Academic Calendar

Fall 2017
Minimester .................................. Starts July 28
Minimester Ends (3 cr. hr. course) .......... August 11
Celebration of Learning ...................... August 14-18
Minimester Ends (4 cr. hr. course) .......... August 15
Classes Begin .................................. August 21
Labor Day (no classes) ...................... September 4
12-Week Classes Start ....................... September 11
Midterm ..................................... October 13
2nd 8-Week Classes Start ................... October 16
Thanksgiving Break (no classes) .......... November 20-26
Thanksgiving Break - College Closed ...... November 23-26
Last Day Before Finals ...................... December 11
Final Exams .................................. December 12-18
Weekend College* .............................. Aug. 25 - Dec. 10
*meets every weekend, except Nov. 24-26

Spring 2018
Minimester Starts .............................. December 19
College Closed ............................... Dec. 23 - Jan. 1
Minimester Ends ............................... January 9
January Celebration of Learning .......... January 10
Classes Begin ................................ January 16
12-Week Classes Start ....................... February 5
Midterm ..................................... March 9
Spring Break (no classes) ................... March 12-18
2nd 8-Week Classes Start ................... March 19
Last Day Before Finals ...................... May 7
Final Exams ................................ May 8-14
Graduation .................................. May 19
Weekend College* ............................. Jan. 19 - May 13
*meets every weekend, except March 30-April 1

Summer 2018
Minimester Starts .............................. May 15
No classes .................................. May 25
Holiday - College Closed .................. May 28
Minimester Ends (3 cr. hr. course) ........ June 4
Minimester Ends (4 cr. hr. course) ........ June 4
Classes Begin ................................ June 4
Holiday (no classes) ........................ July 4
Last Day Before Finals ...................... July 24
Final Exams .................................. July 25-27

The ICC College Catalog is also available online!
Visit the ICC website to apply,
or for enrollment information/instructions.

History
Illinois Central College first started classes on September 18, 1967, in temporary buildings at its East Peoria location. Situated on over 400 acres of wooded terrain, the East Peoria Campus is now home to the Edwards Library Administration Building, Academic Building, Agricultural and Industrial Technologies Building, Ramsey Gymnasium, Performing Arts Center, the Caterpillar Building, and the Horticulture Land Laboratory.

In 1973, Illinois Central College purchased a downtown site on Southwest Adams Street, which included the Perley and Thomas Buildings. ICC Peoria, located at 5407 N. University Street in Peoria, opened in December 2002. August 2004, student residences opened, offering students an on-campus, apartment-style living option. In 2008, the College developed ICC Pekin at the Riverway Business Park, located at 225 Hanna Drive. ICC Peoria was newly renovated in 2016. The Student Resource Center was completed in 2017 and includes a Student Success Center, Student Activities Office, cafeteria, bookstore, student lounge, and meeting rooms.

Three out of ten graduating high school seniors living in the ICC district choose Illinois Central College. ICC annually awards more than 1,800 degrees and certificates.

Philosophy/Core Values
Founded as a comprehensive community college in 1966 in response to the Illinois Master Plan for Higher Education, Illinois Central College was established to meet the post-secondary needs of the citizens of the District and to supplement the area schools and four-year colleges.

The College was formed on the belief that individuals have worth and dignity in their own right and should be educated to the fullest extent of their abilities and motivation. Education of each citizen creates a better community for all. The College strives to provide quality education appropriate to each individual’s needs within the bounds of fiscal responsibility. Illinois Central College is committed to non-discrimination and equal opportunity regardless of age, race, gender, ethnicity, religion, or physical capability. We believe that by representing the diversity of our district, we enrich the learning experience and create a broader and better understanding of our global community. In support of building this learning environment, we are dedicated to being a leader in recruiting, retaining, and promoting a diverse group of students, faculty, and staff.

The student is the center of all that is done at Illinois Central College. The College strives to provide students the knowledge, skills and understanding for successful and satisfying careers and for intelligent participation in, and preservation of, a free and democratic society. This includes the development of a higher sense of values and the desire for continuous education throughout life. To achieve these purposes, the College encourages excellence in teaching and close communication between instructor and student.

To fulfill its philosophy and mission, the College:
• Provides developmental and foundational level studies for students with academic deficiencies.
• Provides opportunities for students to appreciate and benefit from the diversity of people in a global community.
• Offers continuing education opportunities for students interested in meeting personal goals or updating employment skills and pursuing cultural and leisure interests.
• Cooperates with other educational, business, and governmental entities to address educational needs related to the economic health of the residents of the District.
• Provides special cultural, recreational, and general interest events which enrich the life of the community.

The College is committed to its Core Values: Learning, Community, Integrity, Responsibility, and Excellence.

Vision
Illinois Central College is a comprehensive college committed to a future that “surprises” our students, employees, and community. We do not think that “settling” is enough. We, the people of ICC, are dedicated to becoming an institution that delights our students with relevant and up-to-date classes, exemplary service, and an enriching campus life, all at an affordable cost. We know what it takes for our students to succeed, and we make it happen. Education at ICC leads to successful careers, transfers to baccalaureate programs, and life-long learning experiences to improve our students’ lives and opportunities.

The short version of the vision is: We provide an exceptional educational experience that delights our students and stakeholders.

Mission
The mission of the College is expressed in these sentences:

Through learning, minds change.
We believe by changing minds, we can change the world.

Diversity Pledge
Illinois Central College stands committed to diversity in all of its dimensions. The College embraces, values, and encourages diversity at all levels of its operation. The College stands for tolerance, non-discrimination, and cultural sensitivity.

Inclusion is at the core of Illinois Central College’s educational and service strategies. Respect for diverse individuals will be evident in the College’s interactions with students, employees, and the communities it serves.

Understanding Accreditation
Educational accreditation is a process of external quality review created and used by higher education to scrutinize colleges, universities, and programs for quality assurance and quality improvement. Accreditation in the United States is more than 100 years old, emerging from concerns to protect public health and safety and to serve the public interest.

In the United States, accreditation is carried out by private, nonprofit organizations designed for this specific purpose. External quality review of higher education is a nongovernmental enterprise.
There are two types of educational accreditation: institutional and specialized.

REGIONAL (INSTITUTIONAL) ACCREDITATION
Institutional accreditation is provided by regional and national associations of schools and colleges. There are six regional associations, each named after the region in which it operates (Middle States Commission, New England Association, Higher Leaning Commission, Southern Association, Western Association for Community and Junior Colleges, Western Association for Senior Colleges and Universities). The regional associations are independent of one another, but they cooperate extensively and acknowledge one another’s accreditation. Several national associations focus on particular kinds of institutions (for example, trade and technical colleges, and religious colleges and universities). An institutional accrediting agency evaluates an entire educational organization in terms of its mission and the agency’s standards or criteria. As an institution, Illinois Central College is accredited by the Higher Learning Commission (hlcommission.org).

SPECIALIZED (PROGRAMMATIC) ACCREDITATION
Programmatic accreditors review specific programs, professions and freestanding schools of law, medicine, engineering, etc. Several ICC programs have sought and received specialized (program) accreditation/approval. These include the following.

Accrediting Agencies
• National Automotive Technicians Education Foundation
• Association of Leaders in Equipment Distribution Foundation
• American Bar Association Standing Committee on Paralegals Approval Commission
• National Association of Schools of Music
• National Accrediting Agency for Clinical Laboratory Sciences
• Commission on Dental Accreditation
• Commission on Accreditation of Allied Health Education Programs
• National League for Nursing Accrediting Commission
• Illinois Board of Nursing
• Illinois Department of Public Health
• Accreditation Council for Occupational Therapy Education
• Commission for Accreditation in Physical Therapy Education
• Joint Review Committee on Education in Radiologic Technology
• Commission on Accreditation for Respiratory Care

Equal Opportunity/Affirmative Action
Illinois Central College is accredited by the Higher Learning Commission. It is the policy of this College that no person, on the basis of race, color, religion, gender, national origin, age, disability, sexual orientation, or veteran's status, shall be discriminated against in employment, in educational programs and activities, or in admission. Inquiries and complaints may be addressed to the Vice President of Diversity, International and Adult Education, Illinois Central College, 1 College Drive, East Peoria, Illinois 61635-0001, (309) 694-5561.

Feedback to Illinois Central College
ICC encourages current students to provide input in the form of compliments, suggestions, or complaints. Your feedback needs to be written and can be submitted using the ICC online feedback form found at the bottom of each page of the website. The College wants to hear about the good things that work, things that maybe weren’t so great, and ideas to make ICC better.

We ask that you provide feedback that is respectful, detailed, and timely, and refrain from using profanity, name-calling, or other inappropriate language. Submissions may be made anonymously, but if the submission includes an email, ICC personnel will follow up with the individual with the answer or resolution or for further clarification if needed to resolve the situation.

Section 504 of the Rehabilitation Act of 1973, as Amended, and the Americans with Disabilities Act of 1990 (ADA), as Amended
Illinois Central College shall provide that no otherwise qualified individual with a disability, shall solely by reason of disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity engaged in by the College as required by Section 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disability Act of 1990. Inquiries or complaints may be addressed to Human Resources, Illinois Central College, 1 College Drive, East Peoria, Illinois, 61635, (309) 694-5437.

ICC has an open-door admission policy.

GENERAL ADMISSION
Individuals seeking admission to the College are required to submit an admission form online at icc.edu.

Individuals eligible for admission to the College include:
- Graduates from a state-recognized high school or individuals with a GED (High School Equivalency) certificate.
- Individuals 18 years of age or older and no longer enrolled in high school.
- Transfer students from other colleges and universities who meet one of the above criteria.
- Individuals younger than 18 years of age who have quit attending high school. These students will be evaluated through the use of an assessment program to determine their appropriate English, reading, and math placement levels.
- High school students age 16 and older or who are juniors or seniors who have authorization to participate in college courses and programs. (Early College admission and enrollment is handled through a student’s respective high school. For more information, please see the high school counselor.)

Admission to the College does not guarantee entrance or enrollment into a particular course or program of study. The College reserves the right to establish selective admission procedures and to give preference to residents of Community College District 514. Refer to the section titled Programs with Special Admission Requirements for specific information or students seeking an F-1 student visa should refer to the section titled International Students.

Residency Requirements
Illinois Central College adheres to current residency requirements set forth by the Illinois Community College Board and the State Board of Education. For students under the age of 24, please note that changing your address does not automatically change your residency. Students who are legal residents within District 514 are afforded the current in-district tuition rate. Please refer to the map and the zip code listing to determine your residency status. If your legal residence is within a split district zip code, your residency will be out-of-district at the time you apply to Illinois Central College. Please provide a copy of your most recent property tax bill to Enrollment Services so a final determination can be made for your residency status.

RESIDENCY STATUSES:

In-District Resident: A student that graduated from a high school within District 514 and has legal residency within District 514 at the time of application to Illinois Central College or is a dependent of a person who has legal permanent residence within District 514 at the time of the student's application to ICC will be classified as an In-District student. Students age 24 years or older may also be classified as an In-District student by establishing residency within District 514 regardless of the high school from which the student graduated.

Out-of-District Resident: A student that graduated from a high school outside of District 514 or has legal residency outside of District 514 at the time of application to Illinois Central College will be classified as an out-of-district student. Students dependent upon a person whose permanent residence is outside of District 514 but within the state of Illinois are considered to be out-of-district. However, the out-of-district tuition rate may be adjusted based on the employment status of the student or the individual claiming the student. Please contact Enrollment Services at (309) 694-5606 or stop in Room L211 to discuss your situation.

Out-of-State Resident: A student that graduated from a high school outside the state of Illinois or has legal residency outside the state of Illinois at the time of application to Illinois Central College will be classified as an Out-of-State student. However, the out-of-state tuition rate may be adjusted based on the employment status of the student or the individual claiming the student. Please contact Enrollment Services at (309) 694-5606 or in Room L211 to discuss your situation.

Out-of-Country Resident: A student that is not a legal, permanent resident of the United States as defined by the Immigration and Naturalization Service (INS) will be classified as an out-of-country student. Dependents of foreign employees working full-time within District 514 will be classified as an out-of-country student. However, the out-of-country tuition rate may be adjusted based on the employment status of the individual claiming the student. Please contact Enrollment Services at (309) 694-5606 or stop in Room L211 to discuss your situation.

International Student: A student that has obtained permission from their home country to study at a college or university within the United States will be classified as an international student. These students will hold either an F-1 Visa (for degree seeking students) or an M-1 Visa (for certificate seeking students). Proof of the ability to pay the Out-of-Country tuition rate and all additional fees and costs related to studying in the United States must be provided before a student is accepted as an international student. For more information regarding study opportunities at ICC, please contact the International Education Department at (309) 694-8817 or (309) 694-8947.

If you are an out-of-district or out-of-state student under the age of 24, and would like consideration for In-District residency status, please complete the residency questionnaire and submit the form along with the acceptable supporting documentation as outlined on the form to Enrollment Services in Room L211 on the East Peoria Campus. The addresses that appear on your supporting documentation must match and must be the same as the address on your student record at Illinois Central College. The residency questionnaire can be found online at http://icc.edu/admissions/enrollment/enrollment-forms/.

Illinois Department of Children and Family Services Dependents: Effective 1/1/2017 any student who is (i) currently under legal guardianship of Illinois Department of Children and Family Services, or has recently been emancipated from the department and (ii) has previously met the 30-day residency requirement of the district but had a placement change into a new community college district will be classified as a resident of the district they are currently residing in.

These students will not be required to meet the 30-day residency requirement and will receive in-district tuition. Proof of current in-district residency from the student, caseworker, other personnel of the department, students' attorney, or guardian ad litem appointed under the Juvenile Court Act of 1987 is required. Please contact Enrollment Services at (309) 694-5606 or in Room 211 on the East Peoria Campus to discuss your situation.
A District 514 student can enroll in a program of study not offered by their home community college district.

District 514 students continue to have the option of attending any community college within Illinois if their program of study is not offered by ICC. However, if ICC has entered into a cooperative agreement with a school that offers the selected program of study, ICC will not approve a chargeback agreement request for the student to attend the selected institution. Please refer to the Cooperative Educational Agreements section below for more information.

The chargeback agreement can be found at icc.edu/admissions/enrollment/enrollment-forms.

For more information on the chargeback agreement, please contact ICC Enrollment Services, Room L211 on the East Peoria Campus, or by phone at (309) 694-5606.

Cooperative Educational Agreements

Working cooperatively with various Illinois two-year colleges, Illinois Central College has agreed to participate in the Community College Educational Agreement (Cooperative Agreement). The intent of this agreement is to expand the educational programs that are provided to students within District 514, as well as offering our programs to Illinois students from outside District 514.

The Cooperative Agreement reduces the student’s tuition obligation to the current in-district rate of the receiving institution.

The agreement works in two ways:

1. A District 514 student can enroll in a curriculum (program) that is not offered by Illinois Central College but is offered by their home community college district.

2. A student that resides within the State of Illinois but outside District 514 can enroll at ICC in a program of study that is not offered by their home community college district.

The chargeback and cooperative agreement form can be obtained online at icc.edu/admissions/enrollment/enrollment-forms.

The following Illinois two-year institutions that have signed on to the Community College Educational Agreement are listed below:

Black Hawk College
Carl Sandburg College
College of DuPage
College of Lake County
Danville Community College
Elgin Community College
Heartland Community College
Highland Community College
Illinois Central College
Illinois Eastern Community College
Illinois Valley Community College
John A. Logan College
John Wood Community College
Joliet Junior College
Kankakee Community College
Kaskaskia College
Kishwaukee Community College
Lake Land College
Lewis and Clark Community College
Lincoln Land Community College
McHenry County College
Moraine Valley Community College
Morton College
Oakton Community College
Parkland College
Prairie State College
Rend Lake College
Richland Community College
Rock Valley College
Sauk Valley Community College
Shawnee Community College
South Suburban College
Southeastern Community College
Southwestern Illinois College
Spoon River College
Waubonsee Community College
William Rainey Harper College

Chargebacks

Illinois Central College is a partner within the Illinois Partial Student Support Program. The intent of this agreement is to expand the education programs that are provided to students within District 514 as well as offering ICC programs to Illinois students from outside District 514. The chargeback reduces the student’s tuition obligation to the current in-district rate of the school at which the student will attend.

The agreement works in two ways:

1. A District 514 student can enroll in a program of study not offered by Illinois Central College but is offered by another Illinois community college.

2. A non-District 514 student can enroll at ICC in a curriculum (major) that is not offered by their home community college district.

For more information, please contact ICC Enrollment Services, Room L211 on the East Peoria Campus, or by phone at (309) 694-5606.
Additional institutions may be added on an annual basis. For more information on the Cooperative Agreement, contact Illinois Central College Enrollment Services, Room L211, phone (309) 694-5606.

High School Inter-District Agreements

ICC has agreed to partner with our bordering community colleges to develop the High School Inter-District Agreement.

This agreement works to provide in-district tuition for taxpayers to high school districts within District 514 that educate students from both District 514 and bordering community college districts. The specific high school districts are as follows:

- El Paso-Gridley District #11
- Farmingdon District #265
- Fieldcrest District #6
- Flanagan-Cornell District #74
- Henry-Senachwine District #5
- Illini Bluffs District #327
- Illini Central C.U.S.D. #189
- Midland District #7
- Midwest Central District #191
- Princeville District #326

If you are a taxpayer to any of the above high school districts and are classified as an out-of-district resident at Illinois Central College, please provide a copy of your most recent property tax bill to Enrollment Services, so a final determination can be made for your residency status. If you have any questions, please contact Enrollment Services, Room 211, (309) 694-5606.

Degree Specific Admission Requirements

Illinois Central College maintains an open-door, open-access policy with regard to general admission to the College. Although selected programs have established, and maintained, specific admission requirements, applicants will be admitted to the general programs of the College. Placement tests and academic advise-ment will be utilized to determine the appropriate courses in which students should enroll.

ASSOCIATE IN ARTS DEGREE
ASSOCIATE IN SCIENCE DEGREE
ASSOCIATE IN ENGINEERING SCIENCE DEGREE

All new full-time applicants who intend to enroll in the Associate in Arts Degree program, Associate in Science Degree program, or in the Associate in Engineering Science Degree program (the usual course of study for baccalaureate/transfer students planning to seek a bachelor degree) must submit not only an application but also high school transcripts (or GED scores) and ACT scores.

As a result of minimum standards established by the Illinois Board of Higher Education and Public Act 86-0954, it is recommended that applicants for the Associate in Arts Degree or Associate in Science Degree successfully complete at least 15 units of high school coursework from the following categories:

- 4 years of English, emphasizing written and oral communication and literature
- 3 years of college preparatory mathematics, including introductory through advanced algebra, geometry, or fundamentals of computer programming
- 2 years of social science

- 2 years of laboratory science
- 2 years of one foreign language, fine arts (art, music, theatre, or dance), or vocational education
- 2 years of elective coursework, including coursework in any of the categories above (excluding English)

These course-specific requirements are minimums. Some high school students should include coursework beyond the minimum in fields they may be considering for advanced study in a college or university. For example, students who think they want to pursue a degree in science or mathematics should take additional courses in mathematics and lab science in high school.

For applicants who do not meet one or more of the course-specific requirements above, ACT minimum sub-scores were established to determine whether high school equivalent knowledge and skills have been acquired: 20 for English, 20 for math, 20 for science, and 20 for social studies (on the reading sub-scores).

Students with a deficiency in one of the high-school-course areas may also satisfy the requirement by passing a college-level course in this area with a grade of C or higher, or by passing one of the following Illinois Central College courses:

- English requirement: ENGL 095 or ENGL 099
- Math requirement: MAT 098
- Science requirement: CHEM 094

ASSOCIATE IN APPLIED SCIENCE DEGREE

Requirements for admission to programs vary. For information on the requirements, see the specific program of study in this Catalog or consult with the department dean.

ASSOCIATE IN GENERAL STUDIES DEGREE

An applicant admissible to the College is admissible to this program.

COMMUNITY EDUCATION

Students enrolled only in non-credit courses are assigned to this curriculum.

Programs with Special Requirements

PROGRAM SPECIFIC

Some programs at ICC use special admissions processes. They may require students to have completed certain coursework or meet certain conditions before entering the program. Students who wish to enter the following areas of study must meet with an advisor in that area to assure all requirements for admission have been met.

- All Health Careers programs
- Programs in Health Careers may have differing requirements. For requirements specific to individual programs please see http://icc.edu/academics/catalog/health-careers/steps-to-apply/. Diesel Powered Equipment Technology (DPET) program
- Application deadline dates are December 1 and April 1 to be considered for the following fall semester. Applications received after April 1 will be considered if openings occur prior to the start of the fall semester. Call (309) 694-5582 or (309) 694-5616 to request a DPET packet.
Take the Mechanical Reasoning and other select placement tests. (Required tests may vary depending on the student’s previous coursework and test scores, consult with a program advisor prior to testing.)

Meet with a DPET Advisor. Submit all required documentation by deadline for consideration.

- **Caterpillar Dealer Service Technology Program**
  The application deadline for consideration is February 1st. All applicants to the program after the deadline will be considered for the next academic year.

  To be considered, each candidate must:
  - Complete and return the application materials you’ll receive in the mail and send ICC an official copy of your high school transcript.
  - Send items to: Illinois Central College, ATTN: CAT Dealer Service Technology, 1 College Drive, TT 101, East Peoria, IL 61635-0001
  - Schedule a “Big Look” informational tour of the Caterpillar program and take the Accuplacer Placement Test and the Mechanical Reasoning Test. (We will schedule the test and tour on the same day.)
  - Be accepted for sponsorship by a supporting Caterpillar dealership.

- **General Motors Automotive Service Educational Program (GM ASEP)**
  Application deadline dates are April 1 to be considered for the following fall semester. Applications received after April 1 will be considered if openings occur prior to the start of the fall semester. Call (309) 694-5192 or (309) 694-5616 to request a GM ASEP packet.

  Application deadline is April 1 to be considered for the following fall semester. Applications received after April 1 will be considered if openings occur prior to the start of the fall semester. Call (309) 694-5192 or (309) 694-5616 to request a GM ASEP packet.

  Take the Mechanical Reasoning and other select placement tests. (Required tests may vary depending on the student’s previous coursework and test scores, consult with a program advisor prior to testing.)

  Have a clean driving record.

  Meet with a GM ASEP Advisor. The Advisor will assist in scheduling an interview with a sponsoring GM Dealership or ACDelco Professional Service Center.

**GED Admission**

Admission for the GED program is handled through the Adult Education Office. For further information regarding placement testing, start dates and registration, please call 309-694-5240.

**Academic Placement Testing**

| East Peoria Campus • L220 • (309) 694-5234 |
| ICC Peoria • Arbor Hall, A103 • (309) 690-6990 |
| ICC Pekin • Main Office • (309) 353-5088 |

The College uses placement tests in subjects like math and reading to determine college readiness and to place students in classes at the appropriate level. The Reading Placement Test is required for most college-level courses unless the student has met one of the other placement options. ICC’s Math Placement Test is required for all math courses unless one of the other placement options has been met. Availability of score equivalencies and options will vary by course level.

For specific requirements review “Do I Need a Placement Test” on the ICC Testing Center website at icc.edu/around-campus/testing-center/placement-testing/.

Additional placement tests are available for specific courses or subjects. Direct placement into BIOL 205 is dependent upon successful completion of the Anatomy and Physiology placement test. Other placement tests are available but not required for individuals with background knowledge in Spanish, Music Theory, and Engineering.

Study guides and additional resources can be found on the Testing Center website at icc.edu/around-campus/testing-center/placement-testing/online-resources-and-sample-questions/.

If you require reasonable accommodations for testing, please contact Access Services at (309) 694-5749 to discuss the documentation you will need to submit.

**Testing Center**

| East Peoria Campus • L220 • (309) 694-5234 |
| ICC Peoria • Arbor Hall, A103 • (309) 690-6990 |

The Testing Centers at the East Peoria and Peoria campuses offer a variety of other testing services. If a student misses an exam in the classroom the instructor may have the student take a proctored test in the Testing Center. Credit by examination (CLEP and departmental proficiency exams) are available. Some certification and licensing exams may be available. All testing is by appointment. Visit the Testing Center website at icc.edu/testingcenter for more details about these and other tests, as well as instructions on scheduling appointments.

**Evaluation of Transfer Credit**

Students pursuing a degree or certificate at ICC who are interested in receiving credit from college-level coursework taken from another institution should have their official transcripts sent directly to Illinois Central College as early as possible for evaluation. Once ICC receives an official transcript(s) it is evaluated in the order in which it is received. Information regarding the date the transcript was received is available in the student’s eServices account. Keep in mind that only your credits may transfer, but individual grades will not be factored into your ICC cumulative grade point average. Once completed, a student’s transcript evaluation summary will be available to view in the student’s eServices account.

Transfer of credit may be considered for lower division coursework that has been successfully completed from the following categories of academic institutions:

**Regionally Accredited**: Degree-granting public, private, nonprofit, two- and four-year institutions in the United States conferred by the Higher Learning Commission, and/or parallel accrediting agencies in other regions of the United States

**Non-Regionally Accredited**: Specialized institutions in the United States, including distance learning providers recognized by the Council of Higher Education Accreditation (CHEA) and the U.S. Department of Education
Non-United States Institutions: Institutions that hold accreditation through the home country’s Ministry of Education to award professional degrees, certificates, and licensures. Coursework from non-United States institutions must be evaluated by an approved agency such as World Education Services (WES.org) or Educational Credential Evaluators (ECE.org).

Military/DANTES: Credit achieved through military training or examination may be considered for transfer according to the Guide to the Evaluation of Educational Experiences in the Armed Services by the American Council on Education (ACE).

Additional information on evaluation of transfer credit can be obtained from Enrollment Services, L211, (309) 694-5611.

Credit For Prior Learning

Several methods are available for students to test their knowledge/ prove their learning about a variety of subject matter in which the student feels proficient and thereby earn non-traditional college credit. Credit for prior learning can save a student valuable time needed for other subjects, in addition to being a financial savings. Credit for prior learning can be a jump-start to a college certificate or degree. Examples of credit for prior learning accepted at Illinois Central College are:

- Military credit (see column at right)
- CLEP exams (see Testing Center, page 13)
- Advanced placement exams (see Testing Center, page 13)
- Early College (see page 233)
- Transfer credit (see page 13)
- Departmental proficiency exams (see Testing Center, page 12)

College Credit by Examination

Students may apply a maximum of 30 credit hours towards a degree through College Credit by Examination. Students pursuing a certificate must complete a minimum of 30% of their credits towards their certificate at Illinois Central College.

Credit For Service and Education in the Armed Forces

Illinois Central College recognizes for college credit certain training experience in the U.S. armed forces.

To have military education credits evaluated and posted to Illinois Central College records, official transcripts from The Community College of the Air Force or Joint Services Transcript (JST) must be sent directly to the College. It is the student's responsibility to request the transcript be sent directly to Illinois Central College.

Any other military education for which students wish to receive consideration for credit must be listed on the DD-214. Students must bring a copy of their DD-214 to Enrollment Services. Eligible veterans, as outlined below, may receive six hours of TC credit upon submission and review of their DD-214.

To be consistent with federal guidelines, an “eligible veteran” is defined as one who meets the following criteria:

1. Served on active duty for a period of at least 180 days or;
2. Was released/discharged from active duty because of a service connected disability, or;
3. Served as a member of a reserve component under an order of active duty during a period of war or in a campaign or expedition for which a campaign badge is authorized.

(Reference Public Law 102-127).

To ensure maximum veteran education benefits, please contact the ICC Veterans Affairs at (309) 694-5562 or in Room 305B on the East Peoria Campus.
Enrollment and Academic Advisement

Academic Advisement ....................................................... 16
Underage Student Enrollment ........................................... 16
International Students......................................................... 16
Enrollment Procedure ......................................................... 16
Enrolling in Classes ........................................................... 17
Student Status ................................................................... 17
Maximum Load .................................................................. 17
Withdrawal from Classes ................................................... 17
Cancellation of Classes ....................................................... 18
Veterans ............................................................................. 18
Academic Advisement

Academic Advisement services are available to all students attending Illinois Central College. Advisors assist students in planning the appropriate classes each semester for their program of study. Advisors provide guidance concerning specific program requirements and serve as a source of information regarding general education requirements, College policies and procedures, and transferring to a college or university.

Students in a specific curriculum are assigned to either a departmental or faculty advisor in that area. Undecided students are assigned to the Advisement and Counseling Services Office for advisement and are assisted by counselors who are trained to help them with their academic planning and career exploration.

All full-time students are required to obtain academic advisement and must have an advisor's approval each semester to enroll in twelve or more credit hours. Part-time students are strongly encouraged to seek advisement each semester before enrolling. The student is responsible for scheduling an appointment with his/her advisor. Students can obtain their advisor's name and contact information from eServices, departmental offices, or the Advisement and Counseling Services Office, CC200.

Underage Student Enrollment

Students under the age of 16 who wish to enroll in any courses must petition the Dean of Student Success. Students will be asked to complete the appeal form, to have completed any assessment testing or provide results of ACT/ SAT tests, to provide a transcript including all completed coursework from the current school, and to provide additional information as indicated on the form. Once the documentation is provided, an appointment can be made by calling the Dean of Student Success at (309) 694-8568. It is recommended that the petition be made a minimum of 2 weeks prior to the course start date.

PROCESS:

The paperwork and initial meeting with the Dean of Student Success will serve as an evaluation of the proposed coursework, as well as the academic and emotional preparedness of the student for college-level coursework. The dean will confer with the appropriate faculty member and dean prior to the face-to-face meeting with the student to determine the academic preparedness needed and any potential challenges or exceptional characteristics of the course that may be relevant to the decision. The faculty member and dean have the ability to deny entrance into a class. If the faculty staffing for a class changes, the course enrollment will be reviewed with the new faculty member. Students will not be permitted to enroll in developmental coursework unless there are extenuating circumstances that require this enrollment.

The dean will use the feedback and recommendation of the faculty member and dean in determining student eligibility for an individual course in conjunction with the face-to-face meeting. The face-to-face meeting will discuss issues including course content, course modality, academic rigor, FERPA, safety and legal issues, and other important aspects regarding underage enrollment. Students must also provide a letter from the school principal or other designated official that indicates their recommendation or support of the student for college-level coursework. If the enrollment is approved by all parties involved, the student will be allowed to enroll in the course.

DUAL-ENROLLMENT

The student must be enrolled on a full-time basis at a district elementary or secondary institution or be officially enrolled in a home education program.

The student must be at least 16 years old to enroll at ICC on a part-time basis in up to seven (7) credit hours. Part-time enrollment at ICC for students who are at least 16 years old can supplement a high school curriculum.

International Students

International students on F1 visas are required to contact the International Education Program Director, (309) 694-8817, or the International Education Coordinator, (309) 694-5553. International students must read and write English, understand English when spoken, and speak easily understandable English. All F1 international students must take a TOEFL, IELTS, or CET4 (China) exam to assess their English abilities. ICC offers assistance with English language learning for students with low TOEFL scores. All International students will also be required to take placement tests.

International F1 students are required to enroll in a minimum of 12 credit hours each semester, except summer. Students on dependent visas are not required to enroll full time. The International Education Office will issue the I-20 form only after all documents have been submitted and the application has been accepted.

Enrollment Procedure

New students enrolling at ICC need to complete the following:

1. Fill out an admission form, available online (icc.edu)
2. Send all high school and college/university transcripts and ACT/SAT scores. All transcripts and test scores need to be official copies sent directly to ICC from the institution.
3. Take the academic placement tests. You can schedule a testing appointment online (icc.edu/testingcenter). Note: If you have completed appropriate college-level coursework and/or taken the ACT/SAT exam, you may not need to take a placement test. See Prerequisite Requirements for IAI General Education Course for details. Contact Enrollment Services if you have questions.
4. Apply for Financial Assistance. Fill out your Free Application for Federal Student Aid (FAFSA) online (fafsa.ed.gov). You must enter ICC's school code #006753 for your information to be processed by ICC. If you have any questions, please contact the financial assistance office at (309) 694-5311 or email financialaid@icc.edu.
5. Apply for an ICC scholarship. Fill out an online application between January 15 and April 1 for the upcoming fall semester. The application can be found at icc.edu/scholarships
6. Make an appointment to meet with your academic advisor. Your academic advisor's name and contact information is listed within your welcome email and letter that you received upon completing your admission form as well as in your eServices account. The general advising department (for undecided programs of study) can be reached at (309) 694-5281.
7. Enroll in classes you have selected with your academic advisor. You can enroll online through your eServices account or at an Enrollment Services office on any campus.
8. Make financial arrangements for your tuition. Tuition payments should be on time and can be made in person by cash, check or credit card. You may also use your ICC eServices account to pay tuition online or to set up a payment plan. The due date for your tuition can be found in your eServices account. ICC no longer sends paper bills to students through the mail. You will
be notified through your ICC student email anytime there is a change in your account. For more information on how to access your ICC student email, please visit icc.edu, select eServices, and then select “email basics”.

9. Attend New Student Orientation. To reserve a seat on your date of choice, go to (icc.edu/students/new-student-orientation) or call (309) 694-5560.

All enrollment materials should be sent to:
Illinois Central College
Enrollment Services, L211
1 College Drive, East Peoria, IL 61635-0001

Enrolling in Classes Schedules are online at icc.edu

The class schedule lists day, time, and location of classes, and dates and times for registration. The Summer/Advanced Fall Class Schedule is generally available the preceding March; the Spring Class Schedule, the preceding October; and the Fall Class Schedule in July.

Before enrolling for classes, FULL-TIME STUDENTS MUST MEET WITH THEIR ACADEMIC ADVISOR to plan a specific course schedule meeting Illinois Central College requirements, personal needs, and, if appropriate, four-year institution transfer requirements. The required approval will be obtained from the advisor at this time. PART-TIME STUDENTS are encouraged to meet with an academic advisor or counselor to receive full benefit of their continuing education. ALL OUTSTANDING FINANCIAL OBLIGATIONS MUST BE PAID BEFORE ENROLLING.

Instructions and enrollment options/dates are provided in the class schedule.

Student Status

FULL-TIME STUDENT

Students enrolled for 12 or more credit hours are classified as full time. These students are entitled to and encouraged to use all the academic support systems and College facilities available. Students enrolled in six or more credit hours during the summer session are classified as full time for academic purposes but part time for financial aid purposes.

PART-TIME STUDENT

Students enrolled for eleven or fewer credit hours are classified as part time. These students are entitled to and encouraged to use all the academic support systems and College facilities available to full-time students. Students enrolled for five or fewer credit hours during a summer session are classified as part time.

Maximum Load

The recommended maximum load for a student during an academic semester is 16 credit hours, unless the program of study requires a number of hours in excess of 16. The recommended maximum load for summer is 9 credit hours. Prior to enrolling for more than 18 credit hours during a semester (or for more than nine credit hours during the regular summer session) permission MUST be obtained from the dean/associate dean in the student's curriculum area. Students with less than a "B" (3.0) grade average are discouraged from attempting more than 18 credit hours. Students on academic caution, academic pre-suspension, or re-admitted suspended students, and students in certain programs may be limited to a lesser number of hours. Since study time of two hours is normally required for each lecture hour of class, students carrying a full-time course schedule should be employed no more than 10 to 15 hours per week. In most cases, employment in excess of 15 hours per week should be accompanied by corresponding reduction of course schedule.

Withdrawal from Classes

When necessary to withdraw from a class or classes, you may do so at anytime until 75% of the class has elapsed.

Withdrawals are accepted online, by mail, fax, or in person at the East Peoria Campus (L211); ICC Peoria, Arbor Hall; or ICC Pekin. You cannot withdraw from a class via phone.

If you experience problems when trying to withdraw online, you must contact the ICC Help Desk within 24 hours of your attempt so that we may research the problem. Call the ICC Help Desk at (309) 694-5457 or email enroll@icc.edu. If you do not make this contact, your situation will be handled in accordance with the current ICC enrollment policies.

Students may withdraw from a class until the withdrawal date listed on their class schedule. All students are financially responsible for tuition and fees for classes that they enroll into during a semester. However, if the withdrawal occurs on or before the refund date listed on the class schedule, the student may be entitled to a refund of tuition.

Students who are given a failing grade on an assignment for Academic Misconduct will not be allowed to withdraw from that course without instructor permission. Students who are given a failing grade in the course for Academic Misconduct will not be allowed to withdraw from the course. Illinois Central College reserves the right to reinstate any individuals who are withdrawn in these situations.

MAILED OR FACED WITHDRAWALS

The envelope or fax must bear a postmark prior to or on the withdrawal (or refund) date published for the course in the class schedule.

Mailed or faxed withdrawals received during the weekend that bear the appropriate date on the envelope or fax receipt will be processed the following business day. If you have any questions, please contact Enrollment Services for verification. We strongly encourage you to contact Enrollment Services to verify the transaction was processed in our system.

LATE WITHDRAWALS

Withdrawals after the end date listed in the class schedule will be considered late. For more information on the process see “Request for Late Withdrawal Grades,” in the Student Handbook.

WITHDRAWAL FOR NON-ATTENDANCE

Students who are identified as a non-attender by their instructor will be withdrawn from the class at midterm. Students recorded as non-attenders will be notified by mail that they have been administratively withdrawn from the class without refund of tuition. Instructors have individual and often varying policies regarding non-attendance withdrawals. Do not assume you will be withdrawn if you never attend or stop attending a class.

If space is available, and if approval from department and instructor are obtained, then students may re-enroll in a class from which they have been withdrawn.
Non-attendance without an official withdrawal constitutes a failing or unsatisfactory grade.

Students are financially responsible for tuition and fees for all classes not officially dropped by the appropriate refund date.

**Cancellation of Classes**

The College reserves the right to cancel class sections due to insufficient enrollment. Students registered in canceled classes should arrange to enroll in another class or receive a refund.

**Veterans**

**East Peoria Campus • 304B • (309) 694-5562**

Illinois Central College will assist veterans and eligible dependents of veterans navigate the college enrollment process and complete the proper forms required for monthly education benefits and will serve as a liaison between the student and the US Department of Veteran Affairs. Certification requests must be submitted by the veteran or their eligible dependent(s) each semester to the ICC Veterans Affairs office to ensure timely and proper enrollment certification through the US Department of Veteran Affairs.

Requirements for Chapters 30, 31, 33, 35, 1606 and 1607 are as follows:

- Copy of DD-214 member 4 or DD-2384 (Notice of Basic Eligibility)
- Transcript of any previous college course work from each institution previously attended (if applicable)
- Certificate of Eligibility from the Department of Veteran Affairs for the eligible education benefit

The ICC Veterans Affairs Coordinator is available to answer questions about Veteran benefits and to monitor student degree plans and academic progress.

ICC also accepts the Illinois National Guard, Illinois Veterans and Illinois MIA/POW grants. A request to use these benefits must be submitted by the veteran each semester to the ICC Veterans Affairs office to ensure tuition is paid. For eligibility questions, please contact the ICC Veterans Affairs office at (309) 694-5562.

The law requires that educational assistance benefits to veterans and eligible dependents be discontinued when the student ceases to maintain the Satisfactory Academic Progress standards set forth by the educational institution. At ICC, students receiving state and/or federal veteran education benefits must maintain a 2.0 cumulative GPA and must maintain a 67% cumulative course completion rate to maintain eligibility for education benefits. The exact rules for satisfactory academic progress may be obtained at icc.edu/students/financial-aid/eligibility.

The Department of Veterans Affairs requires military education to be evaluated, credited, and posted to Illinois Central College records. Official transcripts from The Community College of the Air Force or the Army (AARTS) must be sent directly to the College from the appropriate institution. Joint Services transcripts can be obtained at https://jst.doded.mil/smart/signin.do, or a student can submit a DD214 for military credit.

To ensure maximum veteran education benefit, please contact the ICC Veterans Affairs Office.

**WITHDRAWAL DUE TO CALL TO ACTIVE DUTY**

In accordance with Illinois Statute (330 ILCS 60/5.2), students who are called to active military service have the right to receive a refund of tuition and fees applicable to their registration when called to duty for a period of 7 or more consecutive days. Withdrawal from the course will not impact the grade point average of the service member. Please provide a copy of your orders to the ICC Veterans Affairs Coordinator once orders have been received that may impact your semester classes.

Commencement Ceremony .................................................... 21
Student Rights and Responsibilities

Information about Student Rights and Responsibilities can be found in the Student Handbook. Students are responsible for reading the Rights and Responsibilities, as well as reading and abiding by the Student Code of Conduct. Print copies are available in the Dean of Students Office and online at icc.edu/student-services.

STUDENT RIGHT TO PRIVACY & ACCESS TO RECORDS

According to the Family Education Rights and Privacy Act (FERPA) of 1974, students have the right to (1) inspect and review their educational records to ensure that they are not inaccurate, misleading, or otherwise in violation of the student's privacy or other rights; (2) restrict disclosure of information to other individuals or entities; (4) file a complaint with the Family Educational Rights and Privacy Act Office if the College fails to comply with the requirements of the Act.

Directory Information

The College considers the following directory information: (1) student’s full name; (2) address; (3) ICC email address; (4) affirmation of student enrollment status (full/part-time) and class level; (5) dates of attendance, graduation, intended program of study, degree(s), certificate(s) earned, and honors received; and (6) pertinent information relating to participation in officially recognized activities and sports.

The College will only disclose directory information to individuals or entities with legitimate educational interests and in compliance with the Solomon Act. Educational records, student schedules, grades, and other academic information (including drop-out lists) will not be released to parents, guardians, employers or other individuals without written consent of the student. All requests from internal and external entities for the use or release of directory information lists must be reviewed and approved by the Vice President of Student Services in consultation with other offices as necessary.

Students have the right to restrict disclosure of directory information. Contact the Enrollment Services Office (309) 694-5610 for the appropriate paperwork. All paperwork must be submitted in person with a photo ID.

Educational Records

Educational records are all records that contain information directly related to a student and are maintained by an educational agency or institution, or by a party acting on its behalf. A record means any information recorded in any way, including handwriting, print, tape, film, microfilm, microfiche, and digital images.

Educational records may include semester grades, GPA, tuition and fee information, financial aid information, birthdate, disciplinary actions, and other personally identifiable information (PII.).

Additional resources

For a full description of exclusions to this law, as well as more complete definitions of the terms in this section, students can contact the Vice President of Student Services, the Enrollment Services Office at the East Peoria and Peoria campuses, or go online to icc.edu/student-services.

A more complete guide to FERPA for students, including references to statutes and additional clarifications:
2.ed.gov/policy/gen/guid/fpco/ferpa/students.html

Program of Study Changes

Students sometimes change educational or career goals before completing the program in which they originally enrolled. When students consider such a change, they should discuss it with their academic advisor. When the change is deemed necessary, students must complete a Change of Program form and submit it to Enrollment Services L211 or the Dean of Student’s office L221. Selective admission programs must approve the change before the program change will be processed.

Transcript Requests

East Peoria Campus • L211 • (309) 694-5503

ICC Peoria • Arbor Hall • (309) 690-6870

Official transcripts of credit earned at Illinois Central College can be requested by current and former students, and can be sent to another individual, business, or school.

Official transcripts can be requested online through your eServices account. Once you login to your eServices account, select “Main Menu” and then “Self Service”. You will then select “Academic Records” and “Secure Transcript”. This will take you to our secure ordering site to complete your transcript order. There is no cost for a transcript sent electronically or by standard mail.

In situations where a transcript is necessary for immediate use, one may be provided within an hour for a $10 per copy fee. This service is available 8:30 am-3:00 pm Monday through Friday at Enrollment Services, L211, East Peoria Campus only.

The College will not forward the original copy nor a copy of any transcript received by the College from another institution or agency to the student or a third party/institution. Transcripts, test scores, etc., must be requested by the student directly from the originating institution or agency.

Unofficial copies of transcripts can be obtained through your eServices account; however, unofficial copies are not generally accepted by other institutions. A student’s official transcript will be withheld if the student has not met all financial obligations to the College.

D.E.T.A.I.L.S.* Student Development Transcript

The Student Development transcript is designed as an official document to accompany resumes or scholarship applications and to supplement the academic transcript. It is a self-reported record, with verification by an advisor or supervisor, of a student’s co-curricular activities, service, leadership development, honors, or awards while at Illinois Central College.

To participate in the Student Development Transcript Program, contact the Student Life Office, 305B, phone (309) 694-5201.

*Development of Excellence Through Activities and Involvement in Leadership and Service
CELEBRATE YOUR SUCCESS BY PARTICIPATING IN ICC’S Commencement Ceremony

If you have met the requirements necessary for a degree/certificate in your program of study, you will receive a postcard regarding participating in commencement. This postcard will provide you with instructions on registering to walk in the commencement ceremony and ordering your cap and gown. Go online to icc.edu/students/im-graduating for more information.

ICC holds only one commencement ceremony. Participation in the May commencement ceremony is optional. Students completing their program of study the previous December are encouraged to participate in the May ceremony. Students who choose not to participate in the commencement ceremony but wish to purchase a tassel, can do so at Enrollment Services on the East Peoria Campus.

Participation in the commencement ceremony does not automatically assure a student of having earned a degree or certificate. Final grades and graduation certification are verified as soon as possible following the ceremony. Diplomas will be mailed to the student approximately six (6) weeks after all final grades are posted.

After your application is processed, you will receive an Official Degree Review sent to your ICC email account. This form will list any course requirements that must be met before you can receive a degree/certificate from Illinois Central College.

There is NO APPLICATION FEE for graduation.

Applications for Degree/Certificate are accepted up to 1 month after the deadline date but the student will be assessed a late fee of $25.

* Applications cover two terms beyond the semester during which you submit the application, even if you apply a semester or two before you plan to complete your program of study.

Tuition Due Dates

Tuition is due according to dates published in the current Class Schedule. Due dates for each semester can also be viewed at icc.edu/admissions/paying-for-college/tuition-due-dates. Financial arrangements must be made by the due date to ensure you remain enrolled in your classes. District chargebacks, inter-district cooperative agreements or agency authorizations must be received by the tuition due date to ensure your account balance is adjusted or you will be responsible for the full tuition amount due by the due date. These authorizations may be submitted to Enrollment Services, Room L210, on the East Peoria Campus. Illinois Central College reserves the right to change tuition without notice.

PAY IN FULL

You can pay your tuition in full by cash, check, credit card or electronic bank transfer (E-check).

Electronic bank transfers (E-checks) are accepted online ONLY. PLEASE NOTE: If you mail your payment, it must arrive by the due date to ensure you remain enrolled in your classes. If payment is not received by the due date, you may be dropped from your classes and will have to re-enroll.

ONLINE PAYMENT PLANS

ICC offers several ways to pay your College bill, based on when you enroll in your classes. All online payment transactions are set up using your eServices account. For more information on how to make online payments and set up a payment plan, visit icc.edu/admissions/paying-for-college. To set up a payment plan, you must have at least one (1) credit hour of tuition charges due on your account. The online credit card or electronic bank transfer payment allows you to make immediate payment through your eServices account. The free payment plans offered by ICC create regular automatic electronic payments. A down payment is due on all payment plans, but the due date for the down payment varies depending on the plan selection. The earlier you enroll in classes and in a payment plan, the longer you have to pay and the smaller your monthly payments will be for the semester. You may submit your payment one of two ways: 1) Electronic bank transfer – payment(s) automatically deducted from either your checking or savings account if it is an ACH transferable account. – OR – 2) Credit Card Option – automatic payment(s) will be charged to a Visa, MasterCard, or Discover card. (PLEASE NOTE: You can only pay for ICC credit and non-credit charges. Charges for PDI, Continuing Education, and College for Kids cannot be paid using this service.) A $10 late fee will be charged for each installment payment that cannot be successfully processed on the due date of the installment.

For more information on tuition payment options, please contact or visit Enrollment Services, Room L211, on the East Peoria Campus or call (309) 694-5600.

Tuition and Financial Aid Refunds

To ensure timely and accurate delivery of your refund monies, ICC offers eRefund services to students. To take advantage of this service, you must set up an eRefund account through your eServices account. Select the eRefund Account Setup link. You can find detailed instructions on setting up this account at icc.edu/admissions/paying-for-college. It is the policy of ICC to deduct from a student’s refund any outstanding obligation when the refund is processed. Obligations include, but are not limited to, tuition, NSL checks, institutional emergency loans, traffic fines, library fines, etc. By law, ICC is allowed to use financial aid refund dollars to pay any outstanding obligation for tuition and fees for a prior term within the same academic year but only $200 can be used to pay an obligation from a previous academic year. It is the student’s responsibility to ensure any remaining balance is paid in full or future services (registration, transcripts, etc.) will be withheld from the student. Financial aid refund checks not cashed within 60 days will be cancelled and the funds will be returned back to the Federal Student Aid program.

All authorized refunds, including those for canceled classes, will be processed approximately the fourth week of classes.
IRS Form 1098-T

As a college student, you (or your parents or guardians) may be eligible for a tax credit for tuition expenses. To assist you, ICC provides the IRS Form 1098-T to students and reports qualified tuition and fees that were billed during the calendar year. In general, qualified tuition and fees are considered to be billed when you enroll in the classes. It is the student’s responsibility to ensure ICC has the correct Social Security Number of Taxpayer Identification Number (TIN) on record for tax reporting purposes. If you would like to receive the Form 1098-T with your TIN information, you are required to submit an IRS Form W-9S informing ICC of your TIN for reporting purposes. Please visit irs.gov to obtain the PDF version of IRS Form W-9S. This form must be submitted to Enrollment Services, Room, L211, on the East Peoria Campus.

To make sure you always have access to this form (for current year and previous years), ICC encourages you to sign up to receive this form through your eServices account. The electronic version assures you that you will be able to access your form as soon as it’s available. For more information and instructions to sign up for the electronic form, please visit icc.edu and select “Sign up for electronic 1098-T form.”

Please check with the IRS or your tax preparer for additional information on tax credits. ICC does not provide tax advice regarding tuition tax credits.

<th>Dropping Classes/Refunds</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICC will drop all tuition charges or give 100% refunds of tuition for any decrease in credit hours including complete withdrawal from the College if you officially withdraw online or in person prior to the refund date(s) for the course(s). Refund dates vary and are listed for each course on the student's class schedule. The ICC class schedule can be viewed at icc.edu/classschedule. For more information and instructions on how to officially withdraw from a course, refer to the “Withdrawal from Classes” section found on page 17. Other attempts to withdraw are not considered official and will not be honored for a refund. A student will be held financially responsible for tuition and fees for all classes not officially dropped by the refund date. In the event the College cancels a class, a total refund of tuition and fees related to the class will be made if the student does not change to another class.</td>

Illinois Central College is committed to the philosophy that all individuals who need, want, and are able to benefit from higher education should be provided the opportunity to realize their aspirations and goals. Illinois Central College offers a variety of financial aid to students who may encounter difficulty in meeting financial obligations while pursuing their education. Major types of aid include the Federal Pell Grant, State of Illinois Monetary Award Program (MAP), Federal Direct Loan Program, Federal Work Study Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), and scholarships.

To apply and to be considered for financial aid you must:

- Complete the ICC Admissions Application. The application can be completed by visiting icc.edu/admissions and select, “Apply Now”.
- Submit the Free Application for Federal Student Aid (FAFSA). You must enter ICC's school code #006753 for your information to be processed by ICC. The FAFSA can be submitted electronically with the government at fafsa.ed.gov. The ICC Financial Assistance staff is able to provide assistance with completing the FAFSA. Please visit the Financial Assistance Office, Room L209, or call (309) 694-5311 or email financialaid@icc.edu for assistance.
- Have enrolled or have been accepted to enroll in a program of study requiring 16 credit hours or more.
- Are in compliance with the Satisfactory Academic Progress Standards (SAP) prior to and following receipt of financial aid. All students applying for aid must meet GPA (cumulative 2.0) and completion rate (cumulative 67%) requirements. In addition, the student must not have attempted the maximum hours allowed for the program. In general, this requirement is 1.5 times the number of hours required to complete the program. Students not meeting SAP standards will be notified in writing through their student email account. Students may be reinstated for financial aid once they meet SAP requirements. Students may appeal their loss of aid eligibility if extenuating circumstances exist. For a detailed explanation of SAP, please visit icc.edu/students/financial-aid/ eligibility. PLEASE NOTE: By law, all coursework on a student's transcript must be reviewed for purposes of determining SAP, even if previous hours attempted were not paid by Federal Student Aid.

</tbody>
</table>

East Peoria Campus • L209 • (309) 694-5311
financialaid@icc.edu
• If additional information is requested by ICC, you will receive the request through your ICC student email account. All requested documentation, must be received as soon as possible. Your FAFSA will not be processed until all documentation is received.

• If you are requesting student loans, you must submit all paperwork required. Visit icc.edu/students/financial-aid/types-of-financial-aid-available for a list of documents required for the loan application.

Students are encouraged to complete the FAFSA form as soon as possible after October 1 of each year. Applications are accepted throughout the year. However, completed applications received by June 1 of each year are given priority status when determining eligibility for limited funded grants such as FSEOG and Federal Work Study.

RETURN OF FINANCIAL AID FUNDS

Financial aid funds are awarded to a student under the assumption that the student will attend school for the entire period for which the financial aid is awarded. Students should understand that changing their class schedule anytime during the semester may alter the amount of financial aid they are eligible to receive.

If a student falls below 6 credit hours and has a student loan, the student may no longer be eligible to receive the loan.

If a student withdraws from all classes, the student may not have earned all of the aid they were awarded. A Return to Title IV calculation must be done to determine the amount of earned and unearned aid the student has for the semester. If it is calculated that a student was disbursed more funds than were earned, the unearned funds must be returned back to the Federal Student Aid programs.

If it is found that the student owes part of all of their financial aid back to the U.S. Department of Education, ICC will return the funds and the student will owe ICC. This balance must be paid before future enrollments are allowed. The student will be notified of any Return to Title IV obligations.

FINANCIAL AID OVERPAYMENT

A financial aid overpayment occurs when a student has been disbursed more aid than they are eligible to receive. This typically happens when a student changes their enrollment level by dropping classes before the refund date listed on their class schedule AFTER they have already been disbursed their financial aid.

If an overpayment situation occurs, the student will be notified alerting them to the situation and steps to be taken to resolve the situation. If the overpayment is not resolved, and the Title IV funds are not repaid by the student, the institution will transfer the overpayment to the U.S. Department of Education. Owing an overpayment of a federal grant or loan will prevent the student from qualifying for future financial aid at an academic institution.

PURCHASING TEXTBOOKS WITH FINANCIAL AID

Eligible enrolled students, whose grant, loan and/or scholarship funds exceed the outstanding charges on their student account, may be eligible to use a bookstore charge to purchase books and supplies against their pending financial aid. These charges are automatically set up for Pell eligible, and loan eligible, students to use at the bookstore two weeks prior to the start of the semester for fall and spring semesters. Bookstore charges close the third Wednesday of the fall and spring semester. All charges made by the student will be posted to their ICC student account and will remain as an outstanding balance owed until the financial aid funds are received by ICC.

Books and supplies required for classes must be purchased before any other bookstore items such as electronics and clothing can be purchased.

It is important that you have finalized your enrollment and have submitted all requested financial aid documents to ensure an accurate bookstore charge is set up in a timely manner for your use in the bookstore. If you do not have all requested items submitted to the financial aid office, you will not be eligible for a bookstore charge.

PELL GRANT LIFETIME ELIGIBILITY LIMITS

A student’s maximum duration of Pell grant eligibility is six full year academic awards. For term based schools, such as ICC, this is equal to twelve semesters of payment at full time enrollment in each of those semesters. For example, if a student is enrolled full time for the semester and receives the Pell grant at full-time status, the student is using 50% of an academic year award. However, if the same student is enrolled at a half-time status for the semester, the student is only using 25% of an academic year award. If a student is close to reaching the lifetime eligibility limit and has applied for financial aid the student will be notified by the U.S. Department of Education.

STUDENT LOAN INFORMATION

Students must be enrolled in an eligible program leading to a certificate or degree and be registered for at least six eligible credit hours to borrow a Federal Direct Loan for any semester of attendance. Students in default on student loans are not eligible for student loans or any financial aid in the future until the default is resolved.

Loans will be certified for the amount requested or for the amount you are eligible, if less than the requested amount. If you are enrolled in less than 12 credit hours, your cost of attendance is adjusted to reflect the actual number of credit hours enrolled and your loan award will be recalculated. Any change in enrollment status after your loan is certified by ICC may require additional
recalculation and revision of your original loan amount. If you submit a loan application prior to the tuition due date and you are determined eligible for the loan, you will be held in your classes.

Loan disbursements are completed in two payments during the loan period. If the student has requested a two semester loan (i.e. fall and spring loan), the student will receive one disbursement in each of the semesters. If the student has requested a one semester loan (i.e. fall only loan), the student will receive two disbursements in the semester. The second half of the disbursement is processed the week after midterm break. If the student's enrollment level changes prior to the second disbursement, the loan amount may change. Per federal regulation, disbursements for first time loan borrowers are not processed until 30 days after the start of the semester (approximately the 5th week of the academic semester).

