

Clicker-Ready Classrooms

August 2015

i>Clicker Base Receiver Units Permanently Installed in Classrooms

To accommodate instructors who require their students to purchase their own i>Clicker student remote devices, i>Clicker base receiver units have been permanently installed a number of Illinois Central College classrooms.

These base receiver units connect to the classroom's podium computer with a USB cable. The base receiver unit works along with the i>Clicker software to collect the votes that students transmit with their i>Clicker student remotes.

Clicker Classrooms and Clicker Sets

In addition to the classrooms that are equipped with the base receiver units, ICC has a number of sets of i>Clicker student remotes. These clicker sets also have their own base units, and can be quickly set up and used at other locations across the college.

Note that the base units are interchangeable. If you happen to be using a clicker set in a classroom that is already equipped with a base receiver unit, you do not have to use the base unit from the clicker set—the one already set up in the classroom will work just fine.

Scheduling Classes in a Clicker-Ready Classroom

If you plan to have your students purchase clickers, **ask your department's scheduler** to request that your course be scheduled in a clicker-ready classroom. "I>Clicker" is an option that is taken into account when the semester's schedule is being created—make sure your scheduler knows to mark that option for your course.

Note: You only need to request a clicker-ready classroom if are requiring your students to **purchase** clickers. If you plan to make use of a clicker set, the set will include it's own base unit. **Clicker sets** can be easily used in any classroom with a podium computer and projector.

Request Additional Clicker-Ready Classrooms

The Teaching and Learning Center co-ordinates the installation of i>Clicker base units into additional classrooms. Please make an effort to have your courses scheduled in an existing clicker classroom first, but if an additional base unit needs to be installed to meet your needs, contact the Teaching and Learning Center to make the arrangements.

Contact the Teaching and Learning Center for more information about using clickers at Illinois Central College: (309) 694-8908 or tlc@icc.edu