**Situations that may delay or cancel your student loan:**

- Enrollment in second 8-week classes may delay your loan disbursement until all classes start.
- Change in your enrollment status may require a recalculation of your loan eligibility.
- If your enrollment drops below six credit hours, any loan funds that have not been disbursed will be cancelled.

**STUDENT LOAN DEFAULT**

Student loan default, or not repaying your student loan debt, carries serious consequences. When taking out a student loan, you want to exhaust all other possible funding methods and borrow conservatively. Student that do not repay their student loans become ineligible for any financial aid and loans in the future. Defaulted loans can prevent students from renewing professional licenses. The federal government can collect on defaulted loans by confiscating federal tax refunds and garnishing wages. It is the student's responsibility to always stay in contact with the loan servicer to stay current with address and enrollment information to help avoid default.

If you and your loan servicer disagree about the balance or status of your student loan and you have done everything you can to resolve the issue, you can contact the Federal Student Aid Ombudsman Group. They can help you find some resolution to the matter.

Please use the following information to contact the FSA Student Loan Ombudsman Group:

- **Online assistance:** studentaid.gov
- **Telephone:** (877) 557-2575
- **Fax:** (202) 275-0549
- **Mail:** U.S. Department of Education
  FSA Ombudsman Group
  830 First Street, N.E., Mail Stop 5144
  Washington, D.C. 20202-5144

**DIRECT PLUS LOANS**

Parents of dependent undergraduate students may borrow this loan on the student's behalf. Students must be enrolled at least half-time (6 credit hours) at ICC. Financial need is not required, but the loan is limited to the school's cost of attendance, which varies depending on the number of credit hours enrolled, minus other aid the student is receiving. FAFSA filing is required and parents must not have an adverse credit history.

Direct PLUS loan repayment begins on the date the loan is fully disbursed. Payments may be deferred while the dependent student is enrolled at least half-time. A parent borrower who is also a student may defer repayment while he or she is enrolled at least half-time. Deferments must be requested by contacting the agency that services the loan.

Parents may apply for a PLUS loan after the student receives a financial aid award letter from ICC. The PLUS loan application and instructions are located at icc.edu/students/financial-aid/forms.

**SUBSIDIZED LOAN LIMIT**

Effective July 1, 2013, first time borrowers lose eligibility for additional subsidized loans when the student has received subsidized loans for 150% of their current academic program. In addition, students that continue enrollment beyond 150% of their published program length will lose the interest subsidy on prior subsidized loans received that have an outstanding or unpaid balance. First time borrowers are defined as students that have never received a student loan or students that have paid previously borrowed loans in full and are borrowing after July 1, 2013. Generally, the 150% is measured in time, not dollars, based on the published length of the program. Students who lose eligibility for subsidized loans are still eligible for unsubsidized loans.

**Scholarships**

Scholarships are offered through the Illinois Central College Educational Foundation, a nonprofit, tax-exempt organization established to support the College. The mission of the Illinois Central College Educational Foundation is two-fold:

- To assure access to higher education for our community – the Educational Foundation Scholarship Program seeks to ensure cost is not a barrier for individuals who seek a college education. Information about Foundation scholarships is available through the Financial Assistance Office, L209, or on the web at icc.edu/admissions/scholarships. Students can apply for scholarships via the website from January 15 through April 1 for the upcoming fall semester.

- To enhance the quality of education offered by ICC – the Educational Foundation enhances the quality of instruction at ICC by funding faculty/staff development, technology and equipment, and special projects of the college.

The Foundation accomplishes its mission by securing charitable contributions, forming partnerships with business and industry, and pursuing grant funding.

**Special Academic Services**

Financial assistance to purchase required books and supplies is available to qualified applied science and certificate students. Special Academic Services also provides financial support to students enrolled in applied science programs that lead to a nontraditional career. Nontraditional careers are defined as occupations in which individuals from one gender comprise less than 25% of all the individuals employed in that occupation. Academic support services include study skills assistance, schedule planning, and tutoring for specific health programs at ICC.

Catalog of Record

For any degree or certificate, students have five (5) years from the date they declare a program of study to complete the program requirements outlined in that specific catalog. Should appreciable changes to the degree or certificate requirements occur, students will need to meet the degree or certificate requirements in the current catalog at time of application for graduation. Students who have not met the degree or certificate requirements within five years will need to meet the requirements in effect at that time of application for graduation. A student who has not been enrolled for three consecutive semesters, excluding summer, must meet the catalog requirements in effect upon re-entry. Illinois Central College will consider granting permission to a graduate under a catalog more than five years old if the student has been enrolled continuously and the degree or certificate requirements have not changed appreciably. Requests for this exception should be directed to the dean/associate dean of the department for approval.

Credit Hour

Illinois Central College defines a credit hour as an amount of work represented in goals or intended learning outcomes, and verified by evidence of student achievement, that reasonably approximates not less than 50 minutes of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately 16 weeks for each credit hour earned.

Multiple Associate Degrees/Certificates

Although a student may earn multiple Associate in Applied Science degrees and/or Certificates, he/she may earn only one of each of the following degrees:
• Associate in Arts (AA)
• Associate in Science (AS)
• Associate in Engineering Science (AES)
• Associate in General Studies (AGS)

A student may not earn:

An Associate in Arts (AA) degree after earning an Associate in Arts and Science degree (offered at ICC prior to 2010); or
An Associate in General Studies (AGS) degree after earning any other degree.

Educational Rights and Responsibilities

Students have the same rights accorded all citizens, including the right to free, open, and responsible discussion and inquiry, and the right to a quality education in a program of study provided by competent instructors. It is the right of each student at Illinois Central College to:
• study any controversial issue with political, economic, or social significance and concern
• have free access to all relevant information, including materials which circulate freely in the community
• study under competent instructors in a healthy, responsive atmosphere free of bias and prejudice
• form and express personal opinions on controversial issues without jeopardizing their relationship with instructors or the College
• be treated fairly and with full respect
• be accorded the best efforts of instructors, including access through regular office hours.

In return, students are expected to conduct themselves as responsible members of the academic community. Disruption of the educational process and violation of the rights of others constitutes irresponsible behavior. Faculty members reserve the right to establish a classroom environment that is conducive to learning and equitable to all.

Specific responsibilities of Illinois Central College students include:
• attending classes regularly and explaining reasons for absences to instructors
• intelligent care of equipment and facilities used
• abiding by the expectations established in the course syllabus
• actions characterized by honesty
• refraining from:
  – giving false or misleading information to any College official or tampering with any College record
  – possessing or taking any narcotic, stimulant, or drug except as prescribed by a physician
  – giving, exchanging, or selling any drug to another person
  – possessing or consuming any alcoholic beverage on campus
  – giving, exchanging, or selling such beverages to another
  – using the College name or emblem in an unauthorized or unseemly manner.

Contrary actions such as plagiarism or giving unauthorized help on examinations, may result in disciplinary action ranging from a failing grade for the assignment or exam to dismissal from the College.

For more information see “Academic Misconduct” page 34.

Students are responsible for knowing and abiding by all College regulations, together with federal, state, and local laws. These are enforced by appropriate civil, state, or College authorities. If students are in doubt about any particular matter, they should consult the Vice President of Student Services, East Peoria Campus, Room L432.

Educational Guarantees

Illinois Central College guarantees the mastery of entry-level technical skills as represented in the degree description and verified by evidence of student achievement, that reasonably approximates not less than 50 minutes of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately 16 weeks for each credit hour earned. Further, it guarantees the transfer of courses toward the credit-hour requirements for a bachelor degree at a four-year institution. If judged by an employer to be lacking in technical skills, a graduate shall be provided a maximum of nine credit hours of additional skill training at Illinois Central College without tuition charge. If a course does not fulfill the transfer guarantee, the student may receive either a tuition refund for that course, or tuition-free enrollment in a course to correct the deficiency. This policy became effective for students enrolling in the fall of 1993 and subsequent semesters. Although tuition for approved courses will be waived, the student is responsible for any other costs associated with taking the courses. Listed below are the conditions for these guarantees. Contact the Academic Affairs Office, (309) 694-5784 or academicaffairs@icc.edu for more information.

Guarantee of Technical Competence

1. The student must be employed full time in a job directly related to his or her program of study within one year of graduation from the approved ICC program.

2. The employer must verify in writing within 90 days of the graduate’s initial employment that the graduate lacks competency in specific technical skills as represented in the degree description and course syllabi.
3. The student must have graduated within five (5) years of initial enrollment in the program.
4. Prerequisites and other admission requirements for retraining courses must be met and are not included in the courses covered by this guarantee.
5. All retraining must be completed within two (2) calendar years after the claim is made.
6. The retraining will be limited to courses regularly offered by the College.
7. A written retraining plan must be developed by the employer, the graduate, and the appropriate instructional administrator, specifying the courses needed for retraining and the competencies to be mastered.
8. This guarantee does not imply that the graduate will pass any national, regional, and state board licensing or qualifying examination for a particular career.

Guarantee of Credit Transfer

1. During each semester at Illinois Central College, the student must meet with his/her assigned advisor to plan an appropriate course of study, based on the requirements of the institution to which the student intends to transfer. Registration cards must be signed by the student’s assigned advisor.
2. For the guarantee to be in effect, the student must receive an Associate in Arts Degree or an Associate in Science Degree from Illinois Central College.
3. Only courses designated “Transfer Credit” in the Illinois Central College Catalog are covered by the guarantee.
4. Within one year of graduation from Illinois Central College, the student must notify the Academic Affairs office in writing of the courses that did not properly transfer. Upon notification, Illinois Central College has up to 90 days to investigate and to resolve the problem with the transfer institution. After the 90 days, the College will provide a refund of the monies paid for tuition and any lab fees for courses which did not transfer, or tuition-free enrollment in courses to correct the deficiency if such courses are available. The choice between the refund or the tuition-free enrollment is the student’s.

Grading System

Illinois Central College uses the following letter grades, definitions, and grade point equivalent as its official grading system.

<table>
<thead>
<tr>
<th>Grade</th>

</tbody>
</table>

NR  Not reported by instructor  No grade point
FA  The student has attended through the midterm of the class then ceases to attend for the duration of the term. The FA grade factors into the grade point average as a failing grade. To avoid the FA grade, students must officially withdraw.
WF  Awarded to student who, without instructor approval, voluntarily withdraws from a class after the last day to withdraw without penalty. This grade will factor into the student’s GPA as a grade of “F”.
FX  The student has met the requirements for grade exclusion. The grades with FX do not factor into the ICC grade point average. For complete details see the section on the Grade Exclusion Policy.
I  Indicates the student has not completed requirements for the course. No grade points or credit hours will be given in a course for which the I grade was given. The student must complete all requirements for each course in which an incomplete grade has been received 90 days after final grades have been posted for that class(es); otherwise, the grade will be changed by Enrollment Services to an F. When the student has completed the requirements for a course within the allotted time, the incomplete grade will be changed on the permanent record to the appropriate letter-grade.

Incomplete grades are given, by arrangement with the instructor, only when fully justified by serious circumstances (e.g., illness, accident, death or illness in the immediate family). Incomplete grades are not given for such reasons as unjustified failure to complete the required work by the end of the semester or failure to appear for the final examination.

S  Used in courses numbered 001-039 or with a GEDPR or ESL prefix (except ESL 106). Indicates the student has fulfilled requirements as established for an individual course, but is not used in computing the student’s GPA or college credit hours.

U  Used in courses numbered 001-039 or with a GEDPR or ESL prefix (except ESL 106). Indicates the student has not fulfilled requirements as established for an individual course, and is not used in computing the student’s GPA or college credit hours.

NG  Indicates a Community Education non-credit activity which does not receive a grade or earn grade points.

NR  No grade reported by instructor.

Grade Point Average (GPA)

An important average for all students is their grade point average (GPA) which serves as a measure of academic achievement.

The number of grade points earned in a given course is calculated by multiplying the number of points assigned to the specific letter grade received in the class by the number of credit hours the course carries. Thus, a grade of B (3.00 grade points) in a course worth four credit hours would earn the student 12 (3 x 4) grade points.

A student’s GPA for a given semester is computed by dividing the total number of credit hours attempted into the total number of grade points earned. The division is carried out three places to the right of the decimal point. An example is shown below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
<th>Letter Grade</th>
<th>Points Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 110</td>
<td>3</td>
<td>B</td>
<td>9</td>
</tr>
<tr>
<td>PSY 110</td>
<td>3</td>
<td>C</td>
<td>6</td>
</tr>
<tr>
<td>BIOL 111</td>
<td>4</td>
<td>A</td>
<td>16</td>
</tr>
<tr>
<td>PHYED 130</td>
<td>1</td>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>HIST 111</td>
<td>4</td>
<td>B</td>
<td>12</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>15</strong></td>
<td></td>
<td><strong>46</strong></td>
</tr>
</tbody>
</table>

\[ \text{GPA} = \frac{46}{15} = 3.066 \]

Grade point averages are calculated at the conclusion of each semester. Courses with grades S, U, W, NG, and CR are not
considered part of the total hours attempted for purposes of determining a student's GPA, but these grades are recorded on the student's academic record.

A SEMESTER GPA represents the average of grades for one semester, and a CUMULATIVE GPA reflects the average of grades for all courses taken at Illinois Central College. If courses taken at Illinois Central College are retaken at this institution according to specified retake procedures, both grades appear on the transcript but only the higher grade will be included in the GPA computation. Questions regarding GPA should be referred to Enrollment Services at the East Peoria Campus, L211, (309) 694-5581.

THIS POLICY DOES NOT PRECLUDE ADMISSION/RE-ADMISSION REQUIREMENTS IN OTHER COLLEGE ACADEMIC PROGRAMS.

Class Attendance
Regular attendance at all class meetings and laboratory sessions or active participation in online classes is expected of all students. Faculty members may establish attendance policies and/or makeup procedures for their classes. Faculty will ordinarily permit students to make up work missed due to College sponsored activities, if prior notification of absence is given.

Some programs have established rigid attendance policies. For example, most health careers programs have exacting attendance policies, especially for clinical assignments. These are explained in materials distributed to program enrollees. It is the student's responsibility to be aware of attendance and participation policies and makeup procedures.

Excessive absence and lack of participation are among the most common causes of failing grades. As a College guideline, absences in excess of five (5) percent of total number of scheduled class meetings are considered excessive. For example, three absences in a class which meets twice per week would be considered excessive since these absences represent more than five (5) percent of the class meetings.

In case of prolonged absences because of illness, accident, hospitalization, or family problems, students should notify the Vice President of Student Services Office or the Health Services Office, so proper notification can be made to instructors. In addition, it is the responsibility of the student to contact the instructor about possible makeup work.

Audit of Courses
Many courses at ICC may be audited. A student that audits a course is a non-participating listener in a course and is not required to take tests or complete assignments. The student receives no grade or notation on a transcript relative to the audited course.

Registration for audit classes will be accepted beginning the week the class is scheduled to begin, provided space is available in the class.

Tuition for auditing a class will be the in-district rate.

Further information about which courses may be audited and procedures for registering may be obtained from departmental offices.

A student may not change class registration status from “audited” to “credit” or from “credit” to “audited”.

Retaking Classes
Students may retake a class attempted at this institution for which they received a grade. Retaking of program specific courses may require department approval prior to the student continuing in program of study. If a student retakes a class, all grades will remain on the transcript, but only the highest grade will be calculated in the Illinois Central College cumulative grade point average. Students receiving financial assistance should refer to the Retaking Course-work section on page 26 to determine how retakes will affect their eligibility. Questions regarding retaking classes should be directed to Enrollment Services, East Peoria Campus, L211.

Note: Students planning to transfer to another college are cautioned that many colleges include all grades earned to compute the transfer cumulative grade point average.

Repeatable Classes
Classes that are approved as repeatable for credit are marked as such in the “Course Descriptions” area of the Catalog. These classes are each listed individually on the official transcript with all credit hours counting towards graduation and being calculated into the Illinois Central College cumulative grade point average.

Grade Appeal Process (Approved May, 2015)
The Grade Appeal Process is designed to provide students and faculty with a fair and structured process to review a grade issue or discrepancy. Only final course grades may be appealed through this process.

The process, in brief, is explained in these steps:

Informal Appeal
1. Student must identify a grade issue/discrepancy and contact the instructor (in person or by email) to discuss the issue and a possible resolution. The contact must be within 15 business days from the scheduled course final exam date.

2. If the student does not receive a response from the faculty member within 10 business days, the student should contact the Department Dean/Associate Dean. The Dean/Associate Dean will notify the instructor of the grade issue.

3. The student and instructor may schedule a time to meet to discuss the grade issue or correspond by email or phone to determine if the issue can be resolved informally.

If the issue is not resolved through this process, the student can request a formal review. A student must complete the informal appeal process before moving to the formal process. If an extenuating circumstance exists that prevents this informal process, the student must contact the department dean/associate dean or the Vice President of Student Services.

Formal Appeal
A student must complete the informal appeal process before moving to the formal process.

1. The student must request a Grade Appeal form from the Vice President of Student Services (VPSS) office (East Peoria Campus - L432.) The student must submit the Grade Appeal form, along with supplemental evidence to support the appeal. The form and supporting documents must be submitted to the Academic Department Office within five (5) business days (except in extraordinary circumstances) of the completion of the informal process.

a. Upon receipt of the completed Grade Appeal form and supporting evidence, the academic department will schedule
a meeting between the student, the course instructor and the department dean/associate dean. The dean/associate dean will serve as the mediator for the meeting.

b. In situations involving an objection to a face-to-face meeting, the student or instructor can request to meet separately with the department dean/associate dean.

c. The department dean/associate dean will provide written notice of the resolution to both the student and instructor, via ICC email, within three (3) business days of the meeting.

2. If the issue is not resolved through step 4, the student may request a formal review by the Grade Appeal Committee.

a. Within five (5) business days of receipt of the emailed resolution from department dean/associate dean, the request for the grade appeal review must be made through the Vice President of Student Services.

b. The Vice President of Student Services will notify the co-chairs of the Academic Standards Committee to convene the formal review by the Grade Appeal Committee.

c. The student and the faculty member are encouraged to provide a written summary and documented evidence supporting his or her position to the contact person above a minimum of two (2) business days in advance of the scheduled date of the Grade Appeal Committee. Only written materials submitted in advance will be considered by the Grade Appeal Committee.

3. The Grade Appeal Committee is comprised of a subset of members from the Academic Standards committee. The Grade Appeal Committee will include a minimum of one (1) administrator and two (2) faculty members, with at least one faculty from the academic department from which the appeal originated. In the event an available academic department representative is not available, a designee from the Faculty Senate can be appointed.

4. The Grade Appeal Committee will review the documentation and make a determination regarding the appeal. The Grade Appeal Committee may request additional information as needed. The decision of this committee is final.

Grade Exclusion Policy

The grade exclusion policy at Illinois Central College provides a second chance for academic success to students who have failed courses that otherwise may make it difficult or impossible for them to pursue a degree or certificate.

In order to qualify for grade exclusion:

1. The student cannot have enrolled in graded, college-level courses at Illinois Central College or any other post-secondary education institution for four (4) consecutive semesters prior to application for grade exclusion (summer terms do not apply). A student may apply at any time for exclusion after this time requirement has been met.

2. The student's cumulative grade point average must be less than 2.000 at the time of re-admission to the College.

3. Following re-admission, the student must complete a minimum of 15 approved consecutive credit hours in graded college level courses (110 or above) with no grades of “D” or “F” or a GPA of at least 2.000 in each semester in which the 15 hours are attempted before exclusion will be granted.

Grade exclusion will only be granted once. A maximum of 16 hours of “F” grades earned in graded college level courses at Illinois Central College will be excluded.

To qualify for grade exclusion, the student is required to meet with a designated academic advisor.

When eligibility requirements have been fulfilled and exclusion granted, the student's cumulative grade point average will be recalculated with “F” grades removed from the calculation. However, all grades, including those excluded, will continue to appear on the ICC academic transcript and will be counted as attempted hours for Financial Aid purposes. Students who plan to transfer to another institution should be aware that the receiving institution may use all of the grades that are excluded by ICC for calculation of the grade point average for admission review.

(Note: Excluded grades will be indicated by an FX.)

Application forms for grade exclusion may be obtained and submitted to any Enrollment Services office. All graduation items are processed through the East Peoria Enrollment Services office, L211, East Peoria Campus.

THIS POLICY DOES NOT PRECLUDE ADMISSION/RE-ADMISSION REQUIREMENTS IN OTHER COLLEGE ACADEMIC PROGRAMS.

Academic Honors

Full-time students who have completed 12 credit hours and have achieved a 4.00 grade point average (GPA) in a given semester are named to the President's List; those earning between 3.50 and 3.99 grade point averages are named to the Dean's List.

Part-time students who have completed 12 credit hours and are enrolled in no fewer than 6 hours are eligible for the President’s List if they have achieved a 4.00 GPA and Dean’s List recognition if the earned GPA is between 3.50 and 3.99.

Students will be accorded honors at the point of graduation* as follows:

- Certificate Honors: Students who earn a GPA of 3.5 or higher in certificates with 24 or more hours
- Degree Honors: Students who earn a degree have three levels of honors
  - Highest Honors: GPA of 4.0
  - High Honors: GPA of 3.75-3.99
  - Honors: GPA of 3.5-3.74

These honors will be noted on the academic transcript and on the diploma for all students graduating who have reached this criteria. These honors may also be recognized at commencement.

*Since final grades are not posted to student records until after the graduation ceremony, the previous semester's cumulative GPA may be used as the basis for special recognition at commencement.

Academic Standards

It is the purpose of Illinois Central College to provide educational opportunities to those who can benefit from continued educational experience; therefore, the following retention policies and processes are provided. Illinois Central College recognizes some students may have deficiencies in certain areas of preparation. As such, the College believes students who have been placed on academic caution, pre-suspension or suspension should be made aware of the consequences of these statuses and the resources available for the detection and possible correction of academic deficiencies. If at any time a student raises their cumulative GPA to 2.000, they will be removed from the process and return to Academic Good Standing.

Academic Caution

The purpose of academic caution is to alert students that their grades do not meet minimum requirements. A second and equally
important purpose is to provide students an opportunity to plan corrective actions, which will hopefully lead to a more successful academic career. Information regarding academic advisement services is available in the Advisement and Counseling Services Office, located in the Leitch Career Center. Students on Academic Caution are restricted to a maximum enrollment of 13.99 credit hours. If a student's cumulative grade point average does not raise above a 2.00 within one semester, the student will be placed on academic pre-suspension.

**Academic Pre-Suspension**

Students on Academic Pre-suspension are restricted to a maximum enrollment of 7.99 credit hours. If a student on Academic Pre-suspension fails to meet the grade point standards after the above measures have been completed, the student will be placed on Academic Suspension.

**Academic Suspension**

A student that fails to meet the 2.00 grade point average after three (3) consecutive semesters will be placed on Academic Suspension from the College for one (1) semester. A student on suspension may re-enter after one (1) semester, but are required to meet with an academic advisor prior to registration. A suspended student re-admitted to the College must have a semester grade point average above a 2.00 to be allowed to enroll in the next semester. Students on Academic Suspension are restricted to a maximum enrollment of 6.99 credit hours.

**Readmission**

- If a suspended student is re-admitted to the College and their semester grade point average fails to meet the 2.00 requirement, the student will be suspended from Illinois Central College for one academic year.
- If a student does not enroll for 5 or more years they may appeal through the Dean of Students office to enroll in additional credit hours, regardless of their Academic Standing.

**Intercollegiate Competition**

A student is eligible to participate in a particular intercollegiate competition for a maximum of four (4) semesters providing he/she is in good academic standing. A student may not participate during any period when he/she is not in good academic standing, even if he/she meets the NJCAA eligibility requirements, unless approval is granted by the Vice President of Student Services. The minimum number of credit hours in which a student must be enrolled is determined by the organization governing the competition.

**Academic Misconduct**

Matters relating to academic honesty or contrary action such as cheating, plagiarism, or giving unauthorized help on examinations or assignments may result in an instructor giving a student a failing grade for the assignment, test, or for the course. Based on the severity of the offense, the instructor may recommend failure for an assignment or failure for the course. Multiple instances of academic misconduct could include sanctions up to dismissal from the College.

A common form of academic dishonesty is plagiarism. This is the use (whether deliberate or unintentional) of an idea or phrase from another source without proper acknowledgment of that source. The risk of plagiarism can be avoided in written work by clearly indicating, either in footnotes or in the paper itself, the source of any other major or unique idea which the student could not or did not arrive at independently. These precise indications of sources must be given regardless of whether the material is quoted directly or paraphrased. Direct quotations, however brief, must be enclosed in quotation marks as well as being properly documented.

Another form of plagiarism is copying or obtaining information from another student. Submission of written work, such as laboratory reports, computer programs, or papers which have been copied from the work of other students, with or without their knowledge and consent, is plagiarism.

Obtaining an examination prior to its administration or use of unauthorized aides during the examination are clear acts of academic dishonesty. It is also academically dishonest to knowingly aid another student in performing an act of academic dishonesty. Thus, in cases of inappropriate collusion on academic work, the provider of inappropriately used material is guilty of academic dishonesty, as well as the actual perpetrator.

Listed below are examples which may involve confusion on the student's part, especially freshmen who are accustomed to working on projects in laboratories with fellow students in high school.

1. Sharing information in the preparation of a report or paper, unless approved by instructor.
2. Turning in the same paper for two different courses with slight modification.
3. The illegitimate uses of written material such as laboratory reports and computer programs or the obtaining of information from other students while an examination is in progress.

In brief, any act which represents work not one's own as one's own is an academically dishonest act.

If a student is ever in doubt about an issue of academic dishonesty, or has any hesitation about a contemplated course of action, the student should consult his or her instructors. The penalties for academic dishonesty can be very severe and can affect the entire educational experience at Illinois Central College.

**PROCEDURES FOR ADDRESSING ACADEMIC MISCONDUCT**

In cases where Academic Misconduct is suspected by an instructor or reported by another individual, the faculty member will gather the evidence and inform the dean/associate dean/program director.

**Step 1: Faculty-Student Conference**

The faculty member will inform the student privately of his/her findings and attempt a resolution of the problem. The associate dean, teaching chair, program director, or designee may be present in this conference if necessary. If the student refuses to attend the conference, the student may forfeit the opportunity for an appeal. Depending on the nature of the situation and the documented proof available, such resolution could include disciplinary sanctions, a failing grade for the assignment, or a failing grade for the course. The faculty member will provide the student the opportunity to address the findings. The faculty member will notify the student of his/her decision and will file the Academic Misconduct forms with the respective division and the Vice President of Student Services office.

**Step 2: Appeal Process**

If a student is not satisfied with the instructor's decision, he/she may contact the dean of the department within 10 business days of the decision. The dean will review the information and will meet with the faculty member and then with the student to attempt to resolve the issue. If the student is not satisfied with the result of
the appeal, he/she may petition the Academic Standards Committee for a review of the case. This appeal must be requested through the Vice President of Student Services Office in writing within 10 business days of the appeal decision from the dean. The decision of the Academic Standards Committee is final.

**Step 3: Documentation of the Incident**
All cases of academic misconduct are noted in a student's disciplinary file. This information is released in accordance with the Federal Educational Rights and Privacy Act (FERPA) and is not noted on the academic transcript. In situations where a second Academic Misconduct report is filed, the student will be charged with an alleged violation of the Student Code of Conduct. Code of Conduct violations are addressed through the Dean of Students and could include sanctions up to and including expulsion from the College.

**Additional Information:**
Students who are given a failure on an assignment for Academic Misconduct will not be allowed to withdraw from that course without instructor permission. Students who are given a failure from the course for Academic Misconduct will not be allowed to withdraw from the course. Illinois Central College reserves the right to reinstate any individuals who are withdrawn in these situations.

Institutional Learning Outcomes

Developed with input from faculty, staff, and community stakeholders, the following Institutional Learning Outcomes (ILOs) reflect the broad-level knowledge, skills, behaviors, and attitudes that graduates should demonstrate as a result of their experiences at Illinois Central College. Such experiences may include general education courses, program courses, developmental courses, co-curricular activities, and extra-curricular activities, among others. ILOs help prepare our graduates to become productive members of society and life-long learners.

COMMUNICATION

Statement of Intent: Associate degree graduates have the ability to transfer information, concepts, or emotions to an audience through written, oral, symbolic, aesthetic, and/or nonverbal communication methods that successfully align with their purpose.

REASONING

Statement of Intent: Associate degree graduates identify and solve problems, analyze new information, synthesize and evaluate ideas, and transform ideas into a course of action by using critical, creative, and/or analytical skills.

RESPONSIBILITY

Statement of Intent: Associate degree graduates understand the implications of choices and actions, demonstrate appropriate behaviors in academic/professional contexts, and contribute constructively within the context of community.

Developmental Coursework

Developmental courses are designed to provide students with the basic skills needed to achieve success in college-level courses. Based on placement testing scores, students will be advised as to the most appropriate sequence of classes to attain their educational goals. Although students receive grades for developmental courses, those courses do not apply towards a degree or certificate. For information related to developmental coursework and Financial Assistance, refer to the Remedial Coursework section of the catalog.

Degrees

ASSOCIATE IN APPLIED SCIENCE is a career-oriented degree preparing students for immediate employment and is awarded in a specific program of study. Although not designed as a transfer degree, some courses may fulfill Illinois Articulation Initiative’s general education requirements, and some courses may transfer to four-year colleges and universities. Students should consult their departmental advisor for more information on these courses.

ASSOCIATE IN GENERAL STUDIES DEGREE allows individuals interested in acquiring a broad range of academic courses to suit their specific needs. While it is not designed as a transfer degree, some coursework may fulfill Illinois Articulation Initiative general requirements or transfer to a four-year college or university. Students who choose this option should work closely with their advisors to determine whether this option meets current and future needs.

ASSOCIATE IN ARTS DEGREE is a baccalaureate-oriented transfer degree focused in the arts, humanities, social sciences, behavioral sciences, or professional fields with these study areas as a foundation. Degree completion may qualify the individual for junior standing at many four-year colleges and universities. ICC’s Associate in Arts degree fulfills the Illinois Articulation Initiative’s general education requirements. (For more information on the Illinois Articulation Initiative, see page 166.)

ASSOCIATE IN SCIENCE DEGREE is a baccalaureate-oriented transfer degree focused in life or physical sciences, or professional fields with these study areas as a foundation. Degree completion may qualify the individual for junior standing at many four-year colleges and universities. Students who complete the Associate in Science degree at ICC will need to complete additional requirements at ICC or the transfer institution in order to complete the Illinois Articulation Initiative’s general education requirements. (For more information on the Illinois Articulation Initiative, see page 166.)

ASSOCIATE IN ENGINEERING SCIENCE DEGREE is a baccalaureate-oriented degree for students pursuing engineering. This degree does not fulfill all Illinois Articulation Initiative general education requirements. The AES provides students with a greater number of credit hours in mathematics and sciences early in their academic career, which is the preferred course sequence for some colleges and universities. Students completing this degree may be expected to take additional general education requirements at their transfer schools. Students who choose this option should work closely with their Engineering advisor to assure a smooth transition from ICC to a four-year engineering program.
**Associate in Applied Science Degree (AAS)**

**SPECIFIC REQUIREMENTS**

In addition to the General Requirements for a Degree listed on page 42, candidates for the Associate in Applied Science Degree must maintain an overall grade point average of 2.00 (C). All credits used to complete this degree must be labeled as “OC” or “TC”. The student must also present an approved program with the minimum credit hours specified for the program, including the following general education requirements:

A. **ENGLISH:** (3 credit hours) ENGL 110, 111, 116, 125, 201

B. **COMMUNICATION:** (3 credit hours) COMM 110 or 212, 113 or 3 additional credit hours in one of the following: ENGL 116, 125 or 201

C. **SOCIAL AND BEHAVIORAL SCIENCES:** (3 credit hours)
   1. Economics: ECON 105, 110, 111
   2. Geography: GEOG 112, 113, 116, 118, 200
   3. History: HIST 117, 118, 201, 202, 231
   4. International Studies: INTST 130, 134, 140
   5. Political Science: POLSC 115, 119, 120, 122, 124
   6. Psychology: PSY 110, 202, 210, 220
   7. Social Science: SSC 111
   8. Sociology: SOCI 110, 114, 120, 213, 218, 219

D. **MATHEMATICS AND/OR LABORATORY SCIENCE** (6 credit hours)
   1. Mathematics: The particular course prescribed in the specific Applied Science curriculum. Approved courses are: AGBUS 118; BUS 120, MAT 106, RNRS 150.
      Any MATH above 100, except for the following: 230, 250
   2. Laboratory Science: The particular course prescribed in the Applied Science curriculum. Approved courses are: AGRI 112; AUTO 115; CATTK 110; DPET 130; ELCTK 220; HORT 110
      Any BIOL above 100, except for the following: 150, 230
      Any CHEM above 100, except for the following: 113, 122, 131, 132, 210, 220, 230
      Any PHYS above 100, except for the following: 104, 121, 211, 212, 213, 214
      Any EASC or PHYSC above 100

E. **HUMANITIES AND FINE ARTS** (3 credit hours)
   1. Art: ART 110, 142, 150, 151, 152
   2. Dance: DANCE 115
   3. Film: FILM 110
   4. Foreign Language: ARA 211; CHN 211; FR 211; GER 211; ITAL 211; SPAN 211
   5. History: HIST 111, 112
   6. Humanities: HUMAN 123, 124, 125, 128, 129, 250
   7. International Studies: INTST 132, 133
   9. Mass Communication: MCOMM 224
   10. Music: MUS 148, 149, 150
   12. Theatre: THTRE 110 or 111

F. Requirements of the specified curriculum in which the student is enrolled. Appropriate technical course substitutions may be approved by the appropriate dean.

**Certificates**

An Occupational Certificate is awarded to students who complete all the requirements for organized programs of more than a single course (3-4 credit hours) but fewer than fifty (50) credit hours total.

**GENERAL REQUIREMENTS FOR OCCUPATIONAL CERTIFICATES**

To become eligible for a certificate a student must:

1. Complete all courses listed for the particular certificate. Appropriate technical course substitutions may be approved by the department dean/associate dean.

2. Complete at least thirty percent (30%) of the total program of study required for the certificate in residence at Illinois Central College.

3. Maintain a cumulative grade point average of 2.00 (C) in all courses required for the certificate. Individual courses may have additional grade requirements.

4. Fulfill all financial obligations to the college.

5. Submit an Application for Certificate by the deadline for the term in which they plan to graduate to ensure the timely award of the certificate. (See page 21)

   - September 1 December graduation deadline
   - February 1 May graduation deadline
   - May 1 July graduation deadline

Applications for certificates are accepted up to one (1) month after the deadline date but the student will be assessed a late fee of $25.

A **Certificate of Participation** may be awarded for completion of single course programs of instruction and certain community service activities.
Associate in General Studies Degree (AGS)

**SPECIFIC REQUIREMENTS**

In addition to the General Requirements for a Degree listed on page 42, candidates for the Associate in General Studies Degree must complete the degree with an overall grade point average of 2.00 (C) for all courses counted towards graduation. Graduates must complete a minimum of 60 credit hours all labeled “TC” or “OC”, including the following:

A. **ENGLISH/COMMUNICATION:** (6 credit hours)
   1. English: ENGL 110, 111, 116, 125, 201
   2. Communication: COMM 110 or 212, 113

B. **SOCIAL AND BEHAVIORAL SCIENCES:** (9 credit hours)
   1. Economics: ECON 105, 110, 111
   2. Geography: GEOG 112, 113, 116, 118, 200
   3. History: HIST 117, 118, 125, 201, 202, 231
   4. International Studies: INTST 130, 134, 140
   5. Political Science: POLSC 115, 119, 120, 122, 124
   6. Psychology: PSY 110, 202, 210, 220
   7. Social Science: SSC 111 or INTST 140 (only one of these three may satisfy IAI requirements)
   8. Sociology: SOC 110, 114, 120, 213, 218, 219

C. **MATHEMATICS:** (3 credit hours)
   AGBUS 118, BUS 120, MAT 106, RNRS 150
   Any MATH above 100, except for the following: 230, 250

D. **LABORATORY SCIENCE:** (4 credit hours)
   AGRI 112, 201; ASEP 221; AUTO 115; CATTK 110; DPET 130; ELCTK 220; HORT 110
   Any BIOL above 100, except for the following: 150, 230
   Any CHEM above 100, except for the following: 113, 122, 131, 132, 210, 220, 230
   Any PHYS above 100, except for the following: 104, 121, 211, 212, 213, 214
   Any EASC or PHYS above 100

E. **HUMANITIES AND FINE ARTS:** (3 credit hours)
   1. Art: ART 110, 142, 150, 151, 152
   2. Dance: DANCE 115
   3. Film: FILM 110
   4. Foreign Language: ARA 211; CHN 211; FR 211; GER 211; ITAL 211; SPAN 211
   5. History: HIST 111, 112
   6. Humanities: HUMAN 123, 124, 125, 128, 129, 250
   7. International Studies: INTST 132, 133
   9. Mass Communication: MCOMM 224
   10. Music: MUS 148, 149, 150
   12. Theatre: THTRE 110, 111

F. **HUMANITIES AND FINE ARTS:** (9 credit hours)
   1. Fine Arts (3-6 credit hours)
   2. Film: FILM 110
   3. Foreign Language: ARA 211; CHN 211 or FR 211 or GER 211; ITAL 211 or SPAN 211
   4. History: HIST 111, 112
   5. Humanities: HUMAN 123, 124 or 125, 129; INTST 132 or 133
   7. Mass Communication: MCOMM 224
   8. Music: MUS 148, 149, 150
   9. Theatre: THTRE 110 or 111

*Either PSY 210 or SOC 218 satisfies IAI requirements*

Updated courses will appear on ICC’s website: icc.edu/catalog or see the IAI and ICC General Education Course Alignment (page 168). ICC’s courses approved by the Illinois Articulation Initiative (IAI) are posted on the itransfer website: itransfer.org

While a foreign language is not required for graduation at ICC, students are strongly advised to check the requirements of the program at the college or university to which they intend to transfer.
Associate in Science Degree (AS)

SPECIFIC REQUIREMENTS (Transfer Degree)

In addition to the General Requirements for Degrees listed on page 42, candidates for the Associate in Science Degree must complete at least 60 credit hours of TRANSFER CREDIT courses including the General Education requirements listed below. Students must maintain an overall grade point average of 2.00 (C). See page 166 for further IAI description. All students who earn the Associate in Science Degree must complete the specific degree requirements in effect for the AS degree at the time they apply for graduation.

A. ENGLISH: (6 credit hours) ENGL 110 and 111; In order to fulfill this requirement, a student must receive a grade of "C" or better in each of the two courses.

B. COMMUNICATION: (3 credit hours) COMM 110 or COMM 212

C. SOCIAL AND BEHAVIORAL SCIENCES: (6 credit hours) Courses must be taken in at least two of the following disciplines:
   1. Economics: ECON 110, 111
   2. Geography: GEOG 112 or 113, 116, 118, 200
   3. History/International Studies: HIST 117, 118, 201, 202, 231; INTST 130, 134
   4. Political Science: POLS 115, 119, 120, 122, 124
   5. Psychology: PSY 110, 202, 210*, 220
   6. Social Science: SSC 111 or INTST 140 (only one of these three may satisfy IAI requirements)
   7. Sociology: SOC 110, 114, 120, 213, 218*, 219

D. MATHEMATICS: (6-9 credit hours) At least one of these courses must be taken from Group I, and the others may be taken from either Group I or Group II. See chart on page 43.
   1. Group I (3-6 credit hours) MATH 110, 111 or 211, 122, 134, 135, 201, 222, 223, 224
   2. Group II (Transfer credit, but NOT IAI approved courses for General Education) MATH 115, 120, 124, 165, 190, 200, 230, 250

E. PHYSICAL AND LIFE SCIENCES: (10-11 credit hours) Students must complete at least one Physical Science and one Life Science course from Group I. The other course can be taken from Group I or Group II. At least two courses must also contain a laboratory component.
   1. Group I: (7-8 credit hours) Life Sciences:
      - Biology: BIOL 110, 111, 114, 115, 150 (non-lab), 160 or 161, 250
      - Physical Sciences:
        - Chemistry: CHEM 110, 113 (non-lab), 115, 120, 130
        - Earth Science: EASC 111, 116, 118, 250
        - Physical Science: PHYS 110, 114
        - Physics: PHYS 110, 120
   2. Group II: (3-4 credit hours) Any science course designated as Transfer Credit, but NOT IAI approved courses for General Education.

F. HUMANITIES AND FINE ARTS: (6 credit hours) At least one of these courses must be a Humanities course and at least one must be a Fine Arts course.
   1. Humanities (3 credit hours)
      - Foreign Language: ARA 211 or CHN 211 or FR 211 or GER 211 or ITAL 211 or SPAN 211
      - History: HIST 111, 112
      - Humanities/International Studies: HUMAN 123, 124 or 125, 129; INTST 132 or 133
      - Philosophy: PHIL 110, 111, 112, 115, 116
   2. Fine Arts (3 credit hours)
      - Art: ART 110, 142, 150, 151, 152
      - Dance: DANCE 115
      - Film: FILM 110
      - Humanities: HUMAN 128, 250
      - Mass Communication: MCOMM 224
      - Music: MUS 148, 149, 150
      - Theatre: THTRE 110 or 111

*Either PSY 210 or SOC 218 satisfies IAI requirements

Updated courses will appear on ICC’s website: icc.edu/catalog or see the IAI and ICC General Education Course Alignment (page 168). ICC’s courses approved by the Illinois Articulation Initiative (IAI) are posted on the transfer website: itransfer.org. While a foreign language is not required for graduation at ICC, students are strongly advised to check the requirements of the program at the college or university to which they intend to transfer.

Associate in Engineering Science Degree (AES)

SPECIFIC REQUIREMENTS

In addition to the General Requirements for a Degree listed on page 42, candidates for the Associate in Engineering Science Degree must complete at least 61 credit hours of the following requirements maintaining an overall grade point average of 2.00 (C):

A. ENGLISH/COMMUNICATION: (6 credit hours)
   ENGL 110 and 3 additional credit hours from ENGL 111, COMM 110 or COMM 212

B. SOCIAL SCIENCE/HUMANITIES/FINE ARTS: (12 credit hours, a minimum of one course must be taken in a social science and a minimum of one course must be taken in humanities/fine arts.)
   1. SOCIAL SCIENCE:
      - Economics: ECON 110, 111
      - Geography: GEOG 112 or 113, 116, 118, 200
      - History: HIST 117, 118, 201, 202, 231
      - International Studies: INTST 130, 134
      - Political Science: POLS 115, 119, 120, 122, 124
      - Psychology: PSY 110, 202, 210*, 220
      - Social Science: SSC 111 or INTST 140 (only one of these three (3) may satisfy IAI requirements)
      - Sociology: SOC 110, 114, 120, 213, 218*, 219

   2. HUMANITIES/FINE ARTS
      - Art: ART 110, 142, 150, 151, 152
      - Dance: DANCE 115
      - Film: FILM 110
      - Foreign Language: ARA 211 or CHN 211 or FR 211 or GER 211 or ITAL 211 or SPAN 211
      - History: HIST 111, 112
      - Humanities: HUMAN 123, 124 or 125, 128, 129, 250
      - International Studies: INTST 132 or 133
      - Mass Communication: MCOMM 224
      - Music: MUS 148, 149, 150
      - Philosophy: PHIL 110, 111, 112, 115, 116
      - Theatre: THTRE 110 or 111

C. MATHEMATICS: (16 credit hours) MATH 222, 223, 224, 250
   See chart on page 43.

D. LABORATORY SCIENCES: (14 credit hours) CHEM 130, PHYS 211, 212, 213

E. REQUIRED ENGINEERING COURSE: (1 credit hour) ENGR 110

F. ENGINEERING ELECTIVES: (minimum 8 credit hours of any of the following):
   1. ENGR 113, 230, 240, 241, 242, 251, 252, 253

G. MATHEMATICS, SCIENCE or ENGINEERING ELECTIVE(S): (minimum 4 credit hours of any of the following):
   1. BIOL 160 or 161
   2. CHEM 132, 220, 230
   3. MATH 230
   4. ENGR 113, 230, 240, 241, 242, 251, 252, 253
   5. PHYS 214

*Either PSY 210 or SOC 218 satisfies IAI requirements

Note: Students intending to transfer to Southern Illinois University or Northern Illinois University may benefit from obtaining the Associate in Science Degree. See an Engineering advisor for details.
Degree Specific Admission Requirements
Illinois Central College maintains an open-door, open-access policy with regard to general admission to the College. Although selected programs have established, and maintained, specific admission requirements, applicants will be admitted to the general programs of the College. Placement tests and academic advisement will be utilized to determine the appropriate courses in which students should enroll.

ASSOCIATE IN ARTS DEGREE
ASSOCIATE IN SCIENCE DEGREE
ASSOCIATE IN ENGINEERING SCIENCE DEGREE

All new full-time applicants who intend to enroll in the Associate in Arts Degree program, Associate in Science Degree program, or in the Associate in Engineering Science Degree program (the usual course of study for baccalaureate/transfer students planning to seek a bachelor degree) must submit not only an application but also high school transcripts (or GED scores) and ACT/SAT scores.

As a result of minimum standards established by the Illinois Board of Higher Education and Public Act 86-0954, it is recommended that applicants for the Associate in Arts Degree or Associate in Science Degree successfully complete at least 15 units of high school coursework from the following categories:

- 4 years of English, emphasizing written and oral communication and literature
- 3 years of college preparatory mathematics, including introductory through advanced algebra, geometry, or fundamentals of computer programming
- 2 years of social science
- 2 years of laboratory science
- 2 years of one foreign language, fine arts (art, music, theatre, or dance), or vocational education
- 2 years of elective coursework, including coursework in any of the categories above (excluding English)

These course-specific requirements are minimums. Some high school students should include coursework beyond the minimum in fields they may be considering for advanced study in a college or university. For example, students who think they want to pursue a degree in science or mathematics should take additional courses in mathematics and lab science in high school.

For applicants who do not meet one or more of the course-specific requirements above, ACT/SAT minimum sub-scores were established to determine whether high school equivalent knowledge and skills have been acquired: 20 for English, 20 for math, 20 for science, and 20 for social studies (on the reading sub-scores).

Students with a deficiency in one of the high-school-course areas may also satisfy the requirement by passing a college-level course in this area with a grade of C or higher, or by passing one of the following Illinois Central College courses:

English requirement: ENGL 095 or ENGL 099
Math requirement: MAT 098
Science requirement: CHEM 094

ASSOCIATE IN APPLIED SCIENCE DEGREE
OCCUPATIONAL CERTIFICATE

Requirements for admission to programs vary. For information on the requirements, see the specific program of study in this Catalog or consult with the department dean.

ASSOCIATE IN GENERAL STUDIES DEGREE

An applicant admissible to the College is admissible to this program.

COMMUNITY EDUCATION

Students enrolled only in non-credit courses are assigned to this curriculum.

General Requirements for Degrees
Students must fulfill all requirements to be eligible for a degree.

1. Credit hours:
   - Associate in Arts, Associate in Science degrees – complete a minimum of 60 transfer credit hours, including general education requirements; 15 of the final 30 credit hours must be earned at ICC.
   - Associate in Engineering Science Degree — complete a minimum of 61 transfer credit hours; 15 of the final 30 credit hours must be earned at ICC.
   - Associate in Applied Science Degree – complete the prescribed credit hours for a specific Associate in Applied Science degree program. At least 15 of the last 30 hours must be completed at ICC. Those 15 credit hours must be program courses from the second year of the program.
   - Associate in General Studies – complete a minimum of 60 credit hours, including general education requirements; 15 of the final 30 credit hours must be earned at ICC.

   Note: Illinois Central College does not accept partial credit for coursework completed at other colleges and universities. ICC will evaluate quarter hours earned at other colleges and universities for equivalent credit at ICC.

2. Maintain an overall grade point average (GPA) of 2.00 on a 4-point scale or a “C” average. All grades and hours of all courses attempted at ICC are used in calculating the student's GPA. When a higher grade is earned in a repeated course where a student received a D or F, the D or F will be dropped from GPA calculation and the higher grade will be used. Individual courses or programs may have additional or higher GPA requirements.

3. Satisfactorily complete all specific degree requirements outlined by the College (see individual degree and/or program requirements.)

4. Fulfill all financial obligations to the College.

5. Submit an Application for Degree/Certificate and $15 fee for the desired graduation month/term:
   - December/Winter Graduation – due September 1
   - May/Spring Graduation – due February 1
   - Summer/July Graduation – due May 1

   Note: Commencement ceremonies are only held in May. Students who received degrees in December and students anticipating receiving degrees in July may participate in the May ceremony.
Math Sequence for Transfer Programs

For Applied Science Degrees, See individual program requirements.
Placement into mathematics courses is based on score on an acceptable Placement test, ACT/SAT math subscore, or prior coursework.

IAI Mathematics courses listed under A.S. degree requirements may be used toward the A.A. Liberal Arts degree mathematics requirements.

Gray boxes indicates IAI (Illinois Articulation Initiative) courses.

*Geometry is also a requirement for these courses. This requirement may be met with completion of MATH 095 with a C or better, successful completion of one year of high school geometry at a regionally-accredited school, or by an acceptable Placement proficiency test.

-MATH 115 & MATH 120 may be taken concurrently.

The department also offers: MATH 095 Elementary Geometry
MATH 097 Elementary Algebra Review
MATH 165 Precalculus

Not all classes are required for all academic areas. Talk to your advisor for the most appropriate math class(es) for you!

Associate in General Studies Degree
Career Clusters

Through the program sections of the Catalog, you’ll see small icons like this. These icons identify the primary career cluster for the program. Career Clusters were developed to give you the information you need to decide about a career. A “cluster” describes a group of careers that have specific knowledge (things you know) and skills (things you do) in common. At ICC, you’ll find various programs that prepare you for careers in general areas like finance, health sciences, information technology, manufacturing or marketing.

Here are the icons and the areas they represent:

- Agriculture, Food, & Natural Resources
- Architecture & Construction
- Arts, Audio/Visual Technology & Communications
- Business Management & Administration
- Education & Training
- Finance
- Government & Public Administration
- Health Science
- Hospitality & Tourism
- Human Services
- Information Technology
- Law, Public Safety, Corrections & Security
- Manufacturing
- Marketing
- Science, Technology, Engineering & Mathematics
- Transportation, Distribution & Logistics

You can use these icons as quick references for programs in the career area of your interest. For example, if you’re interested in health careers in general and want to know what your ICC options are, look for this icon.

While Career Clusters give you an idea of how ICC programs fit into general career areas, you need to know that sometimes your program can support multiple Career Clusters. You might choose a program that has a primary Career Cluster of Information Technology, but you really want to be a teacher (the Education and Training Cluster). In this case, you’re really preparing for two of the career areas! But we’ve kept our coding simple and just provided the primary career area to avoid confusion. Regardless of how you want to mix and match these, the best path to the career you want is to work with your advisor or ICC’s Career Center.

For more information on Career Clusters and how they fit into the job world, visit: careertech.org.
APPLIED SCIENCE DEGREE and CERTIFICATE

The Associate in Applied Science degree is a career-oriented degree preparing students for immediate employment and is awarded in a specific program of study. Although not designed as a transfer degree, some courses may fulfill Illinois Articulation Initiative’s general education requirements, and some courses may transfer to four-year colleges and universities. Students should consult their departmental advisor for more information on these courses.

An Occupational Certificate is awarded to students who complete all the requirements for organized programs of more than a single course (3-4 credit hours) but fewer than fifty (50) credit hours total. Requirements for admission to programs vary.
Certificate
Total Credit Hours: 15

Program Information: The mission of the 9-1-1 Telecommunicator certificate program is to prepare the graduates for employment as a 9-1-1 telecommunicator by educating them in the knowledge, skills, and behaviors as an entry level 9-1-1 telecommunicator at a police, fire, or EMS department.

Associate in Applied Science

Total Credit Hours: 66

Program Information: The mission of the Agricultural-Business Management Associate in Applied Science degree program is to prepare students for employment in the agricultural industry by educating them in the fundamental concepts, knowledge, hands-on techniques and skills of the agricultural industry.

Additional Program Info: This general agriculture option enhances the student’s ability to obtain a broad range of agricultural employment opportunities. Whether returning to a farm or working for an agricultural business, graduates of the Agricultural Business Management program will have a good basic knowledge of modern agricultural production and business practices. The student will complete two internships on a farm and/or in an agricultural business during their sophomore year to gain additional practical experience. Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule that meets Illinois Central College and personal requirements.

See page 308 for program mission, goals, and student learning outcomes.
Associate in Applied Science

Total Credit Hours: 61

Program Information: The mission of the Associate of Applied Science degree in Architectural Construction is to prepare students for entry-level positions in construction firms by providing architectural drafting skills and an understanding of the fundamentals of architecture and construction.

Additional Program Info: Typical potential job titles for graduates could be internships in: architectural detailer, architectural drafter, estimator, planning technician, field inspector, sales representative, and laboratory technician. The program offers several options in tailoring the student’s studies toward career goals by implementing the appropriate electives into the program outline. Those students considering transfer of credit to a university for a baccalaureate degree should discuss their program goals and transferability of courses with their advisor.

Admission To the Program: Suggested high school courses should include three years of high school mathematics, one laboratory science course, and one year of architectural drafting. Students must complete basic skills placement testing before admission into this program.

Contact Information: Arts and Communication Department East Peoria Campus Room 124A (309) 694-5113 or Dirksen Hall, phone (309) 694-5734

Architectural Construction Technology

GENERAL COURSES:
- ENGL 110 COMPOSITION I 3 CR. HRS.
- ENGL 201 TECHNICAL COMMUNICATIONS 3 CR. HRS.
- SOCIAL SCIENCE* 3 CR. HRS.
- MATH 130 TECHNICAL ALGEBRA AND TRIGONOMETRY 5 CR. HRS.
- PHYS 112 TECHNICAL PHYSICS I 4 CR. HRS.
- HUMANITIES* 3 CR. HRS.

PROGRAM COURSES:
- ARCH 131 ARCHITECTURAL CONSTRUCTION I 4 CR. HRS.
- ARCH 204 ARCHITECTURAL COMPUTER AIDED DESIGN AND DRAFTING I 3 CR. HRS.
- ARCTK 111 ARCHITECTURAL DRAFTING 3 CR. HRS.
- ARCTK 112 STRUCTURAL DRAFTING 3 CR. HRS.
- ARCTK 113 ELEMENTARY SURVEYING 2 CR. HRS.
- ARCTK 116 HISTORY OF ARCHITECTURE AND CONSTRUCTION 3 CR. HRS.
- ARCTK 125 SOILS AND FOUNDATION MATERIALS 3 CR. HRS.
- ARCTK 201 ARCHITECTURAL DRAFTING 4 CR. HRS.
- ARCTK 203 MECHANICS OF MATERIALS 3 CR. HRS.
- ARCTK 210 INTERNSHIP 3 CR. HRS.
- ARCTK 225 SITE DEVELOPMENT 2 CR. HRS.
- ARCTK 229 COST ESTIMATING AND CONSTRUCTION PRACTICE 3 CR. HRS.

ELECTIVE COURSES:
- APPROVED ELECTIVES** 4 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.
** Approved electives: ARCH 111, 112, 205, 206, ARCTK 114, 115, 117, 118, 215, 216, 224, 227, 228, 230, or 255

Recommended Course Sequence:
1st Semester: ARCTK 111; ARCTK 113; ARCTK 116; MATH 130; ENGL 110
2nd Semester: ARCH 131; ARCTK 112; ARCTK 125; ARCH 204; ENGL 201
Summer Semester 1: ARCTK 210
3rd Semester: ARCTK 201; ARCTK 203; ARCTK 225; PHYS 112; Approved Electives
4th Semester: ARCTK 229; Approved Electives; Social Science; Humanities

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 309 for program mission, goals, and student learning outcomes.
Certificate

Total Credit Hours: 35

Program Information: The mission of the Architectural Drafting certificate is to prepare the student to enter employment as a trainee in the area of civil engineering, architecture, or construction, with basic skills and knowledge of the profession.

Additional Program Info: The program is designed to give the student a diversified background in which a number of options for employment positions can be gained. Successful completion of this certificate program contributes to an associate degree in Architectural Construction Technology.

Admission To the Program: Suggested high school courses should include three years of high school math, one laboratory science course, and one year of architectural drafting. Students must complete basic skills placement testing before admission into this program.

To Remain in and Graduate From the Program: Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

Associate in Applied Science

Total Credit Hours: 67

Program Information: The mission of the Automotive Technology Associate in Applied Science degree program is to prepare students for employment as an entry-level technician to be employed by automobile dealers, independent repair shops, mass merchandisers, auto manufacturers, part and component distributors, and other service oriented businesses.

Additional Program Info: Students participate in an eight week internship during their sophomore year. Students are encouraged to take the National Institute for Automotive Service Excellence (ASE) exams, an evaluation program that qualifies the student as a technician in other states as well.

Accreditation: Automotive Service Excellence (ASE) certified program

Admission To the Program: Students entering the program should have mechanical aptitude and be interested in mechanical work. Students must provide their own tools for use throughout the course of study.

Contact Information:

See page 311 for program mission, goals, and student learning outcomes.
Certificate
Total Credit Hours: 16

Program Information: The Cisco Certified Network Associate (CCNA) certificate is designed to provide students with hands-on networking experience in associate-level technologies that focuses on core routing and switching. Instruction includes, but is not limited to networking standards, LAN protocols, WAN protocols, cabling standards, IP addressing, and various routing protocols. The certificate is career-focused and certification aligned aimed at helping students prepare for entry-level networking opportunities.

Accreditation: Cisco Certified Network Associate (CCNA) Certificate

To Remain in and Graduate From the Program:
Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Students should submit an "Application for Degree/Certificate" after completing 8 hours. This form is available in Enrollment Services, L211.

Technology Center
Room 205
(309) 694-5558

---

Cisco Certified Network Associate (CCNA)

PROGRAM COURSES:

- CMCIS 151 NETWORK FUNDAMENTALS 4 CR. HRS.
- CMCIS 152 ROUTING AND SWITCHING ESSENTIALS 4 CR. HRS.
- CMCIS 153 SCALING NETWORKS 4 CR. HRS.
- CMCIS 154 WAN COMMUNICATION 4 CR. HRS.

Recommended Course Sequence:
1st Semester: CMCIS 151; CMCIS 152
2nd Semester: CMCIS 153; CMCIS 154

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 311 for program mission, goals, and student learning outcomes.
Cisco Certified Network Professional (CCNP)

**Program Information:** The Cisco Certified Network Professional (CCNP) certificate is designed to provide students with hands-on networking experience in enterprise-level networking that develops an advanced understanding of routing and switching technologies. Instruction includes, but is not limited to advanced knowledge of routing protocols, LAN protocols, WAN protocols, and further hands-on experience with enterprise-level network devices and their configurations. The certificate is career-focused and certification aligned aimed at helping students prepare for professional-level networking opportunities.

**Accreditation:** Cisco Certified Network Professional (CCNP) Certificate

**To Remain in and Graduate From the Program:** Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Students should submit an “Application for Degree/Certificate” after completing 8 hours. This form is available in Enrollment Services, L211.

See page 312 for program mission, goals, and student learning outcomes.
Associate in Applied Science

Total Credit Hours: 63 to 64

Program Information: The mission of the Cisco Networking Specialist degree is to prepare students for employment in the networking field through education and training on real-world networking equipment by specializing in areas of cabling, network design, core routing and switching technologies, and security concepts, as well as telephony and wireless technologies. The program is aligned to several highly sought-after Cisco certifications including the CCNA and CCNP.

To Remain in and Graduate From the Program:
Students must meet each semester with their assigned academic advisor to plan a course schedule that meets student needs and fulfills program requirements.

Contact Information:
Business, Hospitality, and Information Systems Department

PROGRAM COURSES:
- MACTR 110 PRINT READING MECHANICAL 3 CR. HRS.
- MACTR 121 MACHINE TOOL OPERATION I 3 CR. HRS.
- NCTK 110 INTRODUCTION TO NUMERICAL CONTROL SYSTEMS 1 CR. HR.
- NCTK 212 CNC MACHINE OPERATION I 2 CR. HRS.

Recommended Course Sequence:
1st Semester: MACTR 110; MACTR 121; NCTK 110; NCTK 212

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 313 for program mission, goals, and student learning outcomes.
Certificate
Total Credit Hours: 28

Program Information: The mission of the Commercial Refrigeration Technician certificate program is to provide students with the knowledge and skills pertaining to the maintenance and repairing of ice machines as well as both medium and low temperature walk-ins, reach-ins, and supermarket refrigeration. After completing the program coursework consisting of both lecture and lab experiences, the graduates will be prepared to seek employment as entry-level technicians as refrigeration mechanics or general facilities repair persons.

Additional Program Info: Students must provide the following items: safety glasses with side shields, work gloves, basic scientific calculator, and thumb drive. After completion students can pursue the HVAC Technician Certificate or HVAC/R Technology Associate in Applied Science Degree.

Admission To the Program: The HVAC Residential Installer Certificate is required to enter the program.

To Remain in and Graduate From the Program: Students must attain a grade of “C” or better in each course to remain in and graduate from the program. Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Students must take the Commercial Refrigeration Industry Competency Exam (ICE) in order to graduate.

Contact Information:
Agricultural and Industrial Technologies Department

See page 314 for program mission, goals, and student learning outcomes.
Certificate
Total Credit Hours: 14

Program Information: The mission of the Computed Tomography program is to prepare knowledgeable and skilled entry-level CT technologists to meet the needs of the medical community.

Additional Program Info: This certificate program is online. Please contact the Virtual Campus Office for more information, (309) 694-8888, or icc.edu/VirtualCampus.

Admission To the Program: Successful completion of an accredited program in: radiologic technology, nuclear medicine technology, and/or radiation therapy technology with a minimum cumulative grade point average of 2.50. Currently hold national certification and registration in Radiography, Radiation Therapy, or Nuclear Medicine through ARRT or NMTCB. This one-semester program is offered in the spring and fall semesters with limited enrollment based on clinical availability. Drug screen, criminal background check, physical exam, and proof of immunizations, will be required following program acceptance. Required proof of current CPR certification: American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider by specified date. Proof of certification must be in the form of an original or photocopy of course completion card issued by either the AHA or ARC. Students are required to maintain current CPR certification throughout the program.

To Remain in and Graduate From the Program: Maintain a “C” and/or “S” or better in all RADTK courses.

Certificate
Total Credit Hours: 26

Program Information: The mission of the Computer-Aided Mechanical Drafting Certificate program is to provide students with the knowledge and skills required for entry-level employment in computer-aided design and drafting systems. Individuals will learn manufacturing processes, welding processes, and dimensional metrology.

Additional Program Info: The student can earn the certificate as they work towards a Mechanical Engineering Technology Associate in Applied Science degree and/or a baccalaureate in Manufacturing Engineering Technology or an Industrial Technology Associate in Applied Science degree.

Admission To the Program: Math skills equivalent to two years of high school algebra and one year of high school geometry are required for admission to the program. These courses are available at the College for applicants who need to upgrade their math skills.

To Remain in and Graduate From the Program: Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

Contact Information:
Agricultural and Industrial Technologies Department
East Peoria Campus
AIT Building
Room 209

Computer-Aided Mechanical Drafting

PROGRAM COURSES:
- MECTK 106  BASIC DRAFTING  2 CR. HRS.
- MECTK 110  INTRODUCTION TO THE TOOLS OF TECHNOLOGY  3 CR. HRS.
- MECTK 115  PRINCIPLES OF DIMENSIONAL METROLOGY  2 CR. HRS.
- MECTK 121  INTRODUCTION TO MECHANICAL COMPUTER-AIDED DRAFTING USING AUTOCAD  3 CR. HRS.
- MECTK 123  MECHANICAL DETAILING WITH CAD  3 CR. HRS.
- MECTK 125  3D MODELING WITH PRO-ENGINEER  4 CR. HRS.
- MECTK 138  MANUFACTURING PROCESSES I  3 CR. HRS.
- MECTK 231  INDUSTRIAL FLUID POWER  3 CR. HRS.
- WELD 119  WELDING PROCESSES  3 CR. HRS.

Recommended Course Sequence:
1st Semester: MECTK 110; MECTK 138; MECTK 121; MECTK 106; MECTK 115
2nd Semester: MECTK 123; MECTK 125; WELD 119; MECTK 231
Associate in Applied Science

Total Credit Hours: 67

Program Information: The mission of the Culinary Arts Management Associate in Applied Science degree program is to prepare students for employment in the restaurant industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the restaurant industry.

To Remain in and Graduate From the Program:
Students must meet each semester with their assigned academic advisor to plan a course schedule that meets student needs and fulfills program requirements.

Deconstruction

PROGRAM COURSES:
- DECON 101 INTRODUCTION TO DECONSTRUCTION 1 CR. HRS.
- DECON 102 DECONSTRUCTION METHODS AND MATERIALS 2 CR. HRS.
- DECON 103 PRINCIPLES OF DECONSTRUCTION ASSESSMENT 2 CR. HRS.
- DECON 104 DECONSTRUCTION INTERNSHIP 2 CR. HRS.

Recommended Course Sequence:
1st Semester: DECON 101; DECON 102; DECON 103; DECON 104

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 317 for program mission, goals, and student learning outcomes.
Associate in Applied Science

Total Credit Hours: 81.5

Program Information: The mission of the Dental Hygiene program is to prepare professional, ethical, and competent entry-level dental hygienists, by facilitating development of knowledge, attainment of skills, enhancement of professional behaviors, and increasing awareness of roles and responsibilities to serve diverse needs of patients within the community.

Additional Program Info: Graduates are eligible to take the National Board Dental Hygiene Examination and a regional/state examination for registration as a Dental Hygienist in Illinois, and other states. The dental hygienist works under the supervision of the dentist in dental offices and other health agencies by performing duties delegated by the dentist in accordance with the Illinois Dental Practice Act. Other applicable state practice acts. Duties include cleaning teeth, exposing x-rays, providing oral healthcare instructions to patients, maintaining patient records, etc. Students receive extensive clinical experiences in the Illinois Central College Dental Hygiene Clinic and selected agencies. All required general education courses may be taken prior to admission into the program.

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

Accreditation: The Dental Hygiene program is accredited by the Commission on Dental Accreditation, a specialized accrediting body of the American Dental Association. Contact information for ADA/COA: 211 East Chicago Ave., Chicago, IL 60611-2678. Phone: (312) 440-2500

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a “C” or better. ACT composite score of 20 or above OR completed 18 or more credit hours of college transfer level courses (110 or higher) at ICC or equivalent courses at other colleges with a “C” or better which must include BIOL 140, BIOL 210, and CHEM 115. ICC grade point average (GPA) of 2.0 or above (if you have attended ICC). GPA of 2.0 or above at the last college attended (other than ICC). OR completion of 18 credit hours of ‘program’ courses at ICC or other colleges with a “C” or better. One year high school chemistry with a “C” average or higher OR completion of an equivalent college chemistry course with a “C” or better. One year of another high school science with a “C” average or higher OR completion of an equivalent college science course with a “C” or better. One year of high school algebra with a “C” average or higher OR completion of a college level algebra course with a “C” or better. OR place on a MAT 094 or MAT 097 or MAT 098 with a “C” or better OR placed into MAT 098 or higher. One year high school geometry with a “C” average or higher OR completion of an equivalent college geometry course with a “C” or better OR tested out of MAT 095. Basic Nutrition, Chemistry, Human Anatomy and Physiology, and Microbiology must be completed within five (5) years of admission to the program.

To Remain in and Graduate From the Program: A grade of “C” or better in all DHYGN courses, BIOL 140, BIOL 210, CHEM 115, and FCS 110.

Dental Hygienist

**GENERAL COURSES:**

- ENGL 110 COMPOSITION I
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE
- PSY 110 INTRODUCTION TO PSYCHOLOGY
- BIOL 140 HUMAN ANATOMY AND PHYSIOLOGY**
- CHEM 115 FOUNDATIONS OF CHEMISTRY**
- HUMANITIES*

**PROGRAM COURSES:**

- BIOL 210 MICROBIOLOGY**
- DHYGN 110 DENTAL SCIENCE I
- DHYGN 111 DENTAL SCIENCE II
- DHYGN 113 FUNDAMENTALS OF DENTAL HYGIENE AND INFECTION CONTROL
- DHYGN 115 INTRODUCTION TO DENTAL HYGIENE
- DHYGN 117 DENTAL SPECIALTIES
- DHYGN 131 INTRODUCTION TO DENTAL HYGIENE CLINICAL APPLICATIONS
- DHYGN 133 PRECLINICAL DENTAL HYGIENE
- DHYGN 135 DENTAL RADIOLOGY
- DHYGN 137 MEDICAL EMERGENCIES
- DHYGN 139 SPECIAL POPULATIONS
- DHYGN 210 COMMUNITY DENTAL HEALTH
- DHYGN 212 DENTAL MATERIALS
- DHYGN 220 NITROUS OXIDE ANALGESIA
- DHYGN 222 PREVENTIVE MODALITIES
- DHYGN 226 LOCAL ANESTHETICS FOR THE DENTAL HYGIENIST
- DHYGN 228 NEW DIMENSIONS IN DENTAL HYGIENE
- DHYGN 230 DENTAL HYGIENE CLINIC I
- DHYGN 231 DENTAL HYGIENE CLINIC II
- DHYGN 232 DENTAL HYGIENE CLINIC III
- DHYGN 243 ORAL PATHOLOGY I
- DHYGN 244 PERIODONTOLOGY
- DHYGN 245 ORAL PATHOLOGY II
- DHYGN 246 TRANSITIONS FOR THE DENTAL HYGIENIST
- DHYGN 247 OFFICE PRACTICES IN DENTISTRY
- DHYGN 248 PHARMACOLOGY I FOR DENTAL HYGIENISTS
- DHYGN 249 PHARMACOLOGY II FOR DENTAL HYGIENISTS
- FCS 110 BASIC NUTRITION**
- SOC 110 AN INTRODUCTION TO SOCIOLOGY

*See specific requirements for Associate in Applied Science degree.

**These courses must be completed within five (5) years of admission to the program.

Recommended Course Sequence:

Previous Semester (for pre-program courses): BIOL 140; CHEM 115
1st Semester: ENGL 110; BIOL 210; DHYGN 110; DHYGN 113; DHYGN 115; DHYGN 117; Humanities
2nd Semester: COMM 110; FCS 110; DHYGN 111; DHYGN 131; DHYGN 133; DHYGN 135; DHYGN 137; DHYGN 139
Summer Semester: DHYGN 212; DHYGN 220; DHYGN 222; DHYGN 230; DHYGN 243
3rd Semester: DHYGN 210; DHYGN 226; DHYGN 231; DHYGN 244; DHYGN 245; DHYGN 248
4th Semester: SOC 110; PSY 110; DHYGN 232; DHYGN 246; DHYGN 247; DHYGN 249

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 318 for program mission, goals, and student learning outcomes.
Associate in Applied Science

Total Credit Hours: 72

Program Information: The mission of the Diesel Powered Equipment Technology Associate in Applied Science degree program is to provide the training necessary to maintain, service, and diagnose system failures as applied to agricultural equipment, construction equipment, and heavy truck. The program actively encourages students to expand their horizons to permit upward mobility through general education courses and other related learning experiences such as those associated with the student club organization. The program also places a strong emphasis on developing and expanding the student's work ethic so that the student is fully prepared as an entry-level service technician.

Additional Program Info: Students complete two, eight-week internships during the sophomore year of training. Technical training reflects the technology represented by the agricultural equipment, construction equipment, and heavy truck industries. The graduate’s salary will directly commensurate with the service professional's academic performance, work ethic, and motivation. Graduates have the opportunity to transfer to a four-year university. Students must be enrolled as full-time students and complete the required coursework in the prescribed sequence. Students must provide their own tools for use throughout the course of study.

Admission To the Program: High school graduate or equivalent. Candidate applications are screened. Acceptance into the program is based on the caliber of competing applications and departmental approval. Applicants must submit separate application materials for the DPET Program to the Program Coordinator. Applicants must schedule an on-campus meeting with the Program Coordinator. Application forms, procedures and policies are available from the Program Coordinator at the DPET Building or by calling (309) 694-8445 or 694-5616. Students enter the program during the fall semester only. Deadline dates for complete applications are December 1, and April 1, to be considered for the following fall semester. Applications received after April 1 will be considered should openings occur prior to the start of fall semester. High School Recommendations: 3 years English, 2 years mathematics, agriculture mechanics and/or auto mechanics, welding, agriculture course work.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. To remain in and graduate from the program, "C" or better in all required general education and DPET program courses and pass a substance abuse screening.

Diesel Powered Equipment Technology

GENERAL COURSES:
- ENGL 110 Composition I 3 CR. HRS.
- COMMUNICATION* 3 CR. HRS.
- SOCIAL SCIENCE* 3 CR. HRS.
- AGBUS 118 Agricultural Computations 3 CR. HRS.
- HUMANITIES* 3 CR. HRS.
- DPET 130 Principles of Internal Combustion Engines 4 CR. HRS.

PROGRAM COURSES:
- DPET 132 Electrical Systems of Heavy Equipment 3 CR. HRS.
- DPET 133 Engine Rebuilding, Theory and Practice 3 CR. HRS.
- DPET 134 Air Conditioning of Heavy Equipment 3 CR. HRS.
- DPET 229 Hydraulics 3 CR. HRS.
- DPET 230 Harvesting Equipment 2 CR. HRS.
- DPET 231 Planting and Tillage Equipment 2 CR. HRS.
- DPET 232 Transmissions and Final Drive 3 CR. HRS.
- DPET 233 Occupational Internship and Seminar I 4 CR. HRS.
- DPET 234 Introduction to Diesel Fuel Systems 2 CR. HRS.
- DPET 235 Electronic Controls/Monitoring Systems 3 CR. HRS.
- DPET 236 Hydraulic System Analysis and Repairs 3 CR. HRS.
- DPET 238 Occupational Internship and Seminar II 4 CR. HRS.
- DPET 239 Power Train Diagnostics 2 CR. HRS.
- DPET 240 Service Center Management 1 CR. HR.
- DPET 241 Mechanical Diesel Fuel Systems 3 CR. HRS.
- DPET 242 Electronic Fuel Systems 3 CR. HRS.
- DPET 243 Engine Performance Analysis 2 CR. HRS.
- DPET 244 Guidance Systems 2 CR. HRS.
- DPET 245 Truck Suspension, Brakes and Chassis 3 CR. HRS.
- DPET 246 Industry Qualifications 2 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.

Recommended Course Sequence:
1st Semester: DPET 132; DPET 133; DPET 229; AGBUS 118; ENGL 110
2nd Semester: DPET 133; DPET 234; DPET 235; DPET 240; Communication; Social Science
Summer Semester 1: DPET 230; DPET 231; DPET 232; DPET 134
3rd Semester: DPET 233; DPET 245; DPET 241; DPET 242; DPET 244
4th Semester: DPET 236; DPET 238; DPET 239; DPET 243; DPET 246; Humanities

## Associate in Applied Science

**Total Credit Hours:** 61

**Program Information:** The mission of the Associate in Applied Science Drug and Alcohol Counselor Training degree is to prepare students to work as a professional in the field of drug and alcohol treatment. After completing the curriculum, students can complete the Illinois Alcohol and Other Drug Abuse Professional Certification Association (IAODAPCA) certification exam.

**Additional Program Info:** In addition to the listed general education requirements, students will be exposed to a variety of issues and counseling skills specific to the needs of the chemically dependent client. This training will provide employment opportunities in a variety of community mental health programs or other Illinois Department of Alcohol and Substance Abuse recognized chemical dependency programs. The core classes listed in this curriculum will also qualify as accepted continuing education credits for those students who are currently certified in pursuit of continuing education specific to the profession of drug and alcohol counseling.

**Accreditation:** Illinois Alcohol and Other Drug Abuse Professional Certification Association (IAODAPCA) certification exam

**To Remain in and Graduate From the Program:** Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

### Drug and Alcohol Counselor Training

**GENERAL COURSES:**

- ENGL 110  COMPOSITION I  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- PSY 110  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- BIOL 140  HUMAN ANATOMY AND PHYSIOLOGY  4 CR. HRS.
- MATHEMATICS*  3 CR. HRS.
- HUMANITIES*  3 CR. HRS.

**PROGRAM COURSES:**

- DACT 110  FOUNDATIONS I  3 CR. HRS.
- DACT 111  ADDICTION COUNSELING I  3 CR. HRS.
- DACT 112  FOUNDATIONS II  3 CR. HRS.
- DACT 113  ADDICTION COUNSELING II  3 CR. HRS.
- DACT 210  ADDICTION COUNSELING III  3 CR. HRS.
- DACT 211  COUNSELING AND HUMAN CHANGE  3 CR. HRS.
- DACT 212  INTERNSHIP SEMINAR  9 CR. HRS.
- HUMSV 110  INTRODUCTION TO HUMAN SERVICES  3 CR. HRS.
- PSY 112  PERSONALITY  3 CR. HRS.
- PSY 225  ABNORMAL PSYCHOLOGY  3 CR. HRS.
- PSY 250  INTRODUCTION TO RESEARCH METHODS IN THE BEHAVIORAL SCIENCES  3 CR. HRS.

**ELECTIVE COURSES:**

- PSYCHOLOGY/SOCIOLOGY ELECTIVE**  3 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.
** SOC 120, 219, PSY 202, 210

**Recommended Course Sequence:**
- 1st Semester: PSY 110; BIOL 140; DACT 110; HUMSV 110; ENGL 110
- 2nd Semester: COMM 110; DACT 112; DACT 113; Mathematics
- 3rd Semester: PSY 112; DACT 210; DACT 211; PSY 225; Humanities; PSY/SOC Electives
- 4th Semester: PSY 250; DACT 212

Associate in Applied Science

Total Credit Hours: 69

Program Information: The mission of the General Motors Automotive Service Education Program (GM ASEP) Associate in Applied Science degree program is to prepare students for employment in the automotive repair industry by educating them in the fundamental concepts, knowledge, hands-on techniques, and forward thinking skills to serve as the next generation of automotive technicians.

Additional Program Info: Students completing the program will meet approximately 80 percent of GM Service Training Standards. The program involves attending classroom lectures and participating in laboratory activities using General Motors products at Illinois Central College. In addition, the student will intern at a General Motors dealership or an AC Delco Professional Service Center four times. Upon graduation, the student will be prepared to assume a position as an entry-level dealer service technician in a General Motors dealership. During the course of study, the students are encouraged to take the National Institute for Automotive Service Excellence (ASE) exams, an evaluation program that qualifies the student as a technician. Students must provide their own tools for use throughout the program of study. Students must have a sponsor for the internship before acceptance into the program.

Accreditation: Automotive Service Excellence (ASE) certified program through the Automotive Technicians Education Foundation (NATEF)

To Remain in and Graduate From the Program: Students must meet with an academic advisor prior to being accepted into the program. Their assigned academic advisor will plan a specific course schedule meeting Illinois Central College and personal requirements. Students must maintain a 2.8 GPA throughout the program.

Associate in Applied Science

Total Credit Hours: 61

Program Information: The mission of the Graphic Communications Associate in Applied Science degree program is to prepare students for employment in the graphic communications industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills for page layout, web page development, packaging, screen printing, and digital publishing workflows.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

Contact Information:
Graphic Communication and Digital Publishing Coordinator

(309) 694-5147

Graphic Communications

GENERAL COURSES:

- ENGL 110 COMPOSITION I 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- MATHEMATICS* 3 CR. HRS.
- LABORATORY SCIENCE* 4 CR. HRS.
- HUMANITIES* 3 CR. HRS.

PROGRAM COURSES:

- GCOMM 110 INTRODUCTION TO GRAPHIC COMMUNICATIONS 4 CR. HRS.
- GCOMM 112 VECTOR GRAPHICS WITH ADOBE ILLUSTRATOR 3 CR. HRS.
- GCOMM 130 PAGE LAYOUT WITH ADOBE INDESIGN 3 CR. HRS.
- GCOMM 140 PRINTING METHODS 4 CR. HRS.
- GCOMM 150 PRODUCTION TECHNIQUES AND PROCESSES 3 CR. HRS.
- GCOMM 230 ADVANCE PAGE LAYOUT AND INTERACTIVE CROSS MEDIA 3 CR. HRS.
- GCOMM 235 DIGITAL PHOTOGRAPHY AND SCANNING FOR PUBLISHING 3 CR. HRS.
- GCOMM 245 WEB PUBLISHING WITH ADOBE DREAMWEAVER 3 CR. HRS.
- GCOMM 247 ADVANCE WEB PUBLISHING WITH ADOBE DREAMWEAVER AND FLASH 3 CR. HRS.
- GCOMM 250 BEGINNING ADOBE PHOTOSHOP TECHNIQUES 3 CR. HRS.
- GCOMM 251 ADVANCED ADOBE PHOTOSHOP TECHNIQUES 3 CR. HRS.
- GRDSN 140 GRAPHIC DESIGN I 3 CR. HRS.
- GRDSN 142 TYPOGRAPHY 3 CR. HRS.

ELECTIVE COURSES:

- APPROVED ELECTIVE 1 CR. HR.

* See specific requirements for Associate in Applied Science Degree.

Recommended Course Sequence:
1st Semester: GCOMM 110, GCOMM 112, GCOMM 130; GCOMM 235; GCOMM 250
2nd Semester: GCOMM 140; GCOMM 150; GCOMM 230; GCOMM 251; ENGL 110
3rd Semester: GCOMM 245; GRDSN 140; COMM 110; PSY 110; Mathematics; Approved Elective
4th Semester: GCOMM 247; GRDSN 142; Laboratory Science; Humanities

See page 324 for program mission, goals, and student learning outcomes.
**Associate in Applied Science**

**Total Credit Hours:** 63 to 64

**Program Information:** The mission of the Green Building Environment Associate in Applied Science degree program is to provide the student with the knowledge to work in the energy areas, the built environment, building management, and other jobs yet to be defined. The student will learn about the evolving and developing sustainability and green areas and how to become better stewards of the environment. After completing this program, graduates will be able to work as entry-level weatherization technicians, energy auditors, and indoor air quality technicians in residential and commercial buildings.

**Additional Program Info:** Previous experience in energy areas is not required to enter the program. Students need to have basic computer skills using Microsoft Word, Excel, and Powerpoint before admission into this program. Students must provide the following items: safety glasses with side shields, work gloves, basic scientific calculator, and thumb drive.

**Admission To the Program:** COMPASS Reading score of 70 and MAT 094 or higher, or an equivalent course with a grade of "C" or better, or department approval.

**To Remain in and Graduate From the Program:** Student must attain a grade of "C" or better to remain in and graduate from the program. Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

**Contact Information:**

Associate in Applied Science

Total Credit Hours: 62 to 63

Program Information: The mission of the Associate in Applied Science Human Services program is to provide an educational foundation that addresses the attitudes/values, skills, and knowledge which are essential for the personal growth of each student to become an effective human services worker.

Admission To the Program: Must be a high school graduate or equivalent and complete the COMPASS Placement Test (contact ICC Testing Office, 694-5234).

To Remain in and Graduate From the Program: Human Service students pursuing the Associate in Applied Science Generalist degree must meet with the Human Service Program advisor to select elective courses which will prepare them for their career goals. Students may be dismissed from the program if there is a failure to meet one or more of the following standards: (1) maintaining at least a 2.0 GPA in all course work; (2) maintaining high integrity; personal responsibility; and satisfactory demonstration of skills and abilities prerequisite to the ethical delivery of services in the field; maintaining professional standards at all times representing Illinois Central College following the National Organization of Human Services Code of Ethics; (3) minimal absences in all course work; (4) completion of prior Human Services course work does not guarantee permission to take the internship course and to graduate from the program; (5) successful, timely completion of internship; (6) felony convictions may prevent a student from successfully obtaining employment in the human services field.

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 327 for program mission, goals, and student learning outcomes.
Certificate
Total Credit Hours: 16

Program Information: The mission of the Heating Ventilation and Air Conditioning (HVAC) Residential Installer certificate program is to provide students with the knowledge and skills to understand and follow the manufacturer's specifications when installing basic residential heating and air conditioning equipment as well as the skills to complete the installation. Students will learn the theory of residential heating and cooling through extensive laboratory experience as well as lectures. After completing this program the graduates will be able to work as entry-level residential furnace and air conditioner installers.

Additional Program Info: This is the first certificate individuals should earn prior to working in the HVAC industry. Previous experience in residential heating and cooling is not required to enter the program. Students must provide their own safety glasses with side shields, work gloves, basic scientific calculator, and thumb drive. After completion students can pursue the HVAC Technician Certificate, Commercial Refrigeration Technician Certificate, or HVAC/R Technology Associate in Applied Science Degree.

Admission To the Program: COMPASS Reading score of 70 and MAT 094 or higher, or an equivalent course with a grade of "C" or better, or department approval.

To Remain in and Graduate From the Program: Students must attain a grade of "C" or better in each course to remain in and graduate from the program. Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

HVAC Residential Installer

PROGRAM COURSES:
- ARCTK 119  BLUEPRINT READING CONSTRUCTION 1 CR. HR.
- REACT 110  INTRODUCTION TO REFRIGERATION 4 CR. HRS.
- REACT 118  ELECTRICITY AS IT APPLIES TO HVAC/R 4 CR. HRS.
- REACT 119  SHEET METAL FOR HVAC/R 2 CR. HRS.
- REACT 120  RESIDENTIAL FURNACES 4 CR. HRS.
- REACT 139  RESIDENTIAL SYSTEMS INSTALLATION 1 CR. HR.

Recommended Course Sequence:
1st Semester: REACT 110; REACT 118; REACT 119; REACT 120; ARCTK 119
2nd Semester: REACT 139
Certificate

Total Credit Hours: 27

Program Information: The mission of the Heating Ventilation and Air Conditioning (HVAC) Technician certificate program is to provide students with the knowledge and skills pertaining to the maintenance and repairing of air conditioning systems as well as the following heating systems: natural gas, propane, electric, air source heat pumps, geothermal, and hydronic heating systems. After completing the program coursework consisting of both lecture and extensive laboratory experiences, the graduates will be able to work as entry-level HVAC technicians or general facilities repair persons.

Additional Program Info: Students must provide the following items: safety glasses with side shields, work gloves, basic scientific calculator, and thumb drive. After completion students can pursue the Commercial Refrigeration Technician Certificate or HVAC/R Technology Associate in Applied Science Degree.

Admission To the Program: The HVAC Residential Installer Certificate is required to enter the program.

To Remain in and Graduate From the Program: Students must attain a grade of "C" or better in each course to remain in and graduate from the program. Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Students must take the Residential Heating, Air Conditioning, and Ventilation Industry Competency Exam (ICE) in order to graduate.

See page 329 for program mission, goals, and student learning outcomes.
Associate in Applied Science

Total Credit Hours: 65 to 69

**Program Information:** The mission of the Industrial Electrical Technology Associate in Applied Science degree program is to use lecture and hands-on laboratory experience to prepare students for employment in the Industrial Electrical field by educating them in the knowledge, skills, and behaviors as an industrial electrical technician.

**Admission To the Program:** Math skills equivalent to two years of high school algebra and one year of high school geometry are required for admission to the program. Students applying for admission to the program should have high school transcripts and ACT scores or college transcripts sent to Enrollment Services, (309) 694-5235, or should make an appointment with the Testing Office, (309) 694-5234, for a math test and a reading test. Students must also complete basic skills placement testing before admission into this program.

**To Remain in and Graduate From the Program:** Students enrolled in the Industrial Electrical Technology Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

**Contact Information:**
Agricultural and Industrial Technologies Department

---

**Industrial Electrical Technology**

**GENERAL COURSES:**
- ENGLISH* 3 CR. HRS.
- COMMUNICATION* 3 CR. HRS.
- SOCIAL SCIENCE* 3 CR. HRS.
- LABORATORY SCIENCE/MATHEMATICS* 7 CR. HRS.
- HUMANITIES* 3 CR. HRS.

**PROGRAM COURSES:**
- CMCIS 147 FUNDAMENTALS OF VOICE AND DATA CABLING I or CMCIS 151 NETWORK FUNDAMENTALS 4 CR. HRS.
- ELCTK 111 RESIDENTIAL AND COMMERCIAL WIRING 2 CR. HRS.
- ELCTK 112 ELECTRONIC CAD APPLICATIONS I 2 CR. HRS.
- ELCTK 150 INDUSTRIAL ELECTRICITY 4 CR. HRS.
- ELCTK 151 ELECTRICAL SYSTEMS TROUBLESHOOTING 3 CR. HRS.
- ELCTK 215 PROGRAMMABLE CONTROLLERS 4 CR. HRS.
- ELCTK 231 INDUSTRIAL ELECTRONICS 4 CR. HRS.
- ELCTK 232 ELECTRONICS SYSTEMS TROUBLESHOOTING 3 CR. HRS.
- ELCTK 245 MICROPROCESSORS AND MICROCONTROLLERS 4 CR. HRS.
- ELCTK 255 INDEPENDENT STUDY 1-5 CR. HRS.
- ELCTS 131 INTRODUCTION TO BASIC ELECTRICITY 2 CR. HRS.
- ELCTS 132 SERVICE ELECTRONICS-D.C. CIRCUITS 2 CR. HRS.
- ELCTS 133 SERVICE ELECTRONICS-A.C. CIRCUITS 2 CR. HRS.
- ELCTS 134 SERVICE ELECTRONICS-BASIC SOLID STATE 2 CR. HRS.
- ELCTS 135 SERVICE ELECTRONICS-ADVANCED SOLID STATE 2 CR. HRS.
- ELCTS 136 SERVICE ELECTRONICS-DIGITAL CIRCUITS 2 CR. HRS.
- MECTK 231 INDUSTRIAL FLUID POWER 3 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.

**Recommended Course Sequence:**
1st Semester: ELCTS 131; ELCTS 132; ELCTS 133; ELCTK 111; Mathematics; English
2nd Semester: ELCTS 134; ELCTS 135; ELCTS 136; ELCTK 150; ELCTK 112; Laboratory Science
3rd Semester: ELCTK 151; ELCTK 215; ELCTK 245; CMCIS 147 or CMCIS 151; MECTK 231; Communication
4th Semester: ELCTK 231; ELCTK 232; ELCTK 255; Social Science; Humanities

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 330 for program mission, goals, and student learning outcomes.
Interpreter Preparation

GENERAL COURSES:
- ENGL 110  COMPOSITION I  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- SOCIAL SCIENCE*  3 CR. HRS.
- LABORATORY SCIENCE/MATHEMATICS*  7 CR. HRS.
- HUMANITIES*  3 CR. HRS.

PROGRAM COURSES:
- IPP 110  AMERICAN SIGN LANGUAGE I  4 CR. HRS.
- IPP 111  AMERICAN SIGN LANGUAGE II  4 CR. HRS.
- IPP 112  AMERICAN SIGN LANGUAGE III  3 CR. HRS.
- IPP 115  DEAF CULTURE I  3 CR. HRS.
- IPP 118  AMERICAN SIGN LANGUAGE: FINGERSPELLING AND NUMBERING I  2 CR. HRS.
- IPP 120  INTRODUCTION TO INTERPRETING  2 CR. HRS.
- IPP 121  PRACTICAL AND ETHICAL APPLICATIONS OF INTERPRETING  3 CR. HRS.
- IPP 210  AMERICAN SIGN LANGUAGE IV  3 CR. HRS.
- IPP 211  AMERICAN SIGN LANGUAGE V  3 CR. HRS.
- IPP 216  OCCUPATIONAL INTERPRETING  3 CR. HRS.
- IPP 220  INTERPRETING I  3 CR. HRS.
- IPP 221  INTERPRETING II  3 CR. HRS.
- IPP 230  VOICE INTERPRETING I  3 CR. HRS.
- IPP 231  VOICE INTERPRETING II  3 CR. HRS.
- IPP 260  INTERPRETING INTERNSHIP  3 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.

Recommended Course Sequence:
1st Semester: IPP 110; IPP 115; IPP 120; ENGL 110; COMM 110
2nd Semester: IPP 111; IPP 118; IPP 121; Social Science; Mathematics/Science
Summer Semester 1: IPP 112
3rd Semester: IPP 210; IPP 216; IPP 220; IPP 230; Mathematics/Science
4th Semester: IPP 211; IPP 221; IPP 231; IPP 260; Humanities

Associate in Applied Science

Total Credit Hours: 61

Program Information: The mission of the Associate in Applied Science Law Enforcement degree is to prepare graduates for employment in the law enforcement field by educating them in general education as well as specialized courses in criminal justice to prepare them to enter the law enforcement field.

Admission To the Program: Students must submit: (#1) an application for admission; (#2) transcripts of high school credit or G.E.D. certificate; and (#3) scores from the Illinois Central College Basic Skills Test. Students with no previous law enforcement experience are required to attend the summer internship session.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Students should be aware that each law enforcement agency has its own employment criteria. Most require a minimum of a high school diploma or its equivalent, verification of excellent physical health, and that the applicant be at least 21 years of age. Many positions in law enforcement require advanced study beyond a two-year degree.

Contact Information:
Social Sciences and Public Services Department

Law Enforcement

GENERAL COURSES:
- ENGL 110 COMPOSITION I 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- SOC 110 AN INTRODUCTION TO SOCIOLOGY 3 CR. HRS.
- LABORATORY SCIENCE* 4 CR. HRS.
- MATHEMATICS* 3 CR. HRS.
- HUMANITIES* 3 CR. HRS.

PROGRAM COURSES:
- CMGEN 120 COMPUTER APPLICATIONS 3 CR. HRS.
- CRJ 110 INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM 3 CR. HRS.
- CRJ 112 POLICE OPERATIONS 3 CR. HRS.
- CRJ 114 INTRODUCTION TO CORRECTIONS 3 CR. HRS.
- CRJ 118 JUVENILE DELINQUENCY 3 CR. HRS.
- CRJ 130 INTRODUCTION TO INVESTIGATION 3 CR. HRS.
- CRJ 201 INTERNSHIP IN CRIMINAL JUSTICE** APPROVED ELECTIVE*** 3 CR. HRS.
  or CRJ 225 CRIMINAL LAW 3 CR. HRS.
- CRJ 227 ADMINISTRATION OF JUSTICE 3 CR. HRS.
- CRJ 250 POLICE ORGANIZATION AND ADMINISTRATION 3 CR. HRS.
- ENGL 111 COMPOSITION II 3 CR. HRS.
- POLSC 115 AMERICAN NATIONAL GOVERNMENT or POLSC 119 STATE AND LOCAL GOVERNMENT 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY or SOC 210 INTRODUCTION TO CRIMINOLOGY 3 CR. HRS.

ELECTIVE COURSES:
- APPROVED ELECTIVE*** 3 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.
** In order to be eligible to enroll in CRJ 201 Internship in Criminal Justice, students must attain an overall grade point average of 2.0. Students must be enrolled in Law Enforcement Program and have completed a minimum of 20 semester hours.
*** Approved Electives are such courses as CRJ 111, 230, 255, or any course approved by your advisor.

Recommended Course Sequence:
1st Semester: CRJ 110; CRJ 118; SOC 110; ENGL 110; CMGEN 120
2nd Semester: CRJ 112; CRJ 130; PSY 110; ENGL 111; COMM 110; Approved Elective
Summer Semester 1: CRJ 201 or Approved Elective
3rd Semester: CRJ 225; CRJ 250; POLSC 119; Humanities; Mathematics
4th Semester: CRJ 227; SOC 210; CRJ 114; Laboratory Science

Certificate

Total Credit Hours: 27 to 30

Program Information: The mission of the Library Technical Assistant certificate program is to prepare students for employment in various types of libraries and/or for the foundational education in information management for a master's degree in library science. LTA graduates possess collection development, cataloging, media technology, technology troubleshooting, reference, collaborative, and patron services skills, and are eager to network and serve the surrounding community.

Additional Program Info: The Library Technical Assistant certificate program is designed to prepare individuals for immediate entry into positions which help library and information services professionals acquire, prepare and organize materials, and assist library users in finding materials and information. Emphasis is on acquiring practical skills needed in day-to-day operations in a library or media center.

To Remain in and Graduate From the Program: Students enrolled in this certificate program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

Certificate

Total Credit Hours: 41

Program Information: The mission of the Licensed Practical Nurse certificate program is to effectively provide educational resources within theory, laboratory, and clinical experiences to prepare graduates for a successful professional nursing career as a Licensed Practical Nurse.

Accreditation: The Licensed Practical Nurse certificate program is fully accredited by the Illinois Department of Financial and Professional Regulation. The graduate will be eligible to take the National Council Licensure Examination for Practical Nurses (NCLEXPN) and apply for licensure as a Licensed Practical Nurse (LPN).

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of “C” or better. ACT composite score of 16 or above OR have completed 9 or more credit hours of college transfer level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of “C” or better. Grade point average (GPA) of 2.0 or above at ICC or last college attended OR completion of 9 credit hours of “program” courses with a grade of “C” or better. One year high school algebra with a grade of “C” average or higher OR completion of MAT 094 or MAT 097 or MAT 099 with a grade of “C” or better OR placement into MAT 098 or higher.

To Remain in and Graduate From the Program: Maintain a grade of “C” or better in all required program courses.

Requirements Upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

Recommended High School Subjects: (1) three years of English (2) one year of biology (3) two years of mathematics, including one year of algebra.

Licensed Practical Nurse

PROGRAM COURSES:

- BIOL 140  HUMAN ANATOMY AND PHYSIOLOGY  4 CR. HRS.
- ENGL 110  COMPOSITION I  3 CR. HRS.
- FCS 110  BASIC NUTRITION  2 CR. HRS.
- HEOCC 114  INTRODUCTION TO INTERDISCIPLINARY HEALTH CARE  1 CR. HR.
- HLTH 121  MEDICAL TERMINOLOGY  2 CR. HRS.
- PRNRS 110  PRACTICAL NURSING I  9 CR. HRS.
- PRNRS 111  PRACTICAL NURSING II  12 CR. HRS.
- PRNRS 112  PRACTICAL NURSING III  5 CR. HRS.
- PSY 110  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.

Underlined courses may be taken prior to admission into the program.

Recommended Course Sequence:
1st Semester: PRNRS 110; BIOL 140; HEOCC 114
2nd Semester: PRNRS 111; ENGL 110; HLTH 121; FCS 110
Summer Semester 1: PRNRS 112; PSY 110
**LPN to RN Completion Program**

**GENERAL COURSES:**
- **ENGL 110** COMPOSITION I 3 CR. HRS.
- **COMM 110** COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- **PSY 110** INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- **BIOL 205** PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I 4 CR. HRS.
- **BIOL 206** PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II 4 CR. HRS.
- **HUMANITIES** 3 CR. HRS.

**Program Courses:**
- **BIOL 210** MICROBIOLOGY 4 CR. HRS.
- **FCS 110** BASIC NUTRITION 3 CR. HRS.
- **FCS 120** PRINCIPLES OF NUTRITION 3 CR. HRS.
- **HLTH 121** MEDICAL TERMINOLOGY 2 CR. HRS.
- **RNRS 111** PHARMACOLOGY FOR NURSES 2 CR. HRS.
- **RNRS 125** NURSING: LPN to RN TRANSITION 2 CR. HRS.
- **RNRS 150** PRINCIPLES OF SAFE MEDICATION ADMINISTRATION 1 CR. HR.
- **RNRS 210** HEALTH ASSESSMENT OF THE ADULT PATIENT 2 CR. HRS.
- **RNRS 220** NURSING III 10 CR. HRS.
- **RNRS 221** NURSING IV 10 CR. HRS.
- **RNRS 222** NURSING MANAGEMENT AND LEADERSHIP 2 CR. HRS.
- **SOC 110** AN INTRODUCTION TO SOCIOLOGY 3 CR. HRS.

* See specific requirements for an Associate in Applied Science degree

Underlined courses may be taken prior to admission into the program.

**Recommended Course Sequence:**
1st Semester: **BIOL 205; ENGL 110; RNRS 150; RNRS 210; HLTH 121; COMM 110; SOC 110**
2nd Semester: **RNRS 220; RNRS 221; RNRS 222; RNRS 210; **
3rd Semester: **RNRS 220; RNRS 222; RNRS 222**
4th Semester: **RNRS 222; RNRS 222**

Associate in Applied Science

Total Credit Hours: 62

Program Information: The mission of the Associate in Applied Science Management degree program is to prepare students for employment in managerial positions through education in management, fundamental business concepts, and classes specific to particular industry option.

Additional Program Info: The Associate in Applied Science Management program of study is designed for students preparing for managerial positions but provides the student with the opportunity to specialize by pursuing electives in one of two management career options – Supervision or Hospitality. Internship courses are offered whereby students can gain work experience in their chosen field and earn college credit while working at an approved business location. Program requirements can be completed in four semesters of full-time study or on a part-time basis. The program is not designed for college transfer, although some courses may transfer with approval from four-year institutions.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Applied Science Degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Students should submit an “Application for Degree/Certificate” after completing 40 or more semester hours. The form is available in the Enrollment Services, L211.

- MGMT 205 PERSONNEL MANAGEMENT 3 CR. HRS.
- MKTG 112 PRINCIPLES OF MARKETING 3 CR. HRS.
- CMGEN 120 COMPUTER APPLICATIONS 3 CR. HRS.
- CMPSC 120 BUSINESS COMPUTER SYSTEMS 3 CR. HRS.

ELECTIVE COURSES:

- APPROVED ELECTIVES** 15 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.

** Students who wish to pursue a career in supervision should complete: BUS 200, MGMT 114, 211, 215, 216 or other course with departmental approval. Students who wish to pursue a career in hospitality management should complete: BUS 121, CA 151; HOS 110, 111, 112 or other course with departmental approval.

Recommended Course Sequence:
1st Semester: ENGL 110; BUS 112; BUS 120; MGMT 113; ACCTG 120; CMGEN 120 or CMPSC 120
2nd Semester: ENGL 125 or COMM 110; BUS 215; MKTG 112; Approved Electives (2)
3rd Semester: ECON 105 or ECON 110; Approved Electives (2);
   Laboratory Science/Mathematics
4th Semester: MGMT 205; BUS 220; MGMT 213 or MGMT 260; BUS 151; Humanities;
   Approved Elective

See page 335 for program mission, goals, and student learning outcomes.
Associate in Applied Science

Total Credit Hours: 68

Program Information: The mission of the Supply Chain Management program is to prepare students for employment in Supply Chain Management through education in management, fundamental business concepts, and supply chain management.

Additional Program Info: The Associate in Applied Science Management program of study is designed for students preparing for managerial positions but provides the student with the opportunity to specialize by pursuing electives in one of three management career options: Supervision; Supply Chain Management, or Hospitality Management. Internship courses are offered whereby students can gain work experience in their chosen field and earn college credit while working at an approved business location. Program requirements can be completed in four semesters of full-time study or on a part-time basis. The program is not designed for college transfer, although some courses may transfer with approval from four-year institutions.

Students enrolled in the Associate in Applied Science Degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

To Remain in and Graduate From the Program: Students should submit an "Application for Degree/Certificate" after completing 40 or more semester hours of this program. This form is available in the Student Service Center, L211.

Associate in Applied Science

**Total Credit Hours:** 60 to 63

**Program Information:** The mission of the Manufacturing Engineering Technology Associate in Applied Science degree program is to prepare students with the skills and knowledge for entry-level positions in manufacturing firms. Students will learn about manufacturing processes as well as manufacturing equipment, parts, and quality problems.

**Additional Program Info:** The college maintains articulation agreements with several universities from which students may pursue a bachelors degree upon graduating.

**Admission To the Program:** Students must complete basic skills placement test before entering the program. Contact the Testing Center at (309) 694-5234.

**Contact Information:** Agricultural and Industrial Technologies Department East Peoria Campus AIT Building, Room 209 (309) 694-5171 or (309) 694-5510

Certificate
Total Credit Hours: 37

Program Information: The mission of the Massage Therapist program is to provide the curriculum and clinical experiences necessary to empower graduates with knowledge, skills, and affective elements necessary to successfully practice massage therapy in the workforce.

Additional Program Info: Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

Admission To the Program: High school graduate or equivalent. Completion of TM 110 with a grade of “C” or better. Completion of BIOL 140 with a grade of “C” or better (Note: BIOL 140 requires a COMPASS reading score of 81 or higher or completion of appropriate ENGL prerequisites).

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

To Remain in and Graduate From the Program: Maintain a “C” or better in all required program courses.

See page 337 for program mission, goals, and student learning outcomes.
## Associate in Applied Science

**Total Credit Hours:** 68

### Program Information:
The mission of the Mechanical Engineering Technology Associate in Applied Science program is to prepare students to continue on for a bachelor’s degree in manufacturing engineering or industrial technology, or to enter the workforce in the manufacturing community.

### Additional Program Info:
The role of the Mechanical Engineering Technologist in industry is quite varied. They are often employed in the design office of a manufacturer. Some entry-level graduates construct 3D-models of machines or parts. The career path of these graduates could lead to job titles of senior designer or design supervisor. Mechanical Engineering Technologists also work in product support, solving design-related problems, as service information technologists, write and develop service and repair instructions, applications engineers, who help equipment manufacturers design the correct bearings, pumps, motors, etc. into a wide range of products. Students develop a strong foundation in CAD software, analytical and rational problem solving skills, taking courses in mathematics, science, and machine design. Students can receive a bachelor’s degree in Engineering Technology by transferring to Bradley University or one of several Illinois state universities.

### Admission To the Program:
Students applying for admission to the program should have high school transcripts and ACT scores or college transcripts sent to the Enrollment Services Center. Math skills equivalent to two years of high school algebra and one year of high school geometry are required for admission to the program (two years of high school technical math or applied math equals one year of algebra). These courses are available at Illinois Central College for students wishing to upgrade their skills.

See page 339 for program mission, goals, and student learning outcomes.
Certificate

Total Credit Hours: 41

Program Information: The mission of the Medical Assistant Certificate is to prepare competent, entry-level medical assistants in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Additional Program Info: The practice of medical assisting directly influences the public's health and well-being, and requires mastery of a complex body of knowledge and specialized skills requiring both formal education and practical experience. Medical assistants are multiskilled health professionals specifically educated to work in ambulatory settings performing administrative and clinical duties such as assessing patient's vital signs and histories, preparing patients for procedures, assisting the physician with examinations and treatments, collecting and processing specimens, performing selected diagnostic tests, performing electrocardiograms, and administration of medications as directed by the physician.

Accreditation: Commission on Accreditation of Allied Health Education Programs (CAAHEP) is responsible for establishing criteria for the medical assistant program and conducts accrediting activities designed to ensure that educational programs meet minimum entry level criteria. CAAHEP grants accreditation of medical assisting programs upon the recommendations of the Medical Assisting Education Review Board. Graduates from this CAAHEP-accredited medical assisting program are eligible to take the CMA (AAMA) Certification Exam.

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of "C" or better. ACT composite score of 17 or above OR have completed 9 or more credit hours of college transfer level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of "C" or better. Grade point average (GPA) of 2.0 or above at ICC or last college attended OR completion of 9 credit hours of 'program' courses with a grade of "C" or better. One year high school algebra with a grade of "C" or better. One year high school algebra with a grade of "C" or better OR completion of MAT 094 or MAT 097 or MAT 099 with a grade of "C" or better OR placement into MAT 098 or higher.

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program. (Deadline for providing proof of current CPR certification is April 1st of the program's spring semester).

Recommended High School Subjects: (1) three years of English (2) one year of algebra (3) biology (4) word processing.

To Remain in and Graduate From the Program:
Maintain a grade of "C" or better in all required program courses.

Medical Assistant

PROGRAM COURSES:

- BIOL 140 HUMAN ANATOMY AND PHYSIOLOGY 4 CR. HRS.
- ENGL 125 BUSINESS COMMUNICATIONS 3 CR. HRS.
- HEOCC 200 DISEASE PROCESSES IN MAN 3 CR. HRS.
- HLTH 071 BASIC ELECTROCARDIOGRAMS* 1 CR. HRS.
- HLTH 120 FIRST AID 2 CR. HRS.
- HLTH 121 MEDICAL TERMINOLOGY 2 CR. HRS.
- MEDO 110 MEDICAL ASSISTANT ADMINISTRATIVE SKILLS* 4 CR. HRS.
- MEDO 111 MEDICAL ASSISTANT CLINICAL PROCEDURES* 4 CR. HRS.
- MEDO 112 MEDICAL OFFICE COMPUTER SKILLS* 2 CR. HRS.
- MEDO 114 CLINICAL LABORATORY SKILLS FOR MEDICAL ASSISTANTS* 2 CR. HRS.
- MEDO 119 INTRODUCTION TO PHARMACOLOGY FOR MEDICAL ASSISTANTS* 2 CR. HRS.
- MEDO 125 MEDICAL ASSISTANT PRACTICUM* 3 CR. HRS.
- MLT 110 INTRODUCTION TO THE MEDICAL LABORATORY AND PHLEBOTOMY* 2 CR. HRS.
- MLT 112 PHLEBOTOMY CLINICAL PRACTICUM* 2 CR. HRS.
- TYPE 120 KEYBOARD/WORD PROCESSING I 3 CR. HRS.

* All courses within the program must be completed within (5) years of admission to the program.
Underlined courses may be completed prior to admission into program

Recommended Course Sequence:
1st Semester: ENGL 125; BIOL 140; MEDO 110; MEDO 112; TYPE 120
2nd Semester: MEDO 111; MLT 110; HEOCC 200; HLTH 071; HLTH 120; HLTH 121
Summer Semester 1: MEDO 114; MLT 112
3rd Semester: MEDO 125; MEDO 119
Certificate
Total Credit Hours: 27

Program Information: The mission of the Medical Coder certificate program is to provide knowledge, skills, and professional attitude for an entry-level medical coder position in medical offices, hospitals, clinics, skilled-care facilities, insurance companies, billing offices, and governmental agencies.

Additional Program Info: The Medical Coder certificate is intended to provide students with entry-level skills needed to gain employment as a medical coder. This program will prepare students to gain a working knowledge of medical language and the International Classification of Diseases (ICD-10) and Current Procedural Terminology (CPT) coding system skills used to determine and secure appropriate reimbursement for services rendered by healthcare providers. This program can be completed in approximately three (3) semesters of study as outlined below. Upon completion, students can expect to be employed in a variety of healthcare settings such as hospitals, physician offices, billing services, and insurance companies.

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of "C" or better. ACT composite score of 17 or above OR have completed 9 or more credit hours of college transfer level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of "C" or better. Grade point average (GPA) of 2.0 or above at ICC or last college attended OR completion of 9 credit hours of "program" courses with a grade of "C" or better. One year high school biology with a grade of "C" or better OR completion of an equivalent college biology course with a grade of "C" or better.

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

High school recommendations: 3 years English and 2 years typing.

To Remain in and Graduate From the Program: Students must attain a grade of "C" or better in all coursework to remain in and graduate from program.

Medical Corpsman to Practical Nurse

PROGRAM COURSES:

- PRNRS 160 MEDICAL CORPSMAN TO PRACTICAL NURSE TRANSITION COURSE 6 CR. HRS.

Recommended Course Sequence:
1st Semester: PRNRS 160

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 340 for program mission, goals, and student learning outcomes.
Medical Laboratory Technician

General Courses:

- ENGL 110 COMPOSITION I 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- BIOL 140 HUMAN ANATOMY AND PHYSIOLOGY 3 CR. HRS.
- BIOL 205 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY 4 CR. HRS.
- BIOL 206 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II 4 CR. HRS.
- BIOL 210 MICROBIOLOGY 4 CR. HRS.
- HUMANITIES/FINE ARTS * 3 CR. HRS.

Program Courses:

- CHEM 120 PRINCIPLES OF CHEMISTRY I 4 CR. HRS.
- CHEM 130 GENERAL CHEMISTRY 4 CR. HRS.
- CHEM 122 PRINCIPLES OF CHEMISTRY 4 CR. HRS.
- CHEM 132 GENERAL CHEMISTRY 4 CR. HRS.
- MLT 101 INTRO TO MEDICAL LABORATORY SCIENCE 1 CR. HR.
- MLT 102 INTRODUCTION TO GENERAL MEDICAL LABORATORY TECHNIQUES 2 CR. HRS.
- MLT 115 FUNDAMENTALS OF URINALYSIS AND BODY FLUIDS 3 CR. HRS.
- MLT 116 FUNDAMENTALS OF IMMUNOLOGY AND SEROLOGY 2 CR. HRS.
- MLT 210 FUNDAMENTALS OF HEMATOLOGY AND HEMOSTASIS 3 CR. HRS.
- MLT 214 FUNDAMENTALS OF CLINICAL CHEMISTRY 2.5 CR. HRS.
- MLT 216 FUNDAMENTALS OF IMMUHENOHEMATOLOGY 4 CR. HRS.
- MLT 218 FUNDAMENTALS OF CLINICAL MICROBIOLOGY 3 CR. HRS.
- MLT 220 ADVANCED CLINICAL HEMATOLOGY 2 CR. HRS.
- MLT 224 ADVANCED CLINICAL CHEMISTRY 2 CR. HRS.
- MLT 222 APPLIED CLINICAL EXPERIENCE I 4 CR. HRS.
- MLT 228 ADVANCED CLINICAL MICROBIOLOGY 2.5 CR. HRS.
- MLT 230 PROFESSIONAL SEMINAR 2 CR. HRS.
- MLT 232 APPLIED CLINICAL EXPERIENCE II 5 CR. HRS.

* See specific requirements for the Associate in Applied Science Degree.

Recommended Course Sequence:

1st Semester: BIOL 140 or BIOL 205 and BIOL 206; CHEM 120 or CHEM 130; ENGL 110; Humanities/Fine Arts; MLT 101; MLT 102; or MLT 110

2nd Semester: CHEM 122 or CHEM 132; BIOL 210; COMM 110; PSY 110; MLT 101; MLT 102; or MLT 110

Summer Semester: MLT 115; MLT 116; MLT 210; MLT 214; MLT 215; MLT 216; MLT 222; MLT 224; MLT 225; MLT 228; MLT 230; MLT 232

The following courses may be taken to develop additional skills for the MLT graduate or for the student interested in employment in histology laboratory. Courses are offered in cooperative agreement with OSF Saint Francis Medical Center and ICC.

- MLDBL 125 HISTOLOGY I: GENERAL TECHNIQUES 6 SEM. HRS.
- MLDBL 126 HISTOLOGY II: SPECIAL STAINS 5 SEM. HRS.

Prerequisite: Associate degree or higher to include the following: ENGL 110, MAT 098 or MAT 115; BIOL 140; BIOL 210; CHEM 120 or equivalent courses with a cumulative GPA of 2.5 or better. Recommended high school subjects: 4 years English; 4 years math; 2 years algebra; 1 year geometry; 1 year biology; 1 year chemistry.

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 341 for program mission, goals, and student learning outcomes.
Certificate

Total Credit Hours: 26

Program Information: The mission of the Medical Office Administrative Assistant Certificate program is to provide the curriculum and experiences to enable graduates to attain knowledge, attitudes, and skills to perform as an entry-level medical office administrative assistant.

Additional Program Info: Medical Office Administrative Assistants are specifically educated to work in ambulatory settings performing administrative duties. The administrative program develops such necessary skills as arranging patient appointments, communicating with the public in person and by telephone, basic book-keeping, ordering equipment and supplies, and completing medical forms. This program is a 9 month certificate, non-accredited program.

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of "C" or better. ACT composite score of 17 or above or OR have completed 9 or more credit hours of college transfer level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of "C" or better. Grade point average (GPA) of 2.0 or above at ICC or last college attended OR completion of 9 credit hours of 'program' courses with a grade of "C" or better. One year high school prealgebra with a grade of "C" average or higher OR completion of MAT 092 with a grade of "C" or better OR placement into MAT 094 or higher

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program. (Deadline for providing proof of current CPR certification is December 1st of the programs fall semester).

To Remain in and Graduate From the Program: Student must attain a grade of "C" or better in all required program courses to remain in and graduate from the program.

Recommended High School Subjects: (1) three years of English (2) one year of prealgebra (3) one semester of high school word processing or equivalent.

Certificate

Total Credit Hours: 6

Program Information: The mission of the Nursing Assistant Certificate program is to provide the resources, curriculum, and clinical experiences to enable program completers to gain knowledge, skills, and behaviors to attain entry-level employment as nursing assistants in long-term care facilities, hospitals, and other health care settings.

Additional Program Info: This program is comprised of classroom, laboratory, and clinical learning experiences. Courses are offered at Illinois Central College campuses and other off-site locations. Students will learn to apply theoretical knowledge, and basic nursing skills to observe and report client/resident signs and symptoms. The Nursing Assistant, under the direction and supervision of a Registered Nurse or LPN, functions as a member of the health care team in the nursing home, hospital, or home health setting.

Accreditation: The Basic Nurse Assistant Training Program is approved by the Illinois Department of Public Health. Completers are eligible to take the Nurse Aide Competency Evaluation Program (NACEP) and become certified by the state of Illinois.

Admission To the Program: COMPASS reading score of 62 or higher OR completion of appropriate ENGL prerequisites with a grade of “C” or better.

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

Associate in Applied Science

Total Credit Hours: 60

Program Information: The mission of the Associate in Applied Science Office Professional degree is to prepare students for employment in clerical or word processing positions such as receptionists, secretaries, administrative assistants, clerks, word processors, and transcriptionists, through a series of skillbuilding courses in keyboarding, electronic equipment operation, information processing, software applications and integration, office procedures, bookkeeping, and records management.

Additional Program Info: Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. This is not designed as a transfer program, although some of the courses may transfer with approval from the four-year college.

Admission To the Program: Students are expected to be computer literate and to know the Windows operating system. Students are expected to be able to touch type. If this is not the case, TYPE 120 and 121 are prerequisites for entering this program.

To Remain in and Graduate From the Program: Students should submit an “Application for Degree/Certificate” after completing 45 hours. This form is available in Enrollment Services, L211. Contact the Business, Hospitality, and Information Systems Department for information regarding the TYPE 120 placement exam and the TYPE 121 proficiency exam.

Associate in Applied Science

Total Credit Hours: 62

Program Information: The mission of the Associate in Applied Science Paralegal degree is to produce competent, well-rounded individuals who are able to work under the supervision of an attorney in the many areas of the practice of law, specifically, the student will be prepared to perform such tasks as legal research, client interviews, investigations, preparation of legal documents, and other legal work as delegated by an attorney. Paralegals are employed by private law firms, corporations, governmental agencies, insurance companies, title companies, and financial institutions.

Additional Program Info: Students enrolled in the Associate in Applied Science degree program must meet with the Program Coordinator to plan a specific course schedule meeting Illinois Central College and personal requirements. Computers are an important component to many aspects of this profession. The student should be familiar with the keyboard. If not, an additional class in keyboarding is recommended.

Accreditation: This program has been approved by the American Bar Association.

To Remain in and Graduate From the Program:
Students must attain a grade of "C" or higher in each PRLGL course (including equated transfer courses) to remain in and graduate from the program. PRLGL 113, 116, and 260 must be taken at ICC to graduate from the program. Students must take at least ten credit hours or the equivalent of legal specialty courses through traditional format. All prerequisites to PRLGL courses must be satisfied with a grade of "C" or better. Students should submit an "Application for Degree/Certificate" after completing 45 hours of the program. This form is available in Enrollment Services, L211.

Certificate

Total Credit Hours: 37

Program Information: The mission of the Paralegal certificate is to produce competent, well-rounded individuals who are able to work under the supervision of an attorney in the many areas of the practice of law. Specifically, the student will be prepared to perform such tasks as legal research, client interviews, investigations, preparation of legal documents, and other legal work as delegated by an attorney. Paralegals are employed by private law firms, corporations, governmental agencies, insurance companies, title companies, and financial institutions.

Additional Program Info: Students enrolled in this program must meet with the Program Coordinator to plan a specific course schedule meeting Illinois Central College and personal requirements.

Accreditation: This program is approved by the American Bar Association.

Admission To the Program: A bachelor's degree (4 years/undergraduate) or associate degree from an accredited college or university is required for admission to the program. Student must submit an application for admission to Illinois Central College and must submit an official transcript from the college or university granting the degree to Enrollment Services, L211. Student must submit a separate application for the Paralegal Certificate Program to the Program Coordinator and have an interview with the Program Coordinator before gaining admission to the program. The form is available from the Program Coordinator at Peoria Campus, Poplar Hall 117, by calling (309) 690-7691 or online at http://paralegal.icc.edu. At least 30 percent of the total program of study must be completed at Illinois Central College. Student must take at least 10 credit hours or the equivalent of legal specialty course through traditional format. PRLGL 113, 116, and 260 must be taken at ICC to graduate from the program. Students must attain a grade of "C" or higher in each course (included equated transfer courses). All prerequisites to PRLGL courses must be satisfied with a grade "C" or better.

To Remain in and Graduate From the Program: Students should submit an "Application for Degree/Certificate" during the next to last semester of study. This form is available in Enrollment Services, L211.

Associate in Applied Science

Total Credit Hours: 66-68

Program Information: The mission of the Associate in Applied Science Paramedic degree program is to provide comprehensive theoretical knowledge, practice simulations, and skills training to prepare graduates for employment as a Paramedic within the healthcare community.

Additional Program Info: Students enrolled in the Associate in Applied Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Student is eligible for licensure as an EMT after successful completion of EMS 114.

Accreditation: The Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (caahp.org) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services (coaemsp.org). Commission on Accreditation of Allied Health Education Programs, 1361 Park Street Clearwater, FL, 33756; (727) 210-2350; caahp.org.

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of C or better. ACT composite score of 20 or above OR have completed 18 or more credit hours of college transfer level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of C or better. ICC grade point average (GPA) of 2.0 or above at the last college attended (other than ICC) OR completion of 18 credit hours of ‘program’ courses at ICC or other colleges with a grade of C or better. One year high school algebra with a grade of C average or higher OR completion of MAT 094 or MAT 097 or MAT 099 with a grade of C or better OR placement into MAT 098 or higher.

Requirements upon Program Acceptance: Drug screen, fingerprint background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

To Remain in and Graduate From the Program: Student must maintain a grade of C or better in BIOL 205; BIOL 206, and all EMS prefix courses.

Associate in Applied Science

Total Credit Hours: 61 to 64

Program Information: This program of study is intended for students planning on pursuing a career as a certified personal trainer. Students will gain knowledge in individual and group exercise programs, and will work with populations of varying ability levels. Upon successful completion of the program, graduates will be qualified to work as personal trainers in health clubs, fitness centers, and recreational programs. Graduates will be eligible to test and become certified in their choice of organizations that certify personal trainers.

Accreditation: Upon successful completion, student will be able to sit for the ACE or NCF personal trainer examination.

Admission To the Program: Students entering this program should have a strong understanding of science and math concepts, and be able to physically perform exercises they intend to teach.

Contact Information:
Physical Education Coordinator
East Peoria Campus
CougarPlex
(309) 694-5502

GENERAL COURSES:
- ENGL 110 COMPOSITION I 3 CR. HRS.
- COMM 110 COMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- or COMM 120 INTERPERSONAL COMMUNICATION
- SOCIAL SCIENCE* 3 CR. HRS.

Certificate

Total Credit Hours: 9 to 12

Program Information: Phlebotomists are employed in hospital laboratories, physician clinics, and other health care institutions to perform the collection of blood specimens by venipuncture and micropuncture techniques. Theory and practice in phlebotomy skills are studied in addition to ethical and legal responsibilities, effective communication skills, and safe practices. The program consists of lecture, offered in a hybrid online delivery format, student laboratories, and a clinical phlebotomy practicum arranged in a local hospital. Successful completion of the program will allow the graduate to seek employment as a phlebotomist and be eligible to take an appropriate phlebotomy certification examination.

Additional Program Info: Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Suggested additional courses: HLTH 121, COMM 110, PSY 110, and CMGEN 120. BIOL 106 or MLT 110 may be taken in the summer.

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 72 or higher OR completion of appropriate ENGL prerequisites with a grade of "C" or better. One year high school biology with a "C" average or higher OR completion of an equivalent college biology course with a grade of "C" or better.

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification (might be required) from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification, if required, must remain current throughout the program.

To Remain in and Graduate From the Program: Maintain a grade of "C" or better in all MLT and BIOL courses.

Associate in Applied Science

Total Credit Hours: 66

Program Information: The mission of the Physical Therapist Assistant program is to provide the knowledge and skills and develop attitudes which prepare graduates to function as entry-level physical therapist assistants who will work under the direction and supervision of the physical therapist to meet the needs of the community in a variety of clinical settings.

Accreditation: This program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) 1111 North Fairfax Street, Alexandria, Virginia 22314; (703) 7063245; email: accreditation@apta.org; website: capteonline.org

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of "C" or better. ACT composite score of 20 or above OR have completed 18 or more credit hours of college transfer level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of "C" or better. ICC grade point average (GPA) of a 2.0 or above (if you have attended ICC). GPA of 2.0 or above at the last college attended (other than ICC) OR completion of 18 credit hours of 'program' courses at ICC or other colleges with a grade of "C" or better. One year of high school science with a grade of "C" or better OR completion of an equivalent college science course with a grade of "C" or better. Science courses must be chemistry, human biology, or physics. One year of high school math with a grade of "C" or better OR completion of an equivalent college math course with a grade of "C" or better. 20 hours of documented observation in two different Physical Therapy departments. High School Recommendations: 3 years English, 1 year Biology, 1 year Chemistry, 2 years Mathematics

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

To Remain in and Graduate From the Program: Maintain a "C" or better in all required general education and program courses.

Recommended Course Sequence:
1st Semester: WELD 111, WELD 113, WELD 131, WELD 135, WELD 150

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 349 for program mission, goals, and student learning outcomes.
Radiographer

**GENERAL COURSES:**
- ENGL 110    COMPOSITION I  3 CR. HRS.
- COMM 110   COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- PSY 110    INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- MATH 115   COLLEGE ALGEBRA  4 CR. HRS.
- BIOL 140   HUMAN ANATOMY AND PHYSIOLOGY  4 CR. HRS.
- HUMANITIES *  3 CR. HRS.

**PROGRAM COURSES:**
- HLTH 121   MEDICAL TERMINOLOGY  2 CR. HRS.
- RADTK 110  FUNDAMENTALS OF RADIOGRAPHY I  6 CR. HRS.
- RADTK 112  FUNDAMENTALS OF RADIOGRAPHY, DIRECTED PRACTICE ORIENTATION  1 CR. HR.
- RADTK 120  FUNDAMENTALS OF RADIOGRAPHY II  6 CR. HRS.
- RADTK 121  FUNDAMENTALS OF RADIOGRAPHY, DIRECTED PRACTICE I  3 CR. HRS.
- RADTK 200  RADIOGRAPHY I  3 CR. HRS.
- RADTK 201  FUNDAMENTALS OF RADIOGRAPHY, DIRECTED PRACTICE II  2 CR. HRS.
- RADTK 210  RADIOGRAPHY II  6 CR. HRS.
- RADTK 211  RADIOGRAPHY, DIRECTED PRACTICE III  3 CR. HRS.
- RADTK 220  RADIOGRAPHY III  3 CR. HRS.
- RADTK 221  RADIOGRAPHY, DIRECTED PRACTICE IV  3 CR. HRS.
- RADTK 230  RADIOGRAPHY IV  2 CR. HRS.
- RADTK 231  RADIOGRAPHY, DIRECTED PRACTICE V  2 CR. HRS.
- RADTK 260  SECTIONAL ANATOMY FOR DIAGNOSTIC IMAGING  3 CR. HRS.
- RADTK 270  PATHOLOGY AND PHARMACOLOGY FOR THE IMAGING PROFESSIONAL  3 CR. HRS.
- RADTK 280  COMPUTED TOMOGRAPHY PRINCIPLES, INSTRUMENTATION AND IMAGING PROCEDURES  3 CR. HRS.

* PHIL 113 is recommended

Underlined courses may be taken prior to admission into the program.

Recommended Course Sequence:
1st Semester: BIOL 140; HLTH 121; MATH 115; RADTK 110; RADTK 112
2nd Semester: ENGL 110; PSY 110; RADTK 120; RADTK 121
Summer Semester 1: RADTK 200; RADTK 201
3rd Semester: RADTK 210; RADTK 211; COMM 110; RADTK 260
4th Semester: RADTK 220; RADTK 221; RADTK 270; RADTK 280
Summer Semester 2: RADTK 230; RADTK 231; Humanities

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 350 for program mission, goals, and student learning outcomes.
Registered Nurse

GENERAL COURSES:

- ENGL 110  COMPOSITION I  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- PSY 110  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- RNRS 150  PRINCIPLES OF SAFE MEDICATION ADMINISTRATION  1 CR. HR.
- BIOL 205  PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I**  4 CR. HRS.
- BIOL 206  PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II**  4 CR. HRS.
- HUMANITIES *  3 CR. HRS.

PROGRAM COURSES:

- BIOL 210  MICROBIOLOGY **  4 CR. HRS.
- FCS 110  BASIC NUTRITION or SOC 110  AN INTRODUCTION TO SOCIOLOGY  3 CR. HRS.
- RNRS 222  NURSING MANAGEMENT AND LEADERSHIP  2 CR. HRS.
- RNRS 221  NURSING IV  10 CR. HRS.
- RNRS 220  NURSING III  10 CR. HRS.
- RNRS 210  HEALTH ASSESSMENT OF THE ADULT PATIENT  2 CR. HRS.
- RNRS 120  NURSING II  6 CR. HRS.
- RNRS 111  PHARMACOLOGY FOR NURSES  2 CR. HRS.
- FCS 120  PRINCIPLES OF NUTRITION  3 CR. HRS.
- HLTH 121  MEDICAL TERMINOLOGY  2 CR. HRS.
- RNRS 110  NURSING I  6 CR. HRS.

* See specific requirements for Humanities required for Associate in Applied Science Degree.
** These courses must be completed within five (5) years of admission to the program and/or indicated in course prerequisites.
Underlined courses may be taken prior to admission into the program.

Recommended Course Sequence:

1st Semester: BIOL 205; ENGL 110; RNRS 150; RNRS 110; RNRS 210; HLTH 121
2nd Semester: BIOL 206; FCS 110 or 120; RNRS 111; RNRS 120; PSY 110
3rd Semester: BIOL 210; RNRS 220; SOC 110
4th Semester: RNRS 221; RNRS 222; COMM 110; Humanities

Accreditation: The Nursing program is fully approved by the Illinois Department of Financial and Professional Regulation and accredited by the Accreditation Commission for Education in Nursing. The Accreditation Commission for Education in Nursing (ACEN) is a resource for the nursing information contained in this catalog. The commission may be contacted as follows: Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326; Phone: (404) 975-5000, Fax: (404) 975-5020. Graduates are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEXRN) and may apply for licensure to practice nursing as a Registered Nurse (RN).

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 350 for program mission, goals, and student learning outcomes.
Respiratory Therapist

GENERAL COURSES:

- **ENGL 110**  COMPOSITION I  3 CR. HRS.
- **COMM 110**  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- **PSY 110**  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- **BIOL 205**  PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I  4 CR. HRS.
  and **BIOL 206**  PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II  4 CR. HRS.
  or **BIOL 140**  HUMAN ANATOMY AND PHYSIOLOGY  4 CR. HRS.
  - **BIOL 210**  MICROBIOLOGY*  4 CR. HRS.

- **HEOCC 114**  INTRODUCTION TO INTERDISCIPLINARY HEALTH CARE  1 CR. HR.
- **HLTH 108**  ELECTROCARDIOGRAM INTERPRETATION  1 CR. HR.
- **HLTH 121**  MEDICAL TERMINOLOGY  2 CR. HRS.
- **RESP 125**  RESPIRATORY CARE PRACTICUM II  3 CR. HRS.
- **RESP 123**  PHARMACOLOGY FOR RESPIRATORY CARE  2 CR. HRS.
- **RESP 122**  CARIOPULMONARY ANATOMY AND PHYSIOLOGY  2 CR. HRS.
- **RESP 121**  FUNDAMENTALS OF RESPIRATORY CARE II  5 CR. HRS.
- **RESP 115**  RESPIRATORY CARE PRACTICUM I  3 CR. HRS.
- **RESP 112**  FUNDAMENTALS OF RESPIRATORY CARE I  4 CR. HRS.
- **RESP 110**  INTRODUCTION TO RESPIRATORY CARE  1 CR. HR.
- **RESP 127**  CARIOPULMONARY DISEASES  3 CR. HRS.
- **RESP 201**  INTRODUCTION TO MECHANICAL VENTILATION  1 CR. HR.
- **RESP 210**  FUNDAMENTALS OF RESPIRATORY CARE III  5 CR. HRS.
- **RESP 220**  RESPIRATORY CARE PRACTICUM III  3 CR. HRS.
- **RESP 231**  FUNDAMENTALS OF RESPIRATORY CARE IV  4 CR. HRS.
- **RESP 235**  RESPIRATORY CARE PRACTICUM IV  3 CR. HRS.
- **RESP 240**  RESPIRATORY THERAPY CAPSTONE  1 CR. HS.
- **SOC 110**  AN INTRODUCTION TO SOCIOLOGY  3 CR. HRS.

*See specific requirements for Associate in Applied Science Degree.
**BIOL 140 or BIOL 205 and BIOL 206.

PROGRAM COURSES:

- **HEOCC 114**  INTRODUCTION TO INTERDISCIPLINARY HEALTH CARE  1 CR. HR.
- **HLTH 108**  ELECTROCARDIOGRAM INTERPRETATION  1 CR. HR.
- **HLTH 121**  MEDICAL TERMINOLOGY  2 CR. HRS.
- **RESP 125**  RESPIRATORY CARE PRACTICUM II  3 CR. HRS.
- **RESP 123**  PHARMACOLOGY FOR RESPIRATORY CARE  2 CR. HRS.
- **RESP 122**  CARIOPULMONARY ANATOMY AND PHYSIOLOGY  2 CR. HRS.
- **RESP 121**  FUNDAMENTALS OF RESPIRATORY CARE II  5 CR. HRS.
- **RESP 115**  RESPIRATORY CARE PRACTICUM I  3 CR. HRS.
- **RESP 112**  FUNDAMENTALS OF RESPIRATORY CARE I  4 CR. HRS.
- **RESP 110**  INTRODUCTION TO RESPIRATORY CARE  1 CR. HR.
- **RESP 127**  CARIOPULMONARY DISEASES  3 CR. HRS.
- **RESP 201**  INTRODUCTION TO MECHANICAL VENTILATION  1 CR. HR.
- **RESP 210**  FUNDAMENTALS OF RESPIRATORY CARE III  5 CR. HRS.
- **RESP 220**  RESPIRATORY CARE PRACTICUM III  3 CR. HRS.
- **RESP 231**  FUNDAMENTALS OF RESPIRATORY CARE IV  4 CR. HRS.
- **RESP 235**  RESPIRATORY CARE PRACTICUM IV  3 CR. HRS.
- **RESP 240**  RESPIRATORY THERAPY CAPSTONE  1 CR. HS.
- **SOC 110**  AN INTRODUCTION TO SOCIOLOGY  3 CR. HRS.

*See specific requirements for Associate in Applied Science Degree.
**BIOL 140 or BIOL 205 and BIOL 206.

Underlined courses may be taken prior to admission into the program.

Recommended Course Sequence:

1st Semester: **ENGL 110**; **RESP 110**; **RESP 112**; **RESP 115**; **RESP 122**; **HLTH 121**
2nd Semester: **RESP 121**; **RESP 123**; **RESP 125**; **RESP 127**; **BIOL 205** or **BIOL 140**
Summer Semester 1: **PSY 110**; **RESP 201**; **BIOL 210**
3rd Semester: **COMM 110**; **RESP 210**; **RESP 220**; **BIOL 206**; **Humanities**
4th Semester: **SOC 110**; **RESP 231**; **RESP 235**; **RESP 240**; **HLTH 108**; **HEOCC 114**

Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent). CPR certification must remain current throughout the program.

See page 352 for program mission, goals, and student learning outcomes.
Certificate

Total Credit Hours: 27

Program Information:
The mission of the Solar Thermal Heating Systems certificate program is to provide the students with knowledge and skills pertaining to solar thermal heating systems. After completing this program, the graduate will be able to work as an entry-level repair/maintenance worker, solar domestic water/space heating technician, solar thermal systems designer, or a solar thermal salesperson.

Additional Program Info: Previous experience with solar thermal heating systems is not required to enter this program of study. The solar thermal heating courses include extensive laboratory experience as well as lectures. Students must provide the following items: safety glasses with side shields, work gloves, basic scientific calculator, and thumb drive.

Admission To the Program: COMPASS Reading score of 70 and MAT 094 or higher, or an equivalent course with a grade of "C" or better, or department approval.

To Remain in and Graduate From the Program:
Students must attain a grade of "C" or better in each course to remain in and graduate from the program. Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

Contact Information:
Agricultural and Industrial Technologies Department

**Surgical Technologist**

**GENERAL COURSES:**
- ENGL 110 COMPOSITION I 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- BIOL 205 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I 4 CR. HRS.
- BIOL 206 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II 4 CR. HRS.
- BIOL 210 MICROBIOLOGY 4 CR. HRS.
- HUMANITIES * 3 CR. HRS.

**PROGRAM COURSES:**
- HEOCC 114 INTRODUCTION TO INTERDISCIPLINARY * 1 CR. HR.
- HLTH 110 FUNDAMENTALS OF STERILE PROCESSING 2 CR. HRS.
- HLTH 121 MEDICAL TERMINOLOGY 2 CR. HRS.
- SOC 110 AN INTRODUCTION TO SOCIOLOGY 3 CR. HRS.
- SURTK 120 INTRODUCTION TO SURGICAL TECHNOLOGY 4 CR. HRS.
- SURTK 121 FUNDAMENTALS OF SURGICAL TECHNOLOGY I 7 CR. HRS.
- SURTK 122 FUNDAMENTALS OF SURGICAL TECHNOLOGY II 6 CR. HRS.
- SURTK 130 PHARMACOLOGY FOR THE SURGICAL TECHNOLOGIST 1 CR. HR.
- SURTK 210 FUNDAMENTALS OF SURGICAL TECHNOLOGY III 8 CR. HRS.
- SURTK 211 ADVANCED FUNDAMENTALS OF SURGICAL TECHNOLOGY 7 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.

Underlined courses may be taken prior to admission into the program.

**Recommended Course Sequence:**
1st Semester: SURTK 120; BIOL 205; HLTH 110; HLTH 121; ENGL 110
2nd Semester: SURTK 121; BIOL 206; SURTK 130; HEOCC 114; COMM 110
Summer Semester 1: SURTK 122
3rd Semester: SURTK 210; BIOL 210; SOC 110
4th Semester: SURTK 211; PSY 110; Humanities
Certificate

Total Credit Hours: 49

Program Information: The mission of the Surgical Technology certificate program is to prepare competent, entry-level surgical technologist, able to function within the healthcare community.

Additional Program Info: Requirements upon Program Acceptance: Drug screen, fingerprint criminal background check, physical exam, and immunizations. Documentation of current CPR certification from the American Heart Association (AHA) Healthcare Provider (HLTH 041 at ICC or equivalent) or American Red Cross (ARC) Professional Rescuer and Health Care Provider. CPR certification must remain current throughout the program.

Students enrolled in this program must meet with their assigned advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Suggested supplemental courses: HEOCC 111, 200, 230; PSY 115, 116, 117, 119 Students are advised to complete all BIOL courses prior to first SURTK course. Recommended High School Subjects: (1) four years of English/communication (2) two years of mathematics (3) three years of biological science.

Accreditation: Commission on Accreditation of Allied Health Programs (CAAHEP) in cooperation with the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC/STSA).

Admission To the Program: High school graduate or equivalent. COMPASS reading score of 81 or higher OR ACT reading score of 18 or higher OR completion of appropriate ENGL 110 prerequisites with a grade of "C" or better. ACT composite score of 18 or above OR have completed 18 or more credit hours of college transfer-level courses (110 or higher) taken at ICC or equivalent courses at other colleges with a grade of "C" or better. ICC grade point average (GPA) of a 2.0 or above (if you have attended ICC). GPA of 2.0 or above at the last college attended (other than ICC) OR completion of 18 credit hours of "program" courses at ICC or other colleges with a grade of "C" or better. One year high school biology with a "C" average or higher OR completion of equivalent college biology course with a grade of "C" or better.

To Remain in and Graduate From the Program:

Students must maintain a grade of "C" or better in all BIOL and SURTK courses.

See page 354 for program mission, goals, and student learning outcomes.
Certificate

Total Credit Hours: 7

Program Information: Tractor trailer drivers are prepared to take the Illinois Secretary of State administered Class A Road Test, which results in a Commercial Drivers License (CDL). Drivers with CDLs are employed by a variety of trucking industry companies. Subjects covered include trucking and transport regulations, reporting, map reading and trip planning, as well as driving techniques. The program consists of 48 hours of classroom lecture and 112 hours of "yard" work (backing skills and pre-trip inspections), and on the road experience.

Additional Program Info: Students enrolled in this program must meet with their assigned advisor to plan a specific course schedule meeting Illinois Central College and personal requirements. Prior to enrolling in this program, students are encouraged to obtain a copy of their Motor Vehicle Report from the Secretary of State’s Drivers License Bureau.

Admission To the Program: Admission criteria include: ability to read and write the English language; minimum age of 18 (those over age 21 receive greater placement assistance); ability to meet the Federal Department of Transportation requirements; a valid regular driver’s license; and acceptable driving history.

Contact Information:
Professional Development Institute

Truck Driver Training

PROGRAM COURSES:
- PDTTD 110 TRUCK DRIVING 7 CR. HRS.

Recommended Course Sequence:
1st Semester: PDTTD 110

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
Web Developer

PROGRAM COURSES:
- CMWEB 110  BEGINNING WEB DEVELOPMENT WITH HTML AND CSS  4 HRS.
- CMWEB 120  INTERMEDIATE WEB DEVELOPMENT WITH HTML AND CSS  4 HRS.
- CMWEB 130  WEB CONTENT MANAGEMENT SYSTEMS AND ANALYTICS  4 HRS.
- CMWEB 135  BUSINESS USE OF SOCIAL MEDIA  4 HRS.
- CMWEB 140  ELECTRONIC COMMERCE  4 HRS.
- CMWEB 150  WEB ACCESSIBILITY AND USABILITY  4 HRS.
- CMWEB 160  INTRODUCTION TO SCRIPTING FOR THE WEB  4 HRS.
- CMWEB 200  JAVASCRIPT FOR WEB DEVELOPERS  4 HRS.
- CMWEB 220  ADVANCED WEB SITE DEVELOPMENT WITH HTML AND CSS  4 HRS.
- CMWEB 241  PHP  4 HRS.
- CMWEB 270  WEB SERVER AND WEB APPLICATION SECURITY  4 HRS.
- CMWEB 280  WEB DEVELOPMENT FOR MOBILE DEVICES  4 HRS.
- CMWEB298 WEB DEVELOPER ASSOCIATE CERTIFICATION CAPSTONE *  1 HR.
  or  CMWEB299 WEB DEVELOPER PROJECT CAPSTONE *  1 HR.

* For the capstone course, the student has a choice between CMWEB 298 and CMWEB 299. If the student wishes to take the Web Professionals Web Developer Associate Exam, an industry recognized certification, they should sign up for CMWEB 298. If the student does not wish to take the certification exam, they should sign up for CMWEB 299, in which they complete a comprehensive project that reviews and demonstrates competency in the most important concepts covered in the classes in the program.

Recommended Course Sequence:
1st Semester: CMWEB110, CMWEB130, CMWEB150, CMWEB160
2nd Semester: CMWEB120, CMWEB140, CMWEB200, CMWEB270
3rd Semester: CMWEB135, CMWEB220, CMWEB241, CMWEB280, CMWEB298 or CMWEB299

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 354 for program mission, goals, and student learning outcomes.
Certificate
Total Credit Hours: 29

Program Information: The mission of the Web Developer Apprentice Certificate program is to instruct students in the fundamentals of programming and scripting of websites for business and industry using web standards and responsive design.

Additional Program Info: Students enrolled in this program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements.

This certificate program is offered online. Please contact the Virtual Campus Office for more information. (309) 694-8888 or icc.edu/VirtualCampus

Accreditation: Accredited by Webprofessionals.org as a Web Professional Academy.

Contact Information:
Business, Hospitality, and Information Systems Department

(309) 694-5558

Web Developer Apprentice

PROGRAM COURSES:
- CMWEB 110 BEGINNING WEB DEVELOPMENT WITH HTML AND CSS 4 HRS.
- CMWEB 120 INTERMEDIATE WEB DEVELOPMENT WITH HTML AND CSS 4 HRS.
- CMWEB 130 WEB CONTENT MANAGEMENT SYSTEMS AND ANALYTICS 4 HRS.
- CMWEB 140 ELECTRONIC COMMERCE 4 HRS.
- CMWEB 150 WEB ACCESSIBILITY AND USABILITY 4 HRS.
- CMWEB 160 INTRODUCTION TO SCRIPTING FOR THE WEB 4 HRS.
- CMWEB 270 WEB SERVER AND WEB APPLICATION SECURITY 4 HRS.
- CMWEB296 WEB DEVELOPER APPRENTICE CERTIFICATION CAPSTONE * 4 HRS.
  or CMWEB297 WEB DEVELOPER APPRENTICE PROJECT CAPSTONE 1 HR.
* CMWEB 296 provides a review and allows the student to take the Web Professionals Web Developer-Apprentice certification exam, an industry-recognized credential. Should the student not wish to take this exam, they should choose CMWEB 297 instead; in this course, instead of an exam, the student creates a project that utilizes components from their previous web development classes to provide a good review and demonstrate competency.

Recommended Course Sequence:
1st Semester: CMWEB110, CMWEB130, CMWEB150, CMWEB160
2nd Semester: CMWEB120, CMWEB140, CMWEB270, CMWEB296 or CMWEB297

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
See page 355 for program mission, goals, and student learning outcomes.
Web Systems

GENERAL COURSES:

- ENGL 110 COMPOSITION I
- or ENGL 125 BUSINESS COMMUNICATIONS
- or ENGL 201 TECHNICAL COMMUNICATIONS 3 HRS.
- COMMUNICATION * 3 HRS.
- SOCIAL SCIENCE * 3 HRS.
- MATHEMATICS/LABORATORY SCIENCE * 3-4 HRS.
- BUS 120 BUSINESS MATHEMATICS 3 HRS.
- HUMANITIES * 3 HRS.

PROGRAM COURSES:

- CMWEB 110 BEGINNING WEB DEVELOPMENT WITH HTML AND CSS 4 HRS.
- CMWEB 120 INTERMEDIATE WEB DEVELOPMENT WITH HTML AND CSS 4 HRS.
- CMWEB 130 WEB CONTENT MANAGEMENT SYSTEMS AND ANALYTICS 4 HRS.
- CMWEB 135 BUSINESS USE OF SOCIAL MEDIA 4 HRS.
- CMWEB 140 ELECTRONIC COMMERCE 4 HRS.
- CMWEB 150 WEB ACCESSIBILITY AND USABILITY 4 HRS.
- CMWEB 160 INTRODUCTION TO SCRIPTING FOR THE WEB 4 HRS.
- CMWEB 200 JAVASCRIPT FOR WEB DEVELOPERS 4 HRS.
- CMWEB 220 ADVANCED WEB SITE DEVELOPMENT WITH HTML AND CSS 4 HRS.
- CMWEB 241 PHP 4 HRS.
- CMWEB 270 WEB SERVER AND WEB APPLICATION SECURITY 4 HRS.
- CMWEB 280 WEB DEVELOPMENT FOR MOBILE DEVICES 4 HRS.
- CMWEB298 WEB DEVELOPER ASSOCIATE CERTIFICATION CAPSTONE ** 1 HR.
- or CMWEB299 WEB DEVELOPER PROJECT CAPSTONE ** 1 HR.

* See specific requirements for Associate in Applied Science Degree.

** For the capstone course, the student has a choice between CMWEB 298 and CMWEB 299.
If the student wishes to take the Web Professionals Web Developer Associate Exam, an industry recognized certification, they should sign up for CMWEB 298. If the student does not wish to take the certification exam, they should sign up for CMWEB 299, in which they complete a comprehensive project that reviews and demonstrates competency in the most important concepts covered in the classes in the program.

Recommended Course Sequence:
1st Semester: CMWEB110, CMWEB130, CMWEB150, CMWEB160
2nd Semester: CMWEB120, CMWEB140, CMWEB200, CMWEB270
Summer Semester 1: English, Mathematics/Laboratory Science
3rd Semester: CMWEB135, CMWEB220, CMWEB241, CMWEB280
4th Semester: Social Science, BUS120, Humanities, Communication, CMWEB298 or CMWEB299
Certificate

Total Credit Hours: 12 to 16

Program Information: The Welding Operator certificate program prepares students with entry-level skills in the major commercial welding processes, SMAW and GMAW. With welding skills in both processes, completers of the Welding Operator certificate might seek entry-level welder positions in the construction as well as the manufacturing industry. All courses required for the Production Welder certificate program are included in the Welding Operator program.

Additional Program Info: The Welding Operator certificate consists of twelve (12) semester hours of instruction. Upon completion of this program, the graduate is prepared for entry-level employment as a manufacturing production or construction apprentice welder.

See page 356 for program mission, goals, and student learning outcomes.
Certificate

Total Credit Hours: 27-30

Program Information: The mission of the Welding Specialist certificate program of study is to develop entry-level welders for industry with skill in major commercial welding processes capable of part layout, inspection, and process troubleshooting.

Additional Program Info: The Welding Specialist certificate includes twenty-seven (27) credit hours of study and can be completed by the full-time student in two semesters. It provides additional welding skill, as well as enrichment in related areas such as fabrication and machine trades. The graduate is prepared for entry-level employment as a production, maintenance welder, or construction trades apprentice.

## Associate in Applied Science

**Total Credit Hours:** 61 to 65

**Program Information:** The Welding Technology Associate in Applied Science degree program is to prepare students with skill and knowledge to develop welding processes, troubleshoot equipment, part and quality problems as welding engineering technicians for industry. The degree requirements include all the technical courses included in the Welding Specialist certificate as well as engineering technology courses and general education courses required for an associate in applied science degree.

**Additional Program Info:** The Welding Technology curriculum can be completed by a full-time student in two years and leads to an Associate in Applied Science degree. In addition to developing welding skills, the program includes technical background in such areas as metallurgy, physics, and electricity, as well as a survey of industry-related practices. Employment possibilities include welder, welding specialist, welding analyst, or welding technician.

**Contact Information:**
Agricultural and Industrial Technologies Department

Room 118
(309) 694-5171 or (309) 694-5510

### Welding Technology

#### GENERAL COURSES:
- ENGLISH* 3 CR. HRS.
- COMMUNICATION* 3 CR. HRS.
- LABORATORY SCIENCE/MATHEMATICS* 7 CR. HRS.
- SOCIAL SCIENCE* 3 CR. HRS.
- HUMANITIES* 3 CR. HRS.

#### PROGRAM COURSES:
- MACTR 121 MACHINE TOOL OPERATION I 3 CR. HRS.
- MECTK 121 INTRODUCTION TO MECHANICAL COMPUTER-AIDED DRAFTING USING AUTOCAD 3 CR. HRS.
- MECTK 226 STATISTICS AND QUALITY CONTROL 3 CR. HRS.
- MECTK 232 MATERIALS SCIENCE AND PHYSICAL METALLURGY 3 CR. HRS.
- NCTK 110 INTRODUCTION TO NUMERICAL CONTROL SYSTEMS 1 CR. HRS.
- NCTK 212 CNC MACHINE OPERATION I 2 CR. HRS.
- WELD 111 WELDING BLUEPRINT READING 3 CR. HRS.
- WELD 112 WELDING THEORY-SMAW 1 CR. HRS.
- WELD 113 WELDING THEORY-GMAW 1 CR. HRS.
- WELD 121 STICK WELDING I 1 CR. HRS.
- WELD 122 STICK WELDING II 1 CR. HRS.
- WELD 131 SEMI-AUTOMATIC ARC WELDING 1 CR. HRS.
- WELD 135 ADVANCED INDUSTRIAL SEMI-AUTOMATIC ARC WELDING (GMAW) 1 CR. HRS.
- WELD 141 GAS TUNGSTEN ARC WELDING 1 CR. HRS.
- WELD 150 WELD CERTIFICATION PREPARATION AND TESTING 1-5 CR. HRS.
- WELD 161 MAINTENANCE WELDING 2 CR. HRS.
- WELD 163 WELD FABRICATION WITH THE GMAW PROCESS 2 CR. HRS.
- WELD 210 WELDING EQUIPMENT MAINTENANCE AND OPERATION 3 CR. HRS.
- WELD 223 STICK WELDING III 1 CR. HRS.
- WELD 230 WELD TESTING 3 CR. HRS.
- WELD 240 WELD ENGINEERING TECHNOLOGY 3 CR. HRS.
- WELD 263 WELD FABRICATION WITH THE SMAW PROCESS 2 CR. HRS.

* See specific requirements for Associate in Applied Science Degree.

**Recommended Course Sequence:**
1st Semester: English; WELD 111; WELD 112; WELD 113; WELD 121; WELD 122; WELD 131; WELD 135; WELD 161
2nd Semester: Laboratory Science/Mathematics; WELD 141; WELD 163; WELD 223; WELD 210; MACTR 121
3rd Semester: Communication; Humanities; Laboratory Science/Mathematics; MECTK 121; WELD 230; WELD 263
4th Semester: Social Science; NCTK 110; NCTK 212; MECTK 226; MECTK 232; WELD 240

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

See page 357 for program mission, goals, and student learning outcomes.
ASSOCIATE IN GENERAL STUDIES

The Associate in General Studies degree allows individuals interested in acquiring a broad range of academic courses to suit their specific needs. While it is not designed as a transfer degree, some coursework may fulfill Illinois Articulation Initiative general requirements or transfer to a four-year college or university. Students who choose this option should work closely with their advisors to determine whether this option meets current and future needs.
Associate in General Studies

**Total Credit Hours:** 60 to 64

**Program Information:** The Associate in General Studies Degree is for individuals who wish to take courses to satisfy their needs and desires for self-improvement and development. Students are advised that the Associate in General Studies Degree is generally NOT intended for transfer to a four-year school or to prepare a student for employment. It should not be confused with taking General Education courses in preparation for either an Associate in Arts or Associate in Science Degree or an Associate in Applied Science Degree.

**Additional Program Info:** This degree program is offered online. Please contact the Virtual Campus Office for more information, (309) 694-8888, or icc.edu/ VirtualCampus.

**Contact Information:**
Advisement and Counseling Services
East Peoria Campus
Room L220
(309) 694-5281

**General Courses:**
- **ENGLISH*** 6 CR. HRS.
- **SOCIAL SCIENCE*** 6 CR. HRS.
- **MATHEMATICS*** 3 CR. HRS.
- **LABORATORY SCIENCE*** 4 CR. HRS.
- **HUMANITIES*** 3 CR. HRS.

**Elective Courses:**
- **ELECTIVES*** 37 CR. HRS.

*See specific requirements for Associate in General Studies Degree in the current ICC Catalog.

**Recommended Course Sequence:**
1st Semester: Humanities; Electives
2nd Semester: English; Mathematics; Electives
3rd Semester: Laboratory Science; Social Science; Electives
4th Semester: English; Social Science; Electives

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
Transfer Degrees

Associate in Arts Degrees
Associate in Science Degrees
Associate in Engineering Science Degree
Transfer Degrees

The Illinois Central College offers a wide variety of courses specifically designed for transfer. The keys to successful transfer are to start planning immediately and to select coursework carefully. The Associate of Arts (A.A.), the Associate in Science (A.S.), and the Associate in Engineering Science (A.E.S.) degrees are intended for students planning to transfer to a college or university for a baccalaureate degree. However, since requirements can vary from one institution to another, it is recommended that students meet regularly with an academic advisor as well as verify information with the transfer institution. Academic advisors are available to help students develop an individual education plan. Although Associate in Applied Science (A.A.S.) programs are not primarily designed for transfer to a four-year institution, ICC has established articulation agreements with a number of colleges and universities so that many A.A.S. degrees may transfer. Students should consult an academic advisor or program coordinator regarding the growing transfer possibilities with the A.A.S. degrees.

Transfer

East Peoria Campus • 303B • (309) 694-5330

ABOUT TRANSFERRING

Students who earn the Associate of Arts or Associate in Science (A.A. or A.S.) degrees at Illinois Central College before transferring may be granted junior standing by many baccalaureate institutions considering the general education requirements are completed. Transfer students should check early with their transfer institutions and advisors to ensure they are meeting all requirements specific to each individual institution. A few colleges/universities may do a course-by-course examination of work from Illinois Central College, and could expect students to complete some general education courses at their institution. Students should work together with their academic advisors and the Transfer Center along with transfer institutions to build a transfer degree program appropriate for them. As a general rule, earning an A.A. or A.S. degree is an excellent strategy for transfer. Students who decide to transfer to another college in Illinois before they earn an A.A. or A.S. degree will find that IAI-approved courses will be accepted by most baccalaureate institutions. Transferring without completing the general education core curriculum may mean that students must complete the general education requirements at the four-year institution.

TRANSFER PLANNING

By carefully constructing an educational plan, students can select Illinois Central College courses for transfer to a variety of four-year colleges and universities. When a student has selected a transfer school, it is important that the student review that institution’s specific admission and course requirements. Transfer information can be obtained from their academic advisor and the Transfer Center or on the Transfer Assistance page on the ICC website http://icc.edu/students/transfer-assistance/.

TRANSFERRING FROM ILLINOIS CENTRAL COLLEGE

The Transfer Center at Illinois Central College offers information about transferring to baccalaureate institutions. For successful transfer, the following checklist is available for all students who plan to transfer:

1. Choose a Plan of Study (Major)
   You can investigate possible career paths in the ICC Career Center or through labor market information and career interest surveys.

2. Plan Your ICC Courses
   Your academic advisor and/or the Transfer Center, can assist in course selection. Transfer program course guides available in various department offices and/or on the college website. Because transfer requirements change frequently, verify all transfer information directly with the college/university.

3. Visit the ICC Transfer Center
   Transfer Center has the following available resources: internet access, college-career search programs, applications, college catalogs, and more. To schedule an appointment call (309) 694-5330 or email: transfcenter@icc.edu

4. Research and Choose a University
   Be sure to compare academic programs, entrance requirements, costs, deadlines for applications and transcript submission, and housing requirements for each of the possible colleges/universities.

5. Visit Campuses
   Try to visit each of the colleges as time and resources permit, try to envision yourself there. Virtual tours may be available on the Internet and many college representatives also come to the ICC campus in October for “Transfer Day / College Night” and throughout the year.

6. Apply for Admission
   Submit your applications (and fees, if needed) to your transfer institutions of choice.

7. Send Transcripts
   Send your academic transcripts (from all colleges you have attended) and obtain letters of recommendation, if necessary.

8. Secure Financial Aid
   Complete the financial aid process by completing the Free Application for Federal Student Aid (FAFSA) application.

9. Stay in Touch With Your Transfer School
   Once you have been accepted, complete the housing process and register for classes as soon as possible.

10. Attend Your Transfer School’s Orientation
    Attend any “Transfer Days” or student orientations to get involved at your new school.

Baccalaureate Completion/Transfer Agreements

ILLINOIS ARTICULATION INITIATIVE (IAI)

Illinois Central College participates in the Illinois Articulation Initiative (IAI), and has since 1998. Under the terms of IAI, a student who fulfills the general education requirements for the Associate of Arts Degree and Associate of Science Degree as listed in this catalog may also fulfill the lower divisional general education requirements at more than 100 colleges and universities, both private and public, within the State of Illinois. This benefit is
intended to make the transition to an Illinois four-year college or university easier. Information about IAI, including names of participating schools and specific course information, is available from Illinois Central College academic advisors, the ICC Transfer Center, and the IAI website: iTransfer.org

Refer to IAI and ICC General Education Course Alignment (page 168) and follow ICC’s IAI/Transfer guidelines:

- Students should be advised that most universities will accept for transfer no more than approximately 66 credit hours from a community college toward the bachelor degree.
- Students transferring in the completed IAI General Education Core Curriculum (GECC) will not be required to complete ICC’s Associate in Arts Degree or Associate in Science Degree specific requirements.
- The College will accept IAI GECC courses that have a passing grade when the Core has not been completed prior to transfer. Students must maintain an overall cumulative grade point average of 2.00 (C) in all IAI GECC courses and ENGL 110 and ENGL 111 must receive a grade of C or better.
- ICC does not accept partial semester credit, but will accept credit for quarter hours to satisfy course requirements. Minimum hours required for Associate in Arts Degree or Associate in Science Degree will remain at 60 hours.
- Transfer credit may be accepted from another college or university accredited by a regional accrediting association. If the credit is not from such an institution, the transcript will not be evaluated nor will the credit be accepted as fulfilling IAI requirements.
- ICC accepts College-Level Examination Program (CLEP) credits to satisfy credit requirements for a degree and/or as fulfilling the IAI GECC. Refer to page 13 for more information on CLEP. If a student fulfills the entire IAI package at a school and the school so certifies, ICC will accept that the student has fulfilled the IAI general education requirements. If the student does not complete the entire IAI package.

Additional Articulation Agreements

In addition to the Illinois Articulation Initiative (IAI) with the state universities for students who complete transfer degrees at Illinois Central College, the College also has written agreements with several baccalaureate completion institutions. It is the transfer students’ responsibility to ensure that all course requirements are met by communicating with the chosen four-year institution prior to transferring.

While not exhaustive, the following is a list of current transfer agreements. For more detailed information or an updated listing go online to: http://icc.edu/students/transfer-assistance/ or call the Transfer Center at (309) 695-5330.

ASSOCIATE IN ARTS

The Associate in Arts degree is designed to provide students with the foundation for transferring to a four-year college or university. The degree requires a minimum of 60 credit hours; approximately 40 of those hours are in general education coursework. (See page 42 for general education requirements) Students usually choose to focus the remaining hours of coursework in their future area of emphasis.

A special agreement called the Illinois Articulation Initiative (IAI) works to make transfers between participating colleges and universities within Illinois smoother. Most colleges and universities will accept no more than roughly 66 credit hours from community colleges towards a bachelors degree. Colleges participating in the IAI agree to accept the general education coursework completed at ICC as a package – to meet the general education requirements at IAI participating schools. Some schools have additional or specific courses they want above the IAI gen eds. To most effectively plan coursework at ICC, students should work with their advisor and the Illinois Central College Transfer Center.

The following pages outline recommended coursework that will help prepare a student for continued education in their selected field of study.
Associate in Arts

Total Credit Hours: 60 to 64

Program Information: In addition to the General Requirements for a Degree, candidates for the degree of Associate in Arts must complete at least 60 semester hours of TRANSFER CREDIT courses including the General Education requirements on page 40. Check current IAI transfer status by confirming at iTransfer.org. See the current ICC catalog for further descriptions. Courses labeled occupational credit (OC) in course descriptions may not be applied to degree requirements. All students who earn the Associate in Arts Degree must complete the specific degree requirements in effect for the Associate in Arts degree at the time they complete the “Application for Degree/Certificate.”

Additional Program Info: This degree program is offered online. Please contact the Virtual Campus Office for more information. (309) 694-8888 or icc.edu/VirtualCampus.

Associate in Arts

GENERAL COURSES:

- ENGL 110 COMPOSITION I 3 CR. HRS.
- ENGL 111 COMPOSITION II 3 CR. HRS.
- COMMUNICATION* 3 CR. HRS.
- SOCIAL SCIENCE* 9 CR. HRS.
- MATHEMATICS* 3 CR. HRS.
- PHYSICAL SCIENCE* 3-4 CR. HRS.
- LIFE SCIENCE* 3-4 CR. HRS.
- FINE ARTS* 3 CR. HRS.
- HUMANITIES* 3 CR. HRS.
- HUMANITIES/FINE ARTS* 3 CR. HRS.

ELECTIVE COURSES:

- ELECTIVES 23 CR. HRS.

* See specific requirements for Associate in Arts Degree.

Recommended Course Sequence:
1st Semester: ENGL 110; Life Science; Humanities; Communication; Electives
2nd Semester: ENGL 111; Social Science; Physical Science; Fine Arts; Electives
3rd Semester: Social Science; Mathematics; Electives
4th Semester: Humanities/Fine Arts; Social Science; Electives

Additional Program Info: This degree program is offered online. Please contact the Virtual Campus Office for more information, (309) 694-8888, or icc.edu/VirtualCampus.

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog

Students MUST meet each semester with their assigned academic advisor to plan a course schedule that meets student needs and fulfills program requirements.
Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The Accountancy program of study is designed for the student who plans to pursue a career in accounting after completion of a bachelor's degree program. Upon completion of the degree at Illinois Central College, most of the general education requirements at most state universities in Illinois will have been met as well as the usual accounting and business courses found in the typical first two years of a bachelor's degree. Public accounting, private accounting, managerial accounting, cost and governmental accounting are a sampling of the areas in which the student may specialize after transferring to a four-year bachelor's degree.

Additional Program Info: This degree program is offered online. Please contact the Virtual Campus Office for more information. (309) 694-8888 or icc.edu/VirtualCampus.

To Remain in and Graduate From the Program: Students must meet each semester with their assigned academic advisor to plan a course schedule that meets student needs and fulfills program requirements. Students transferring to a four-year institution are advised to check with their transfer institution which may recommend 60 credit hours be completed before transfer.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: Students who have a strong interest in mathematics and business should investigate the Actuarial Science field of study. Actuaries use mathematical, statistical, and economic models to design, price, finance, and operate benefit plans which protect people from risks of injury, illness, death, property damage, and the loss of income due to unemployment or retirement. A required background in calculus, accounting, and economics can be acquired at Illinois Central College.

Additional Program Info: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts
Total Credit Hours: 60 to 64

Program Information: This program of study sequence is designed for students planning to transfer to a four-year institution pursuing a Bachelors degree in Agriculture. The student is encouraged to enroll in courses required at the transferring institution so it is important that each student determine as early as possible which institution he/she is planning to attend after completion of courses at Illinois Central College.

Additional Program Info: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Admission To the Program: The student enrolling in this curriculum should be in the upper half of his/her high school class or have an ACT composite score of 20 or above. Job availability will be dependent upon the major at the four-year institution. Students are encouraged to complete the following courses in high school: (1) three or four years of mathematics; (2) two or three years of science; (3) four years of English; and (4) two to four years of agriculture (where offered).

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The Business Administration area of study is for students intending to transfer to a four-year institution to pursue a bachelor’s degree in business-oriented fields such as general management, marketing, advertising, finance, and production management. Students have obtained successful business careers with firms such as Caterpillar Inc., General Electric, Procter and Gamble, and IBM. Illinois Central College has special articulation agreements with many four-year institutions insuring transfer of course work. PLEASE CONTACT AN ACADEMIC ADVISOR REGARDING THESE AGREEMENTS. Specialty courses in the student’s major are usually taken at the transfer institution during the junior and senior years.

Additional Program Info: This degree program is offered online. Please contact the Virtual Campus Office for more information, (309) 694-8888, or icc.edu/VirtualCampus.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: Communications is the most significant tool of humankind. In various forms, communication is all around us and constitutes the basis for all human interaction. Courses at Illinois Central College are designed to allow the student to explore both the practical and creative natures of communication as it relates to the world in which we live. Illinois Central College provides two approaches to the study of communication: the General Communication Option, and the Public Relations Option. As a natural outgrowth and extension of communication classes, Illinois Central College’s Forensic Union/Speech Team offers interested students the opportunity to participate in an intercollegiate forensic program, which has achieved several national championships. Students completing the Public Relations Option should consider elective courses in business, marketing, or political science.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Recommended Course Sequence:
1st Semester: COMM 110; COMM 120; ENGL 110; Fine Arts; Social Science
2nd Semester: COMM 203; ENGL 111; MCOMM 113; Life Science
3rd Semester: COMM 113; COMM 115; COMM 212; COMM 245; Physical Science; Social Science
4th Semester: COMM 204; MATH 111; Humanities; Humanities/Fine Arts; Social Science
Associate in Arts
Total Credit Hours: 60 to 64

Program Information: Communications is the most significant tool of humankind. In various forms, communication is all around us and constitutes the basis for all human interaction. Courses at Illinois Central College are designed to allow the student to explore both the practical and creative natures of communication as it relates to the world in which we live. Illinois Central College provides two approaches to the study of communication: the General Communication Option, and the Public Relations Option. As a natural outgrowth and extension of communication classes, Illinois Central College's Forensic Union/Speech Team offers interested students the opportunity to participate in an intercollegiate forensic program, which has achieved several national championships. Students completing the Public Relations Option should consider elective courses in business, marketing, or political science.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts
Total Credit Hours: 60 to 64

Program Information: This area of study is designed for people planning to transfer to a four-year college or university for completion of a baccalaureate degree in Computer Science with an Information Systems emphasis. The baccalaureate degree prepares the student for careers in computer programming, systems analysis, and (with experience) management positions in computer information systems.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts
Total Credit Hours: 60 to 64

Program Information: This area of study is designed for students intending to prepare for a career in the criminal justice field. The area of study may prepare the student for employment in some areas of the field; however, many of the employment opportunities in the criminal justice field require a four-year degree. Students desiring to transfer should work very closely with their advisors.

Additional Program Info: This degree program is offered online. Please contact the Virtual Campus Office for more information. (309) 694-8888 or icc.edu/VirtualCampus.

Admission To the Program: Students must complete basic skills placement testing before admission into this program. Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

To Remain in and Graduate From the Program: Students must meet each semester with their assigned academic advisor to plan a course schedule that meets student needs and fulfills program requirements.

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
**Associate in Arts**

**Total Credit Hours:** 60 to 64

**Program Information:** The Dietetics area of study has been planned to allow students to readily transfer into the junior year at a four-year institution. Possible careers in this field allow Dietitians to establish nutritional care plans, help prevent and treat illnesses through the promotion of healthy eating habits, assess and evaluate clients' nutritional needs, and oversee institutional food service systems. They also counsel individuals and groups on nutritional practices, supervise food service personnel and large scale meal planning and preparation in health care facilities, industrial cafeterias, prisons and schools, oversee food purchases, and participate in dietetic research and education.

**Additional Program Info:**
The student is encouraged to select electives that will provide additional expertise in math, business, economics, marketing and accounting. (Only transferable courses numbered 110 or higher will apply towards the 60 credit hours graduation degree requirements.) Along with or after completion of the bachelor's degree, students must apply and obtain an internship which may be an additional 6 to 12 months long. These internships are highly competitive and require the student to maintain a good grade point average to make herself/himself more marketable. Once the bachelor's degree and internship is completed the student is then eligible to take the Academy of Nutrition and Dietetic's registration examination.

**Accreditation:**
To become a Registered Dietitian (RD), a four year degree in Dietetics/Nutrition is required. After a Bachelor's degree is acquired students will complete an internship to be eligible to take the Dietetic's registration examination. All programs must meet requirements of the Academy of Nutrition and Dietetics credentialing body.

**Admission To the Program:**
Students complete academic placement testing before admission into this program. The student enrolling in this curriculum should have academic placement test scores for reading at a college level. Completion of high school algebra and/or placement test scores into MATH 110 at Illinois Central College are favorable. High school recommendations include 2 to 3 years laboratory science, including biology and chemistry; 3 to 4 years English; 1 year algebra and 1 year geometry with grade averages of "C" or better in each of these high school courses.

**To Remain in and Graduate From the Program:**
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Learning Opportunities

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The English area of study is designed for students planning to transfer to a senior college or university for completion of a baccalaureate degree. Students build a strong background in the humanities, writing, and literature. The English course of study is designed for students who have as educational goals: (1) teaching elementary or secondary language arts; (2) business writing, advertising, publishing, or editorial work; (3) pre-professional majors, especially law; (4) undecided college transfer plans; or (5) self-improvement in the areas of reading and writing.

Admission To the Program: English majors should complete four years of high school English.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The baccalaureate degree in history is designed to prepare students for a broad range of career opportunities. In addition to teaching, a history major is a preferred background for many careers: Law (a history B.A. is a preference of many law schools); federal, state and local government positions especially the Foreign Service, the National Park Service, and military careers; museum direction, library and archival work; the business fields of public relations and advertising; journalism and other media; and public policy and planning agencies. These fields are open to history graduates because their degree indicates to future employers they possess writing and research skills and a basic understanding of the world and its people.

Admission To the Program:
Two years of a foreign language may be required for an undergraduate degree in history and for entry into most law schools. Students should check with the school to which they intend to transfer.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

- PHIL 110 INTRODUCTION TO PHILOSOPHY 3 CR. HRS.
- FINE ARTS* 3 CR. HRS.
- HUMANITIES*** 3 CR. HRS.

PROGRAM COURSES:
- HISTORY** 12 CR. HRS.

ELECTIVE COURSES:
- ELECTIVES**** 11 CR. HRS.

** See specific requirements for Associate in Arts Degree.
** HIST 117, 118, 201 and 202 are Social Science courses in the General Education core for the Associate in Arts Degree. (HIST 110, 125, 203, 204, 219 and 250 are History Electives that transfer but do not satisfy requirements in the General Education core.)
*** HIST 111 or 112 fulfills part of the Humanities/Fine Arts requirement for the Associate in Arts Degree.
**** Suggested Electives: ECON 111; GEOG 112, 114; LIT 110; INTST 130-134; PHIL 211; POLSC 115, 119, 122, 124; PSY 110; SOC 110, 114

Recommended Course Sequence:
1st Semester: ENGL 110; GEOG 113; Physical Science; History; Humanities
2nd Semester: ENGL 111; PHIL 110; Life Science; Mathematics; History
3rd Semester: COMM 110; ECON 110; History; Electives
4th Semester: Political Science; Fine Arts; History; Electives

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
Associate in Arts

Total Credit Hours: 60 to 64

Program Information: Completion of the Interior Design area of study prepares students for residential and business design positions in the retail field. Study in this area affords opportunities in the commercial area of furniture, drapery, carpeting, home accessories, wallpaper, and paint stores.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended. Four year programs that include Interior Design vary from institution to institution. Students must work closely with their advisor to satisfy any specific computer science requirements that are a part of the receiving institution’s general education component.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The International Studies area of study at Illinois Central College is for students who plan to transfer to a four-year college or university for completion of a baccalaureate degree. Within this curriculum, students take courses in the social sciences and humanities to gain a more global perspective, as well as an understanding of other cultures. The student is required to take a foreign language to deepen his/her understanding of another culture. Study abroad is encouraged with this program. This degree will serve as a basis for various careers in the field of international relations, foreign or public service, or careers in international institutions. This degree indicates to future employers that the student has a basic understanding of the world and its peoples.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts
Total Credit Hours: 60 to 64

Program Information: This area of study emphasizes the development of professional-level writing and reporting skills and provides students with a broadly-based program of liberal arts courses necessary for a career in journalism, radio/television news, public relations, and business reporting. This suggested area of study is basically designed for students planning to transfer to a senior college or university. Because requirements at four-year institutions vary, students planning to transfer should seek information about the particular program they plan to enter.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The Liberal Arts area of study is designed for students planning to transfer to a senior college or university for completion of a baccalaureate degree. This course sequence intends to provide a strong, general foundation in the humanities. It provides breadth in a variety of disciplines rather than aiming at depth in any one. This area of study is especially appropriate for students who have as their educational goals: (1) transferring to a liberal arts college, (2) undecided plans for a major in transferring to any senior college or university, (3) a desire to understand more thoroughly the underlying principles of individual and social behavior in the environment.

To Remain in and Graduate From the Program: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended. This degree program is also offered online. Please contact the Virtual Campus Office for more information, (309) 694-8888, or icc.edu/Virtual Campus.

- GRDSN 140  GRAPHIC DESIGN I  3 CR. HRS.

* See specific requirements for Associate in Arts

** A three credit hour Global Perspectives (GP) course is required to graduate at most major universities. These courses are available at ICC within the social sciences and humanities electives. Please see your advisor to determine which GP course is applicable to the institution you wish to transfer to.

Recommended Course Sequence:
1st Semester: MM 140; GRDSN 140; ENGL 110; COMM 110
2nd Semester: MM 150; MCOMM 217; ENGL 111; Mathematics; Physical Science
3rd Semester: MM 142; MM 230; Life Science; Social Science; ART 151
4th Semester: MM 241; MCOMM 224; Humanities; Social Science; Social Science
Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The music student must successfully complete the following course work before transferring to a four-year university as a junior in music:
(1) four semesters of music theory; (2) four semesters of applied music (private instruction); (3) one semester of class piano; (4) four semesters participation in one or more college performance groups. There are six performance organizations in which all students at ICC are invited to participate, whether music majors or not; Concert Band, Concert Choir, Chamber Singers, Jazz Band, Philharmonic Chorale, and Vocal Jazz Ensemble. Music students are required to participate in a performance organization each semester they are registered for music theory or applied music. Performance organizations present public concerts at ICC, high schools, and for special groups throughout the college district.

Additional Program Info: Students enrolled in the Associate in Arts degree program must meet with their assigned academic adviser to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended. To maximize musical skill development, each level of Harmony and Analysis, Musicianship, and Class Piano should be taken concurrently (e.g.: MUS 110, 170, 180; MUS 111, 171, 181; MUS 210, 270, 280). If the student’s primary performance medium is piano, the Applied Piano numbers may be substituted (e.g.: MUS 117, 170, 180; MUS 118, 171, 181; MUS 217, 270, 280).

Accreditation: Illinois Central College is an accredited institutional member of the National Association of Schools of Music (NASM).

Admission To the Program: A score of 70% or better on music theory placement exam or successful completion of MUS 136 and diagnostic audition in primary performance area.

Contact Information:
Arts and Communication Department
East Peoria Campus
Room 124A
(309) 694-5113

Music

GENERAL COURSES:

- ENGL 110 COMPOSITION I 3 CR. HRS.
- ENGL 111 COMPOSITION II 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- SOCIAL SCIENCE* 3 CR. HRS.
- SOCIAL SCIENCE* 3 CR. HRS.
- MATHEMATICS* 3 CR. HRS.
- LIFE SCIENCE* 3-4 CR. HRS.
- PHYSICAL SCIENCE* 3-4 CR. HRS.
- MUS 148 INTRODUCTION TO JAZZ 3 CR. HRS.
- MUS 149 INTRODUCTION TO MUSIC LITERATURE 3 CR. HRS.
- HUMANITIES* 3 CR. HRS.

PROGRAM COURSES:

- APPLIED MUSIC** 8 CR. HRS.
- ONE PERFORMANCE ORGANIZATION*** 4 CR. HRS.
- MUS 110 CLASS PIANO **** 2 CR. HRS.
- MUS 170 THEORY I 3 CR. HRS.
- MUS 171 THEORY II 3 CR. HRS.
- MUS 180 MUSICIANSHIP I 1 CR. HR.
- MUS 181 MUSICIANSHIP II 1 CR. HR.
- MUS 270 THEORY III 3 CR. HRS.
- MUS 271 THEORY IV 3 CR. HRS.
- MUS 280 MUSICIANSHIP III 1 CR. HR.
- MUS 281 MUSICIANSHIP IV 1 CR. HR.

* See specific requirements for Associate in Arts Degree.

** Students should enroll in applied music each semester. If a student enrolls for more than four semesters, the last number of the sequence may be repeated.

*** For each semester of enrollment in applied music, she/he must also enroll in a performing organization. Students should complete 2 semesters at the 100 level of each performing organization before progressing to the 200 level.

**** If a student’s primary instrument is piano MUS 110 is not required.

Recommended Course Sequence:

Previous Semester (for preprogram courses): MUS 136

1st Semester: Applied Music; Performing Organization; MUS 110; MUS 170; MUS 180; ENGL 110; Mathematics; MUS 148
2nd Semester: Applied Music; Performing Organization; MUS 171; MUS 181; ENGL 111; Life Science; PSY 110
3rd Semester: Applied Music; Performing Organization; MUS 270; MUS 280; MUS 149; COMM 110; Social Science
4th Semester: Applied Music; Performing Organization; MUS 271; MUS 281; Physical Science; Humanities; Social Science

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The Philosophy area of study is designed for students planning to transfer to a four-year college or university for completion of a baccalaureate degree. Students concentrate on building a strong foundation in philosophy, writing, and critical thinking. The philosophy area of study is designed for students who have as educational goals: (1) teaching at the college or university level; (2) pre-professional majors, especially law; (3) undecided college transfer plans; (4) self-improvement in the areas of reading, writing, critical thinking, and problem solving; (5) students who are deeply curious and strongly motivated by questions of life, death, God, meaning, purpose, value, and the nature of reality.

Additional Program Info: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The Political Science area of study is designed for students planning to transfer to a four-year college or university for completion of a baccalaureate degree. Students concentrate on building a strong foundation in political science as well as other related social science courses. It is recommended that prospective students take a traditional college-preparatory curriculum in high school, with a strong emphasis on the liberal arts and social sciences.

Additional Program Info: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

**Associate in Arts**

**Total Credit Hours:** 60 to 64

**Program Information:** Careers in statistics require a strong background in mathematics. Certain specific courses in the mathematics sequence are recommended. For persons interested in statistics, it is wise to consider a secondary subject in which statistical methods are applicable. Some four-year schools require as much as 15 credit hours in an area of this type for graduation. These might include, but are not limited to, biology, psychology, or economics. Students should be aware that some colleges and universities require proficiency in a foreign language.

**Additional Program Info:** Students enrolled in the Associate in Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Arts

Total Credit Hours: 60 to 64

Program Information: The Theatre area of study, leading to an Associate in Arts degree, is designed to prepare for transfer to a four-year university after completing the four semester program. We offer study in both performance and technical areas, one-on-one advisement with classes, and help to explore possible careers associated with theatre, film, and television. The program begins to prepare students interested in careers in acting, directing, arts management, teaching, scenic, costume, lighting, and makeup design. The program produces four shows per year in multiple venues. This practical experience is invaluable and allows the student the opportunity to work in all areas of the theatre and gain insight and understanding of the theatrical process.

Additional Program Info: Students enrolled in the Associate in Arts degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Theatre

GENERAL COURSES:
- ENGL 110  COMPOSITION I  3 CR. HRS.
- ENGL 111  COMPOSITION II  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- PSY 110  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- SOCIAL SCIENCE*  3 CR. HRS.
- SOCIAL SCIENCE*  3 CR. HRS.
- MATHEMATICS*  3 CR. HRS.
- LIFE SCIENCE*  3 CR. HRS.
- PHYSICAL SCIENCE*  3 CR. HRS.
- THTRE 110 or THTRE 111  THEATRE APPRECIATION or MODERN DRAMA  3 CR. HRS.
- HUMANITIES*  3 CR. HRS.
- HUMANITIES/FINE ARTS*  3 CR. HRS.

PROGRAM COURSES:
- THTRE 113  INTRODUCTION TO TECHNICAL THEATRE  3 CR. HRS.
- THTRE 114  FUNDAMENTALS OF THEATRICAL DESIGN  3 CR. HRS.
- THTRE 115  STAGE MAKEUP  2 CR. HRS.
- THTRE 118  THEATRE PRACTICUM  1 CR. HR.
- THTRE 119  THEATRE PRACTICUM  1 CR. HR.
- THTRE 122  ACTING I  3 CR. HRS.
- THTRE 123  DIRECTING I  3 CR. HRS.
- THTRE 210  INTRODUCTION TO COSTUMING  3 CR. HRS.
- THTRE 218  THEATRE PRACTICUM  1 CR. HR.
- THTRE 219  THEATRE PRACTICUM  1 CR. HR.
- THTRE 222  ACTING II  3 CR. HRS.
- THTRE 223  DIRECTING II  3 CR. HRS.

* See specific requirements for Associate in Arts Degree.

Recommended Course Sequence:
1st Semester: THTRE 110 or 111; THTRE 122; THTRE 113; ENGL 110; THTRE 118; Mathematics
2nd Semester: THTRE 222; Life Science; Social Science; ENGL 111; THTRE 119; THTRE 115
3rd Semester: THTRE 123; THTRE 218; COMM 110; Social Science; Physical Science; Humanities
4th Semester: THTRE 114; THTRE 219; THTRE 223; THTRE 210; PSY 110; Humanities/Fine Arts
ASSOCIATE IN SCIENCE

The Associate in Science degree is a baccalaureate-oriented transfer degree focused in life or physical sciences, or professional fields with these study areas as a foundation. Degree completion may qualify the individual for junior standing at many four-year colleges and universities. Students who complete the Associate in Science degree at ICC will need to complete additional requirements at ICC or the transfer institution in order to complete the Illinois Articulation Initiative's general education requirements (For more information on the Illinois Articulation Initiative, see page 166.)

The following pages outline recommended coursework that will help prepare a student for continued education in their selected field of study.
Associate in Science

Total Credit Hours: 60 to 64

Program Information: Associate in Science Degree must complete at least 60 credit hours of TRANSFER CREDIT courses including the General Education requirements listed below. Students must maintain an overall grade point average of 2.00 (C). See pages 8 and 9 of the current College Catalog for further IAI description. All students who earn the Associate in Science Degree must complete the specific degree requirements in effect for the AS degree at the time they apply for graduation.

Additional Program Info: This degree program is offered online. Please contact the Virtual Campus Office for more information. (309) 694-8888 or www.icc.edu/VirtualCampus.

Associate in Science

Total Credit Hours: 60 to 64

Program Information: Students identified as biological science majors take two years of basic work, followed by a major in a specific area of interest. Many occupations depend on an interest in and an aptitude for life science, including: forester, biochemist, biologist, fish and wildlife service, zoologist, botanist, ecologist, oceanographer, teacher, pharmacologist, etc. Biology majors are usually interested in the study of organisms and life functions, and have a great interest in the natural world. Topics pursued range from subcellular particles to vast populations. Since each living organism is part of a larger interacting system, biology is intertwined with other important fields of study. Knowledge of biology is centered on understanding much of the world and life around us.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Associate in Science

Total Credit Hours: 60 to 64

Program Information: The Chemistry area of study is designed for students planning to transfer to a senior college or university for completion of a baccalaureate degree. During the first two years, students concentrate on building a strong foundation in the sciences and mathematics. The chemistry curriculum is sufficiently flexible to meet the needs of students with the following goals: (1) industrial research and development, (2) environmental research, (3) liberal arts background for medical and allied health professions, (4) secondary teaching of chemistry, or (5) chemical engineering.

To Remain in and Graduate From the Program:
Students enrolled in the Associate in Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
**Associate in Science**

**Total Credit Hours:** 60 to 64

**Program Information:** The Engineering area of study at Illinois Central College is designed for students planning to transfer to a university for completion of a baccalaureate degree. During the two years at Illinois Central College, the student concentrates on building a strong foundation in the sciences and mathematics, and meets the requirements for the Associate in Science degree.

**Additional Program info:** Entry to many university engineering programs at the junior level requires additional engineering courses in the first two years. Students who complete the requirements for the Associate in Science degree may find that an additional year of study may be necessary after transferring if the engineering courses are not completed at ICC. Depending upon where a student is intending to transfer, it may be more beneficial to complete the Associate in Engineering Science Degree. All engineering students should meet with an engineering advisor as early as possible to determine which degree would be more beneficial.

### Associate in Science

**Total Credit Hours:** 60 to 64

**Program Information:** The Geology area of study at Illinois Central College is designed for students planning to transfer to a senior college or university for completion of a baccalaureate degree. During the two years at Illinois Central College, the student concentrates on building a strong foundation in the sciences and mathematics, and meets the requirements for the Associate in Science degree. The Geology curriculum is designed to prepare the student for a wide range of career opportunities. In addition to the positions traditionally available in petroleum and coal production, professional careers exist with:

1. governmental agencies, including the U.S. Geologic Survey, state geological surveys, the National Park Service, the Coast and Geodedic Survey, and the Bureau of Mines,
2. planning organizations,
3. environmental agencies,
4. educational institutions,
5. museums, and
6. various industrial firms.

**To Remain in and Graduate From the Program:**
Students enrolled in the Associate in Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Physics

GENERAL COURSES:

- ENGL 110  COMPOSITION I  3 CR. HRS.
- ENGL 111  COMPOSITION II  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- SOCIAL SCIENCE*  6 CR. HRS.
- MATH 222  CALCULUS AND ANALYTIC GEOMETRY I  5 CR. HRS.
- MATH 223  CALCULUS AND ANALYTIC GEOMETRY II  4 CR. HRS.
- CHEM 130  GENERAL CHEMISTRY  4 CR. HRS.
- PHYS 211  ENGINEERING PHYSICS: MECHANICS  4 CR. HRS.
- LIFE SCIENCE*  4 CR. HRS.
- FINE ARTS*  3 CR. HRS.
- HUMANITIES*  3 CR. HRS.

PROGRAM COURSES:

- CHEM 132  GENERAL CHEMISTRY  4 CR. HRS.
- MATH 224  CALCULUS AND ANALYTIC GEOMETRY III  4 CR. HRS.
- MATH 230  LINEAR ALGEBRA  3 CR. HRS.
- MATH 250  DIFFERENTIAL EQUATIONS  3 CR. HRS.
- PHYS 212  ENGINEERING PHYSICS: ELECTRICITY AND MAGNETISM  4 CR. HRS.
- PHYS 213  ENGINEERING PHYSICS: THERMODYNAMICS  2 CR. HRS.
- PHYS 214  ENGINEERING PHYSICS: MODERN PHYSICS  2 CR. HRS.

* See specific requirements for Associate in Science Degree.

Recommended Course Sequence:
1st Semester: CHEM 130; MATH 222; ENGL 110; Life Science
2nd Semester: CHEM 132; MATH 223; ENGL 111; PHYS 211
3rd Semester: PHYS 212; MATH 224; COMM 110; Social Science; Humanities
4th Semester: PHYS 213; PHYS 214; MATH 230; MATH 250; Fine Arts; Social Science
Associate in Science

Total Credit Hours: 60 to 64

Program Information: Students planning to enter a professional school should seek specific information from the school they wish to attend since admission requirements vary considerably. Accredited chiropractic colleges require a minimum of 90 credit hours before entrance into the medical school, of which a minimum of 30 hours must come from upper-level courses. A bachelor’s degree is not required but is encouraged. Although a major in any academic field is usually acceptable, majors in biology and chemistry are especially suitable since major requirements in these fields overlap with pre-professional requirements.

Additional Program Info: Students enrolled in the Associate in Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended. It is recommended that a student whose plans include completing a bachelor’s degree before entrance into a chiropractic college complete math through calculus at ICC before transferring to the university.

Pre-Chiropractic

GENERAL COURSES:
- ENGL 110 COMPOSITION I 3 CR. HRS.
- ENGL 111 COMPOSITION II 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE
or COMM 212 PUBLIC SPEAKING 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- SOCIAL SCIENCE 3 CR. HRS.
- BIOL 111 THE BIOLOGY OF MAN
or BIOL 160 BIOPRINCIPLES I 4 CR. HRS.
- BIOL 205 PRINCIPLES OF HUMAN ANATOMY
AND PHYSIOLOGY I 4 CR. HRS.
- CHEM 130 GENERAL CHEMISTRY 4 CR. HRS.
- MATH 120 COLLEGE TRIGONOMETRY 3 CR. HRS.
- MATH 211 STATISTICAL ANALYSIS 4 CR. HRS.
- FINE ARTS 3 CR. HRS.
- HUMANITIES 3 CR. HRS.

PROGRAM COURSES:
- BIOL 206 PRINCIPLES OF HUMAN ANATOMY
AND PHYSIOLOGY II 4 CR. HRS.
- BIOL 210 MICROBIOLOGY 4 CR. HRS.
- CHEM 132 GENERAL CHEMISTRY 4 CR. HRS.
- CHEM 220 ORGANIC CHEMISTRY*
or PHYS 120 GENERAL PHYSICS* 5 CR. HRS.
- CHEM 230 ORGANIC CHEMISTRY*
or PHYS 121 GENERAL PHYSICS* 5 CR. HRS.

* Both sequences will be needed before entering into a DC program

Recommended Course Sequence:
Previous Semester (for pre-program courses):
1st Semester: MATH 120; CHEM 130; BIOL 205; ENGL 110; Social Science
2nd Semester: MATH 211; CHEM 132; BIOL 206; ENGL 111; PSY 110
Summer Semester 1: BIOL 210
3rd Semester: CHEM 220; PHYS 120; COMM 110 Or COMM 212; Humanities/Fine Arts
4th Semester: CHEM 230; PHYS 121; Fine Arts; Humanities; Social Science

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
**Pre-Medical, Pre-Dental**

### GENERAL COURSES:
- ENGL 110  **COMPOSITION I**  3 CR. HRS.
- ENGL 111  **COMPOSITION II**  3 CR. HRS.
- COMM 110  **COMMUNICATION: PROCESS AND PRACTICE**
  or COMM 212  **PUBLIC SPEAKING**  3 CR. HRS.
- PSY 110  **INTRODUCTION TO PSYCHOLOGY**  3 CR. HRS.
- SOC 110  **AN INTRODUCTION TO SOCIOLOGY**  3 CR. HRS.
- MATH 222  **CALCULUS AND ANALYTIC GEOMETRY I**  5 CR. HRS.
- MATH 223  **CALCULUS AND ANALYTIC GEOMETRY II**
  or MATH 211  **STATISTICAL ANALYSIS**  4 CR. HRS.
- BIOL 160  **BIOPRINCIPLES I**  4 CR. HRS.
- BIOL 161  **BIOPRINCIPLES II**  4 CR. HRS.
- CHEM 130  **GENERAL CHEMISTRY**  4 CR. HRS.
- HUMANITIES  3 CR. HRS.
- FINE ARTS  3 CR. HRS.

### PROGRAM COURSES:
- CHEM 132  **GENERAL CHEMISTRY**  4 CR. HRS.
- CHEM 220  **ORGANIC CHEMISTRY**  5 CR. HRS.
- CHEM 230  **ORGANIC CHEMISTRY**  4 CR. HRS.
- PHYS 120  **GENERAL PHYSICS**  5 CR. HRS.
- PHYS 121  **GENERAL PHYSICS**  5 CR. HRS.

* See specific requirements for Associate in Science Degree.

**Recommended Course Sequence:**
1st Semester: MATH 222; CHEM 130; BIOL 160; ENGL 110
2nd Semester: MATH 223 or MATH 211; CHEM 132; BIOL 161; ENGL 111; Fine Arts
3rd Semester: COMM 110; CHEM 220; PHYS 120; PSY 110
4th Semester: CHEM 230; PHYS 121; SOC 110; Humanities

Associate in Science

Total Credit Hours: 60 to 64

Program Information: Admission requirements to colleges of pharmacy vary considerably. Students planning to enter a pharmacy school should seek specific information from the school they wish to attend. Acceptance into a college of pharmacy is extremely competitive. Entrance into a college of pharmacy directly from ICC is possible; an alternative would be to receive a baccalaureate degree in biology, chemistry, or biochemistry before applying to the pharmacy college of their choice.

Additional Program Info: Students enrolled in the Associate in Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting Illinois Central College and personal requirements in addition to requirements for the institution to which transfer is intended.

Math, Science, and Engineering Department
East Peoria Campus
Room 320B
(309) 694-5365

Pre-Pharmacy

GENERAL COURSES:

- ENGL 110 COMPOSITION I 3 CR. HRS.
- ENGL 111 COMPOSITION II 3 CR. HRS.
- COMM 110 COMMUNICATION: PROCESS AND PRACTICE 3 CR. HRS.
- COMM 212 PUBLIC SPEAKING 3 CR. HRS.
- PSY 110 INTRODUCTION TO PSYCHOLOGY 3 CR. HRS.
- ECON 110 PRINCIPLES OF MACROECONOMICS 3 CR. HRS.
- ECON 111 PRINCIPLES OF MICROECONOMICS 3 CR. HRS.
- MATH 122 CALCULUS AND ANALYTIC GEOMETRY I 5 CR. HRS.
- MATH 222 CALCULUS AND ANALYTIC GEOMETRY II 4 CR. HRS.
- CHEM 132 GENERAL CHEMISTRY 4 CR. HRS.
- CHEM 130 GENERAL CHEMISTRY 4 CR. HRS.
- FINE ARTS* 3 CR. HRS.
- HUMANITIES* 3 CR. HRS.

PROGRAM COURSES:

- CHEM 132 GENERAL CHEMISTRY 4 CR. HRS.
- BIOL 205 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I 4 CR. HRS.
- BIOL 206 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II 4 CR. HRS.
- CHEM 220 ORGANIC CHEMISTRY 5 CR. HRS.
- CHEM 230 ORGANIC CHEMISTRY 4 CR. HRS.
- PHYS 120 GENERAL PHYSICS 5 CR. HRS.

ELECTIVE COURSES:

- PHYS 121 GENERAL PHYSICS 5 CR. HRS.

* See specific requirements for Associate in Science Degree.

Recommended Course Sequence:
1st Semester: MATH 222; CHEM 130; BIOL 160; ENGL 110
2nd Semester: MATH 223 or MATH 211; CHEM 132; BIOL 161; ENGL 111; PSY 110 or SOC 110
Summer Semester 1: Humanities; ECON 110 or ECON 111
3rd Semester: CHEM 220; BIOL 205; PHYS 120; COMM 110 or COMM 212

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
Pre-Physical Therapy

**GENERAL COURSES:**
- ENGL 110  COMPOSITION I  3 CR. HRS.
- ENGL 111  COMPOSITION II  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
- COMM 212  PUBLIC SPEAKING  3 CR. HRS.
- PSY 110  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- MATH 135  CALCULUS FOR BUSINESS AND SOCIAL SCIENCES  5 CR. HRS.
- MATH 222  CALCULUS AND ANALYTIC GEOMETRY I  5 CR. HRS.
- MATH 211  STATISTICAL ANALYSIS  4 CR. HRS.
- BIOL 160  BIOPRINCIPLES I  4 CR. HRS.
- BIOL 161  BIOPRINCIPLES II  4 CR. HRS.
- CHEM 130  GENERAL CHEMISTRY  4 CR. HRS.
- FINE ARTS*  3 CR. HRS.
- HUMANITIES  3 CR. HRS.

**PROGRAM COURSES:**
- BIOL 205  PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I  4 CR. HRS.
- BIOL 206  PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II  4 CR. HRS.
- CHEM 132  GENERAL CHEMISTRY  4 CR. HRS.
- PHYS 120  GENERAL PHYSICS  5 CR. HRS.
- PHYS 121  GENERAL PHYSICS  5 CR. HRS.

* See specific requirements for Associate in Science Degree.

Recommended Course Sequence:
1st Semester: MATH 135 or MATH 222; BIOL 160; CHEM 130; ENGL 110
2nd Semester: MATH 211; BIOL 161; CHEM 132; ENGL 111; PSY 110
3rd Semester: BIOL 205; PHYS 120; COMM 110 or COMM 212; Humanities
4th Semester: BIOL 206; PHYS 121; Fine Arts; Social Science

Pre-Veterinary

**GENERAL COURSES:**
- ENGL 110  COMPOSITION I  3 CR. HRS.
- ENGL 111  COMPOSITION II  3 CR. HRS.
- COMM 110  COMMUNICATION: PROCESS AND PRACTICE  3 CR. HRS.
  or COMM 212  PUBLIC SPEAKING  3 CR. HRS.
- PSY 110  INTRODUCTION TO PSYCHOLOGY  3 CR. HRS.
- SOCIAL SCIENCE  3 CR. HRS.
- MATH 222  CALCULUS AND ANALYTIC GEOMETRY I  4 CR. HRS.
  or MATH 135  CALCULUS FOR BUSINESS AND SOCIAL SCIENCES  4 CR. HRS.
- MATH 223  CALCULUS AND ANALYTIC GEOMETRY II  4 CR. HRS.
  or MATH 211  STATISTICAL ANALYSIS  4 CR. HRS.
- BIOL 160  BIOPRINCIPLES I  4 CR. HRS.
- BIOL 161  BIOPRINCIPLES II  4 CR. HRS.
- CHEM 130  GENERAL CHEMISTRY  4 CR. HRS.
- FINE ARTS  3 CR. HRS.
- HUMANITIES  3 CR. HRS.

**PROGRAM COURSES:**
- CHEM 132  GENERAL CHEMISTRY  4 CR. HRS.
- CHEM 220  ORGANIC CHEMISTRY  5 CR. HRS.
- PHYS 120  GENERAL PHYSICS  5 CR. HRS.
- PHYS 121  GENERAL PHYSICS  5 CR. HRS.

**ELECTIVE COURSES:**
- CHEM 230  ORGANIC CHEMISTRY  4 CR. HRS.
- AGRI 110  PRINCIPLES OF ANIMAL SCIENCE**  4 CR. HRS.

* See specific requirements for Associate in Science Degree.
** AGRI 110 is not required for students transferring into a biology curriculum

Recommended Course Sequence:
1st Semester: BIOL 160; CHEM 130; ENGL 110; MATH 222 or MATH 135
2nd Semester: BIOL 161; CHEM 132; ENGL 111; Humanities; MATH 223 or MATH 211
3rd Semester: CHEM 220; PHYS 120; COMM 110 or COMM 212
4th Semester: PHYS 121; PSY 110; Fine Arts; Social Science

For the most up-to-date program requirements, go online to the College catalog: icc.edu/catalog
ASSOCIATE IN ENGINEERING SCIENCE

The Associate in Engineering Science (AES) degree is designed to complete the lower-division (freshman and sophomore) portion of a baccalaureate degree in engineering. Baccalaureate engineering programs are highly structured and require extensive, sequential mathematics and science courses at the lower division level. Because the AES degree increases the focus on mathematics and science classes needed for engineering, ICC students need to take courses in a similar pattern to those freshman and sophomore students in the field of engineering at a four-year institution. Students enrolled in this degree program will still have general education coursework to take at their transfer institution their junior or senior year. However, the general education coursework required for ICC’s AES degree will transfer as general education courses at IAI participating schools.

Students interested in engineering should meet with an engineering advisor as soon as possible after applying to ICC.
**Associate in Engineering**

**Total Credit Hours:** 61

**Program Information:** The Associate in Engineering Science program prepares students for entry into a baccalaureate level engineering program at the junior level. The suggested sequence of courses includes a minimum of 61 semester hours of mathematics, chemistry, physics, selected engineering sciences, and many general education requirements common to most engineering B.S. degree programs. (See specific graduation requirements for the Associate in Engineering Science Degree.) This sequence is articulated with Bradley University, Missouri University of Science and Technology, University of Illinois at Urbana or Chicago, and fulfills the requirements of most other universities. Students planning to attend Northern Illinois University or Southern Illinois University should meet with an advisor as early as possible.

**Admission To the Program:** Students must complete the COMPASS placement tests before admission into this program. Summer sessions are necessary for most engineering students.

**To Remain in and Graduate From the Program:** Students enrolled in the Associate in Engineering Science degree program must meet with their assigned academic advisor to plan a specific course schedule meeting the requirements of both Illinois Central College and the institution to which transfer is intended.

Adult Education

ICC Peoria • Arbor Hall, A125 • (309) 690-6827

GED
The Adult Education program isn’t just another “GED” preparation program. In addition to preparing for the GED, the program features career pathways that include manufacturing and healthcare fields that are in demand in our area. Students learn about the skills needed, the education and training available, and prepare to transition into ICC programs.

GED preparation classes cover all subject areas found on the GED test and are free. These classes are made possible from a grant from the Illinois Community College Board (ICCB) and offered through ICC's Adult Education Program. Class enrollment is first come; first served and at the beginning and mid-term of each semester. Classes are offered at the East Peoria, Peoria and Pekin Campuses along with several sites around our community. Class schedules and times vary by site. For more information and upcoming enrollment dates, call our office at (309) 694-5240. Interested students must participate in a reading test.

English as a Second Language
Free beginning and intermediate ESL classes are offered at the ICC Peoria Campus and begin in August and January. Call (309) 690-6827 for more information.

Star Reading Program
Do you struggle with reading? Need additional help? No problem with our Star Reading program that assists students reading from a 4th grade to an 8th grade level obtain the skills necessary to achieve a high school equivalency. This program is tailored to you!

Teen Express
Are you 16 or 17 years old? Teen Express is the program for you! This 4 day afternoon program is fast-paced, customized to teens, providing them with the tools to pass their GED and enter post-secondary education!

I-Pathways
Can’t get to one of our classes because of transportation issues or babysitting problems? Try out our online GED preparation called I-Pathways. You must have a 10th grade reading level or higher to qualify. Students can only enroll during the set phone-in registration dates.

Corporate and Community Education

ICC Peoria • Hickory Hall • (309) 690-6900

Professional Development Institute
The Professional Development Institute (PDI) at Illinois Central College is a comprehensive training and consulting organization whose mission is to serve businesses and individuals. PDI's workforce development services are designed to help build a strong local economy by assisting in developing highly capable employes. PDI services include customized training programs as well as regularly scheduled open enrollment sessions for those who want to upgrade their skills or train for a new career.

PDI has the ability to offer relevant, current topics through a knowledgeable staff, state-of-the-art technology, and community and academic resources, including:

Business Effectiveness Programs: Leadership topics such as Change Management, Critical Thinking/Decision Making, Coaching, Emotional Intelligence, and Developing Successful Work Teams. Assessments and evaluations including 360 Degree Feedback, Strengths Finder, and DiSC. Specialty topics such as Spanish for the Workplace, Diversity/Cultural Training, Performance Planning and Fundamentals of Project Management.

Computer/Information Technology Programs: Basic to advanced Microsoft Office, Quickbooks, SQL, and AutoCAD. PDI is also an Authorized Testing Center for Microsoft Office Specialist (MOS) Certifications.

Industrial, Safety, Quality Programs: Blueprint Reading, CNC Operator, Electrical Troubleshooting, Hydraulics Maintenance and Troubleshooting, OSHA 10 and 30 Hour, DOT HAZMAT, Employee Safety Refresher, ISO 9000, 14000, and TS 16949. PDI also provides NIMS certifications as well as MSSC.

Continuing Professional Education for Healthcare: CNA Recertification, professional development workshops for massage therapists and other allied health occupations plus Pharmacy Technician training.

Truck Driver Training: For individuals seeking a career in truck driving can choose from a full-time, four-week program or a part-time eight-week program. Experienced drivers who have been away from the profession, can benefit from the Refresher Course. Individuals relocating to Illinois may choose the Transition Course. Other special courses include HAZMAT Training and Pre-Trip Inspection. PDI also works with companies in developing specific courses for their employees with Class A licenses or permits.

Highway Construction Careers Training Program (HCCTP): HTTP is a pre-apprentice program designed to prepare individuals to enter into a building trades apprentice program. Funded by the Illinois Department of Transportation, the HCCTP programs is 12 weeks in length and include topics such as math for the trades, job readiness, blueprint reading, technical skills, OSHA 10 Hour certification, First Aid/CPR certification and exposure to the work of many area apprentice programs.

Choosing PDI means you are choosing business expertise in the areas that are most vital to your organization. As part of Illinois Central College, PDI has access to training facilities and technologies that you cannot find anywhere else in Central Illinois. From welding labs to culinary kitchens, to sophisticated computer labs to “smart” classrooms, your business or organization will find a vast array of resources to enhance your needs.

Adult Community Programs: Adult Community Programs (ACP) provides workshops and programs on a variety of topics, designed to give community members opportunities to learn something new or enhance their current skills. Topic areas include history, art, computers, language, gardening, crafts, cooking, and fitness/health. Unless specifically stated, ACP programs are designed for adults 18 and over.

Youth Programs: College for Kids offers summer enrichment programs providing those students going into 4th through 12th grades a mix of fun, academics, and new friendships. Sessions are generally held Monday through Thursday in June and July and offer a wide range of times and class options. After care and special Friday field trips are also scheduled for those seeking to extend their College for Kids experience. In addition, College for Kids periodically offers computers and technology courses during the school year.

SAT Prep: High school juniors and seniors have the opportunity to prepare for their SAT exam in the areas of reading, writing, math and test preparation. These sessions include classroom instruction, study materials, and practice exams.
Early College

High school juniors and seniors can earn both college credit and credit toward their high school diploma by taking Early College classes for dual credit at their school. Through an agreement with ICC, some schools also allow students to take college classes at an ICC campus. Contact your high school counselor to see what is available at your school.

Honors Program

Illinois Central College offers an Honors Program for students who exhibit academic excellence. Students accepted into the Honors Program receive: 1) free tuition for up to 64 credit hours; 2) access to honors courses with small class sizes; 3) opportunity to network with other honors students; 4) opportunities to enhance leadership skills through community service; 5) honors recognition on the academic transcript and commencement service when the program is successfully completed. Honors classes are based on active student participation through research assignments, in-depth class discussion, group projects and independent study.

The program is limited to 50 participants. Entry into the program is competitive and based on ACT/SAT scores, high school GPA, and other criteria.

Applications for the fall semester are due by February 15. Applications for the spring semester are due by November 1.

Minimum qualifications include:
1. A composite ACT score of 27.
2. Current college students must also have a cumulative GPA of 3.35 or better on a 4.0 scale.
3. Students must be considered an in-district student.

To remain in the program, the Honors student must maintain a cumulative GPA of 3.35 or better and must enroll in two honors sections of classes offered each semester.

For more information access the college website at icc.edu/academics/honors-program.

International Education Program

The purpose of the international education program is to promote the development of internationally competent citizens. This objective is addressed by assistance to faculty in internationalizing the content and perspective of the curriculum, by developing and promoting opportunities for students, faculty and staff to study abroad, by welcoming international students, faculty, and visitors to ICC and by sponsoring events emphasizing cultural awareness on campus.

Students may choose a semester program in China; Canterbury, England; Carlow, Ireland; Spain; Salzburg, Austria; or summer sessions in San Jose, Costa Rica, and France. A student is not limited to these programs specifically. There are programs to match his/her needs. Most programs are endorsed by the Illinois Consortium of International Study Programs (ICISP) and provide ICC credit. To be eligible for these programs, students must have completed a minimum of 15 hours with a cumulative grade point average of at least 2.75. Final determination of acceptance rests with ICC.

Virtual Campus (Online Learning)

ICC offers opportunities to earn a degree or certificate completely through online classes. For more information, contact the Virtual Campus office. Illinois Central College is accredited by the Higher Learning Commission. ICC earned accreditation for Distance Education in 2003.

Illinois Central College has been approved by Illinois to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education. Out-of-state enrollment limitations may apply to some students. Call for more information.

Enrollment in BIOL110 online is limited to US students, only. Due to restrictions on shipping the course’s required lab kit, only students based in the US can enroll in BIOL110 – Life Science online. Contact the Virtual Campus office for more information.

While ICC offers these programs as fully online, some classes might require proctored exams. ICC faculty will provide students with options at ICC, and at a distance, to fulfill the requirements of proctored exams when required by the instructor in some online classes. Most MAT, MATH, and BIOL online classes do require proctored exams. Contact the class instructor for more information.

COMM212 online requires students to participate in live, online speech delivery. The class schedule will note the day and time requirement for live, synchronous online speech sessions.

COURSE IDENTIFICATION

Illinois Central College Course descriptions are listed alphabetically by subject prefix. Community Education (non-credit) classes and workshops are listed in the final section. Not all courses are offered each semester.

The description is introduced by a subject prefix followed by a three-digit course number, course title, and number of semester hours of credit.

SAMPLE COURSE LISTING

</table>

Prerequisite: ACCTG 000 or department approval. This course is a practical study of accounting principles relative to current Internal Revenue requirements. Lecture Hours: 3 Lab Hours: 0

COURSE NUMBERING*

- Prefix: followed by two digits indicates Community Education (Hobby/Leisure, non-credit)
- Number: follows the prefix and indicates the course number
- Title: indicates the course title
- Credit Hours: the number of credit hours offered
- Type of Credit: indicates the type of credit

IAI NUMBER

Refer to page 168.

PREREQUISITE

Unfulfilled prerequisites may restrict enrollment in a course. If you are unsure that you have completed a prerequisite or its equivalent, contact either your advisor or the dean/associate dean of that department.

TYPES OF CREDIT

TC - Transfer Credit – articulated with state universities; usually transferrable

OC - Occupational Credit – applicable to an occupational degree or certificate; may be transferrable

BEC - Basic Education Credit – preparation for college level course work; not applicable to degrees or certificates

GSC - General Studies Credit – applicable only to personal development; not applicable to degrees or certificates

ABE - Adult Basic Education Credit – competency/basic skills credit; not applicable to degrees or certificates

ASE - Adult Secondary Education Credit – competency/basic skills credit; not applicable to degrees or certificates

ESL - English as a Second Language – competency/basic skills credit; not applicable to degrees or certificates

CLASS FORMAT

Access to a computer and/or the Internet may be required for a class, regardless of format. See notes for a particular class in class schedule or check with instructor.

8-week classes – Classes are either more frequent or longer than regular 16-week classes, allowing you to earn a full semester’s credit in eight weeks.

Extended – Courses that extend beyond the normal end of the semester.

Flex – Students may enroll in the class any time during the semester, but must finish the class within a year.

4-week classes – Classes are either more frequent or longer than regular 16-week classes, allowing you to earn a full semester’s credit in four weeks.

Hybrid classes – Class content is delivered through a combination of face-to-face instruction and the Internet. Time required in the classroom is reduced but not eliminated.

Independent study – You develop a plan of study for a particular subject area. With approval from the dean/associate dean, you earn credit by successfully completing your project and submitting a written report by the end of the semester.

Internships – Earn college credit in selected programs while you work at approved locations. You must earn at least twelve semester hours of college credit before enrolling in an internship. Your internship schedule is arranged cooperatively among your work supervisor, your program supervisor or teaching chair, and you.

Minimesters – Course content is studied in a condensed time frame between semesters, usually in 11 to 13 days.

Off-campus classes – Classes offered at locations other than Illinois Central College campuses.

Short – Courses that are shorter in duration than normal.

12-week classes – Classes are either more frequent or longer than regular 16-week classes, allowing you to earn a full semester’s credit in 12 weeks.

Web classes – Course content is delivered online instead of in a classroom. A student who likes to read, write, use the computer and the Internet, and is self-directed to complete work on his or her own is more likely to succeed in a web class. Web classes are not easier nor do they take less time; they require as much if not more time than a traditional class. Web classes have deadlines and due dates. Access to a reliable computer and a stable connection to the Internet is required. **NOTE: Some online math classes may require proctored testing. Contact the specific instructor for more information.**

Weekend college – Classes meet on Friday, Saturday, and/or Sunday.
### Accounting

**ACCTG 101**  SURVEY OF ACCOUNTING  3 HRS. (OC)
This course is designed for students who do not expect to become professional accountants, but who need to understand basic accounting concepts and to gain insight into the creation and use of accounting information. Emphasis will be placed on accounting principles as well as the use, meaning, and limitations of financial statements. This course is a prerequisite for financial and managerial accounting topics. Students will learn to use the financial statements of an organization for decision-making.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 105**  BOOKKEEPING/ACCOUNTING I  3 HRS. (OC)
This course presents instruction in basic principles of accounting necessary for understanding accounting data. Practical problems and exercises are used to make concepts meaningful.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 108**  ACCOUNTING USING QUICK BOOKS  3 HRS. (OC)
Prerequisite: ACCTG 105 with a grade of "C" or better or equivalent. This course covers basic training in the use of accounting software on microcomputers.

Lecture Hours: 2  Laboratory Hours: 2

**ACCTG 113**  TAX ACCOUNTING  3 HRS. (OC)
This course is a practical study of business and individual income tax accounting procedures relative to current Internal Revenue requirements.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 115**  PAYROLL ACCOUNTING  3 HRS. (OC)
Prerequisite: ACCTG 105 with a grade of "C" or better or ACCTG 120 with a grade of "C" or better or department approval. This course emphasizes payroll accounting theory and application through familiarization of various federal, state, and local laws effecting payroll systems of business firms. Emphasis is placed on performing detailed payroll work from time of recording employees' hours worked to issuance of paychecks. Familiarization is given to insure adequate control over every detail of the payroll system to improve accuracy, reliability, and timeliness of payroll information processed.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 120**  FINANCIAL ACCOUNTING (BUS 903)  4 HRS. (TC)
This course presents accounting as an information system that produces summary financial statements, primarily for users external to a business or other enterprises. Students study the forms of business organizations and the common transactions entered into by businesses. The emphasis is on understanding and applying basic accounting principles and other concepts that guide the reporting of the effect of transactions and other economic events on the financial condition and operating results of a business. How to analyze and interpret historical financial statements and the limitations of using these in making forward-looking business decisions is included. The primary content emphasis will be accounting for current assets and liabilities, long-term assets and liabilities, corporations' cash flow statements and financial statement analysis.

Lecture Hours: 4  Laboratory Hours: 0

**ACCTG 121**  MANAGERIAL ACCOUNTING (BUS 904)  4 HRS. (TC)
Prerequisite: ACCTG 120 with a grade of "C" or better. This course covers the fundamental principles of managerial accounting as they apply to management planning, controlling, evaluating and decision-making. Included is the identification and measurement of the costs of producing goods or services and how to analyze and control these costs, Decision models commonly used in making specific short-term and long-term business decisions are also included.

Lecture Hours: 4  Laboratory Hours: 0

**ACCTG 206**  INTERMEDIATE ACCOUNTING I  3 HRS. (TC)
Prerequisite: ACCTG 121 with a grade of "C" or better or department approval. This course helps develop an ability with the basic assumptions underlying accounting principles, procedures, methods that are applied in the preparation of financial statements, and the proper uses that can be made of financial data. With this background, the business student is better prepared to analyze and interpret the full product of accounting; the accounting major is better prepared to continue with advanced studies to achieve professional status.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 207**  INTERMEDIATE ACCOUNTING II  3 HRS. (TC)
Prerequisite: ACCTG 206 with a grade of "C" or better. This course emphasizes accounting theory and concepts through analysis of special problems that arise in applying these underlying concepts to the financial accounting; emphasis is placed on investigation of liabilities, paid-in-capital, retained earnings, stockholder's equity analysis, changes in financial position, and financial statement analysis. Insight is given as to how knowledge of these areas provides a basis for decision-making by management, stockholders, creditors, and other users of financial statements and accounting reports.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 208**  COST ACCOUNTING  3 HRS. (TC)
Prerequisite: ACCTG 121 with a grade of "C" or better or department approval. This course deals with concepts and procedures applied in accumulation of cost data and use of data by management in performing functions of planning, decision-making, and control. Product cost systems, cost-volume-profit relationships, capital budgeting and inventory planning, control and valuation are topics emphasized.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 209**  INTERMEDIATE ACCOUNTING III  3 HRS. (TC)
Prerequisite: ACCTG 207 with a grade of "C" or better. This course helps further the student's developmental knowledge with accounting theory and concepts as they relate to special financial statement components. Emphasis is placed upon appropriate financial statement reporting of revenue recognition, leases, accounting changes, and corrections of errors on prior financial statements. Additionally, preparation of the statement of cash flows along with in depth analysis of the statement is provided to assist students as to how this data aids day-to-day management business decision making. The capstone portion of the course looks at all of the full disclosure principles mandated as an accompaniment to business financial statements.

Lecture Hours: 3  Laboratory Hours: 0

**ACCTG 216**  ACCOUNTING AND INFORMATION SYSTEMS  3 HRS. (OC)
Prerequisite: ACCTG 105 with a grade of "C" or better. This course is a synthesis of accounting and information systems, integrates data processing with experience in manual accounting procedures. Emphasis is placed on analysis and design of accounting procedures.

Lecture Hours: 2  Laboratory Hours: 2

**ACCTG 255**  INDEPENDENT STUDY  1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit.

Lecture Hours: 0  Laboratory Hours: 3 - 15 or equivalent

**ACCTG 260**  ACCOUNTING INTERNSHIP  3 HRS. (OC)
Prerequisite: Credit or concurrent enrollment in ACCTG 207 or department approval. In cooperation with the Internship Coordinator, each student is assisted in locating an appropriate training station where a minimum of fifteen hours per week of on-the-job work experience is provided. The student's work will include experiences which involve accounting activities. This course may be repeated one time.

Lecture Hours: 1  Laboratory Hours: 15

### Agricultural Business

**AGBUS 110**  INTRODUCTORY ECONOMICS OF FOOD, FIBER, AND NATURAL RESOURCES (AG 901)
This course is an introduction to the principles of economics including production principles; production costs, supply, and revenue; profit maximization; consumption and demand; price elasticity; market price determination; and competitive versus noncompetitive market models. These principles are applied to agriculture and the role of agriculture in the United States and world economics. Other topics include a survey of the world food situation; natural, human, and capital resources; commodity product marketing; and agricultural problems and policies.

Lecture Hours: 3  Laboratory Hours: 0

**AGBUS 111**  ECONOMICS OF AGRICULTURE  3 HRS. (TC)
This basic course covers the principles of production, supply, demand, price determination, and resource allocation as they apply to economic decisions in agriculture. It includes a study of commodity futures trading that emphasizes the use of hedging and options.

Lecture Hours: 3  Laboratory Hours: 0

**AGBUS 112**  AGRICULTURAL SALES  2 HRS. (OC)
This course provides an understanding of the basic principles underlying the sales process in agricultural supply and service firms. The student will become familiar with a problem solving approach to selling.

Lecture Hours: 2  Laboratory Hours: 0

**AGBUS 115**  COMPUTER TECHNOLOGY IN AGRICULTURE  3 HRS. (TC)
This course is an introduction to computer hardware, disk operating systems, file manipulation, and printers and the use of word processing, graphics, spreadsheets, and database management software. This course will also include solutions of agriculture data-related problems and use of prepared software and templates.

Lecture Hours: 2  Laboratory Hours: 2
AGBUS 118 AGRICULTURAL COMPUTATIONS 3 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, and MAT 095
This course will develop the students' understanding of the breadth and scope of animal production with the emphasis on food producing animals. Students will be exposed to and develop the basic concepts and their relationship to contemporary production systems including economics, terminology and industry issues to enhance understanding and appreciation of the management of beef cattle, dairy cattle, sheep, goats and swine with special emphasis on management techniques to maximize production efficiency and profitability in animal production.
Lecture Hours: 3 Laboratory Hours: 0

AGBUS 200 OCCUPATIONAL INTERNSHIP AND SEMINAR I 4 HRS. (OC)
Prerequisite: Department approval. This course provides the student majoring in Agricultural Business Management with valuable on-the-job training to study practical business problems.
Lecture Hours: 1 Laboratory Hours: 20

AGBUS 211 AGRICULTURE BUSINESS AND FINANCIAL MANAGEMENT 3 HRS. (OC)
This course will provide a study of agricultural business management as it applies to the management of farm operations. This course also includes the study of financial management through the use of resource appraisal, budgeting, financial record keeping, enterprise analysis, and capital and credit needs.
Lecture Hours: 3 Laboratory Hours: 0

AGBUS 212 MARKETING AGRICULTURAL PRODUCTS 3 HRS. (OC)
This course allows the student to survey implications for the producer, processor, distributor and consumer created by different marketing alternatives. A study of the functions and services of each phase of the marketing channel for livestock and grain producers is included. The use of the futures market is incorporated, as it applies to the marketing of livestock and grain. The course includes the study of different grading and standardization methods used in marketing agriculture products.
Lecture Hours: 3 Laboratory Hours: 0

AGBUS 214 OCCUPATIONAL INTERNSHIP AND SEMINAR II 4 HRS. (OC)
Prerequisite: Department approval. This course provides the student majoring in Agricultural Business Management with valuable on-the-job training to apply previous instruction to practical business problems.
Lecture Hours: 1 Laboratory Hours: 20

AGBUS 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. This course is repeatable up to a maximum of five semester hours of credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

Agricultural Mechanics
AGMEC 110 INTRODUCTORY AGRICULTURAL MECHANIZATION (AG 906) 3 HRS. (TC)
This course will familiarize the student with various areas of agricultural engineering including power and machinery, electricity, agricultural structures, and soil and water conservation. The use of mathematics will be stressed.
Lecture Hours: 2 Laboratory Hours: 2

AGMEC 117 PRINCIPLES OF AGRICULTURAL MECHANICS 3 HRS. (OC)
This course includes preventative maintenance skills necessary for farm tractors. Basic principles of operation and adjustment of electric motors, tillage and planting equipment will also be covered.
Lecture Hours: 2 Laboratory Hours: 2

Agriculture
AGRI 110 PRINCIPLES OF ANIMAL SCIENCE (AG 902) 4 HRS. (TC)
This is a survey course in animal science involving the basic principles of genetics, physiology, nutrition, and product technology as they apply to the breeding, selection, feeding, and management of cattle, swine, sheep, poultry and horses.
Lecture Hours: 3 Laboratory Hours: 2

AGRI 111 APPLIED LIVESTOCK PRODUCTION I 3 HRS. (OC)
This course introduces the student to the livestock industry and the basic principles of livestock production. The technical and scientific fields of breeding, selecting, feeding, housing, and management are introduced as they apply to beef cattle, dairy cattle, sheep, goats, swine, and horses.
Lecture Hours: 2 Laboratory Hours: 2

AGRI 112 BASIC SOILS 4 HRS. (TC)
This course provides fundamental principles of the nature and properties of soils, including origin, formation, and biological, chemical, and physical aspects. Soil dynamics, texture, structure, and soil reactions will be studied.
Lecture Hours: 3 Laboratory Hours: 3

AGRI 113 PRINCIPLES OF SOIL FERTILITY 3 HRS. (OC)
This course is designed to provide a basic knowledge of chemical properties of the various types of fertilizers, their production, use and relation to soil properties, environmental conditions, crop requirements and application. The economic implications of nitrogen, phosphorus, potassium, secondary and trace elements are considered.
Lecture Hours: 2 Laboratory Hours: 3

AGRI 114 APPLIED LIVESTOCK PRODUCTION II 3 HRS. (OC)
Prerequisite: AGRI 111 with a grade of “C” or better or department approval. This course will develop the students' understanding of the breadth and scope of animal production with the emphasis on food producing animals. Students will be exposed to and develop the basic concepts and their relationship to contemporary production systems including economics, terminology and industry issues to enhance understanding and appreciation of the management of beef cattle, dairy cattle, sheep, goats and swine with special emphasis on management techniques to maximize production efficiency and profitability in animal production.
Lecture Hours: 2 Laboratory Hours: 2

AGRI 118 HARVESTING, DRYING, AND STORING GRAIN 2 HRS. (OC)
This course includes the principles of harvesting, drying and storing of various agricultural crops common to this vicinity. It also includes a study of the selection and operation of the equipment necessary to harvest, dry and store agricultural crops.
Lecture Hours: 2 Laboratory Hours: 0

AGRI 121 INTRODUCTION TO PRECISION AGRICULTURE 3 HRS. (OC)
This course will develop a fundamental understanding of the many facets of precision agriculture including: Global Positioning Systems (GPS), Geographical Information Systems (GIS), yield monitors, remote sensing, drones, grid soil sampling, variable rate application, and vehicle guidance to effectively use data to make informed production management decisions.
Lecture Hours: 2 Laboratory Hours: 2 or equivalent

AGRI 133 LIVESTOCK EVALUATION I 1 HR. (OC)
This course provides for the study of relationships between form and function in the live evaluation and selection of beef cattle, swine, sheep, and goats. The student studies how to make accurate decisions about livestock quality and to defend those decisions with logical reasons.
Lecture Hours: 1 Laboratory Hours: 2

AGRI 134 LIVESTOCK EVALUATION II 1 HR. (OC)
Prerequisite: AGRI 133 with a grade of “C” or better or department approval. This course is a continuation of Livestock Evaluation I (AGRI 133), and provides for continued study of the relationships between form and function in the live evaluation and selection of beef cattle, swine, sheep and goats. The student studies how to make accurate decisions about livestock quality and to defend those decisions with logical reasons.
Lecture Hours: 1 Laboratory Hours: 2

AGRI 200 INTRODUCTORY SOIL SCIENCE (AG 904) 4 HRS. (TC)
This course is designed to provide the student with a theoretical understanding of biological, chemical and physical properties of soils. Practical soil management and conservation practices are studied.
Lecture Hours: 3 Laboratory Hours: 3

AGRI 201 CROP PRODUCTION 4 HRS. (OC)
This course is a study of the production and harvesting of farm crops and means for improving yield and will constitute the major portion of instruction. Topics discussed include adaptation and distribution of major crops, principles of plant growth and development, selection of varieties, cultural practices, diseases of crops, and market classes and grades of major crops of the area.
Lecture Hours: 3 Laboratory Hours: 3

AGRI 203 INTEGRATED PEST MANAGEMENT 4 HRS. (OC)
This course is designed to encourage an integrated approach to pest management that ensures favorable economic, ecological, and sociological consequences. The use of genetics, biological, mechanical, cultural, and chemical methods of control will be emphasized, and the characteristics and properties of chemicals used in pest control will be studied. The identification of weeds, insects, and diseases will be incorporated with the proper methods to scout for these plant pests.
Lecture Hours: 3 Laboratory Hours: 3

AGRI 204 INTRODUCTORY CROP SCIENCE (AG 903) 4 HRS. (TC)
This course is an introduction to the kinds, origin, taxonomy, and morphology of field crops. Emphasis is placed on understanding basic principles of plant growth and development. Study of plant reproduction, crop improvement, and utilization of crops; cropping and tillage principles and practices, and field crop production hazards are included.
Lecture Hours: 3 Laboratory Hours: 3
AGRI 221  APPLICATION OF GIS TECHNOLOGY FOR AGRICULTURE  3 HRS. (OC)
Prerequisite: AGRI 121 with a grade of "C" or higher. This course will provide a basic, hands-on approach to how Geographical Information Systems (GIS) are being used to display, analyze, and interpret spatially related data to make improved management decisions in the agricultural sector.
Lecture Hours: 2  Laboratory Hours: 2 or equivalent

AGRI 233  LIVESTOCK EVALUATION III  1 HR. (OC)
Prerequisite: AGRI 133 with a grade of "C" or better and AGRI 134 with a grade of "C" or better, or department approval. This course is designed for students participating extensively in livestock judging competitions. This course is a continuation of Livestock Evaluation I and II and provides for continued study of the relationship between form and function in the live evaluation and selection of beef cattle, swine, sheep and goats. The student studies how to make accurate decisions about livestock quality and to defend those decisions with logical reasons.
Lecture Hours: 1  Laboratory Hours: 2

AGRI 234  LIVESTOCK EVALUATION IV  1 HR. (OC)
Prerequisite: AGRI 233 with a grade of "C" or better or department approval. This course is designed for students participating extensively in livestock judging competitions. It is a continuation of Livestock Evaluation III and provides for continued study of the relationship between form and function in the live evaluation and selection of beef cattle, swine, sheep, and goats. The student learns how to make accurate decisions about livestock quality and to defend those decisions with logical reasons.
Lecture Hours: 1  Laboratory Hours: 2

American Sign Language

ASL 110  AMERICAN SIGN LANGUAGE I  4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This is a beginning course in American Sign Language. It introduces basic expressive and receptive ASL vocabulary and grammar, fingerspelling, linguistic principles, and basic conversation skills. Norms of American Deaf culture, related laws, and agencies that serve this community are presented.
Lecture Hours: 3  Laboratory Hours: 2 or equivalent

ASL 111  AMERICAN SIGN LANGUAGE II  4 HRS. (TC)
Prerequisite: Completion of ASL 110 with a grade of "C" or better. An appropriate score on the placement exam or department approval. This course continues in the development of receptive and expressive proficiency in ASL by expanding students' sign vocabulary, enhancing their knowledge and application of accurate grammatical points of the language, building upon their knowledge of American Deaf culture and the agencies that serve this community. Communication technologies that are utilized by the Deaf and hard of hearing populations will also be presented.
Lecture Hours: 3  Laboratory Hours: 2 or equivalent

Arabic

ARA 110  ELEMENTARY MODERN ARABIC I  4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, or "C" or better in ENGL 095 or "C" or better in ENGL 099 or department approval. This course is designed to introduce and develop these four basic skills in modern Arabic: listening, speaking, reading, and writing.
Lecture Hours: 4  Laboratory Hours: 0

ARA 111  ELEMENTARY MODERN ARABIC II  4 HRS. (TC)
Prerequisite: ARA 110 with a grade of "C" or better or equivalent. This course is a continuation of ARA 110 with emphasis on listening, speaking, reading, and writing. The course is conducted primarily in Arabic.
Lecture Hours: 4  Laboratory Hours: 0

ARA 210  INTERMEDIATE MODERN ARABIC III  4 HRS. (TC)
Prerequisite: ARA 111 with a grade of "C" or higher or equivalent. This course is designed to develop integrated skills in reading, writing, listening, and speaking. The course is conducted primarily in Arabic.
Lecture Hours: 4  Laboratory Hours: 0

ARA 211  INTERMEDIATE MODERN ARABIC IV (H 900)  4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and ARA 210 with a grade of "C" or better or equivalent. This course is a continuation of ARA 210 with emphasis on advanced conversation, reading, and composition. The course is conducted primarily in Arabic.
Lecture Hours: 4  Laboratory Hours: 0

Architectural Construction Technology

ARCTK 001  SOLAR APPLICATIONS FOR YOUR HOME  3 HRS. (GSC)
This course is intended to survey the present status of different ways in which solar energy can be used directly, to summarize present trends and opportunities in research, and to allow the student to gather the latest references to build on previous efforts. The course is designed to inform local alternative energy seekers as to the state of the art of becoming more energy self-sufficient on a decentralized level.
Lecture Hours: 3  Laboratory Hours: 0

ARCTK 007  RESIDENTIAL PLANNING AND DRAWING  1.5 HRS. (GSC)
This course is intended to provide the basic background, knowledge and skills for the individual to design and prepare plans and specifications for a home. The course deals with site selection, landscaping, building construction elements, cost comparisons, mechanical and electrical considerations, different types of architectural treatment, code requirements, and preparation of contract documents.
Lecture Hours: 1  Laboratory Hours: 1

ARCTK 106  BASIC ARCHITECTURAL DRAFTING  2 HRS. (OC)
This is an introductory course in architectural drafting for students without previous architectural drafting course or courses. Students with a minimum of one semester of architectural drafting should enroll in ARCTK 111.
Lecture Hours: 1  Laboratory Hours: 3

ARCTK 111  ARCHITECTURAL DRAFTING  3 HRS. (OC)
Prerequisite: ARCTK 106 with a grade of "C" or better or equivalent. This introductory course includes general drafting techniques, such as lettering, line work, orthographic projection, two-dimensional representation, perspectives, sections, and architectural conventions.
Lecture Hours: 1  Laboratory Hours: 5

ARCTK 112  STRUCTURAL DRAFTING  3 HRS. (OC)
Prerequisite: ARCTK 111 with a grade of "C" or better or department approval. This course introduces the student to structural drafting. Study is made of structural shop drawings and their interrelationship to the entire building, emphasizing the need for the complete structural drawing to be developed logically, completely, and according to currently accepted practices.
Lecture Hours: 1  Laboratory Hours: 5

ARCTK 113  ELEMENTARY SURVEYING  2 HRS. (OC)
Prerequisite: MAT 098 with a grade of "C" or better or MAT 099 with a grade of "C" or better or credit or concurrent enrollment in MAT 106. This is an elementary course in surveying, including the fundamentals of plane surveying, and use and care of equipment. The student becomes familiar with transits, levels, chains, tapes, level rods, and other equipment used in plane surveying. The fundamentals of legal land descriptions are included.
Lecture Hours: 1  Laboratory Hours: 3

ARCTK 114  SURVEYING  2 HRS. (OC)
Prerequisite: ARCTK 113 with a grade of "C" or better. This course develops skills in differential level surveying, profile and cross-section leveling, transit surveying, construction surveying, and surveying calculations. An introduction to GPS and GIS is included.
Lecture Hours: 1  Laboratory Hours: 3

ARCTK 115  ARCHITECTURAL PHOTOGRAPHY  2 HRS. (OC)
This course is offered to study, experiment, and demonstrate procedural skills to capture the character, purpose and human scale of architecture through small-format photography and to study photography as a tool in the design process: presentation of drawings, architectural models, and other technical aspects of the field of architecture.
Lecture Hours: 1  Laboratory Hours: 2

ARCTK 116  HISTORY OF ARCHITECTURE AND CONSTRUCTION  3 HRS. (TC)
This course allows a student to experience a comprehensive study of the evolution of architectural form and use of materials and methods of construction. This course is a chronological study ranging from primitive formulative architecture to complex contemporary engineered architecture and computer controlled building construction.
Lecture Hours: 3  Laboratory Hours: 0

ARCTK 118  BUILDING RESTORATION AND REHABILITATION PLANNING  2 HRS. (OC)
This course provides opportunities to study, define, and apply applicable period design style principles and methods for rescue and revitalization of period built single/multiple buildings. The student will select and use an actual situation to develop comprehensive design and planning skills and will be expected to apply theoretical and methodological principles outlined in class. The student is expected to establish individual approaches to preservation design and demonstrate ability to find a suitable compromise between aesthetic and environmental goals.
Lecture Hours: 1  Laboratory Hours: 2
Course Descriptions

 ARCH 110      ARCHITECTURAL ORIENTATION                           3 HRS. (TC)
 This course consists of a series of lectures, seminars, and field trips designed to
 present the relation of architecture to other disciplines and professions, the role
 of the architect in society, and the challenges and opportunities of the profession.
 Lecture Hours: 3 Laboratory Hours: 0

 ARCH 111      INTRODUCTION TO ARCHITECTURAL RENDERING              2 HRS. (TC)
 This introductory course includes architectural perspective sketching and
 architectural delineation in black and white media.
 Lecture Hours: 1 Laboratory Hours: 2

 ARCH 112      ARCHITECTURAL RENDERING IN COLOR                     2 HRS. (TC)
 Prerequisite: ARCH 111 with a grade of “C” or better. This course includes
 advanced architectural sketching, introduction of color media, description of
 speed techniques, and detailing.
 Lecture Hours: 1 Laboratory Hours: 2

 ARCH 115      INTRODUCTION TO THE ART AND SCIENCE OF GREEN BUILDING 3 HRS. (OC)
 This introductory survey course will examine the core concepts of green building
 ranging from the global impacts of the built environment to the fundamentals of
 building science. Topics include sustainable site development, energy efficiency,
 renewable energy, project team integration, materials selection, and the concept
 of appropriate technology. The course will provide a cross-disciplinary approach to
 learning that enables students to integrate skills and knowledge from multiple
 sources and experiences, and apply their understanding to their professional and
 civic life.
 Lecture Hours: 3 Laboratory Hours: 0

 ARCH 131      ARCHITECTURAL CONSTRUCTION I                        4 HRS. (TC)
 Prerequisite: ARCH 137 with a grade of “C” or higher or ARCH 111 with a grade
 of “C” or higher. This course is an introduction to building construction for design
 professionals. It includes the study of materials, products and systems for buildings
 and the criteria for their selection with emphasis on wood and masonry construction.
 Legal and economic implications and cost control, written and graphic communica-
 tions for construction are also included in this course.
 Lecture Hours: 2 Laboratory Hours: 6

 ARCH 132      ARCHITECTURAL CONSTRUCTION II                       4 HRS. (TC)
 Prerequisite: ARCH 131 with a grade of “C” or better. This course covers the
 building process, the architect-engineer, builder and manufacturer. A continuation
 of ARCH 131, this course includes further study and analysis of materials, products
 and systems with an emphasis on non-combustible and fire resistive building
 construction as well as building code and zoning requirements and specifications.
 This course also includes a study of building construction through the preparation
 of architectural and structural working drawings.
 Lecture Hours: 2 Laboratory Hours: 6

 ARCH 137      FUNDAMENTALS OF ARCHITECTURAL DRAWING               3 HRS. (TC)
 Prerequisite: Enrollment in Architecture curriculum. This introductory course includes
 fundamentals of architectural drafting techniques, such as lettering, line work,
 orthographic oblique projections, two dimensional representation, perspectives,
 sections, sketching, shades and shadows, architectural and topographic forms.
 Lecture Hours: 1 Laboratory Hours: 5

 ARCH 138      ARCHITECTURAL FREEHAND DRAWING I                   2 HRS. (TC)
 Prerequisite: Concurrent enrollment in ARCH 137 and enrollment in Architecture
 curriculum. This studio course includes drawing three-dimensional assigned archi-
 tectural forms and spaces on a two-dimensional surface, introduction to the use of
 perspective in architectural freehand drawing, sketching of architectural motifs and
 drawing from nature in various types of pencil.
 Lecture Hours: 1 Laboratory Hours: 3

 ARCH 139      ARCHITECTURAL FREEHAND DRAWING II                  2 HRS. (TC)
 Prerequisite: ARCH 138 with a grade of “C” or better. This studio course is a
 continuation of ARCH 138 with emphasis on other media and an accelerated
 pace in freehand architectural sketching techniques.
 Lecture Hours: 1 Laboratory Hours: 3

 ARCH 201      BASIC DESIGN STUDIO I                              3 HRS. (TC)
 Prerequisite: ARCH 137 with a grade of “C” or better and ARCH 139 with a grade
 of “C” or better. This course is an introduction to fundamentals of architectural
 design: object, perception and light. Vocabulary includes: figure-ground composition,
 balance and movement, proportion and rhythm, mass-space organization, multiple
 viewing positions, one- and two-point perspective, orthographic projection and
 freehand drawing.
 Lecture Hours: 1 Laboratory Hours: 6

 ARCH 201A    PRINCEPIA IAN ART AND SCIENCE II GREEN BUILDING     3 HRS. (OC)
 This introductory survey course will examine the core concepts of green building
 ranging from the global impacts of the built environment to the fundamentals of
 building science. Topics include sustainable site development, energy efficiency,
 renewable energy, project team integration, materials selection, and the concept
 of appropriate technology. The course will provide a cross-disciplinary approach to
 learning that enables students to integrate skills and knowledge from multiple
 sources and experiences, and apply their understanding to their professional and
 civic life.
 Lecture Hours: 3 Laboratory Hours: 0

 ARCTK 119    BLUEPRINT READING - CONSTRUCTION                    1 HR. (OC)
 This course provides a basic understanding of architects’ drawings and specifica-
 tions. Emphasis is on giving broad practical instruction in content and meaning of
 blueprints, the types of drawings used and an explanation of terms and symbols
 commonly employed by architects. This course is usually taught in eight three-hour
 sessions.
 Lecture Hours: .5 Laboratory Hours: 1 or equivalent

 ARCTK 125    SOILS AND FOUNDATION MATERIALS                      3 HRS. (OC)
 Prerequisite: MAT 098 with a grade of “C” or better or concurrent enrollment. This
 is an introductory course in which the student will become familiar with soil testing
 and mechanics for construction. Also covered are topics in foundation material
 with emphasis given to properties of materials and quality control.
 Lecture Hours: 2 Laboratory Hours: 3

 ARCTK 201    ARCHITECTURAL DRAFTING                              4 HRS. (OC)
 Prerequisite: ARCH 131 with a grade of “C” or better. In this course the student will
 learn how to prepare working drawings of residential and commercial structures
 from schematic and preliminary sketches. Principles of residential and commercial
 construction are introduced for preparation of working documents for the assigned
 building type.
 Lecture Hours: 2 Laboratory Hours: 6

 ARCTK 203    MECHANICS OF MATERIALS                              3 HRS. (OC)
 Prerequisite: Credit or concurrent enrollment in PHYS 112. This course covers
 statics strength of materials, selections of materials for particular applications, and
 inspection of materials. Materials testing methods are stressed in the laboratory.
 Lecture Hours: 2 Laboratory Hours: 3

 ARCTK 210    INTERNSHIP                                        3 HRS. (OC)
 Prerequisite: Department approval. This course is designed to give the intern
 experience in a chosen field of interest under the direct supervision of an architect,
 engineer or contractor while engaged in on-the-job training. The student will also do
 individual research and study on an approved area of interest.
 Lecture Hours: 2 Laboratory Hours: 16 or equivalent

 ARCTK 225    SITE DEVELOPMENT                                    2 HRS. (OC)
 Prerequisite: ARCTK 113 with a grade of “C” or better. This course is designed to
 study considerations of site selection, including land survey, survey computations,
 contours, use of contour leveling, computation of cut and fill, drainage and grading,
 and staking out of buildings and roads.
 Lecture Hours: 1 Laboratory Hours: 3

 ARCTK 227    ENVIRONMENTAL SYSTEMS OF BUILDINGS                  3 HRS. (OC)
 Prerequisite: Sophomore standing or department approval. This course is designed to
 survey different types of environmental systems and their application relevant to
 human occupancy of buildings, which includes heat, atmospheric control, light,
 electric power, solar energy, transportation, communication, sanitation, acoustics
 and related equipment.
 Lecture Hours: 3 Laboratory Hours: 0

 ARCTK 228    CONSTRUCTION MANAGEMENT                          3 HRS. (OC)
 Prerequisite: Sophomore standing or department approval. This course acquaints
 the student with general aspects and organization of the construction industry.
 Emphasis is placed on construction planning and scheduling, including critical path
 method (CPM), resource leveling and control.
 Lecture Hours: 2 Laboratory Hours: 3

 ARCTK 229    COST ESTIMATING AND CONSTRUCTION PRACTICE           3 HRS. (OC)
 Prerequisite: ARCTK 201 with a grade of “C” or better. This course acquaints the
 student with contract documents for architectural construction, utilizing the latest
 recommendations of Construction Specifications Institute and the American Institute
 of Architects. It familiarizes the student with estimating building construction costs
 utilizing the quantity, survey, and approximate methods and also the “systems”
 approach.
 Lecture Hours: 3 Laboratory Hours: 0

 ARCTK 255    INDEPENDENT STUDY                                 1 HR. (OC)
 Prerequisite: Department approval. This course provides the opportunity to work
 on a technical project, research, or other specialized study related to individual
 academic needs. A written plan for the independent-study project is developed
 with a faculty member (including a detailed description of the project, the number
 of credit hours assigned to it, the evaluative criteria to be used, and other relevant
 matters), and the project is carried out under the periodic direction of the faculty
 member. The written plan is submitted to the dean/associate dean for approval and
 remains on file within the department, together with a final written report submitted
 to the faculty member by the student. (Repeatable up to a maximum of five semester
 hours of credit).
 Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent
ARCH 202  BASIC DESIGN STUDIO II  3 HRS. (TC)
Prerequisite: ARCH 201 with a grade of “C” or better. This course is an extension
of ARCH 201 with prime emphasis on major factors which influence aesthetic deci-
sions, relation of the physical and human environment to design, and integration of
design, and notation and evaluation of an image system in the local community.
Lecture Hours: 1 Laboratory Hours: 6

ARCH 203  INTRODUCTION TO THE HISTORY OF ARCHITECTURE  3 HRS. (TC)
Prerequisite: Sophomore standing in Architecture curriculum or department approval.
This course is a visual and cultural analysis of selected buildings, urban spaces, and
cities, from ancient times to modern times, with emphasis on architectural
traditions of western civilization, especially as they affect the built environment
of America and the Middle West.
Lecture Hours: 3 Laboratory Hours: 0

ARCH 204  ARCHITECTURAL COMPUTER AIDED DESIGN AND DRAFTING I  3 HRS. (OC)
Prerequisite: ARCH 111 or ARCH 137 both with a grade of “C” or better. This course
is intended to be the first in a series of courses to introduce the architectural
student or professional to the basic concepts of computer aided design and drafting
using AutoCAD software. The student will be introduced to the basic commands
of the systems in developing three-dimensional modeling and two-dimensional draw-
ings. Students will gain experience in generating, manipulating and editing graphics
and 3-D modeling along with creating library parts for graphic display. Additional
topics in text and dimensioning will be introduced. This course may be repeated
twice; however, it may be used only once to fulfill the requirement for an Associate
in Applied Science degree.
Lecture Hours: 2 Laboratory Hours: 3

ARCH 205  ARCHITECTURAL COMPUTER AIDED DESIGN AND DRAFTING II  3 HRS. (OC)
Prerequisite: ARCH 204 with a grade of “C” or better. This course is the second in
a series of courses to introduce the architectural student or professional to the
concepts of the architectural, engineering and construction applications of the Auto-
CAD System using architectural Desktop software. The student will be introduced
to the commands of the advanced software to generate multiple building plans and
elevations. Discussion of multi-discipline designs using layers and three-dimensional
manipulation and further discussion of menus and model parts in the advanced
software will be covered. This course may be repeated twice; however, it may be
used only once to fulfill the requirement for an Associate in Applied Science degree.
Lecture Hours: 2 Laboratory Hours: 3

ARCH 206  ARCHITECTURAL COMPUTER AIDED DESIGN AND DRAFTING III  3 HRS. (OC)
Prerequisite: ARCH 204 with a grade of “C” or better. This course is the third in a
series of courses to introduce the architectural student or professional to the con-
cepts of the Civil-Site Engineering applications of the AutoCAD System software.
The student will be introduced to new and annotation of map grids and stable
plan grid coordinates. Discussion of contours and generation of 3-D digital terrain
models will be covered. This course may be repeated twice; however, it may be
used only once to fulfill the requirement for an Associate in Applied Science degree.
Lecture Hours: 2 Laboratory Hours: 3

Art

ART 110  ART APPRECIATION (F2 900)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a sur-
yey of the visual arts, exploring the nature, language and history of art, in relation
to cultural, humanistic, and aesthetic values. Lectures are reinforced by written assign-
ments, presentations, gallery visits, critical evaluations of art, and introductory art
experiences. This course is acceptable for Humanities credit in the area of Fine
Arts. It is intended for general studies of non-majors.
Lecture Hours: 3 Laboratory Hours: 0

ART 111  2D DESIGN  3 HRS. (TC)
This course is a studio course which investigates traditional and experimental
processes and materials involved in two-dimensional design elements, principles
of organization and surface treatment.
Lecture Hours: 0 Laboratory Hours: 6

ART 112  3D DESIGN  3 HRS. (TC)
This course is a study of three-dimensional concepts and terminology utilizing
studio projects related to sculpture, architecture and industrial design.
Lecture Hours: 0 Laboratory Hours: 6

ART 120  DRAWING I  3 HRS. (TC)
This course is an introduction to the basic concepts and techniques of drawing, using
a variety of black and white media. Emphasis will be placed on the development of
observation skills. Additional interpretive approaches to drawing will be explored as
well. The course will also introduce discipline-specific vocabulary, critical analysis
skills, and historical information relevant to drawing.
Lecture Hours: 0 Laboratory Hours: 6

ART 121  FIGURE DRAWING I  3 HRS. (TC)
Prerequisite: ART 120 with a grade of “C” or better or department approval. This
course is an introduction to drawing the human figure from direct observation, using
a variety of media and techniques. Emphasis is placed on utilizing the concepts of
creating illusionary space, with relation to the human form, to achieve accurate
proportions, anatomy, and effective composition.
Lecture Hours: 0 Laboratory Hours: 6 or equivalent

ART 140  PHOTOGRAPHY I  3 HRS. (TC)
This is an introductory course covering the fundamentals of photography utilizing an
SLR camera in digital and/or film format. Emphasis is placed on photography as a
fine art medium, investigating exposure control, framing and composition, and
printing processes. Critical evaluation and thinking are stressed in all phases of
the course. An overview of the history of photography, and commercial application
will also be addressed.
Lecture Hours: 0 Laboratory Hours: 6

ART 141  PHOTOGRAPHY II  3 HRS. (TC)
Prerequisite: ART 140 with a grade of “C” or better or department approval. This
course builds on and refines experiences of Photography I, emphasizing creative
and aesthetic applications of photography explored through the study of advanced
techniques in digital and/or darkroom format. The student will gain expertise in all
phases of photography, including but not limited to camera functions, image manip-
ulation, studio practice, lighting, and development of a professional portfolio.
Lecture Hours: 0 Laboratory Hours: 6 or equivalent

ART 142  THE HISTORY OF PHOTOGRAPHY (F2 904)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course surveys
the historical development of photography as an art form from 1839 to the present,
including critical analysis of the types photographic processes, various artists,
and aesthetic movements within the discipline. Students examine photogra-
phies as expressions of aesthetic and humanistic value, in relation to the cultural
and social context of the time.
Lecture Hours: 3 Laboratory Hours: 0

ART 150  ART HISTORY I (F2 901)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a sur-
voy of Western Art from the pre-historic to the Renaissance Period. This course is
acceptable for humanities credit.
Lecture Hours: 3 Laboratory Hours: 0

ART 151  ART HISTORY II (F2 902)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a sur-
voy of art from the Renaissance Period through the present. This course is
acceptable for humanities credit.
Lecture Hours: 3 Laboratory Hours: 0

ART 152  NON-WESTERN ART HISTORY (F2 903N)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a sur-
voy of art in Non-Western cultures, from the pre-historic to the present. Cultures
may include, but are not limited to, the following: China, Japan, Africa, India, The
Pacific Rim, and the Americas.
Lecture Hours: 3 Laboratory Hours: 0

ART 200  PAINTING I  3 HRS. (TC)
Prerequisite: ART 111 with a grade of “C” or better and ART 120 with a grade of
“C” or better. This course is an introduction to the basic properties and techniques
of painting, in either oil or acrylic painting media. An emphasis will be placed on tech-
nical control, use of tools and media, and continued investigations of color
theory, composition, and visual principles. Various projects from observational
study to experimental use of the media will be explored. The course will also
introduce discipline-specific vocabulary, critical analysis skills, and historical
information relevant to painting.
Lecture Hours: 0 Laboratory Hours: 6

ART 201  PAINTING II  3 HRS. (TC)
Prerequisite: ART 200 with a grade of “C” or better or department approval. This
course builds on and refines experiences of Painting I, emphasizing creative
and aesthetic applications of painting, explored through the study of advanced con-
techniques and techniques. This course intended to offer additional studio and portfolio
experience. Emphasis will be placed on personal creative development through further
experimentation with material’s concepts and techniques, on a variety of surfaces.
Lecture Hours: 0 Laboratory Hours: 6 or equivalent

ART 204  CERAMICS I  3 HRS. (TC)
This course explores the design, construction and glazing processes through
hand-built and wheel-thrown pottery.
Lecture Hours: 0 Laboratory Hours: 6

ART 205  CERAMICS II  3 HRS. (TC)
Prerequisite: ART 204 with a grade of “C” or better or department approval. This
course further explores the design, construction and glazing processes through
hand-built and wheel-thrown pottery.
Lecture Hours: 0 Laboratory Hours: 6
ART 206  SCULPTURE I  3 HRS. (TC)
Prerequisite: ART 112 with a grade of "C" or better or department approval.
This beginning sculpture course acquaints the student with both traditional and contemporary sculpture techniques and materials, involving skills in carving, casting, construction and assemblage.
Lecture Hours: 0 Laboratory Hours: 6

ART 210  PRINTMAKING  3 HRS. (TC)
Prerequisite: ART 111 with a grade of "C" or better or ART 121 with a grade of "C" or better. This course is an introduction to a variety of basic printmaking techniques with an emphasis on collograph, linoleum, woodblock, engraving and etching processes.
Lecture Hours: 0 Laboratory Hours: 6

ART 221  FIGURE DRAWING II  3 HRS. (TC)
Prerequisite: ART 121 with a grade of "C" or better or department approval. This course builds on and refines experiences of Figure Drawing I, emphasizing creative and aesthetic applications of figure drawing explored through additional studio experience with the model. Experience will be placed on personal creative development through further experimentation with materials and techniques, on a wider variety of surfaces, papers, and scale.
Lecture Hours: 0 Laboratory Hours: 6 or equivalent

ART 222  DRAWING II  3 HRS. (TC)
Prerequisite: ART 120 with a grade of "C" or better. This course builds on and refines experiences of Drawing I, emphasizing creative and aesthetic applications of various drawing media, including color media, explored through additional studio experience and classroom assignments. Emphasis will be placed on personal creative development through further experimentation with materials, concepts and techniques, on a wider variety of surfaces, papers, and scale.
Lecture Hours: 0 Laboratory Hours: 6 or equivalent

ART 255  ART INTERNSHIP  1 HR. (TC)
Prerequisite: Department approval. This course is designed to give the student/ intern experiences in his/her chosen field of interest under the direct supervision of a professional (Director, Assistant Director, Artist) while engaged in on-the-job training. The student/intern will also do individual research and study on approved area of interest and will attend bimonthly lectures. The student/intern will be responsible for maintaining five laboratory hours per week per credit.
Lecture Hours: 0 Laboratory Hours: 5 - 15 or equivalent

Automotive Technology

AUTO 110  INTERNAL COMBUSTION ENGINES  3 HRS. (OC)
Prerequisite: Department approval. This course discusses the principles of piston driven internal combustion engines and variations in design and operational characteristics of different engine types. In the laboratory, the student will learn the proper use of hand tools, micrometers, dial indicators and other special tools in the visual inspection, measurement and service procedures for spark ignition engines.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 111  INTRODUCTION TO AUTOMOTIVE TECHNOLOGY  3 HRS. (OC)
Prerequisite: Department approval. This course provides instruction and lab experience in shop safety, shop operation and how to obtain service information. Also covered are the basic inspection and servicing techniques of electrical systems, brake systems, and automatic transmissions and transaxles.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 114  MOTOR VEHICLE ELECTRICAL SYSTEMS  3 HRS. (OC)
Prerequisite: Department approval. This course is designed to include electrical concepts as they apply to electrical systems. It will include the use of electrical test equipment used to diagnose electrical problems found on motor vehicle. Major emphasis is on the application of these principles as they apply to the transportation industry.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 115  FUEL AND IGNITIONS SYSTEMS FOR GASOLINE ENGINES  4 HRS. (OC)
Prerequisite: AUTO 110 or ENGR 118 and 114. This course covers the principles of fuel and ignition systems in modern gasoline engines. Diagnostic techniques and repair procedures are emphasized. Special emphasis is placed on the use of modern test equipment to analyze problems and computer operations.
Lecture Hours: 3 Laboratory Hours: 3

AUTO 116  ELECTRICAL ACCESSORY CIRCUITS  3 HRS. (OC)
Prerequisite: AUTO 114 with a grade of "C" or better. This course covers electrical components and systems associated with the transportation industries and their applications. Diagnostic techniques and repair procedures are emphasized.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 117  MANUAL TRANSMISSION AND DRIVE AXLES  3 HRS. (OC)
Prerequisite: Department approval. This course explores the transmission of power from the internal combustion engine by mechanical means. Problems in design and application are solved. The laboratory experience includes inspection, dis-assembly and repair of standard transmissions, differentials, axles, four wheel drive and transfer cases found in current automobiles.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 119  AUTOMOTIVE SUSPENSION, STEERING AND ALIGNMENT  3 HRS. (OC)
Prerequisite: Department approval. This course is a study of the design and operation of suspension and steering systems used in the automotive industry. It includes the use of diagnostic equipment and making component repairs on current automobiles.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 129  AUTOMOTIVE AIR CONDITIONING SYSTEMS  3 HRS. (OC)
Prerequisite: Department approval. This course is an introduction into the basic theory and principles of air conditioning as they relate to automotive applications. Use of test equipment to diagnose and repair malfunctions, including repair of component parts and the charging and recharging of systems will be stressed in the laboratory. Manufacturers' specifications will be utilized in performing standard service operations. Automotive engine cooling systems are also covered in the course.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 201  ENGINE MACHINING AND REBUILDING  4 HRS. (OC)
Prerequisite: AUTO 110 with a grade of "C" or better; within five years of registration for this course. This course consists of internal engine design, diagnosis and rebuilding. Emphasis will be placed upon cylinder, cylinder head, crankshaft, and bearing repair.
Lecture Hours: 2 Laboratory Hours: 6

AUTO 204  AUTOMOTIVE BRAKE SYSTEMS  3 HRS. (OC)
Prerequisite: Department approval. This course is a study of the design and operation of brake systems used in the automotive industry. It includes the use of diagnostic equipment and making component repairs on current automobiles.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 213  ENGINE PERFORMANCE AND TESTING  3 HRS. (OC)
Prerequisite: AUTO 110, AUTO 115, AUTO 201, and AUTO 244 all with a grade of "C" or better, or department approval. This course covers the operation, calibration, and use of measuring instruments in testing internal combustion engines and related equipment. On-the-engine tests such as: brake, horsepower, torque, and fuel consumption are included in the laboratory work.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 218  MOTOR VEHICLE ELECTRONICS  3 HRS. (OC)
Prerequisite: AUTO 244 with a grade of "C" or better. This course provides the background needed to diagnose and repair the sophisticated electronics and computerized circuits within the motor vehicles used in the agricultural, heavy equipment and transportation industries. Basic electronic concepts, component function and system operation are covered. Manufacturers' procedures are taught to identify malfunctions and to test the systems properly.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 234  AUTOMATIC TRANSMISSIONS  3 HRS. (OC)
Prerequisite: AUTO 117 with a grade of "C" or better. This course explores the transmission of power from the internal combustion engine by mechanical and hydraulic means. Problems in design and application are solved. The laboratory experience includes inspection, dis-assembly, and repair of automatic transmissions, torque converters and trans-axles.
Lecture Hours: 2 Laboratory Hours: 3

AUTO 243  SHOP PRACTICES  4 HRS. (OC)
Prerequisite: Department approval. This course is designed to provide an overview of the motor vehicle service industry. The course will examine employment opportunities and job requirements within the sales, service, and parts department of independent shops, mass-merchandisers, vehicle service departments, and franchised dealerships. Local dealers and shop owners as well as their technicians will be utilized in helping the students gain the required knowledge to become successful technicians. Emphasis will be placed on facilities, pricing service labor and parts, accounting, warranty, and supervision of personnel.
Lecture Hours: 2 Laboratory Hours: 6

AUTO 244  EMISSIONS AND DRIVEABILITY  3 HRS. (OC)
Prerequisite: AUTO 115 with a grade of "C" or better. This course covers the emission control systems used in modern gasoline engines. The use of test equipment and proper repair procedures are emphasized. Drive-ability of the automobile is also covered by studying the interaction of fuel, ignition, and emission systems.
Lecture Hours: 2 Laboratory Hours: 3
### Course Descriptions

#### AUTO 250 AUTOMOTIVE INTERNSHIP
- **Prerequisite:** Department approval. This supervised experience is required of students enrolled in the Automotive Technology program. Students' needs and objectives determine major emphasis of this course.
- **Lecture Hours:** 0  **Laboratory Hours:** 20

#### Banking

**BANK 110 PRINCIPLES OF BANK OPERATIONS**
- **Prerequisite:** BANK 110 with a grade of "C" or better or department approval.
- **Lecture Hours:** 3  **Laboratory Hours:** 0

**BANK 115 LAW AND BANKING**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 0

**BANK 116 LAW AND BANKING APPLICATIONS**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 0

#### Biology

**BIOL 106 HUMAN BIOLOGY**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 110 LIFE SCIENCE (L1 900L)**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 111 CONCEPTS IN BIOLOGY (L1 900L)**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 114 ENVIRONMENTAL BIOLOGY (L1 905L)**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 115 NATIVE PLANTS AND ANIMALS (L1 905L)**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 120 GENERAL BOTANY**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 130 GENERAL ZOOLOGY**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 140 HUMAN ANATOMY AND PHYSIOLOGY**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 150 GENETICS (L1 906)**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 206 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY I**
- **Prerequisite:** Approved reading placement score, or equivalent, AND completion of MA TH 115 or approved math placement score or department approval.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 207 PRINCIPLES OF HUMAN ANATOMY AND PHYSIOLOGY II**
- **Prerequisite:** Approved reading placement score, or equivalent.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 210 MICROBIOLOGY**
- **Prerequisite:** Approved reading placement score, or equivalent, AND completion of BIOL 140 or BIOL 160 or BIOL 205 with a minimum grade of "C" or better.
- **Lecture Hours:** 3  **Laboratory Hours:** 2

**BIOL 230 VERTEBRATE ZOOLOGY**
- **Prerequisite:** BIOL 110, 111, 130, or 160 with a "C" or better or department approval.
- **Lecture Hours:** 3  **Laboratory Hours:** 3
BUS 100  PROFESSIONAL DEVELOPMENT FOR EMPLOYEES  3 HRS. (OC)
This course prepares the student for initial entry into a career through the study of professional dress, etiquette, customer service, professional behavior and integrity, workplace adjustments, team membership, meeting professional responsibilities, letters of application and resumes, job interviews, and employment tests.
Lecture Hours: 3  Laboratory Hours: 0

BUS 110  INTRODUCTION TO BUSINESS  3 HRS. (TC)
This course covers the factual and informational survey of business designed to give the student a background for understanding the principles and practices governing the operation of modern business.
Lecture Hours: 3  Laboratory Hours: 0

BUS 111  INTERNATIONAL BUSINESS  3 HRS. (TC)
This course introduces the student to the fundamentals and the essentials of international business and improves their understanding of the domestic, foreign, and international business environments in the global marketplace and their impact on the U.S. economy.
Lecture Hours: 3  Laboratory Hours: 0

BUS 112  INTRODUCTION TO BUSINESS CAREERS  1 HR. (OC)
This course provides the student with a knowledge-based understanding of business-related careers. Self-analysis, analysis of business careers, and characteristics that enhance the likelihood of success are included.
Lecture Hours: 1  Laboratory Hours: 0

BUS 115  BUSINESS LAW  3 HRS. (TC)
This course emphasizes formation and application of contract, sales, and secured transactions law as it relates to business situations. Limited discussion is presented on criminal, tort, and agency law.
Lecture Hours: 3  Laboratory Hours: 0

BUS 116  BUSINESS LAW  3 HRS. (TC)
Prerequisite: BUS 115 with a grade of “C” or better. This course is a continuation of BUS 115. Topics include: business organizations, public law, the nature and use of commercial instruments, and personal and real property.
Lecture Hours: 3  Laboratory Hours: 0

BUS 120  BUSINESS MATHEMATICS  3 HRS. (TC)
Prerequisite: MATH 098 with a grade of “C” or better; or completion of high school Algebra with a grade of “C” or better; or MATH 099 with a grade of “C” or better; or appropriate score on the math placement test; or department approval. This course develops skills in handling mathematics in business transactions, fundamental processes, percentage, discount, interest, profit and loss, payrolls, and taxes, charges for credit, financial statements, insurance, stocks, bonds, metric system, inventories, depreciation, statistics and annuities.
Lecture Hours: 3  Laboratory Hours: 0

BUS 121  PRINCIPLES OF CUSTOMER SERVICE  3 HRS. (OC)
This course focuses on the importance of customer service, perception, and satisfaction, and the application of various customer relation systems in the marketplace. The course is designed to promote an understanding of the principles of customer service in general and how the application of customer service specifically contributes to positive customer perception and the success of business. Emphasis is placed on the importance of excellence in service to retain customers and gain a competitive advantage.
Lecture Hours: 3  Laboratory Hours: 0

BUS 141  SPECIAL TOPICS  0.5 HRS. (OC)
This special topics course will vary to allow an examination of various topics of interest in the business area. Each section offered will present a unique topic of value to students in business. This course may be repeated three times if the topic and content are different. Lecture hours per week will vary depending upon the credit given and course content in each section offered.
Lecture Hours: 0 - 3  Laboratory Hours: 0

BUS 151  JOB ORIENTATION  2 HRS. (OC)
This course employs a series of activities designed to identify and improve skills sought by employers of job candidates and current employees in the workplace. Presented in a workshop format, each session is devoted to one or more group activities focused on the development and/or refinement of a specific job skill. The class culminates in group presentations that require the members of each group to use all of the skills practiced during the course. Targeted skills include, but are not limited to: communication; teamwork; problem-solving; decision-making; and data analysis and presentation.
Lecture Hours: 2  Laboratory Hours: 0

BUS 200  HUMAN RELATIONS IN BUSINESS  3 HRS. (OC)
This course examines the problems of discipline, motivation, communications, authority, social change, and teamwork through case studies.
Lecture Hours: 3  Laboratory Hours: 0

BUS 203  BUSINESS STATISTICS (BUS 901)  4 HRS. (TC)
Prerequisite: MATH 115 with a grade of “C” or better or MATH 134 with a grade of “C” or better. This course includes the basic concepts of statistical analysis used in business decision making, including probability and how uncertainty is dealt with in real life. The student will analyze and work out simple problems and should be able to recognize applications of different statistical techniques, interpret the results of analyses, and recognize instances in which statistical techniques have been misused. The following concepts and statistical techniques are included: measures of central tendency and variability; random variables and probability distributions; binomial, normal and sampling distributions; estimation; test of hypotheses; chi square tests; linear regression and correlation; and one-way analysis of variance.
Lecture Hours: 4  Laboratory Hours: 0

BUS 215  LEGAL ENVIRONMENT OF BUSINESS  3 HRS. (TC)
This course provides the student with an overview of the legal environment within which business must operate. Appropriate public and private law topics are discussed. Legislative and administrative processes are discussed as well as public and private litigation procedures. Specific topics include: Constitutional law, torts, contracts, criminal, property, social and ethical responsibilities, employment law, administrative procedures and rules.
Lecture Hours: 3  Laboratory Hours: 0
BUS 220  INTRODUCTION TO BUSINESS FINANCE  3 HRS. (TC)  
Prerequisite: ACCTG 120 with a grade of "C" or better or department approval. This course is designed to develop an understanding of the principles, methods and problems relevant to managing money, the development and operation of businesses, and the role of financial institutions. Course content includes the financing of business and personal activities, financial planning, banking, and investment and risk management. 
Lecture Hours: 3  Laboratory Hours: 0

BUS 230  PRINCIPLES OF INVESTMENTS  3 HRS. (OC)  
This course covers the principles of investing. It covers the nature of investment, the risks and returns associated with stocks, bonds, savings accounts, real estate and other investments. 
Lecture Hours: 3  Laboratory Hours: 0

BUS 240  PERSONAL FINANCE  3 HRS. (TC)  
This course introduces students to contemporary personal finance topics. It covers the basics of money management, including budgeting, saving, credit management, investing, and tax planning. 
Lecture Hours: 3  Laboratory Hours: 0

BUS 255  INDEPENDENT STUDY  1 HR. (OC)  
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written proposal submitted to the faculty member (including a detailed description of the project, the number of credit hours assigned to it, and the evaluative criteria to be used) is necessary, along with periodic meetings to present progress toward the completion of the project. 
Lecture Hours: 1  Laboratory Hours: 0

BUS 260  BUSINESS INTERNSHIP  3 HRS. (OC)  
Prerequisite: BUS 100 with a grade of "C" or better, or department approval. The business student-intern will gain experience within the field to further develop business skills. An individual internship plan is created by the internship supervisor, intern, and internship coordinator. The intern will complete on-the-job work experience in business and attend a one lecture hour per week class session. 
Lecture Hours: 1  Laboratory Hours: 15

Caterpillar Dealer Service Technology

CATTK 110  CATERPILLAR ENGINE FUNDAMENTALS  4 HRS. (OC)  
Prerequisite: Department approval. This course discusses the principles of compression ignited internal combustion engines and variations in design. Caterpillar engines will be used in the class. 
Lecture Hours: 2  Laboratory Hours: 6

CATTK 111  INTRODUCTION TO CATERPILLAR SERVICE INDUSTRY  2 HRS. (OC)  
Prerequisite: Department approval. This course provides instruction and laboratory experience in shop safety, shop operation and how to obtain Caterpillar service information. 
Lecture Hours: 1  Laboratory Hours: 3

CATTK 112  FUNDAMENTALS OF HYDRAULICS  3 HRS. (OC)  
Prerequisite: Department approval. This course is a practical study of the basic principles and components of hydraulic systems and the application of these principles to Caterpillar agricultural and construction equipment machines. Major emphasis is on developing student competencies in the areas of servicing and maintaining hydraulic equipment. Laboratory practices include disassembly and reassembly of components and tracing circuits. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 113  CATERPILLAR ENGINE FUEL SYSTEMS  3 HRS. (OC)  
Prerequisite: CATTK 110 with a grade of "C" or better and department approval. This course is a study of combustion chamber design, Caterpillar fuel injection systems, diagnosing faults in fuel injection and combustion systems. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 114  FUNDAMENTALS OF ELECTRICAL SYSTEMS  3 HRS. (OC)  
Prerequisite: Department approval. This course is designed to include electrical concepts as they apply to electrical systems. It will include the use of electrical test equipment to diagnose electrical problems found on Caterpillar equipment and engines. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 115  AIR CONDITIONING  2 HRS. (OC)  
Prerequisite: Department approval. This course provides an introduction into the basic theory and principles of air conditioning as they relate to Caterpillar equipment and engines. Use of test equipment to diagnose and repair malfunctions, including repair of component parts and the charging and recharging of systems, will be stressed in the laboratory. 
Lecture Hours: 1  Laboratory Hours: 3

CATTK 116  FUNDAMENTALS OF TRANSMISSIONS & TORQUE CONVERTERS  3 HRS. (OC)  
Prerequisite: CATTK 112 with a grade of "C" or better and department approval. This course is a study of the various transmissions and differential used in Caterpillar equipment, including constant mesh, sliding gear, hydrostatic, synchronesh, and the newer transmissions involving planetary sets. An understanding of the operation, maintenance, and adjustment of the clutch and brakes will be an integral part of this course. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 117  MACHINE HYDRAULIC SYSTEMS  3 HRS. (OC)  
Prerequisite: CATTK 112 with a grade of "C" or better and department approval. This course is designed for inspecting, testing, and servicing, and diagnosing Caterpillar hydraulic circuits, systems, and components. Appropriate testing procedures and equipment will be utilized. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 150  INTERNSHIP I  4 HRS. (OC)  
Prerequisite: Department approval. This supervised experience is required of students enrolled in the Caterpillar Dealer Service Technology Curriculum. The placement experience is obtained through the cooperation of an employer. 
Lecture Hours: 0  Laboratory Hours: 40

CATTK 151  INTERNSHIP II  4 HRS. (OC)  
Prerequisite: CATTK 150 with a grade of "C" or better and department approval. This supervised experience is required of students enrolled in the Caterpillar Dealer Service Technology Curriculum. The placement experience is obtained through the cooperation of an employer. 
Lecture Hours: 0  Laboratory Hours: 40

CATTK 200  UNDERCARRIAGE/FINAL DRIVES  3 HRS. (OC)  
Prerequisite: Department approval. This course is designed to study the various driveline systems found on Caterpillar equipment. The course content will cover brakes, suspension, undercarriage, and steering components. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 201  MACHINE ELECTRONIC SYSTEMS  3 HRS. (OC)  
Prerequisite: CATTK 114 with a grade of "C" or better and department approval. This course provides the background needed to diagnose and repair the sophisticated electronics and computerized circuits found on Caterpillar equipment and engines. Basic system operation, electronic concepts, and component function are covered. 
Lecture Hours: 2  Laboratory Hours: 3

CATTK 202  CATERPILLAR ENGINE PERFORMANCE  2 HRS. (OC)  
Prerequisite: CATTK 113 and 201 with a grade of "C" or better and department approval. This course provides a thorough understanding of the necessary diagnostic skills required for troubleshooting Caterpillar engines and fuel systems. Emphasis will be placed upon knowledge and skills necessary to assure product reliability and performance. 
Lecture Hours: 1  Laboratory Hours: 3

CATTK 203  DIAGNOSTIC TESTING  1 HR. (OC)  
Prerequisite: CATTK 110 and CATTK 114 both with a grade of "C" or better. This is a course that studies the practical use of diagnostic equipment for analyzing and repairing Caterpillar machine and engine systems. Emphasis is placed on Applied Failure Analysis. 
Lecture Hours: 1  Laboratory Hours: 0

CATTK 204  MACHINE SPECIFIC SYSTEMS  4 HRS. (OC)  
Prerequisite: CATTK 117 and 201 with a grade of "C" or higher and department approval. This is a course to develop knowledge and skills used to test and adjust specific Caterpillar machine systems. 
Lecture Hours: 2  Laboratory Hours: 6

CATTK 250  INTERNSHIP III  4 HRS. (OC)  
Prerequisite: CATTK 151 with a grade of "C" or higher and department approval. This supervised experience is required of students enrolled in the Caterpillar Dealer Service Technology Curriculum. The placement experience is obtained through the cooperation of an employer. 
Lecture Hours: 0  Laboratory Hours: 40
CHEM 904 INTRODUCTION TO CHEMISTRY 3 HRS. (BEC)
Prerequisite: Concurrent enrollment in MAT 098 or higher. This course is designed as an introduction to basic chemistry principles as preparation for additional course work in chemistry. Recommended for students with minimal math preparation and without a year of high school chemistry. The course includes the use of the scientific calculator, the solution of basic chemical problems, the study of the metric system, fundamental atomic structure, chemical formulas, and chemical equations. This course is repeatable up to a maximum of three times.
Lecture Hours: 3 Laboratory Hours: 1

CHEM 110 CHEMISTRY AND SOCIETY (P1 903L) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and completion of MAT 098 with a grade of “C” or better or approved math placement score or department approval. This course is intended to establish an understanding of the role of chemistry in modern society by developing the principles of chemistry in the context of their social, environmental, and cultural impact. Typical discussions will include: energy sources and transformations, drugs and health care, agricultural and food chemicals, air and water pollution, toxic wastes and their disposal. At a technical level, it surveys basic principles of chemistry: experimental measurements, matter, chemical symbols, atomic and molecular structure, the chemical bond, temperature, heat and energy conversions, the gas laws, solution chemistry, and basic chemical calculations. Credit will not be granted to those students who have already earned credit in a previous college level chemistry course of comparable or higher level. Recommended as a general education course for liberal arts majors.
Lecture Hours: 3 Laboratory Hours: 2

CHEM 113 CHEMISTRY AND GLOBAL ISSUES (P1 903) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course will examine the science behind important, relevant, and sometimes controversial issues facing today’s society, such as climate change, food chemistry, agriculture, and energy. The material will be approached from the perspective of a non-science major but will be of interest and value to science majors and non-majors alike.
Lecture Hours: 3 Laboratory Hours: 0

CHEM 115 FOUNDATIONS OF CHEMISTRY (P1 902L) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and completion of MAT 098 or MAT 115 or higher with a grade of “C” or better or approved math placement score, or department approval. This course is a one-semester survey of General, Organic, and Biological Chemistry. It covers atomic structure, chemical bonding, solutions, organic functional groups, compounds of physiological importance, and metabolic pathways. Mathematical treatment and problem solving are expected in the first part of the course. Recommended for students in dental hygiene and other health-related occupations.
Lecture Hours: 3 Laboratory Hours: 2

CHEM 120 PRINCIPLES OF CHEMISTRY I (P1 902L) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and completion of MAT 098 with a grade of “C” or better or approved math placement score, or department approval. This course is a study of the fundamental principles governing the behavior of matter. Topics include atomic structure, stoichiometry, chemical bonding, equilibrium and solutions. Recommended for students enrolled in four-year programs in such fields as nursing (BSN) and allied health professions, agriculture, family and consumer science, computer science, prerequisite for general chemistry sequence (CHEM 130 or 131), or as a general education course. The important mathematical skills involved in basic chemistry are developed, but overall there is less mathematical emphasis than in CHEM 130.
Lecture Hours: 3 Laboratory Hours: 3

CHEM 122 PRINCIPLES OF CHEMISTRY 4 HRS. (TC)
Prerequisite: CHEM 120 with a grade of “C” or better or department approval. This course is a continuation of CHEM 120. The main focus of this course is on organic and biochemistry.
Lecture Hours: 3 Laboratory Hours: 3

CHEM 130 GENERAL CHEMISTRY (CHEM 911 P1 902L) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and completion of one year of high school chemistry with a grade “C” or better or CHEM 120 with a grade of “C” or better and completion of MATH 115 with a “C” or better or approved math placement score. This course is a study of fundamental chemistry principles, including atomic structure, chemical bonding, solutions, and reaction stoichiometry with an emphasis on understanding how atomic structure determines the physical and chemical properties of matter. Recommended for pre-professional, engineering, and chemistry majors.
Lecture Hours: 3 Laboratory Hours: 3

CHEM 131 GENERAL CHEMISTRY 3 HRS. (TC)
Prerequisite: CHEM 130 with a grade of “C” or better or department approval. This course is a continuation of CHEM 130. The course includes ionic equilibrium, electrochemistry, thermochemistry, nuclear chemistry, and survey of the elements.
Lecture Hours: 3 Laboratory Hours: 0

CHEM 132 GENERAL CHEMISTRY (CHEM 912) 4 HRS. (TC)
Prerequisite: CHEM 130 with a grade of “C” or better or department approval. This course is a continuation of CHEM 130. It includes chemical kinetics, ionic equilibrium, electrochemistry, thermochemistry, nuclear chemistry, and a survey of the elements. Laboratory includes semi-micro qualitative analysis.
Lecture Hours: 3 Laboratory Hours: 3

CHEM 210 FUNDAMENTALS OF ANALYTICAL CHEMISTRY 4 HRS. (TC)
Prerequisite: Completion of CHEM 132 or equivalent with a grade of “C” or better. This course is a study of the fundamental theory and practical aspects of the traditional and modern areas of chemical analysis methods. The course covers traditional topics such as sample preparation, data collection and analysis. The course also covers the three major areas of modern instrumental methods of analysis: spectrophotometry, separations, and electrochemistry. The course will emphasize the physical and chemical principles upon which analytical techniques are based, how analytical instruments and their components operate, and how these techniques can be used to solve analytical problems.
Lecture Hours: 3 Laboratory Hours: 3

CHEM 220 ORGANIC CHEMISTRY (CHEM 913) 5 HRS. (TC)
Prerequisite: CHEM 122 or 132 with a grade of “C” or better. This is the first semester of a two-semester sequence. It includes a study of the structure, nomenclature, reactivity, and synthesis of organic compounds. Reaction mechanisms and stereochemistry are emphasized. The laboratory includes macro and micro scale techniques and synthesis. Gas and liquid chromatography as well as infrared instrumentation are used to identify synthesized compounds.
Lecture Hours: 4 Laboratory Hours: 3

CHEM 230 ORGANIC CHEMISTRY (CHEM 914) 4 HRS. (TC)
Prerequisite: CHEM 220 with a grade of “C” or better or equivalent. This course is a continuation of CHEM 220 which includes chemistry involving alkenes, delocalized pi systems and benzene, carbonyl and carboxylic systems and concludes with amine chemistry. The laboratory includes multi-step synthesis, the utilization of NMR and GC-MS instrumentation to aid in structure elucidation, and the continued emphasis on chromatographic techniques.
Lecture Hours: 3 Laboratory Hours: 3

Child Development

CHILD 110 INTRODUCTION TO EARLY CHILDHOOD 3 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent. This survey course provides an overview of early childhood care and education including historical and cultural perspectives, organization, structure, programming, and evidence-based practices. Professional and evidence-based practices of highly qualified early childhood educators are outlined with an emphasis on their ability to enhance development and learning of each and every child between the ages of birth and eight. Considerations for diversity of culture, language, race, socioeconomic status, gender, ethnicity, and ability will be included. This course includes ten hour-long field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credential.
Lecture Hours: 3 Laboratory Hours: 0

CHILD 120 GROWTH AND DEVELOPMENT OF THE YOUNG CHILD 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course provides an overview of the theory and principles of human growth and development from conception to age eleven. Content includes an in-depth study of the inter-relatedness of social, emotional, physical, and cognitive aspects of development. Development
is studied in the context of family, gender, culture, language, ability, socioeconomic, diversity, and society. Special emphasis will be the theories of Piaget, Vygotsky, Erikson, and Gardner. Field observations are required outside of class time. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credential.

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 130  CURRICULUM FOR EARLY CHILDHOOD  3 HRS. (OC)**

Prerequisite: CHILD 110 and CHILD 120 both with a grade of "C" or better or department approval. The course is designed to provide a theoretical and practical foundation for the planning, implementing, and evaluating developmentally appropriate, evidence-based curriculum for young children. The course involves the development of educational programs for children from birth to eight years. This course includes field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credentials. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 132  INFANT-TODDLER CARE AND EDUCATION  3 HRS. (OC)**

Prerequisite: CHILD 130 and CHILD 134 both with a grade of "C" or better or department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course involves field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways Infant-Toddler Level 3 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 134  OBSERVATION AND ASSESSMENT OF YOUNG CHILDREN  3 HRS. (OC)**

Prerequisite: CHILD 110 and CHILD 120 both with a grade of "C" or better or department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course involves field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credentials.

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 140  CHILD, FAMILY, AND COMMUNITY  3 HRS. (OC)**

Prerequisite: Approved reading placement score. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course involves field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credentials. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 142  HEALTH, SAFETY, AND NUTRITION FOR THE YOUNG CHILD  3 HRS. (OC)**

Prerequisite: CHILD 110 and CHILD 120 both with a grade of "C" or better or department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course involves field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credentials. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 220  MATH METHODS IN EARLY CHILDHOOD  3 HRS. (OC)**

Prerequisite: CHILD 130 with a grade of "C" or better. This course is an exploration and examination of developmental theory and research, as well as principles, methods, and materials as they apply to mathematics teaching and learning in early childhood settings, birth through kindergarten. This course includes field experiences to be completed outside of class time, requiring current background check through ICC. Successful completion of this course applies toward Gateways ECE Level 3 and 4 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 222  FINE ARTS AND SOCIAL STUDIES IN EARLY CHILDHOOD  3 HRS. (OC)**

Prerequisite: CHILD 130 and CHILD 134 both with a grade of "C" or better, or department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course involves field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 224  SCIENCE METHODS FOR EARLY CHILDHOOD  2 HRS. (OC)**

Prerequisite: CHILD 130 and CHILD 134. This course focuses on the development of educationally appropriate, evidence-based curriculum for young children. The course includes field experiences to be completed outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 2  **Laboratory Hours:** 0

**CHILD 225  GUIDING SOCIAL AND EMOTIONAL DEVELOPMENT IN EARLY CHILDHOOD  2 HRS. (OC)**

Prerequisite: CHILD 130 and CHILD 134 both with a grade of "C" or better. This course focuses on the development of educationally appropriate, evidence-based curriculum for young children. The course involves field experiences outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 2  **Laboratory Hours:** 0

**CHILD 226  TEACHING DIVERSE POPULATIONS IN EARLY CHILDHOOD  3 HRS. (TC)**

Prerequisite: CHILD 130 and CHILD 134 with a grade of "C" or better, or department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course includes field experiences to be completed outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 231  TEACHING DIVERSE POPULATIONS IN EARLY CHILDHOOD  3 HRS. (TC)**

Prerequisite: Approved reading placement score. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course includes field experiences to be completed outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 232  LANGUAGE AND LITERACY DEVELOPMENT IN EARLY CHILDHOOD  3 HRS. (TC)**

Prerequisite: CHILD 130 and CHILD 134 with a grade of "C" or better, or department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course includes field experiences to be completed outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 235  TEACHING DIVERSE POPULATIONS IN EARLY CHILDHOOD  3 HRS. (TC)**

Prerequisite: Approved reading placement score. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course includes field experiences to be completed outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 4 Credential. 

**Lecture Hours:** 3  **Laboratory Hours:** 0

**CHILD 240  CHILD DEVELOPMENT PRACTICUM I  3 HRS. (OC)**

Prerequisite: Department approval. This course involves the development of educationally appropriate, evidence-based curriculum for young children. The course includes field experiences to be completed outside of class time and requires a current ICC background check. Successful completion of this course applies toward Gateways ECE Level 2, 3, and 4 Credentials. 

**Lecture Hours:** 1  **Laboratory Hours:** 6

<td>ELEMENTARY MANDARIN CHINESE II</td>
<td>4 HRS.</td>
<td>(TC) CHN 110 with a grade of “C” or better or equivalent. This course is a continuation of CHN 110 with emphasis on listening, speaking, reading, and writing. The course is conducted primarily in Mandarin Chinese.</td>
</tr>
<tr>
<td>CHN 210</td>
<td>INTERMEDIATE MANDARIN CHINESE III</td>
<td>4 HRS.</td>
<td>(TC) Approved reading placement score, or equivalent, and CHN 210 with a grade of “C” or better or equivalent. This course is a continuation of CHN 210 with emphasis on advanced conversation, reading, and composition. The course is conducted primarily in Mandarin Chinese.</td>

### Communication

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 110</td>
<td>INTRODUCTION TO COMMUNICATION: PRESENTATION AND THEORY (C2 900)</td>
<td>3 HRS.</td>
<td>(TC) Approved reading placement score, or equivalent. This course provides the foundations for theoretical understanding about interpersonal communication, intercultural communication, group communication, nonverbal communication, verbal communication, interpersonal communication, and rhetorical strategies. The course also provides practical application in public speaking and group membership. (AI C2 900)</td>
</tr>
<tr>
<td>COMM 113</td>
<td>BUSINESS AND PROFESSIONAL SPEAKING</td>
<td>3 HRS.</td>
<td>(TC) This course is designed to help students by providing them with a variety of practical communication experiences in business and professional settings. Such experiences may include: communicating with diverse cultures, managing work conflict, career interviews, leading teams, conducting meetings, problem-solving discussions, and a variety of business-style presentations.</td>
</tr>
<tr>
<td>COMM 115</td>
<td>INTRODUCTION TO PUBLIC RELATIONS</td>
<td>3 HRS.</td>
<td>(TC) This course provides an overview of the practices, theories, ethics, issues and problems facing public relations, and it allows the student to develop an appreciation for and an understanding of the Public Relations(PR) field.</td>
</tr>
<tr>
<td>COMM 116</td>
<td>ORAL INTERPRETATION</td>
<td>3 HRS.</td>
<td>(TC) This course is an analysis of the literary forms of prose, poetry and drama for the purpose of orally recreating the author’s intellectual and emotional intentions and of communicating those insights to an audience through controlled use of voice and body. Emphasis is placed on selection and preparation of materials as well as presentation. This course is acceptable as humanities credit.</td>
</tr>
<tr>
<td>COMM 118</td>
<td>COMMUNICATION PRACTICUM I</td>
<td>1 HRS.</td>
<td>(TC) Department approval. This course offers the student practical experience in a wide variety of communication activities which may include forensics competition, tournament work and various communication workshops.</td>
</tr>
<tr>
<td>COMM 119</td>
<td>COMMUNICATION PRACTICUM II</td>
<td>1 HRS.</td>
<td>(TC) Department approval. This course offers the student practical experience in a wide variety of communication activities which may include forensics competition, tournament work and various communication workshops.</td>
</tr>
<tr>
<td>COMM 120</td>
<td>INTERPERSONAL COMMUNICATION</td>
<td>3 HRS.</td>
<td>(TC) Approved reading placement score or equivalent. This course explores the non-presentational side of communication. It is designed to help a student improve the skills necessary for more effective and more efficient day-to-day communication. This course is recommended for any student who wishes to sharpen person-to-person communication skills and for students majoring in communication.</td>
</tr>
<tr>
<td>COMM 126</td>
<td>THE LISTENING LEARNER</td>
<td>1 HR.</td>
<td>(TC) This course introduces the student to the ideals and skills involved in effective listening, as well as to provide the student with an appreciation of the nature and uses of effective listening in college and public life. The student will be expected to acquire and utilize the knowledge and skills necessary for effective listening as a learner and as a member of society. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>
<tr>
<td>COMM 127</td>
<td>COMMUNICATION APPREHENSION</td>
<td>1 HR.</td>
<td>(TC) This course introduces the student to the nature and purpose of communication apprehension and the extent of its presence in daily interactions, as well as to provide the student with knowledge and an appreciation of the ideas and skills involved in overcoming communication apprehension. The student will be expected to acquire and utilize the knowledge and skills necessary for effective communication on all levels of social interaction. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>
<tr>
<td>COMM 128</td>
<td>COMMUNICATION IN DIVERSE CULTURES</td>
<td>1 HR.</td>
<td>(TC) This course introduces the student to the ideals and skills involved in communication effectiveness needed between diverse cultures, including the college environment. The student will be expected to acquire and utilize the knowledge and skills necessary for effective communication on all levels of social interaction. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>
<tr>
<td>COMM 155</td>
<td>COMMUNICATION INTERNSHIP I</td>
<td>1 HR.</td>
<td>(TC) Department approval. This course is designed to provide the student with an on-site educational work experience. The student will work an arranged number of hours per week at an appropriate location under the supervision of a communication professional. The student will work at least 75 hours per credit hour earned, plus weekly meetings with a college supervising professor. Lecture Hours: 0 Laboratory Hours: 5 - 15 or equivalent</td>
</tr>
<tr>
<td>COMM 203</td>
<td>SMALL GROUP COMMUNICATION (MC902)</td>
<td>3 HRS.</td>
<td>(TC) Prerequisite: COMM 110 OR COMM 212 with a grade of “C” or better or department approval. This course introduces the student to the principles and skills of effective group communication. The course will give the student practical experience in working within the group framework and executing group presentations. The student is expected to acquire and demonstrate the basic knowledge and skills necessary for effective group communication. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>COMM 204</td>
<td>INTERCULTURAL COMMUNICATION</td>
<td>3 HRS.</td>
<td>(TC) Approved reading placement score, or equivalent. This course is designed to study how culture affects the process of communication including values, beliefs, behaviors, norms, bias, and linguistic, verbal and nonverbal differences among cultures. The course further examines ethnocentrism and globalization with a focus on understanding and adapting to cultural differences. Studies focus on major theories of intercultural communication and practical approaches to communicating more effectively with individuals from other cultures. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>COMM 212</td>
<td>PUBLIC SPEAKING (C2 900)</td>
<td>3 HRS.</td>
<td>(TC) Prerequisite: Approved reading placement score, or equivalent. This course is designed to provide the student with training and experience in the preparation and execution of various types of public address. In addition, the course seeks to provide the student with knowledge of and an appreciation of rhetorical analysis and criticism. The diversity of the course curriculum makes the course highly useful to students of all majors. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>COMM 218</td>
<td>COMMUNICATION PRACTICUM III</td>
<td>1 HR.</td>
<td>(TC) Department approval. This course offers the student practical experience in a wide variety of communication activities which may include forensics competition, tournament work and various communication workshops. Lecture Hours: 0 Laboratory Hours: 2</td>
</tr>
<tr>
<td>COMM 219</td>
<td>COMMUNICATION PRACTICUM IV</td>
<td>1 HR.</td>
<td>(TC) Department approval. This course offers the student practical experience in a wide variety of communication activities which may include forensics competition, tournament work and various communication workshops. Lecture Hours: 0 Laboratory Hours: 2</td>
</tr>
<tr>
<td>COMM 222</td>
<td>READERS THEATRE</td>
<td>3 HRS.</td>
<td>(TC) This course concentrates on the study of various styles and techniques of Oral Interpretation in Readers’ Theatre. The presentation produced by the class will be toured through the area schools, civic organizations, and presented at ICC. Areas of concern are on vocal development, interpretive approach to literature and imaginative presentation. Three lecture hours per week and additional rehearsals and productions as scheduled. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
</tbody>
</table>
Course Descriptions

CMCIS 158 CCNA SECURITY 3 HRS. (OC)
Prerequisite: CMCIS 152 with a grade of "C" or better, CCNA certification or department approval. This CCNA specialization course is designed to provide students with classroom and laboratory experience in security configurations. The current and emerging networking technologies that will empower them to enter employment and/or further education and training in the computer networking field. Instruction includes, but is not limited to: safety, network topologies, network equipment and operating systems, networking protocols and terminology, network standards and models, LANs, WANs, cabling, cable tools, and IP addressing. Particular emphasis is given to the use of decision-making and problem-solving techniques in applying science, mathematics, and communications concepts to solve networking problems. In addition, instruction and training are provided in the proper care, maintenance, and use of networking software, tools, and equipment. Lecture Hours: 3 Laboratory Hours: 2

CMCIS 159 CCNP ROUTE 4 HRS. (OC)
Prerequisite: CMCIS 154 with a grade of "C" or better or department approval. This course will review topics required to successfully pass the Cisco CCNP certification. This course assists in the preparation for the CCNP certification by further developing networking skills in CCNA core technologies while also expanding knowledge and experience in advanced enterprise-level network configurations. Lecture Hours: 3 Laboratory Hours: 2

CMCIS 160 CCNP SWITCH 4 HRS. (OC)
Prerequisite: CMCIS 151 with a grade of "C" or better. This course is designed to provide students with classroom and laboratory experience focusing on switching technologies. Instruction includes, but is not limited to: safety, network topologies, network equipment and operating systems, networking protocols and terminology, network standards and models, LANs, WANs, cabling, cable tools, and IP addressing. Particular emphasis is given to the use of decision-making and problem-solving techniques in applying science, mathematics, and communications concepts to solve networking problems. In addition, instruction and training are provided in the proper care, maintenance, and use of networking software, tools, and equipment. Lecture Hours: 3 Laboratory Hours: 2

CMCIS 161 CCNP TROUBLESHOOTING 4 HRS. (OC)
Prerequisite: CMCIS 271 with a grade of "C" or better or department approval. This course is designed to provide students with classroom and laboratory experience in current and emerging networking technologies that will empower them to enter...
Computer Management – General

CMGEN 090 FOUNDATIONAL COMPUTER SKILLS 3 HRS. (BEC)
In this course, students will begin to develop skills needed to use computers in educational and occupational environments. Students will be introduced to computer hardware, software, and the Internet.
Lecture Hours: 2 Laboratory Hours: 2

CMGEN 110 INTRODUCTION TO WINDOWS 3 HRS. (OC)
This course teaches the student how to work with an operating system. Topics include managing a Windows work session, managing the system, managing files, customizing the interface through the Control Panel, working with the built-in utilities, learning to install applications under Windows, learning to run DOS and Windows applications, running multiple applications, and learning to share data among multiple applications.
Lecture Hours: 2 Laboratory Hours: 2

CMGEN 120 COMPUTER APPLICATIONS 3 HRS. (OC)
This course is designed to teach students to use a computer operating system, word processing software, spreadsheet software, database management software, presentation software, and integration of these software packages. Transfer students should take CMFSC 120.
Lecture Hours: 2 Laboratory Hours: 2

CMGEN 123 COMPUTER MATHEMATICS 3 HRS. (OC)
Prerequisite: MAT 094 with a grade of “C” or better or an equivalent score on the math placement test. This course is intended to introduce the computer student to those mathematical techniques and terminology which are commonly used in computer applications.
Lecture Hours: 3 Laboratory Hours: 0

CMGEN 141 SPECIAL TOPICS 0.5 HRS. (OC)
The contents of these special topics course will vary to allow an examination of various topics, such as software updates or new software. Each section offered will present a unique topic of value to students in the field of computers. This course may be repeated three times if the topic and content are different. Lecture and laboratory hours per week will vary depending upon the credit given and course content in each section offered.
Lecture Hours: 3 Laboratory Hours: 0

CMGEN 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides the student the opportunity to work on a technical project, research, or other specialized study related to his/her individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department with a final written report submitted to the faculty member by the student. This course is repeatable up to a maximum of five semester hours of credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

Computer Management - Networking

CMNET 110 NETWORK CONCEPTS 3 HRS. (OC)
This course provides a baseline level of knowledge of computer networking. The course begins with information on how to select and maintain a network. Existing network hardware and software are examined, and methods of connecting networks are explored. Finally, security considerations and installation concerns are addressed.
Lecture Hours: 3 Laboratory Hours: 0

CMNET 140 WINDOWS ADMINISTRATION 3 HRS. (OC)
This course provides students with the knowledge and skills required to install, configure, administer, and troubleshoot Microsoft desktop operating systems.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 150 COMPUTER HARDWARE INFRASTRUCTURE 3 HRS. (OC)
This course introduces students to the underlying components of personal computers from hardware elements to the software that operates the computer. Students will be provided with the knowledge and skills required to perform computer hardware installation, maintenance, and problem resolution.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 151 OPERATING SYSTEM ENVIRONMENTS 3 HRS. (OC)
This course will provide the practical knowledge and skills necessary to troubleshoot computer operating systems. Students will learn the fundamentals of Windows operating systems. Topics covered will include how to install, configure, upgrade, diagnose, and troubleshoot Windows operating systems. In addition, fundamental networking capabilities of these operating systems will be studied.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 155 INTRODUCTION TO COMPUTER FORENSICS 3 HRS. (TC)
This course will provide an overview of computer forensics and associated investigation tools and techniques. Students will learn what computer forensics and investigation is as a profession and gain an understanding of the overall investigative process. The most commonly used computer operating system architectures and disk structures will be discussed. Students will learn the importance of digital evidence and how to process crime and incident scenes. Finally, they will learn the fundamentals of data acquisition, computer forensic analysis, email investigations, image file recovery, investigative report writing, and expert witness requirements.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 160 INTRODUCTION TO NETWORK SECURITY 3 HRS. (OC)
Prerequisite: CMWEB 110 with a grade of “C” or better or CMCS 151 with a grade of “C” or better, or concurrent enrollment or department approval. This course will provide an introduction to network security issues. Intended as a survey course, the material covered in this class will provide broad-based knowledge necessary to prepare students for further study in specialized areas of security. Topics covered will include but not be limited to authentication, remote access, intrusion detection, disaster recovery planning, security forensics, and security issues involved in email, web, and wireless networks.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 165 HELP DESK CONCEPTS 3 HRS. (OC)
In this course, students are introduced to the organizational role and operation of the help desk function as it merges technology with communication and customer support services.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 210 WINDOWS SERVER ADMINISTRATION 3 HRS. (OC)
Prerequisite: CMNET 140 with a grade of “C” or better or department approval.
This course provides students with the knowledge and skills required to install, configure, administer, and troubleshoot Microsoft network operating system.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 220 NETWORK INFRASTRUCTURE ADMINISTRATION 3 HRS. (OC)
Prerequisite: CMNET 210 with a grade of “C” or better or department approval. This course provides students with the knowledge and skills needed to implement and support TCP/IP and Windows network services in local and wide-area network environments.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 230 DIRECTORY SERVICE ADMINISTRATION 3 HRS. (OC)
Prerequisite: CMNET 210 with a grade of “C” or better or department approval. This course provides students with the knowledge and skills needed to implement and administer an enterprise-class, central directory database and its services.
Lecture Hours: 2 Laboratory Hours: 2

CMNET 250 ADVANCED SECURITY TOPICS 3 HRS. (OC)
Prerequisite: CMNET 230 with a “C” or better or department approval. This course is designed to teach the fundamentals of securing Windows servers that are connected to corporate networks and the Internet. In addition to learning the fundamentals of designing a secure framework, students will learn how to secure computers based on their function, how to secure the network management process, and how to configure group policies and administrative functions to increase ease of maintenance while retaining high levels of security. Students will learn the fundamentals of scripting with an emphasis on PowerShell, how to use existing scripts to assist in rapid deployment of security fixes and documentation, how to write scripts to interface with the operating system, and how to document scripts so they can be maintained by others. Students will learn terminology associated with security, scripting, and the fundamentals of risk assessment and management. Lecture and laboratory hours per week will vary depending upon the credit given and the course content in each section offered, this course is repeatable up to a maximum of four total hours of credit.
Lecture Hours: 2 Laboratory Hours: 3 or equivalent

CMNET 250 NETWORKING INTERNSHIP 3 HRS. (OC)
Prerequisite: Department approval. In cooperation with the Internship Coordinator, each student is assigned to an appropriate training station where a minimum of fifteen hours per week of on-the-job work experience is provided. The student's work will include those experiences which involve hands-on computer experience. This course may be repeated one time; however, it may be used only once to fulfill the requirement for an Associate in Applied Science degree.
Lecture Hours: 1 Laboratory Hours: 15 or equivalent
CMWEB 110    BEGINNING WEB DEVELOPMENT WITH HTML AND CSS 4 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or departmental approval. This course is designed to teach the basic creation of web pages using HTML and CSS. Included in the course are creation of web pages using HTML and CSS in a text editor, transfer of files (using File Transfer Protocol), domain name acquisition, and web hosting requirements. An overview of topics as they relate to web development including networking, Internet standards, security, and e-commerce concepts will also be covered.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 120    INTERMEDIATE WEB DEVELOPMENT WITH HTML AND CSS 4 HRS. (OC)
Prerequisite: CMWEB 110 with a grade of "C" or better or department approval. This course is designed to teach intermediate web page construction. Included in the course are methods to create static World Wide Web pages with HTML and CSS and methods to develop, deploy, and maintain web sites. Effective web page design and web site design and information architecture will be reviewed. Students will be exposed to the fundamentals of web site project management as well as techniques to maintain a web site. Editing of photos and other graphics will also be discussed.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 130    WEB CONTENT MANAGEMENT SYSTEMS, SEO, AND ANALYTICS 4 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or departmental approval. This course is designed to teach the practical use of web technologies in a business environment with emphasis on current popular content management systems. Installation, configuration, expansion of capabilities using plugins, creation of child themes, and creation of content and navigation will be included. Business concepts related to web development, SEO, and analytics will be discussed.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 135    BUSINESS USE OF SOCIAL MEDIA 4 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or departmental approval. This course is designed to teach business usage of social media. Students will learn current business best practices to grow an online presence. Pitfalls and security issues will be discussed. Employment of metrics to measure effectiveness of social media campaigns will be reviewed, and appropriate creation of content based on platform and audience will also be included.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 140    E-COMMERCE 4 HRS. (OC)
Prerequisite: CMWEB 110 with a grade of "C" or better or concurrent enrollment or department approval. This course is designed to teach the practical application of electronic commerce in a web environment. Business and marketing considerations will be emphasized, and customer requirements (including RFQ (Request for Proposal) and RFP (Request for Quotation)) will be discussed. Security and payment processing will be reviewed, and some user experience concepts and techniques will be discussed. Emerging technologies and best practices will be examined.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 141    WEB SPECIAL TOPICS 1 HR. (OC)
Prerequisite: Department approval. This course is a special topics course which will vary to allow an examination of various topics such as software updates or new software. Each section offered will present a unique topic of value to students in web systems. This course may be repeated three times if the topic and content are different. Lecture hours per week will vary depending upon the credit given and course content in each section offered.
Lecture Hours: 1 - 3 Laboratory Hours: 0

CMWEB 150    WEB ACCESSIBILITY AND UsABILITY 4 HRS. (OC)
Prerequisite: CMWEB 110 with a grade of "C" or better, or concurrent enrollment or department approval. This course is designed to provide the student with a foundation for creating accessible web sites. Students will apply Universal Design Concepts to accommodate individuals with visual, mobility, auditory, speech, and cognitive disabilities. Students will design and test web pages for compliance with accessibility guidelines and legal requirements. Coding techniques for accessible HTML and CSS will be emphasized. The theory and practice of creating intuitive user interfaces will be discussed, with a focus on design and evaluation methodologies in the field of user experience.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 160    INTRODUCTION TO SCRIPTING FOR THE WEB AND XML 4 HRS. (OC)
Prerequisite: CMWEB 110 with a grade of "C" or better or concurrent enrollment or department approval. This course is designed to teach the fundamentals of client side scripting with JavaScript. Included in this course are methods to add interaction to web pages and to understand JavaScript syntax and event handlers. Use of code, documentation, and source code control will also be covered. Students will learn to use JavaScript to manipulate elements on the web page and to incorporate dynamic content into the web page. Students will be exposed to web page validation and creation of more dynamic web sites, including debugging tools and version control. The fundamentals of XML (Extensible Markup Language) will also be discussed.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 200    JAVASCRIPT FOR WEB DEVELOPERS 4 HRS. (OC)
Prerequisite: CMWEB 160 with a grade of "C" or better, or department approval. This course is designed to teach the fundamentals of client side scripting with emphasis on JavaScript. Included in this course are methods to add interaction to web pages and to understand JavaScript syntax and event handlers. Use of code, documentation, and source code control will also be covered. Students will learn to use JavaScript to manipulate elements on the web page and to incorporate dynamic content into the web page. Students will be exposed to web page validation and creation of more dynamic web sites, including debugging tools and version control. The fundamentals of XML (Extensible Markup Language) will also be discussed.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 220    ADVANCED WEB DEVELOPMENT WITH HTML AND CSS 4 HRS. (OC)
Prerequisite: CMWEB 120 with a grade of "C" or better or department approval. This course is designed to teach advanced HTML and CSS techniques, web standards, cross browser development issues, responsive design, and frameworks. HTML email and associated metrics as well as creating and modifying audio and video for inclusion on websites will also be discussed.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 240    WINDOWS WEB SERVER SCRIPTING WITH ASP.NET 4 HRS. (OC)
Prerequisite: CMWEB 110 with a grade of "C" or better or department approval. This course is designed to teach the use of ASP.NET technologies using IIS web servers to interface legacy applications and to develop new web applications. Use of the Visual Studio Integrated Development Environment will be emphasized. Students will learn current business best practices to grow an online presence. Pitfalls and security issues will be discussed. Employment of metrics to measure effectiveness of social media campaigns will be reviewed, and appropriate creation of content based on platform and audience will also be included.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 241    PHP 4 HRS. (OC)
Prerequisite: CMWEB 160 with a grade of "C" or better or department approval. This course is designed to teach the fundamentals of server side scripting with emphasis on the syntax of PHP. We will focus on creation of interactive web pages using PHP. Once students understand the basics of the language (syntax, flow control, operators, arrays, functions, and similar concepts), we will examine uses of this technology. This will include session management, utilization of data stores, creating and consuming web services, interactions with databases, utilization of frameworks, tools and techniques for documentation, authorization and authentication, and version control.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 260    WEB INTERNSHIP 3 HRS. (OC)
Prerequisite: Department approval. In cooperation with the Web Internship Coordinator, each student is assisted in locating an appropriate web client organization (or web projects) where a minimum of 225 hours for the semester of on-the-job work experience is provided (or the equivalent hours of experience working on approved web projects). This can be working either at a for-profit or not-for-profit organization. (The student will need to work with someone other than himself or herself on this project.) The student’s work will include those experiences that involve actual web design and development activities. This course may be repeated two times, however, may be used only once to fulfill the requirement for an Associate in Applied Science degree.
Lecture Hours: 0 Laboratory Hours: 15 or equivalent
CMWEB 270 WEB SERVER AND WEB APPLICATION SECURITY 4 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or department approval.
This course will introduce students to the fundamentals of web server installation and administration using the Linux platform. It will also cover securing web applications, and will establish a baseline for their further investigations into this rapidly evolving subject. The use of tools to increase web server availability, performance, and security will be covered. Students may be asked to sign a waiver that they will only use this knowledge to defend the sites they create/maintain from attack.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 280 WEB DEVELOPMENT FOR MOBILE DEVICES 4 HRS. (OC)
Prerequisite: CMWEB 160 with a grade of “C” or better or department approval.
This course is designed to teach development of web based applications for mobile devices (including smartphone, tablet devices and related hardware). Students will learn what is involved in development of web sites which can dynamically adapt to small screen size viewports. Students will also learn how to develop applications relying on accepted industry tools. In addition, animations (tools and frameworks), SVG (Scalable Vector Graphics), and the use of programs for graphic and image creation/ manipulation will be covered.
Lecture Hours: 4 Laboratory Hours: 0

CMWEB 282 WEB DEVELOPER INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Departmental approval. This course is designed to provide the student with guided instruction on web developer concepts and projects on an individual basis.
Lecture Hours: 1 - 4 Laboratory Hours: 0

CMWEB 296 WEB DEVELOPER APPRENTICE 1 HR. (OC)
Prerequisite: Departmental approval. This course is designed to be a capstone class for the Web Developer Apprentice Certificate. It will include job hunt preparation, preparation of a resume and portfolio, a review of material presented throughout the program, and will culminate with the student taking the Web Professionals Apprentice Developer Certification Exam. This is an industry-recognized credential.
Lecture Hours: 1 Laboratory Hours: 0

CMWEB 297 WEB DEVELOPER APPRENTICE PROJECT CAPSTONE 1 HR. (OC)
Prerequisite: Departmental approval. This course is designed to be a capstone class for the Web Developer Apprentice Certificate. It will include job hunt preparation, preparation of a resume and portfolio, and a project that reinforces and demonstrates competency in the most important areas of the classes taken by students in the program.
Lecture Hours: 1 Laboratory Hours: 0

CMWEB 299 WEB DEVELOPER PROJECT CAPSTONE 1 HR. (OC)
Prerequisite: Departmental approval. This course is designed to be a capstone class for the Web Developer Certificate and the Web Systems Applied Science Degree. It will include job hunt preparation, preparation of a resume and portfolio, and a project that reinforces and demonstrates competency in the most important areas of the classes taken by students in the program.
Lecture Hours: 1 Laboratory Hours: 0

Computer Science

CMPSC 115 CS I: ESSENTIALS OF PROGRAMMING 3 HRS. (TC)
This course is designed to give students exposure to essential object-oriented programming concepts. The primary goal is to familiarize students to a disciplined approach to programming logic, problem-solving methods, algorithm development, and security awareness. The course teaches: program design, coding, testing, debugging, and documentation at the introductory level. When completed, the student will be able to solve programming tasks in socially responsible disciplined fashion. Students are expected to be Windows proficient prior to this course.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 120 BUSINESS COMPUTER SYSTEMS (BUS 902) 3 HRS. (TC)
Prerequisite: MAT 098 with a grade of “C” or better or equivalent. Designed primarily for students planning to major in business. Course will acquaint and train students in the use of business software including word processing, database management, spreadsheets, presentation software, and Internet access methods.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 122 INTRODUCTION TO COMPUTER SECURITY 3 HRS. (OC)
Prerequisite: CMPSC 115 or concurrent enrollment with department approval.
This course provides an overview of the fundamentals of computer security. Topics include security standards, policies, and best practices, principles, mechanisms, and implementation of computer security and data protection; security policy, encryption, and authentication; access control and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis; principles of ethical and professional behavior; regulatory compliance and legal issues; information assurance; risk management and threat assessment; business continuity and disaster recovery planning; and security across the life cycle (requirements, architecture and design, construction, testing, operation, maintenance, acquisition, and services).
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 124 EVENT-DRIVEN PROGRAMMING IN VISUAL BASIC 3 HRS. (TC)
This introductory course in event-driven programming will introduce the student to real world applications for the world’s most widely used operating system, Microsoft Windows. The student will become familiar with how computers are programmed, the Visual Basic editor (IDE), control structures, procedures and functions, arrays, data types, graphics and graphical user interfaces, event-driven programming (task/object/event), error handling, and sequential and random access file processing. Concentration will be on writing well-planned and user-friendly programs. MS Windows proficiency is expected of students desiring to take this course.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 125 CS I: PROGRAMMING IN C++ (CS 911) 3 HRS. (TC)
Prerequisite: MAT 098 with a grade of “C” or better. This course is an introduction to computer science; its primary purpose is to introduce a disciplined approach to problem-solving methods and algorithm development, emphasizing data and procedural abstraction. Using C++, the course teaches program design, coding, testing, debugging, and documentation.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 128 INTRODUCTION TO GAMES AND THEIR DESIGN 3 HRS. (OC)
This course presents a complete overview of the gaming industry with emphasis placed on learning the fundamental terminology. The principles of game design are covered in such a way that the student can see how they apply to the creation of a level or section of a game. In addition to the basic techniques, the student is introduced to the impact of visual design, theme, and atmosphere upon the enrichment of a game. Both 2D and 3D are covered along with limitations on design and the impact on the final product. Case studies reinforce these basic principles.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 129 INTRODUCTION TO GAME PROGRAMMING 3 HRS. (OC)
Prerequisite: MAT 098 with a grade of “C” or better or concurrent enrollment, and computer proficiency. This course teaches the student the basics of programming computer games including data handling, code structures, event-handling, audio, sprites, animation, and realistic movement.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 135 CS II: PROGRAMMING IN JAVA 3 HRS. (TC)
Prerequisite: CMPSC 115 with a “C” or better. This intermediate course is the second in a sequence of Java object-oriented programming courses. The student is introduced to a disciplined approach to problem-solving with emphasis on algorithm development, in addition to an introduction to procedural and data abstraction. This course will cover control structures; program design, testing, and documentation using software assurance and ethical conduct.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 140 INTRODUCTION TO RELATIONAL DATABASES 3 HRS. (OC)
Prerequisite: CMPSC 115 with a grade of “C” or better or department approval.
In this course, elementary relational database concepts will be presented. Database modeling will be explained and normalization will be discussed. Structured Query Language (SQL) and advanced database concepts will be introduced.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 200 C# PROGRAMMING 3 HRS. (OC)
Prerequisite: MAT 098 with a grade of “C” or better or department approval.
This course introduces a current Object Oriented Programmer to the C# programming language, a part of the Microsoft.NET platform. All programming elements of the language are presented in a rapid survey of the language. Emphasis is upon interfacing with databases and class design. The skills needed to write console applications, Windows applications, and beginning Internet applications are presented.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 212 CS II: ADVANCED PROGRAMMING IN C++ (CS 912) 3 HRS. (TC)
Prerequisite: CMPSC 125 with a grade of “C” or better. The second in the sequence of courses in C++ programming. This course covers: design and implementation of large-scale problems; abstract data types; data structures (files, sets, pointers, lists, stacks, queues, trees, graphs); text processing; and an introduction to searching and sorting algorithms.
Lecture Hours: 2 Laboratory Hours: 2

CMPSC 215 COBOL AS A SECOND LANGUAGE 4 HRS. (OC)
Prerequisite: CMPSC 124 or CMPSC 125 with a grade of “C” or better or department approval.
This course is an introductory COBOL course which builds on prior programming experience. Structured programming design, implementation, testing, documentation using COBOL, arrays, records, string processing, and files are covered. Sorting and searching techniques and interactive programming will also be introduced. Specifically, direct access file techniques, master file update, and control break logic are covered. Program linkage and parameter processing are also introduced.
Lecture Hours: 3 Laboratory Hours: 2
Prerequisite: CMPSC 135 with a grade of “C” or better or concurrent enrollment in CMPSC 135 with department approval. This course covers security vulnerabilities of programming in weakly typed languages like C and in more modern languages like Java. Common weaknesses exploited by attackers are discussed, as well as mitigation strategies to prevent those weaknesses. Students practice programming and analysis of software systems through testing and static analysis.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 224  ADVANCED VISUAL BASIC  3 HRS. (OC)
Prerequisite: CMPSC 124 with a grade of “C” or better. This second course in the event-driven programming sequence of Visual Basic will introduce the student to additional real-world applications for the world’s most widely used operating system, Microsoft Windows. The student will build and hone first semester skills, along with becoming familiar with object linking and embedding (OLE), ActiveX controls, collections, fundamental database concepts, database manipulation, Windows API and Registry manipulation, and Internet controls. Concentration will be on writing well-structured and user-friendly applications for business.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 235  CS III: ADVANCED PROGRAMMING IN JAVA  3 HRS. (TC)
Prerequisite: CMPSC 135 with a grade of “C” or better or department approval. This is the third in the sequence of courses in secure Java-oriented programming. This course covers: design and implementation of large-scale problems; abstract data types; data structures (files, sets, pointers, lists, stacks, queues, trees, graphs); algorithmic analysis; software engineering principles; software and information assurance; and an introduction to searching and sorting algorithms.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 237  MOBILE APPLICATION PROGRAMMING  3 HRS. (OC)
Prerequisite: CMPSC 124, CMPSC 125, CMPSC 135, or CMPSC 200 with a grade of “C” or better, or department approval. This course will cover the fundamental programming principles for mobile devices (excluding iOS). The software architecture and user experience considerations underlying handheld software applications and their development environments will be investigated. Concepts will be reinforced by students programming hands-on assignments, which will be run on a current mobile platform. Students will apply these lessons and plan and develop their own viable applications.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 245  STRUCTURED QUERY LANGUAGE  3 HRS. (OC)
Prerequisite: CMPSC 140 with a grade of “C” or better or department approval. This course covers programming in the Structured Query Language. Students are taught to create and maintain database objects and to store, retrieve, and manipulate data. In addition, students learn to create blocks of application code that can be shared by multiple forms, reports, and data management applications. The student will learn how to write and apply triggers, procedures, and packages. Demonstrations and hands-on practice reinforce the fundamental concepts.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 249  UNIX  3 HRS. (OC)
This course is an introduction to UNIX. In this course, file handling, text editors and shell programming are discussed.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 262  INTRODUCTION TO ASSURED SOFTWARE ENGINEERING  3 HRS. (OC)
Prerequisite: CMPSC 235 or concurrent enrollment. This course covers the basic principles and concepts of assured software engineering; system requirements; secure programming in the large; modeling and testing; object-oriented analysis and design using the UML; design patterns; frameworks and API’s; client-server architecture; user interface technology; and the analysis, design and programming of extensible software systems.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 265  DATABASE ADMINISTRATION  3 HRS. (OC)
Prerequisite: CMPSC 245 with a grade of “C” or better or CMNET 210 with a grade of “C” or better or department approval. This course is designed to give the database administrator (DBA) a firm foundation in basic administrative tasks and provide the necessary knowledge and skills to set up, maintain, and troubleshoot a relational database. The student learns to use an administration tool to startup and shutdown a database, create a database, manage file and database storage, and manage users and their privileges. In addition, the student learns to organize the database and to move data into and between databases under different environments. Hands-on practices help to reinforce key concepts.

Lecture Hours: 2  Laboratory Hours: 2

CMPS 270  STRUCTURED SYSTEM ANALYSIS  3 HRS. (OC)
Prerequisite: CMPSC 215 or CMPSC 212 or CMPSC 235, any with a grade of “C” or better or department approval. This course presents to the student the SDLC, System Development Life Cycle, as the basis for the development of computer systems. Various analysis tools will be taught to aid students in the preparation of all aspects of system development.

Lecture Hours: 2  Laboratory Hours: 2

CRJ 110  INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM (CRJ 901)
This course is a survey and analysis of the criminal justice system, including a historical and philosophical overview of its development, with special emphasis on the system’s components and the relationship among those components in the administration of criminal justice in America.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 111  SELECTED TOPICS
The content of this course varies from offering to offering to meet the changing needs of students and to allow exploration of topics more fully than can be addressed in survey courses. Each offering will present a unique investigation of a topic in criminal justice. This course is repeatable if the topic and content are different up to a maximum of three semester hours of credit. The duration of the course will depend upon the topic to be covered.

Lecture Hours: 1 - 3  Laboratory Hours: 0

CRJ 112  POLICE OPERATIONS
This course is designed to acquaint the student with the basic services that are provided by police departments stressing the role and responsibility of the police in the prevention and control of adult crime.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 114  INTRODUCTION TO CORRECTIONS (CRJ 911)
This course provides a basis to understanding the correctional system for those intending to pursue careers in the field of corrections or law enforcement. The course includes historical development, philosophy and variety of correctional methods. Included are institutional and post institutional techniques, probation and parole.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 118  JUVENILE DELINQUENCY (CRJ 914)
This course covers the history and philosophies of society’s reactions to juvenile behavior and problems. Interaction among the police, judiciary, and corrections are examined in the context of cultural influences. Theoretical perspectives of causation and control are examined.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 121  PROFESSIONAL STANDARDS IN CRIMINAL JUSTICE
Prerequisite: CRJ 110 with a grade of “C” or better. This course provides a traditional and multimedia exploration of the field of criminal justice ethics and professional standards. This course broadly encompasses the history of justice, theories of morality, and police ethics from antiquity to the present. Five areas of ethical decision-making opportunities are studied in this course: law enforcement ethics and professional standards, legal profession ethics, correctional ethics, policy making and forensics, and forensic issues that relate specifically to the criminal justice system. The course will also cover topical studies and take advantage of current news stories as an opportunity to explore moral mistakes and triumphs in modern life in criminal justice. This will enable students to explore their own ethical and moral systems and how they make ethical/moral decisions.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 130  INTRODUCTION TO INVESTIGATION
This course is designed to examine the techniques and problems involved in investigation of criminal cases. It includes theory and techniques of investigation, the questioning of witnesses and suspects, procedural problems involved in investigation, the collection and presentation of evidence, and preparation of cases.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 190  9-1-1 TELECOMMUNICATOR I
This course covers the fundamentals of calling-taking and dispatching emergency calls specifically for the police, fire and emergency medical service (EMS) departments.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 191  9-1-1 TELECOMMUNICATOR II
Prerequisite: CRJ 190 with a grade of “C” or better. This course covers the fundamentals of call-taking and dispatching emergency calls specifically for the police, fire, and emergency medical service (EMS) departments, Part II.

Lecture Hours: 3  Laboratory Hours: 0

CRJ 201  INTERNSHIP IN CRIMINAL JUSTICE
Prerequisite: CRJ 110 and CRJ 225 both with a grade of “C” or better. This course is designed to give the trainee field experience in field work by actually participating as a “cadet” while engaged in on-the-job training with experienced criminal justice personnel. The student will also do individual research and study in the student’s field of interest as approved and directed by the instructor.

Lecture Hours: 1  Laboratory Hours: 0
CRJ 212  HUMAN TRAFFICKING: WOMEN AND CHILDREN  3 HRS. (TC)
This course examines the national and global issue of human trafficking, specifically, trafficking in women and children. Some of the areas highlighted in the course are human rights, organized crime, law enforcement response, inaction and corruption, national and international responses in international law, sexual and economic exploitation, global victimization, and in instances, government tolerance of human trafficking. Case studies from several countries will be surveyed to provide context and facilitate student comprehension of this exploitation.
Lecture Hours: 3  Laboratory Hours: 0

CRJ 213  GENDER AND CRIME  3 HRS. (TC)
This course examines the historical and contemporary issues and response of gender and its interrelation to crime. It explores how the social ascription that define gender have impacted the study of women and crime. The course surveys the general and feminist theories that attempt to explain female offending and the patterns of offending. It further explores female victimization. Women professionals in the judiciary, corrections and law enforcement will also be discussed.
Lecture Hours: 3  Laboratory Hours: 0

CRJ 225  CRIMINAL LAW  3 HRS. (TC)
Prerequisite: CRJ 110 or PRLGL 110 with a grade of “C” or better or department approval. This course is concerned with the components, purposes and functions of criminal law. Included in this course is a study of criminal liability, including the elements of various offenses and the rules of evidence.
Lecture Hours: 3  Laboratory Hours: 0

CRJ 227  ADMINISTRATION OF JUSTICE  3 HRS. (TC)
Prerequisite: CRJ 110 or PRLGL 110 with a grade of “C” or better or department approval. This course is designed to acquaint the student with the legal principles applicable to important criminal procedures that involve force, arrest, search and seizure, civil rights, self-incrimination, assistance of counsel and other aspects of Constitutional Law affecting law enforcement officers.
Lecture Hours: 3  Laboratory Hours: 0

CRJ 230  COURT PROCEDURES AND EVIDENCE  3 HRS. (TC)
Prerequisite: CRJ 110 or PRLGL 110 with a grade of “C” or better or department approval. This course is designed to acquaint the student with the kinds of evidence and the rules governing the admissibility of evidence in court, including the effect of court decisions on the acquisition and admissibility of evidence, criminal procedural steps from court to conviction, and acquittal or dismissal.
Lecture Hours: 3  Laboratory Hours: 0

CRJ 250  POLICE ORGANIZATION AND ADMINISTRATION  3 HRS. (TC)
This course is designed to acquaint the student with basic management and leadership skills as they pertain to professional police management.
Lecture Hours: 3  Laboratory Hours: 0

Culinary Arts

CA 150  PROFESSIONAL COOKING  3 HRS. (OC)
This course is a study of the fundamental elements of the foodservice industry, including terminology, equipment identification and usage, information regarding types of foods and trends in the industry, communication skills, and basic preparation techniques.
Lecture Hours: 2  Laboratory Hours: 3

CA 151  ADVANCED SANITATION AND SAFETY  3 HRS. (OC)
This course is a study of the fundamental elements of safety and sanitation within both the commercial and non-commercial food service establishment. It prepares the student to successfully pass the Illinois State Sanitation Certification examination. The development of safe and sanitary working practices needed by each foodservice worker is stressed.
Lecture Hours: 3  Laboratory Hours: 0

CA 153  BAKING  3 HRS. (OC)
Prerequisite: CA 150 with a grade of “C” or better. This course introduces students to the fundamental elements of baking and leavening agents. As a portion of the laboratory experience, the student will produce baked items such as quick breads, biscuits, muffins, cookies, doughnuts, fritters, lean breads and a wide variety of pies. This is the first of two courses that focus on baking.
Lecture Hours: 2  Laboratory Hours: 3

CA 155  MEAT, POULTRY AND FISH  3 HRS. (OC)
Prerequisite: CA 150 with a grade of “C” or better. This course focuses on the identification of wholesale and fabricated cuts of beef, pork, veal and lamb and the recognition of various types of poultry and fish. It includes the study of the fundamental principles regarding meat, poultry and fish preparation.
Lecture Hours: 2  Laboratory Hours: 3

CA 156  SAUCES  3 HRS. (OC)
Prerequisite: CA 150 and CA 155 both with a grade of “C” or better. This course gives a general overview of the history of sauce making and an in-depth study of the classical and contemporary techniques used in sauce preparation. Students will develop and apply skills in preparation of sauces, ranging from the classical leading sauces to contemporary sauces and coulis.
Lecture Hours: 2  Laboratory Hours: 3

CA 157  GARDE MANGER  3 HRS. (OC)
Prerequisite: CA 150, CA 153 and CA 155, all with a grade of “C” or better. This course is a basic overview of the history of Garde Manger. Students will develop and apply knowledge and skills in the preparation of cold sauces and soups, salads, sandwiches and the wholesale and sanitary preparation of sausage, terrines, cured and smoked meats and cheese.
Lecture Hours: 2  Laboratory Hours: 3

CA 175  TOPICS IN CULINARY ARTS  3 HRS. (OC)
Prerequisite: Department approval. This course delves into specific topics of culinary interest. It perpetuates a deeper understanding of techniques and principles involved in specialized areas of Culinary Arts such as chocolates, cuisine of the Mediterranean, sausage making, or petit four and French pastries.
Lecture Hours: 2  Laboratory Hours: 3

CA 211  FOODSERVICE MARKETING  3 HRS. (OC)
This course is a study of the principles of food service marketing and its core concepts. This course prepares the student to identify the relationships between customer’s value, satisfaction and quality.
Lecture Hours: 3  Laboratory Hours: 0

CA 212  FOODSERVICE COST CONTROL  4 HRS. (TC)
Prerequisite: BUS 120 with a grade of “C” or better. This course is the study of the fundamental principles of understanding and managing the costs associated with operating a foodservice business. This course will supply the tools required to maintain sales and cost histories and to develop systems for monitoring current and future activities.
Lecture Hours: 4  Laboratory Hours: 0

CA 213  BEVERAGE MANAGEMENT  3 HRS. (OC)
This course is a study of the fundamental principles of creating a bar business. This course will supply the tools required to identify wines, spirits and beers and how to provide service of these beverages.
Lecture Hours: 3  Laboratory Hours: 0

CA 214  FRONT OF THE HOUSE  2 HRS. (OC)
This course focuses on the nine basic principles of service. Emphasis is on a style of professionalism that enhances the entire industry and emphasis is given to generous and cordial reception of guests.
Lecture Hours: 1  Laboratory Hours: 2

CA 215  FOODSERVICE NUTRITION AND MENU PLANNING  3 HRS. (TC)
This course is the study of the basic principles of nutrition and the nutrient content of foods. Emphasis is placed on menu planning, recipe development and effective ways to communicate and market nutrition.
Lecture Hours: 3  Laboratory Hours: 0

CA 217  INTRODUCTION TO CATERING  3 HRS. (OC)
This course is a study of catering, banquets and other specialty service in the foodservice industry. The course will emphasize the planning, organizing and controlling in the catering business.
Lecture Hours: 3  Laboratory Hours: 0

CA 220  ADVANCED PROFESSIONAL COOKING  3 HRS. (OC)
Prerequisite: CA 151, CA 157, CA 215, and CA 253 all with a grade of “C” or better. This course is designed for students who have proficiency in all basic skills and knowledge of culinary arts. It emphasizes intermediate methods and techniques of culinary arts, with a concentration on regional American cuisine and international cuisine. It examines various cultures and their traditional food habits to develop a better understanding of the many cultures in America and how these cultures and cuisines have influenced American cuisine and the foodservice industry today.
Lecture Hours: 2  Laboratory Hours: 3

CA 225  INTERNSHIP IN CULINARY ARTS  3 HRS. (OC)
Prerequisite: Department approval. This course applies principles of culinary arts management during the supervised experience in a variety of foodservice institutions.
Lecture Hours: 0  Laboratory Hours: 20

CA 253  ADVANCED BAKING  3 HRS. (OC)
Prerequisite: CA 153 with a grade of “C” or better. This course is a study of the advanced principles of baking, leavening agents, and yeast dough production. The production of lean and rich yeast breads, Danish pastries, puff pastries, cakes, tarts, specialty cakes, gateaux, and torten.
Lecture Hours: 2  Laboratory Hours: 3
Dance

DANCE 110  BEGINNING TECHNIQUES OF CLASSICAL BALLET  2 HRS. (TC)
This course is an introduction to the fundamentals of the art of ballet for students who have little or no previous experience. It covers basic barre exercises, center floor exercise, dance combinations and ballet terminology, with emphasis on body placement.
Lecture Hours: 1  Laboratory Hours: 2

DANCE 115  APPRECIATION OF DANCE (F1 906)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a study of dance forms from primitive times to the present. It compares ancient and modern dance forms and examines the contributions of individual dancers, dance companies, and choreographers to cultural heritage.
Lecture Hours: 3  Laboratory Hours: 0

DANCE 120  INTERMEDIATE TECHNIQUES OF CLASSICAL BALLET
Prerequisite: DANCE 110 with a grade of "C" or better. This course is a continuation of beginning ballet techniques with concentration placed on center floor work, development of movement patterns and allegro combinations.
Lecture Hours: 1  Laboratory Hours: 2

DANCE 130  JAZZ DANCE I
This course is an introduction to the fundamental technique of jazz dance for students who have had little or no previous training. It covers warmups, barre and center technique, simple turns, leaps, and combinations emphasizing the use of the body's center.
Lecture Hours: 1  Laboratory Hours: 1

DANCE 131  JAZZ DANCE II
Prerequisite: DANCE 130 with a grade of "C" or better or department approval. This course is a progressive development of fundamental jazz dance technique with concentration placed on center floor work, experiencing different styles of jazz, and culminating in a performance. One lecture and three laboratory hours per week.
Lecture Hours: 1  Laboratory Hours: 3

DANCE 140  MODERN DANCE I
This course gives instruction in dance as an activity based on the creative use of movement. Dance warmups, techniques of dance, dance patterns, analysis of rhythm, and simple dance compositions are emphasized.
Lecture Hours: 1  Laboratory Hours: 1

DANCE 141  MODERN DANCE II
Prerequisite: DANCE 140 with a grade of "C" or better or department approval. This course is a continuation of Modern Dance I with a concentration on the differing modern dance forms, improvisation, and more complicated choreography culminating in a performance.
Lecture Hours: 1  Laboratory Hours: 3

DANCE 150  TAP DANCE I
This course is an introduction to the fundamental technique of tap dance for students who have had little or no previous training. It covers basic tap technique using different tempos and rhythms.
Lecture Hours: 1  Laboratory Hours: 1

DANCE 151  TAP DANCE II
Prerequisite: DANCE 150 with a grade of "C" or better or department approval. This course is a progressive development of fundamental tap dance technique with concentration on time steps, close foot work, and the different styles of tap dance culminating in a performance.
Lecture Hours: 1  Laboratory Hours: 3

DANCE 160  MUSICAL THEATRE DANCE
This course is a study of dance in musical theater which will include dance vocabulary, technique, learned choreography and a general overview of theater dance history. The class is designed to give the student an awareness of the required skills and personality that is required by musical theater performers with regards to dance.
Lecture Hours: 0  Laboratory Hours: 2

DANCE 210  ADVANCED TECHNIQUES OF CLASSICAL BALLET  2 HRS. (TC)
Prerequisite: DANCE 120 with a grade of "C" or better or audition. The student will learn advanced skills and techniques with emphasis on pure classical dance and performing experience. One lecture and three laboratory hours per week.
Lecture Hours: 1  Laboratory Hours: 3

DANCE 211  ADVANCED TECHNIQUES OF CLASSICAL BALLET II  2 HRS. (TC)
Prerequisite: DANCE 210 with a grade of "C" or better. This class is the second semester of Advanced Techniques of Classical Ballet. The student will continue to work on learning advanced skills and techniques with emphasis on pure classical dance and performing experience. One lecture and three laboratory hours per week and other rehearsals as scheduled.
Lecture Hours: 1  Laboratory Hours: 3

Deconstruction

DECON 101  INTRODUCTION TO DECONSTRUCTION  1 HR. (OC)
This course will introduce the basic practice of building deconstruction and building materials (architectural and structural) salvage including key resources and considerations.
Lecture Hours: 1  Laboratory Hours: 0

DECON 102  DECONSTRUCTION METHODS AND MATERIALS  2 HRS. (OC)
Prerequisite: DECON 101 with a grade of "C" or better or concurrent enrollment or department approval. This course will introduce the key components of site assessment, project planning and market considerations of building deconstruction and building material salvage.
Lecture Hours: 1  Laboratory Hours: 2

DECON 103  PRINCIPLES OF DECONSTRUCTION ASSESSMENT  2 HRS. (OC)
Prerequisite: DECON 101 and DECON 102 with a "C" or better or concurrent enrollment in DECON 103 or department approval. This course will provide hands-on deconstruction experience in the laboratory and/or in the field.
Lecture Hours: 0  Laboratory Hours: 6

Dental Hygiene

DHYGN 110  DENTAL SCIENCE I  3 HRS. (OC)
Prerequisite: Acceptance into the Dental Hygiene Program, BIOL 140 and CHEM 115, both with a grade of "C" or better or department approval. This course is a study of the anatomy of the head and neck with emphasis upon the maxilla and mandible. In addition, a study of the anatomy of the primary and permanent teeth and their supportive structure is undertaken.
Lecture Hours: 2  Laboratory Hours: 1

DHYGN 111  DENTAL SCIENCE II  3 HRS. (OC)
Prerequisite: DHYGN 110, 113, 115, 117 and BIOL 210, all with a grade of "C" or better. This course is a basic introduction to embryology and histology followed by an in-depth study of oral and facial development and dental histology.
Lecture Hours: 3  Laboratory Hours: 0

DHYGN 113  FUNDAMENTALS OF DENTAL HYGIENE AND INFECTION CONTROL
Prerequisite: Acceptance into the Dental Hygiene Program, BIOL 140 and CHEM 115, both with a grade of "C" or better or department approval. This course will introduce students to the prevention of disease transmission in dentistry, dental equipment and maintenance, operator and patient positioning, diagnostic dental instruments, and dental charting. Student partners are used in the laboratory sessions.
Lecture Hours: 1  Laboratory Hours: 1

DHYGN 115  INTRODUCTION TO DENTAL HYGIENE  1 HR. (OC)
Prerequisite: Acceptance into the Dental Hygiene Program, BIOL 140 and CHEM 115, both with a grade of "C" or better or departmental approval. This course is an overview of selected specialty areas in dentistry. Material relevant to informing patients of treatment options will be emphasized. The use of student partners will be utilized to demonstrate the usage of selected materials.
Lecture Hours: 1  Laboratory Hours: 0

DHYGN 117  DENTAL SPECIALTIES  1 HR. (OC)
Prerequisite: Acceptance into the Dental Hygiene Program, BIOL 140 and CHEM 115, both with a grade of "C" or better and departmental approval. This course is an overview of selected specialty areas in dentistry. Material relevant to informing patients of treatment options will be emphasized. The use of student partners will be utilized to demonstrate the usage of selected materials.
Lecture Hours: 1  Laboratory Hours: 0

DHYGN 131  INTRODUCTION TO DENTAL HYGIENE  2 HRS. (OC)
Prerequisite: DHYGN 110, 113, 115, 117, BIOL 210, and FCS 110 (or concurrently), all with a grade of "C" or better. This course will introduce students to the study of dental deposits and their etiology in dental diseases, personal control of dental disease, periodontal charting, and the discussion of ancillary procedures, such as power-driven scalers and polishers, generalized patient assessment, appointment sequencing, and post-operative instruction.
Lecture Hours: 2  Laboratory Hours: 0

DHYGN 133  PRECLINICAL DENTAL HYGIENE  2 HRS. (OC)
Prerequisite: DHYGN 110, 113, 115, and 117, all with a grade of "C" or better. This course is a continuation of instrumentation skills necessary for oral prophylaxis, aseptic procedures, and dental equipment care and maintenance. Student partners, mannequins, and selected patients are used in the laboratory to demonstrate instrumentation techniques.
Lecture Hours: 0  Laboratory Hours: 6
DHYGN 135 DENTAL RADIOLOGY  3 HRS. (OC)  
Prerequisite: DHYGN 110, 113, 115, and 117, all with a grade of “C” or better. This course is a comprehensive study of dental radiation physics, radiation hygiene practices, factors affecting radiographic quality, theory and practice of introral and panoramic radiographic techniques, interpretation of normal landmarks, abnormal conditions, and patient education. Laboratory practice on a teaching mannequin is followed by experience with selected patients. Lecture Hours: 2 Laboratory Hours: 3

DHYGN 137 MEDICAL EMERGENCIES  1 HR. (OC)  
Prerequisite: DHYGN 110, 113, 115, and 117, all with a grade of “C” or better. This course is a study of recognition, evaluation, treatment, and prevention of medical emergency situations that may occur in dental office settings. Lecture Hours: 1 Laboratory Hours: 0

DHYGN 139 SPECIAL POPULATIONS  1 HR. (OC)  
Prerequisite: DHYGN 110, 113, 115, and 117, all with a grade of “C” or better. Discussion in this course will focus on the signs and symptoms, as well as in office and home care modifications that are associated with special needs patients, gerodontic, and pediatric patients. Lecture Hours: 1 Laboratory Hours: 0

DHYGN 210 COMMUNITY DENTAL HEALTH  3 HRS. (OC)  
Prerequisite: DHYGN 212, 220, 222, 230, and 243, all with a grade of “C” or better. This course is a study of the dental hygienist’s role in the promotion of oral health and prevention of oral disease in the community. The student will participate in community programs related to preventative dentistry. Lecture Hours: 3 Laboratory Hours: 0

DHYGN 212 DENTAL MATERIALS  2 HRS. (OC)  
Prerequisite: DHYGN 111, 131, 133, 135, 137, and 139, all with a grade of “C” or better. This course is an introduction to the various dental materials utilized by general dentists. Manipulation of the various dental materials is done in the laboratory. The use of student partners will be utilized to demonstrate the usage of selected materials. Lecture Hours: 1 Laboratory Hours: 2

DHYGN 220 NITROUS OXIDE ANALGESIA  0.5 HRS. (OC)  
Prerequisite: DHYGN 110, 111, 131, 133, 135, 137, and 139, all with a grade of “C” or better. This course is an introduction to anxiety and pain control using nitrous oxide/oxygen (N2O2) sedation in dental hygiene treatments. The use of student partners will be utilized to demonstrate the usage of selected materials. Lecture Hours: 0.5 Laboratory Hours: 0.5 or equivalent

DHYGN 222 PREVENTIVE MODALITIES  3 HRS. (OC)  
Prerequisite: DHYGN 111, 131, 133, 135, 137, 139, and FCS 110, all with a grade of “C” or better. This course will provide students with the knowledge and skills dental hygienists need to utilize selective preventive materials, and to understand and implement nutritional assessment as it relates to oral health. Student partners are used in the laboratory sessions. Lecture Hours: 2 Laboratory Hours: 2

DHYGN 226 LOCAL ANESTHETICS FOR THE DENTAL HYGIENIST  1 HR. (OC)  
Prerequisite: DHYGN 110, 212, 220, 222, 230, and 243, all with a grade of “C” or better. This course is an introduction to anxiety and pain control measures used in dental hygiene treatments and administration techniques for topical and injected anesthetics. The use of student partners will be utilized to demonstrate the usage of selected materials. Lecture Hours: 1 Laboratory Hours: 0.5

DHYGN 228 NEW DIMENSIONS IN DENTAL HYGIENE  2 HRS. (OC)  
Prerequisite: DHYGN 212, 220, 222, 230, and 243, all with a grade of “C” or better. This course is a study of the emerging trends in dental hygiene. The students will acquire knowledge and perform skills associated with new technology in the field of dentistry and dental hygiene. The use of student partners will be utilized to demonstrate the usage of selected materials. Lecture Hours: 1 Laboratory Hours: 2

DHYGN 230 DENTAL HYGIENE CLINIC I  2 HRS. (OC)  
Prerequisite: DHYGN 111, 131, 133, 135, 137, and 139, all with a grade of “C” or better. This course is a continued study of clinical dental hygiene, including: scaling, polishing, radiographic surveys, desensitization, oral inspection, charting, health histories, health education, and appointment planning. Planned and supervised clinical experiences are arranged in the dental hygiene clinic. Lecture Hours: 0 Laboratory Hours: 6

DHYGN 231 DENTAL HYGIENE CLINIC II  5 HRS. (OC)  
Prerequisite: DHYGN 212, 220, 222, 230, and 243, all with a grade of “C” or better. This course is a continuation of DHYGN 230 with emphasis on root planning, topical medical application, preparation of study casts, periodontal charting and the use of ultrasonic scalers. Planned and supervised clinical experiences are arranged in the dental hygiene clinic and outside agencies. Lecture Hours: 0 Laboratory Hours: 15

DHYGN 232 DENTAL HYGIENE CLINIC III  4 HRS. (OC)  
Prerequisite: DHYGN 210, 226, 228, 231, 244, and 245, all with a grade of “C” or better. This course is a continuation of DHYGN 231 with emphasis on increasing clinical competency and efficiency in those procedures the dental hygienist routinely performs in clinical practice. Students complete a case patient presentation which incorporates treatment planning, dietary analysis, counseling, caries susceptibility testing, and oral hygiene indices in addition to the oral prophylaxis. Planned and supervised clinical experiences are arranged in the dental hygiene clinic and outside agencies. Lecture Hours: 0 Laboratory Hours: 12

DHYGN 243 ORAL PATHOLOGY I  1 HR. (OC)  
Prerequisite: DHYGN 111, 131, 133, 135, 137, and 139, all with a grade of “C” or better. This course covers the clinical and microscopic features of numerous types of oral diseases as well as their diagnosis and treatment. Lecture Hours: 1 Laboratory Hours: 0

DHYGN 244 PERIODONTOLOGY  2 HRS. (OC)  
Prerequisite: DHYGN 212, 220, 222, 230, 243 and BIOL 210, all with a grade of “C” or better. This course is a study of the disease processes affecting the supporting structures of the teeth. Emphasis is placed on the classification and etiology of periodontal disease. Discussions, correlated to clinical aspects of dental hygiene, stressing preventive periodontics, are held. Lecture Hours: 2 Laboratory Hours: 0

DHYGN 245 ORAL PATHOLOGY II  2 HRS. (OC)  
Prerequisite: DHYGN 212, 220, 222, 230, and 243, all with a grade of “C” or better. This course is a continuation of Oral Pathology I, covering additional categories of diseases affecting the oral cavity, including their diagnosis and treatment. Lecture Hours: 2 Laboratory Hours: 0

DHYGN 246 TRANSITIONS FOR THE DENTAL HYGIENIST  3 HRS. (OC)  
Prerequisite: DHYGN 210, 226, 228, 231, 244, and 245, all with a grade of “C” or better. This course examines the various issues that are faced by dental hygienists when making the transition from school to the workplace. This course will prepare the student by examining the legal and ethical issues facing dental professionals today. This course will focus on the various aspects of obtaining a license and seeking employment. Lecture Hours: 3 Laboratory Hours: 0

DHYGN 247 OFFICE PRACTICES IN DENTISTRY  1.5 HRS. (OC)  
Prerequisite: DHYGN 212, 226, 228, 231, 244, and 245, all with a grade of “C” or better. This course is a study of the current office practices utilized in dentistry. The student will learn and apply a basic knowledge of office practices to aid in making the student more productive and employable. Lecture Hours: 1 Laboratory Hours: 1

DHYGN 248 PHARMACOLOGY I FOR DENTAL HYGIENISTS  1 HR. (OC)  
Prerequisite: DHYGN 212, DHYGN 220, DHYGN 222, DHYGN 230 and DHYGN 243, all with a grade of “C” or better. This is a course of study of the pharmaceutical agents commonly used by patients whose systemic or oral conditions require special procedures in the dental office. Content includes pharmaceutical and therapeutic agents used as adjuncts in dental or dental hygiene procedures. Drug interactions and risk factors are discussed. Pharmacology I will concentrate on general principles of pharmacology and drugs used in the provision of oral health care. Lecture Hours: 1 Laboratory Hours: 0

DHYGN 249 PHARMACOLOGY II FOR DENTAL HYGIENISTS  1 HR. (OC)  
Prerequisite: DHYGN 210, DHYGN 226, DHYGN 228, DHYGN 231, DHYGN 244, DHYGN 245, and DHYGN 248 all with a grade of “C” or better. This is a course of study of the pharmaceutical agents commonly used by patients whose systemic or oral conditions require special procedures in the dental office. Content includes pharmaceutical and therapeutic agents used as adjuncts in dental or dental hygiene procedures. Pharmacology II for Dental Hygienists will concentrate on drugs used in the provision of oral health care, drugs used to control systemic disorders, and drugs used by special populations. Lecture Hours: 1 Laboratory Hours: 0

DHYGN 255 INDEPENDENT STUDY  1 HR. (OC)  
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit. Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

<tbody>
<tr>
<td>EDUC 111</td>
<td>INTRODUCTION TO AMERICAN EDUCATION</td>
<td>3 HRS. (TC)</td>
<td>Approved reading placement score, or equivalent. An introduction to the field of American education, this course covers education history, philosophy, funding, legal aspects, and current issues of American education. Washington. Students will be given a general overview of how American schools came to be and how they function today. They will be introduced to the Illinois Professional Teaching Standards. Students will participate in a minimum of 15 documented clinical experiences involving observation of child learners and practitioners at work, according to specified guidelines. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>EDUC 211</td>
<td>INTRODUCTION TO THE EXCEPTIONAL INDIVIDUAL</td>
<td>3 HRS. (TC)</td>
<td>Approved reading placement score, or equivalent. This course is an overview and orientation to the field of special education. The student studies the characteristics and educational provisions for exceptional individuals: children and adolescents with visual or hearing impairments; communication disorders; health impairments; learning disabilities; mental retardation; behavior disorders; gifted and talented abilities; pervasive developmental disorders; multiple and severe disorders, and at-risk behaviors. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>EDUC 212</td>
<td>FIELD EXPERIENCE IN EDUCATION</td>
<td>2 HRS. (TC)</td>
<td>EDUC 111 with a grade of &quot;C&quot; or better. This course is designed to provide the student with practical experience in the public/private schools and/or other educational agencies under the supervision of competent professional educators. The course is aligned with the Illinois Professional Teaching Standards and emphasizes the communication, responsibility, and collaboration dispositions needed for teaching. Usually taught in one-half school day per week in the field and two, two-hour classes per month. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
</tbody>
</table>

<td>DACT 110</td>
<td>FOUNDATIONS I</td>
<td>3 HRS. (OC)</td>
<td>Department approval. This course introduces the student to the major issues of geologic time and the processes that shape our planet such as earthquakes, volcanic activity, weathering, rivers, glaciers, and more. Local and regional field trips are required. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 111</td>
<td>ADDICITION COUNSELING I</td>
<td>3 HRS. (OC)</td>
<td>Department approval. This course introduces the student to the clinical issues and strategies related to initial contacts with a client, preparation of the client for a successful treatment experience, and the issues and concerns of the first phase of drug and alcohol treatment. Specific topics considered in this course include client screening, intake procedures, orientation procedures, assessment, treatment planning, and modes of treatment. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 112</td>
<td>FOUNDATIONS II</td>
<td>3 HRS. (OC)</td>
<td>DACT 110 with a grade of &quot;C&quot; or better and department approval. This course teaches students about psychoactive pharmacology, the signs and symptoms of drug and alcohol addiction, and the major theoretical systems for understanding the effects of drugs on human behavior. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 113</td>
<td>ADDICITION COUNSELING II</td>
<td>3 HRS. (OC)</td>
<td>DACT 111 with a grade of &quot;C&quot; or better and department approval. This course teaches the student about the core areas of drug and alcohol counselor training. Those skills include case management, crisis intervention, client education, referral, recordkeeping, and consultation and professional networking. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 141</td>
<td>SPECIAL TOPICS IN ADDICTIONS STUDIES</td>
<td>1 HR. (OC)</td>
<td>Department approval. This course explores major issues facing correctional employees in the field of addictionology. Repeatable up to three times for credit if the topic is different. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 142</td>
<td>CONTEMPORARY ISSUES: DRUGS &amp; ALCOHOL</td>
<td>2 HRS. (OC)</td>
<td>Department Approval. This course will examine basic policy problems related to alcohol and drugs, including legislation, professionalism, education, training, literature and research, procedures, administration, and social problems. Lecture Hours: 2 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 210</td>
<td>ADDICITION COUNSELING III</td>
<td>3 HRS. (OC)</td>
<td>DACT 113 with a grade of &quot;C&quot; or better and department approval. This course focuses on professional ethics, special populations, and clinical supervision in drug and alcohol treatment. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 211</td>
<td>COUNSELING AND HUMAN CHANGE</td>
<td>3 HRS. (OC)</td>
<td>DACT 113 with a grade of &quot;C&quot; or better and department approval. This course introduces the student to basic models of counseling in drug and alcohol treatment. Topics of discussion will include the disease model of addiction, the acquired hedonic cost habituation syndrome model, behavioral approaches, cognitive approaches and eclectic combinations based on client need. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>DACT 212</td>
<td>INTERNSHIP SEMINAR</td>
<td>9 HRS. (OC)</td>
<td>Department approval. This course demonstrates the ability to use the theories and skills acquired in the Drug and Alcohol Counselor Training (DACT) program in an agency setting and the preparation necessary to successfully complete the Illinois Alcohol and Other Drug Abuse Professional Certification Association (IAODAPCA) certification exam. Lecture Hours: 3 Laboratory Hours: 25 or equivalent</td>
</tr>
</tbody>
</table>
EDUC 213 DIVERSE LEARNERS IN THE CLASSROOM 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a study of learners who are at risk of failure, who exhibit exceptional ability or disability, and those who may be English Language Learners. It is also the study of strategies educators use to meet their needs. It prepares the future teacher by providing knowledge of assistive technology, early intervention, differentiation, and universal design for learning needed to modify instruction and curricula for diverse learners included in the traditional classroom.
Lecture Hours: 3 Laboratory Hours: 0

Electronics Servicing

ELCTS 131 INTRODUCTION TO BASIC ELECTRICITY 2 HRS. (OC)
Prerequisite: Appropriate math placement score or departmental approval. This course is designed to give the student the basic computational and laboratory skills needed for further study in electronics. The student will develop the necessary skills while learning the fundamental principles and terminology of the fields of electricity and electronics.
Lecture Hours: 1 Laboratory Hours: 3

ELCTS 132 SERVICE ELECTRONICS - D.C. CIRCUITS 2 HRS. (OC)
Prerequisite: Appropriate math placement score or departmental approval. This study lays the foundation for all of the electronics with the study of Ohm’s Law and its application to D.C. circuits. Major topics include: Ohm’s Law, series circuits, parallel circuits, combination circuits, Kirchhoff’s Laws, and power relationships. Major emphasis is placed on hands-on laboratory experimentation.
Lecture Hours: 1 Laboratory Hours: 3

ELCTS 133 SERVICE ELECTRONICS - A.C. CIRCUITS 2 HRS. (OC)
Prerequisite: ELCTS 132 with a grade of ‘C’ or better or departmental approval. This course builds on the foundation established in D.C. circuits, and includes the analysis and application of A.C. circuits. Topics include alternating current and voltage, capacitance, inductance, series, parallel and complex circuits as well as phasor concepts applied to A.C. circuits. Three phase industrial power is also introduced in this principles course.
Lecture Hours: 1 Laboratory Hours: 3

ELCTS 134 SERVICE ELECTRONICS - BASIC SOLID STATE 2 HRS. (OC)
Prerequisite: ELCTS 133 with a grade of “C” or better or departmental approval. This course introduces the student to basic solid state devices and circuits, including common applications of diodes and transistors. Laboratory activities will further develop the student’s ability to analyze circuit performance by using modern test equipment.
Lecture Hours: 1 Laboratory Hours: 3

ELCTS 135 SERVICE ELECTRONICS - ADVANCED SOLID STATE 2 HRS. (OC)
Prerequisite: ELCTS 134 with a grade of “C” or better or departmental approval. This course is a continuation of ELCTS 134. It uses the principles of that course and applies them to power supplies (including filtering), power amplifiers, linear integrated circuits (operational amplifiers and hybrid Integrated Circuits) and an introduction to solid state control used for motors, relays and the silicon controlled rectifier.
Lecture Hours: 1 Laboratory Hours: 3

ELCTS 136 SERVICE ELECTRONICS - DIGITAL CIRCUITS 2 HRS. (OC)
Prerequisite: ELCTS 133 with a grade of “C” or better or departmental approval. This course is designed to teach the student the fundamentals of digital circuits. A wide range of digital circuits and systems will be presented and the student will learn to analyze and troubleshoot them.
Lecture Hours: 1 Laboratory Hours: 3

Electronics Technology

ELCTK 111 RESIDENTIAL AND COMMERCIAL WIRING 2 HRS. (OC)
This course is intended to acquaint the student with the fundamentals of residential and commercial wiring. Selected topics will be covered including: mapping an electrical system, wires and conduit, switching, switches, substituting new plugs and receptacles for old ones, installing new wiring (both indoors and outdoors), and how to check the work. Students will repair and install basic electrical devices under the instructor’s supervision.
Lecture Hours: 1 Laboratory Hours: 2 or equivalent

ELCTK 112 ELECTRONIC CAD APPLICATIONS I 2 HRS. (OC)
Prerequisite: ELCTS 136 with a grade of ‘C’ or better or departmental approval. This course teaches the student to use a variety of computer programs to analyze the operation of both digital and analog electronic circuits. The students will predict the performance of various circuits using analysis programs similar to those used in industry and will build and test the circuits to measure the actual performance. Both special purpose and general purpose analysis programs will be used.
Lecture Hours: 1 Laboratory Hours: 3

ELCTK 145 FUNDAMENTAL DIGITAL ELECTRONICS 4 HRS. (OC)
Prerequisite: Credit or concurrent enrollment in MAT 106 or higher. This course deals with the fundamental building blocks of digital electronics and virtually the entire course revolves around integrated circuit micro-electronics. Topics included range from AND, OR, NAND and NOR GATES, on the outside to RAMS, registers, and arithmetic logic units at the end.
Lecture Hours: 3 Laboratory Hours: 3

ELCTK 150 INDUSTRIAL ELECTRICITY 4 HRS. (OC)
Prerequisite: ELCTS 133 with a grade of “C” or better or departmental approval. This course introduces the student to basic motors and motor control theory. Topics include National Electrical Code, test equipment, print reading, over current protection, and motor and generators.
Lecture Hours: 3 Laboratory Hours: 3

ELCTK 151 ELECTRICAL SYSTEMS TROUBLESHOOTING 3 HRS. (OC)
Prerequisite: ELCTK 150 with a grade of “C” or better or departmental approval. This course introduces the student to the methods and equipment used to maintain, troubleshoot and repair industrial electrical systems. Topics include the effective use of test equipment, various approaches to troubleshooting electrical systems, a review of electrical motor theory, and preventive maintenance of electrical systems.
Lecture Hours: 1 Laboratory Hours: 6

ELCTK 202 INDUSTRIAL ELECTRONICS 3 HRS. (OC)
Prerequisite: Departmental Approval. This course familiarizes the student with rotating machinery found in present day industry and the necessary electronic equipment to maintain control over it. The students will also analyze process control circuits to the extent necessary to repair them.
Lecture Hours: 2 Laboratory Hours: 3

ELCTK 215 PROGRAMMABLE CONTROLLERS 4 HRS. (OC)
Prerequisite: ELCTK 150 with a grade of “C” or better or departmental approval. This course is designed to give the student basic knowledge of Programmable Logic Controller (PLC) concepts and applications. Major emphasis is applied to Input/Output (I/O) addressing, software instructions, and troubleshooting a PLC managed system.
Lecture Hours: 3 Laboratory Hours: 3

ELCTK 220 TRANSDUCERS AND ELECTRONIC INSTRUMENTS 4 HRS. (OC)
Prerequisite: ELCTS 135 with a grade of “C” or better or concurrent enrollment in ELCTS 135 or departmental approval. This course will provide the student the opportunity to become proficient in the selection and use of transducers and instrumentation. The student is required to solve associated instrumentation problems similar to those found in industry. Equipment used includes electronic counters, digital voltmeters, function generators, oscilloscopes, and computer based data acquisition. A special emphasis will be placed on practical, hands-on experience in the laboratory.
Lecture Hours: 3 Laboratory Hours: 3

ELCTK 230 ADVANCED SOLID STATE ELECTRONICS 3 HRS. (OC)
Prerequisite: ELCTK 220 and ELCTK 245 both with a grade of “C” or better or departmental approval. This course includes solid state circuit applications to process control systems. The emphasis is on a quantitative approach to system design, analysis, and troubleshooting. The course includes both analog and digital process control systems and circuits.
Lecture Hours: 2 Laboratory Hours: 3

ELCTK 231 INDUSTRIAL ELECTRONICS 4 HRS. (OC)
Prerequisite: ELCTK 159 or ELCTK 150, and ELCTK 245, all with a grade of “C” or better or departmental approval. This course introduces the student to the application of modern solid state electronics to industrial systems. Topics include A.C., D.C., servo drives and controllers of various types and their use in machine control and numerical control systems.
Lecture Hours: 3 Laboratory Hours: 3

ELCTK 232 ELECTRONICS SYSTEMS TROUBLESHOOTING 3 HRS. (OC)
Prerequisite: ELCTK 215 with a grade of “C” or better or departmental approval. This course introduces the student to the methods and equipment used to maintain, troubleshoot, and repair industrial electronic systems. Topics include the effective use of test equipment, various approaches to troubleshooting electronic systems, and the proper adjustment and calibration of such systems. Emphasis is on solid state drive, control, and instrumentation systems. Safe work habits are emphasized throughout the course.
Lecture Hours: 1 Laboratory Hours: 6

ELCTK 241 SPECIAL TOPICS 0.5 HRS. (OC)
Prerequisite: Departmental approval. This special topics course will vary to allow an examination of various topics of interest in the electrical/electronics area. Each section offered will present a unique topic of value to students in Industrial Electrical Technology. This course may be repeated three times if the topic and content are different. Lecture hours per week will vary depending upon the credit given and course content in each section offered.
Lecture Hours: .5 - 3 Laboratory Hours: 0
Emergency Medical Technician

EMS 106  EMERGENCY MEDICAL TECHNICIAN (EMT)  1 HR. (OC)
Prerequisite: EMS 114 with a grade of "C" or better, or equivalent; department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. Throughout the semester the student is required to provide progress updates which are submitted to the faculty advisor and remain on file within the department, together with a final written report submitted to the faculty member by the student. The course is intended to provide a working knowledge of project management techniques similar to those employed in the working environment.
Lecture Hours: 1  Laboratory Hours: 4

EMS 114  EMERGENCY MEDICAL TECHNICIAN (EMT)  8 HRS. (OC)
Prerequisite: High school graduate or equivalent; and Accuplacer Reading score 44 or greater; or equivalent reading placement score; or department approval. This course is designed to prepare students to care for the victims of medical and traumatic emergencies, with an emphasis on the assessment of victims of illness and injury; and application of proper emergency care procedures. Upon successful completion of EMS 114, students may apply to take the Illinois Department of Public Health or National Registry of Emergency Medical Technicians EMT licensure exam.
Lecture Hours: 7  Laboratory Hours: 3 or equivalent

EMS 116  TRAUMA LIFE SUPPORT  1 HR. (OC)
Prerequisite: Current Illinois or National Registry of Emergency Medical Technicians EMT, EMT-I, AEMT, or Paramedic licensure/certification or equivalent; department approval. This course is designed to enhance and build on the student’s existing knowledge and training in the treatment of a trauma victim. Emphasis will be placed on patient assessment and management. Course topics include rapid assessment, resuscitation, stabilization and transportation of trauma victims. Students successfully completing the course will earn certification in trauma life support by an accredited certifying agency.
Lecture Hours: 1  Laboratory Hours: 0.5 or equivalent

EMS 117  ADVANCED CARDIAC LIFE SUPPORT (ACLS)  1 HR. (OC)
Prerequisite: Current American Heart Association - Healthcare Provider CPR certification; physician, nursing, EMT, paramedic, respiratory therapy, or other appropriate allied/clinical health personnel; department approval. This course is designed to provide specialized instruction in the management of cardiovascular related emergencies and at least emergency and critical care personnel such as physicians, nurses, emergency medical technicians, paramedics, respiratory therapists, and other appropriate healthcare professionals to provide treatment for a cardiovascular emergency. Upon successful completion of the course, the student will be issued an American Heart Association ACLS provider card.
Lecture Hours: 1  Laboratory Hours: 5 or equivalent

EMS 120  EMT PRACTICUM  1 HR. (OC)
Prerequisite: EMS 114 with a grade of "C" or better or equivalent; current Illinois EMT licensure or National Registry of Emergency Medical Technicians EMT certification; Accuplacer score of at least "44"; department approval. This course provides a planned and supervised clinical experience with local transport and non-tranport emergency medical services agencies. During this course, students will be provided the opportunity to participate as a member of the healthcare delivery team in order to enhance the knowledge and skills learned in the Emergency Medical Technician (EMT) course.
Lecture Hours: 0  Laboratory Hours: 5 - 15 or equivalent

EMS 230  PARAMEDIC I  7 HRS. (OC)
Prerequisite: BIOL 111 and EMS 114 both with a grade of "C" or better or equivalent; completion of, or concurrent enrollment in EMS 120; current Illinois EMT licensure or National Registry of Emergency Medical Technicians EMT certification; COMPASS reading score of at least "72"; department approval. This course is the first of six designed to prepare the student to function as a Paramedic. Instruction in the roles and responsibilities of the Paramedic, ethical and legal aspects of emergency care, as well as in-depth study of anatomy and physiology relevant to emergency care will be provided. Instruction in patient assessment will also be provided. Practical laboratory sessions and selected clinical experiences will provide patient contact opportunities to correlate with the course content.
Lecture Hours: 6  Laboratory Hours: 2 or equivalent

EMS 231  PARAMEDIC II  7 HRS. (OC)
Prerequisite: BIOL 111 and EMS 114 both with a grade of "C" or better or equivalent; completion of, or concurrent enrollment in EMS 120; EMS 230; current Illinois EMT licensure or National Registry of Emergency Medical Technicians EMT certification; COMPASS reading score of at least "72"; department approval. This course is the second of six designed to prepare the student to function as a Paramedic. Detailed instruction in airway management, pharmacology, and medication administration will be provided. Further instruction will focus on the pathophysiology and management of trauma, to include assessment of the trauma patient; management of traumatic injuries, and current trends in trauma management. Practical laboratory sessions and selected clinical experiences provide patient contact opportunities to correlate with the course content.
Lecture Hours: 6  Laboratory Hours: 3 or equivalent
EERE 122 RESIDENTIAL SDHW SITE ASSESSOR 2 HRS. (OC)
Prerequisite: EERE 120 with a grade of "C" or better. In this course, students will learn how to assess a home for its potential for a solar domestic hot water (SDHW) system. Students will learn how to define a site's solar window, interpret solar radiation and temperature data, size a system, identify system components, determine the best location for collectors, and determine structural integrity for an installation.
Lecture Hours: 2  Laboratory Hours: 0

EERE 123 SOLAR WATER HEATING LAB 3 HRS. (OC)
Prerequisite: EERE 120 with a grade of "C" or better. In this course, students will learn the basics of how to properly install two types of solar domestic hot water systems suitable for northern climates. The hands-on course includes both theory and installation practice. Participants will work as a group to install both a drain back and pressurized closed-loop system on a training roof. This course will qualify the student to be on the Focus on Energy Full Service Installer list, provides fourteen Wisconsin Department of Commerce continuing education units, and twenty-one North American Board Certified Energy Practitioners (NABCEP) continuing education credits.
Lecture Hours: 1  Laboratory Hours: 4

EERE 124 SOLAR THERMAL DESIGN 2 HRS. (OC)
Prerequisite: EERE 123 with a grade of "C" or better. In this course, students will learn the principles and application of hot water load analysis, component sizing, heat storage, heat distribution, and system efficiency in the design of solar thermal systems. Students will work to apply these considerations as they design four solar thermal systems based on actual case studies of space heating, domestic hot water, process heating, and pool heating systems.
Lecture Hours: 2  Laboratory Hours: 0

EERE 130 SOLAR THERMAL HEATING SYSTEMS I 4 HRS. (OC)
Prerequisite: REACT 120 and DECON 102 both with a grade of "C" or better. In this course, students will learn the components of the different types of residential solar domestic hot water (SDHW) systems and residential solar thermal space heating systems and assemble the primary components on a solar thermal trainer. Also, students will learn how to assess a home for its potential for a solar domestic hot water (SDHW) system/solar thermal space heating system.
Lecture Hours: 3  Laboratory Hours: 2

EERE 135 SOLAR THERMAL HEATING SYSTEMS II 4 HRS. (OC)
Prerequisite: EERE 130 with a grade of "C" or better. In this course, students will learn the principles and applications of hot water/air load analysis, component sizing, heat storage, heat distribution, and system efficiency in the design of solar thermal systems. Students will work to apply these principles as they design four solar thermal heating systems based on actual case studies of space heating, domestic hot water, process heating, and pool heating systems. Also, students will learn how to properly install two types of solar domestic hot water systems suitable for northern climates and build a solar air collector. Students can build their own dry/wet collector to take home if the student provides the construction materials.
Lecture Hours: 3  Laboratory Hours: 3

Engineering
ENGR 110 INTRODUCTION TO ENGINEERING 1 HR. (TC)
Prerequisite: Credit or concurrent enrollment in MATH 165 or higher. This course provides an introduction to the engineering profession. Informed educational and career choices are facilitated through discussions with guest speakers from industry and transfer universities. Skills are developed in engineering problem solving and the use of the personal computer for word processing, spreadsheet analysis, and equation solving. A team design project is included.
Lecture Hours: 1  Laboratory Hours: 1

ENGR 113 ENGINEERING GRAPHICS/CAD (EGR 941) 3 HRS. (TC)
Prerequisite: Credit or concurrent enrollment in MATH 165 or higher and appropriate score on the engineering placement test or department approval. This is a course in hand-sketching and computer-aided design, modeling, and drawing techniques. Topics include: lettering/text, scaling, multiview first and third angle orthogonal projections, pictorial presentation, descriptive geometry with auxiliary views, sections, dimensioning, tolerancing, fasteners, assemblies and production drawings.
Lecture Hours: 2  Laboratory Hours: 4

ENGR 230 PROGRAMMING ENGINEERING APPLICATIONS 3 HRS. (TC)
Prerequisite: MATH 222 with a grade of "C" or better and introductory computer skills. This course uses a high-level programming language to solve specific mathematical and scientific problems applying various mathematical techniques, including numerical and matrix algebra. Structured design is stressed as an essential part of programming each exercise. The course is intended to provide a tool for the engineering student to be able to design their own programs.
Lecture Hours: 2  Laboratory Hours: 3
ENGR 240 ENGINEERING CIRCUIT ANALYSIS (EGR 931) 4 HRS. (TC)
Prerequisite: A grade of “C” or better in PHY S 212; Credit with a grade of “C” or better or concurrent enrollment in MATH 250. This is the first electrical engineering circuit analysis course which includes the study of the principles of circuit operation as well as the mathematical techniques used to analyze circuit behavior under both transient and steady-state conditions, including loop and nodal equations, network theorems, and matrix methods.
Lecture Hours: 4 Laboratory Hours: 0

ENGR 241 ELECTRICAL ENGINEERING LAB (EGR 931L) 2 HRS. (TC)
Prerequisite: Credit with a “C” or better, or concurrent enrollment in ENGR 240. This is the basic electrical engineering laboratory course which acquaints the student with the methods and equipment used in a variety of experimental investigations. It serves as a foundation for more advanced electrical engineering lab work.
Lecture Hours: 1 Laboratory Hours: 3

ENGR 242 DIGITAL SYSTEMS ENGINEERING (EGR 932) 3 HRS. (TC)
Prerequisite: ENGR 230 with a grade of “C” or better or CMPSC 125 with a grade of “C” or better or department approval. This course introduces the student to the analysis and design of digital circuits and systems. Topics include: analog and digital information representation, combinational and sequential switching circuits and hardware, stored program systems, and an introduction to microprocessors.
Lecture Hours: 3 Laboratory Hours: 0

ENGR 251 STATICS (EGR 942) 3 HRS. (TC)
Prerequisite: PHY S 211 with a “C” or better, and MATH 224 with a “C” or better or concurrent enrollment in MATH 224. This course is a fundamental study of static equilibrium and its applications. Topics include algebraic and vector solutions of equilibrium of 2- and 3-dimensional force systems, analysis of forces acting on members of trusses, frames, machines and beams; distributed forces; forces due to friction and fluids; calculation of centroids and moments of inertia using both integration and the method of composites; the principle of virtual work.
Lecture Hours: 3 Laboratory Hours: 0

ENGR 252 DYNAMICS (EGR 943) 3 HRS. (TC)
Prerequisite: ENGR 251 with a grade of “C” or better and credit or concurrent enrollment in MATH 250. This course is a basic study of dynamics. Topics include displacement, velocity, and acceleration of a particle; relationship between forces acting on rigid bodies and changes in motion produced by them; translation, rotation, and plane motion; solutions using principles of force, mass and acceleration, work and energy, and impulse and momentum. The computer is used as an aid to solve engineering problems.
Lecture Hours: 3 Laboratory Hours: 0

ENGR 253 MECHANICS OF MATERIALS 3 HRS. (TC)
Prerequisite: ENGR 251 with a grade of “C” or better. This course is a study in the relationship between external loads, internal stresses, and deflections of deformable bodies within the context of engineering design principles. Topics include internal force, stress, strain and deflection of beams, shafts and columns; analytical methods for determining strength, stiffness and stability; strength and failure criteria in member design; indeterminate problems; transformations for multi-axial stress and strain states.
Lecture Hours: 3 Laboratory Hours: 0

English

ENGL 085 PREPARATION FOR COLLEGE READING AND WRITING 85S 6 HRS. (BEC)
Prerequisite: Approved reading placement score, or equivalent. ENGL 085 is a reading and writing course which helps students develop basic reading comprehension and writing strategies. Students will read a variety of texts and learn to write short, organized essays. This course is repeatable three times.
Lecture Hours: 6 Laboratory Hours: 0

ENGL 095 PREPARATION FOR COLLEGE READING AND WRITING 95S 6 HRS. (BEC)
Prerequisite: Approved reading placement score, or equivalent. ENGL 095 is a reading and writing course which prepares students for the academic challenges of the college classroom. Students will read critically and write developed essays of various lengths. This course is repeatable three times.
Lecture Hours: 6 Laboratory Hours: 0

ENGL 099 ALP: PREPARATION FOR COLLEGE READING AND WRITING 3 HRS. (BEC)
Prerequisite: Concurrent enrollment in ENGL 110 and approved reading placement score, or equivalent. This course reviews the skills and knowledge needed to be successful in the college classroom while supporting success in ENGL 110. Students will read critically and write developed essays.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 110 COMPOSITION I (C1 900) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, or ENGL 095 or 099 or an equivalent course with a grade of “C” or better. This course progresses the student from writing expressive compositions (expressing the ideas of the writer) to writing referential compositions (explaining or analyzing the subject matter for the reader) to writing persuasive compositions (persuading an audience), through critical reading, discussion, exercises, conferences, and revision. The majority of the writing is referential.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 111 COMPOSITION II (C1 910R) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and ENGL 110 course with a grade of “C” or better. This course progresses the student from writing analysis of and inquiring about issues to writing argumentative and persuasive compositions using research, through critical reading, discussion, exercises, conferences, and revision. The majority of the writing is argumentative.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 113 CREATIVE WRITING: NARRATIVE FICTION 3 HRS. (TC)
Prerequisite: ENGL 111 with a grade of “C” or better or department approval. This course offers students opportunities to understand the structures, elements, and processes of creating fictional narratives; to apply their understanding of the critical terminology of creative writing by producing fully developed works of fiction; and to understand the elements and critical terminology of freelance and commercial writing and publication.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 114 CREATIVE WRITING: DRAMA 3 HRS. (TC)
Prerequisite: ENGL 111 with a grade of “C” or better or department approval. This course offers students opportunities to understand the structures, elements, and processes of creating dramatic scripts; to apply their understanding of the critical terminology of creative writing by producing fully developed dramatic works; and to understand the elements and critical terminology of freelance and commercial script writing, production, and publication.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 115 CREATIVE WRITING: POETRY 3 HRS. (TC)
Prerequisite: ENGL 111 with a grade of “C” or better or department approval. In this course students will understand the structure and elements of poetry and the writing process, produce fully developed works of poetry, and demonstrate an understanding of the critical terminology of the creative writer. A minimum of 200-250 finished lines of original work is recommended. Journals, a midterm, and a final exam may also be required.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 116 AGRICULTURAL COMMUNICATIONS 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, or ENGL 095, ENGL 099, ENGL 105, or ENGL 110, any with a grade of “C” or better, or department approval. This course covers the study of writing reports, forms, memos, letters, job-application letters, and resumes. Group projects and presentations of varying lengths and complexity are also completed. Students will produce a minimum of 2500 words of revised writing.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 117 CREATIVE WRITING: NON-FICTION PROSE 3 HRS. (TC)
Prerequisite: Approved reading placement score or equivalent. In this course students will understand the structure and elements of literary non-fiction and the writing process, produce fully developed works of non-fiction, and demonstrate an understanding of the critical terminology of the creative writer.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 125 BUSINESS COMMUNICATIONS 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, or ENGL 095, ENGL 099, ENGL 105, or ENGL 110, any with a grade of “C” or better, or department approval. This course introduces the student to a series of related activities, such as interviewing skills, job application techniques, business writing skills, effective speaking skills, listening skills, and other business communication tasks. Students will produce a minimum of 2500 words of revised writing.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 130 GRANT WRITING BASICS 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course examines and outlines basic principles of organizing and writing grants. An overview of identifying government, private, and corporate grants is also included.
Lecture Hours: 3 Laboratory Hours: 0

ENGL 140 INTRODUCTION TO WRITING CENTER THEORY AND PRACTICE 3 HRS. (TC)
Prerequisite: ENGL 111 with a grade of “C” or better and department approval. This course investigates, applies, and reflects on the theories and strategies pertinent to writing centers with respect to tutoring and writing processes. Students will acquire skills in assessing and prioritizing clients’ needs in an individual way and, recognizing
the importance of both verbal and nonverbal cues, communicate those needs to the writer. Additionally, they will achieve awareness in learning styles and cultural differences as they impact writing. They will also develop techniques to collaborate effectively, respond constructively, and observe critically. Further, the course will introduce students to stages of process-based writing, including intervention, drafting, revising, and editing. Students will gain insight into an array of rhetorical strategies and develop an awareness of audience. The course integrates students into the Studio culture, not as tutors but as observers and writers mentored by the staff.

Lecture Hours: 3  Laboratory Hours: 0

**ENGL 200**  
**INTRODUCTION TO THE ENGLISH LANGUAGE**  
3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent. This course offers an introductory study of linguistics which includes grammar, semantics, language development, and regional and social varieties of English.

Lecture Hours: 3  Laboratory Hours: 0

**ENGL 210**  
**ADVANCED COMPOSITION**  
3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent, or ENGL 095, ENGL 099, ENGL 105, or ENGL 110, any with a grade of "C" or better, or department approval. This course involves the development of clear, concise, technical style of writing, logical organization of material, and the use of drawings, illustrations, and tables in supporting and clarifying report content. Types and forms of reports and the correct format of business letters are studied. Written projects include reports and letters of varying lengths and degree of complexity. Students will produce a minimum of 2500 words of revised writing.

Lecture Hours: 3  Laboratory Hours: 0

**ENGL 240**  
**ACADEMIC COMPOSITION FOR WRITING CENTER CONSULTANTS**  
3 HRS. (TC)  
Prerequisite: ENGL 140 with a grade of "C" or better and department approval. This course explores progressively more intricate argumentative assignments and calls for increasingly complex written peer critiques. Students will focus on building competency within representative academic genres and gaining comfort in delivering written feedback. Students will hone their analytical and collaborative skills in order to provide substantive responses to clients in the Studio and in the Writing Fellows program. Further, students will refine their composition ability and learn a metalanguage for discussing writing processes and genres.

Lecture Hours: 3  Laboratory Hours: 0

**ENGL 250**  
**WRITING FELLOWS PRACTICUM**  
1 HR. (TC)  
Prerequisite: ENGL 140 with a grade of "C" or better and department approval. This course trains students to assist writers enrolled in writing-intensive courses across the curriculum. Student consultants will gain a theoretical background in how writing fellows programs complement the services of a writing center and practical knowledge of how to respond orally and in writing to drafts. Student consultants will also receive training in how to manage individual conferences, guide the revision process, and work closely with faculty in the disciplines.

Lecture Hours: 1  Laboratory Hours: 0

---

### English as a Second Language

**ESL 089**  
**ENGLISH AS A SECOND LANGUAGE, BEGINNING LITERACY LEVEL**  
3 HRS. (ESL)  
Prerequisite: Appropriate score on a standardized ESL test accepted by the Illinois Community College Board or the College. This course is designed for students with little or no English-speaking proficiency. It centers on developing the basic skills needed to function in everyday American life. Repeatable up to three times.

Lecture Hours: 3  Laboratory Hours: 0

**ESL 090**  
**ENGLISH AS A SECOND LANGUAGE, BEGINNING**  
4 HRS. (ABE)  
LEVEL

Prerequisite: Appropriate score on a standardized ESL test accepted by the Illinois Community College Board or the College. This course centers on developing basic vocabulary and grammar skills and understanding idioms using the English language in simple dialogues, reading, and writing. Repeatable up to three times.

Lecture Hours: 4  Laboratory Hours: 0

**ESL 092**  
**ENGLISH AS A SECOND LANGUAGE, INTERMEDIATE LEVEL**  
4 HRS. (ESL)  
Prerequisite: Appropriate score on a standardized ESL test accepted by the Illinois Community College Board or the College. This course centers on developing more advanced vocabulary and grammar skills and understanding of idioms using the English language in dialogues, reading, and writing. Repeatable up to three times.

Lecture Hours: 4  Laboratory Hours: 0

---

### Family and Consumer Services

**FCS 110**  
**BASIC NUTRITION**  
2 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent. This course is a study of basic nutrition to help the student acquire relevant information about nutrition, which they can use professionally and/or personally. The course will cover the practical aspects of normal nutrition, ways to promote sound eating habits throughout the life cycle, and physiological contributions nutrients make to body structure and function.

Lecture Hours: 2  Laboratory Hours: 0

**FCS 120**  
**PRINCIPLES OF NUTRITION**  
3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent. This course is a study of scientific principles related to nutrition. It covers the role of specific nutrients, their sources, the role they play in digestion, absorption, metabolism, and nutritional requirements of individuals during different stages throughout their lifecycle.

Lecture Hours: 3  Laboratory Hours: 0

### Film

**FILM 110**  
**SURVEY OF FILM (F2 908)**  
3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent. An introduction to film as an art form, emphasizing a study of the aesthetic and production elements of the medium, including narrative genres, directorial style, cinematography, acting, editing, sound, and music.

Lecture Hours: 3  Laboratory Hours: 0

**FILM 111**  
**FILM AND LITERATURE**  
3 HRS. (TC)  
Prerequisite: FILM 110 with a grade of "C" or better. This course is a study of formal, thematic, and/or historical relationships between literary and cinematic forms, including examination of adaptations and influences that demonstrate the strengths of each artistic medium.

Lecture Hours: 3  Laboratory Hours: 0

### Fire Science Technology

**FRSTK 110**  
**INTRODUCTION TO FIRE SCIENCE**  
3 HRS. (OC)  
This course is designed to acquaint the student with the fire service, careers available, history, evaluation and survey of fire protection.

Lecture Hours: 3  Laboratory Hours: 0
FRSTK 111  BASIC INSTRUCTOR TRAINING FOR 3 HRS. (OC) THE FIRE SERVICE
Prerequisite: Department approval. This course is a basic introduction to the principles of vocational level skill training for people who will be conducting on-the-job fire training in local fire departments. This course will not teach firemanship, but will equip firemanship trainers with basics of adult vocational skills teaching.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 112  FIRE PREVENTION AND LEGAL ASPECTS OF FIRE PROTECTION 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better or department approval. This course develops the fundamental principles, theories and techniques of fire prevention, including the organization and implementation of a thorough and deliberate program of public fire prevention. In addition to emphasizing fire and life safety through recognition and elimination of related hazards and familiarization with a model fire prevention code, the legal, social, economic and political aspects of providing public fire protection will be stressed.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 113  FIRE COMPANY APPARATUS AND PROCEDURES 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better or department approval. This course provides an understanding of the practices and procedures which permit the most efficient utilization of firefighting appliances and vehicles. While elementary firefighting tactics and strategy will be introduced, the emphasis of this course will be on apparatus design requirements, operation and maintenance necessary for effective and reliable fireground performance.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 114  FIREFIGHTING TACTICS AND STRATEGY 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better or department approval. This course develops an understanding of the art and science of effective utilization of personnel, apparatus, equipment and extinguishing agents on the fireground. Emphasis will be placed on pre-fire planning, size-up and organization of the fireground situation, firefighting operations (ventilation, operation of hose streams, overhaul) and post-fire analysis and study.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 115  CERTIFIED APPARATUS ENGINEER 3 HRS. (OC)
Prerequisite: Department approval. This course covers fire department apparatus including: Illinois state laws as they pertain to fire apparatus, operations apparatus, calculating pump pressures, understanding pump operations, and safe driving procedures.
Lecture Hours: 2  Laboratory Hours: 3

FRSTK 116  RECRUIT FIRE SERVICE TRAINING MODULE A 5 HRS. (OC)
Prerequisite: Department approval. This course, Module A, is a basic introduction to firemanship for a firefighter. The course includes basic fire behavior, extinguishers and extinguishing agents, small tool and equipment utilization, and ladders. Practical applications of each procedure will be made. The materials in this course are intended to prepare the firefighter to challenge the written exam required for Illinois State Certified Firefighters. This course is designed as the first of three Certified Firefighter Program.
Lecture Hours: 5  Laboratory Hours: 0

FRSTK 117  RECRUIT FIRE SERVICE TRAINING MODULE B 5 HRS. (OC)
Prerequisite: Department approval. This course, Module B, is the second course in the Certified Firefighter Program. The course includes instruction in ropes, emergency medical care, water supply, fire streams, forcible entry, ventilation, rescue and overhaul. Course instruction is designed to prepare the firefighter for the written exam for Illinois State Certified Firefighters.
Lecture Hours: 5  Laboratory Hours: 0

FRSTK 118  RECRUIT FIRE SERVICE TRAINING MODULE C 5 HRS. (OC)
Prerequisite: Department approval. This course, Module C, is the third course in the Certified Firefighter Program and includes instruction in communications, sprinkler systems, salvage, fire inspections, fire cause and origin and hazardous materials.
Lecture Hours: 5  Laboratory Hours: 0

FRSTK 132  INDUSTRIAL FIRE PROTECTION 3 HRS. (OC)
Prerequisite: Department approval. This course involves the study of the principles of industrial loss prevention, including risk management, fire hazards and causes, structural fire and explosion protection, fixed detection and suppression systems.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 183  CERTIFIED RESCUE SPECIALIST, ROADWAY 3 HRS. (OC) EXTRICATION
Prerequisite: Employment (paid or voluntary) as Vehicle Emergency Rescue Squad, Firefighter, Police Officer, Ambulance Driver, E.M.T. or department approval. This course is designed to develop skills in the use and care of extraction equipment needed to perform in rescue, extraction and hazardous control functions. Upon successful completion of this course, the student will be qualified for State of Illinois certification examination as a Certified Rescue Specialist-Roadway Extrication. Three lecture hours a week for fifteen weeks and two laboratory sessions at seven and one-half hours each.
Lecture Hours: 3  Laboratory Hours: 1

FRSTK 190  LEGAL ISSUES IN THE FIRE SERVICE 3 HRS. (OC)
Prerequisite: Department approval. This course covers legal issues in the fire service including emergency vehicle operation, tort liability, employment law, and labor law with an emphasis on the law of the State of Illinois.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 201  INTERNSHIP, FIRE SERVICE 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better and department approval. This course is designed to give the trainee field experience in fire protection work by actually participating as a “cadet” while engaged in on-the-job training with experienced fire protection and prevention personnel. The student will do individual research and study in their field of interest as approved and directed by the instructor.
Lecture Hours: 0  Laboratory Hours: 15 or equivalent

FRSTK 211  FIRE SERVICE INSTRUCTOR, STANDARD LEVEL 3 HRS. (OC)
Prerequisite: FRSTK 111 with a grade of “C” or better and qualified as Basic Certified Instructor. This course is the second level of instructor training which is designed to more thoroughly acquaint the trainee with the methods and techniques of training and further develop lesson presentation skills. Additionally, the trainee will learn how to design, develop and administer training programs. The course development process and the planning, researching, writing and evaluation of training curricula and programs will be addressed. Forty-eight hours of lecture, discussion and practice teaching.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 212  FIRE PREVENTION PRINCIPLES II 3 HRS. (OC)
Prerequisite: FRSTK 112 with a grade of “C” or better. This course is designed to meet the needs of individuals who desire to become familiar with advanced fire protection, inspections and investigation practices and procedures. The course is structured to meet the requirement established by the Illinois State Fire Marshal for certification as a Fire Officer II.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 214  TACTICS AND STRATEGY II 3 HRS. (OC)
Prerequisite: FRSTK 114. This course is an advanced study in firefighting strategy and leadership, designed mainly for fire officers and potential fire officers. This course will partially fulfill state requirements for Fire Officer II.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 222  SELECTED TOPICS 1 HR. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better. The content of this course varies from offering to offering to meet the changing needs of students and to allow exploration of topics more fully than can be addressed in survey courses. Each offering will present a unique investigation of a topic in fire science. This course is repeatable if the topic and content are different up to a maximum of four semester hours of credit. The duration of the course will depend upon the topic to be covered.
Lecture Hours: 1 - 4  Laboratory Hours: 0

FRSTK 225  BUILDING CONSTRUCTION FOR THE FIRE SERVICE 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better. This course is a basic introduction to the principles of building construction for firefighters. This course will teach firefighters the importance of understanding how the construction of a building influences the severity of a fire and how to control it.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 227  CHEMISTRY OF FLAMMABLE HAZARDOUS MATERIALS 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better and approved laboratory science. This course develops the properties of chemically active materials such as flammable liquids, oxidizing and corrosive materials, and radioactive compounds. Emphasis is placed not only upon identification, labeling, storage, handling and disposal, but will also consider identification and application of the appropriate extinguishing agents.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 228  CHEMISTRY OF EXPLOSIVE AND TOXIC MATERIALS 3 HRS. (OC)
Prerequisite: FRSTK 110 with a grade of “C” or better and approved laboratory science. This course is an in-depth study of the properties of flammable, explosive and toxic materials, and combustible solids. The inter-reaction of various chemical compounds will also be considered. Secondary emphasis on effects of various extinguishing agents and accompanying emergency procedures.
Lecture Hours: 3  Laboratory Hours: 0

FRSTK 229  HAZARDOUS MATERIALS I 3 HRS. (OC)
Prerequisite: Illinois Certified Firefighter II. This course covers hazardous materials awareness and first responder requirements specified in the State of Illinois Fire Marshal guidelines to meet OSHA standards.
Lecture Hours: 3  Laboratory Hours: 0
**French**

**FR 211**

**INTERMEDIATE FRENCH II (H 900)**

Prerequisite: Approved reading placement score, or equivalent, and FR 210. This course is a continuation of FR 210 with emphasis on advanced conversation, reading, and composition. This course is conducted in French.

**FR 111**

**ELEMENTARY FRENCH II**

Prerequisite: FR 110 with a grade of “C” or better or equivalent. This course is a continuation of FR 110 with emphasis on listening, speaking, reading, and writing. The course is conducted primarily in French.

**FR 210**

**INTERMEDIATE FRENCH I**

Prerequisite: FR 111 with a grade of “C” or better or equivalent. This course emphasizes conversation, selected readings, and composition. The course is conducted primarily in French.
GEDPR 095 GED COMPUTATIONAL SKILLS I 1 HR. (ASE)  
Prerequisite: Reading level of 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College. This course is designed to help the student in the development of mathematical vocabulary, computation skills, and other mathematical reasoning abilities. Repeatable up to a maximum of three times.  
Lecture Hours: 1  Laboratory Hours: 0

GEDPR 096 GED COMPUTATIONAL SKILLS II 2 HRS. (ASE)  
Prerequisite: Reading level of 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College. This course is designed to help the student in the development of mathematical vocabulary, computation skills, and other mathematical reasoning abilities. Repeatable up to a maximum of three times.  
Lecture Hours: 2  Laboratory Hours: 0

GEDPR 097 GED COMPUTATIONAL SKILLS III 3 HRS. (ASE)  
Prerequisite: Reading level of 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College. This course is designed to help the student in the development of mathematical vocabulary, computation skills, and other mathematical reasoning abilities. Repeatable up to a maximum of three times.  
Lecture Hours: 3  Laboratory Hours: 0

GEDPR 098 GED REVIEW II 2 HRS. (ASE)  
Prerequisite: Reading level of 9 - 12.9 on a standardized reading test accepted by the Illinois Community College Board or the College. This course is designed to prepare the student for the GED Tests in the areas of literature, grammar and essay writing, social science, science, and mathematics. Repeatable up to a maximum of three times.  
Lecture Hours: 2  Laboratory Hours: 0

GEDPR 099 GED REVIEW 1 HR. (ASE)  
Prerequisite: Reading level 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College. This course is designed to prepare the student for the GED Test in the areas of literature, grammar and essay writing, social science, science, and mathematics.  
Lecture Hours: 1  Laboratory Hours: 0

General College Studies

ICC 100 INTRODUCTION TO AGRICULTURAL AND INDUSTRIAL TECHNOLOGIES CAREERS 1 HR. (OC)  
This course provides the student with knowledge-based understanding of Agricultural and Industrial Technologies careers. Self-appraisal, critical analysis of Agricultural and Industrial Technologies careers, workplace and professional skills, and safety issues are included.  
Lecture Hours: 1  Laboratory Hours: 0

ICC 101 INTRODUCTION TO ARTS AND COMMUNICATION 1 HR. (OC)  
This course provides the student with a knowledge-based understanding of careers in Arts and Communication. Self-appraisal, critical analysis of careers in arts and communication, workplace and professional skills, and safety issues are included. Course follows along the occupations within the Career Clusters of Architecture and Construction and Arts, Audio/Video Technology, and Communications.  
Lecture Hours: 1  Laboratory Hours: 0

ICC 102 INTRODUCTION TO BUSINESS, HOSPITALITY AND INFORMATION SYSTEMS CAREERS 1 HR. (OC)  
This course provides the student with knowledge-based understanding of business, hospitality and information technology careers. Self-appraisal, critical analysis of business, hospitality and information technology careers, workplace and professional skills, and safety issues are included.  
Lecture Hours: 1  Laboratory Hours: 0

ICC 104 INTRODUCTION TO HEALTH CAREERS 1 HR. (OC)  
This course provides the student with a knowledge-based understanding of health care careers. It introduces the Career/Technical Education area of Health Sciences and Career Cluster of Health Sciences and related pathways: Diagnostic Services, Health Informatics, Support Services, Therapeutic Services, and Biotechnology Research and Development. Self-appraisal, critical analysis of health careers, essential workplace and professional skills, and safety issues are included.  
Lecture Hours: 0.5  Laboratory Hours: 1.5

ICC 110 COLLEGE SUCCESS 3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent, department approval. This course is designed to acquaint students with college life, community and academic resources, learning and study skills, problem-solving and success strategies.  
Lecture Hours: 3  Laboratory Hours: 0

ICC 111 CAREER CHOICE 1 HR. (TC)  
Prerequisite: Approved reading placement score, or equivalent, or department approval. This course provides individuals the opportunity to explore their abilities, interests, values and other significant factors as they relate to a career choice.  
Lecture Hours: 0  Laboratory Hours: 20

General Motors Automotive Service Education Program (GM ASEP)

ASEP 112 INTRODUCTION TO GM-ASEP 2 HRS. (OC)  
Prerequisite: Department approval. This course provides instruction and lab experience in shop safety, shop operation and how to obtain service information. Also covered are the basic inspection and servicing techniques of electrical systems, brake systems and automatic transmissions and transaxles.  
Lecture Hours: 2  Laboratory Hours: 3

ASEP 115 ELECTRICAL SYSTEMS I 3 HRS. (OC)  
Prerequisite: Department approval. This course is designed to include electrical concepts as they apply to electrical systems. It will include the use of electrical test equipment used to diagnose electrical problems found on motor vehicles. Major emphasis is on the application of these principles as they apply to the transportation industry.  
Lecture Hours: 2  Laboratory Hours: 3

ASEP 117 AUTOMOTIVE SUSPENSION, STEERING AND ALIGNMENT 3 HRS. (OC)  
Prerequisite: Department approval. This course is a study of the design and operation of suspension and steering systems used in the automotive industry. It includes the use of diagnostic equipment and making component repairs on current automobiles.  
Lecture Hours: 2  Laboratory Hours: 3

ASEP 129 AUTOMOTIVE BRAKE SYSTEMS 3 HRS. (OC)  
Prerequisite: Department approval. This course is a study of the design and operation of brake systems used in the automotive industry. It includes the use of diagnostic equipment and making component repairs on current automobiles.  
Lecture Hours: 2  Laboratory Hours: 3

ASEP 133 ENGINE PERFORMANCE I 3 HRS. (OC)  
Prerequisite: Department approval. This course covers the principles of fuel and ignition systems in modern gasoline engines. Diagnostic techniques and repair procedures are emphasized. Special emphasis is placed on the use of modern test equipment to analyze problems and computer operations.  
Lecture Hours: 2  Laboratory Hours: 3

ASEP 137 MANUAL DRIETRAINS 3 HRS. (OC)  
Prerequisite: Department approval. This course explores the transmission of power from the internal combustion engine by mechanical means. Problems in design and application are solved. The laboratory experience includes inspection, disassembly and repair of manual transmissions, manual transaxles, differentials, axles, and four wheel drive and transfer cases.  
Lecture Hours: 2  Laboratory Hours: 3

ASEP 150 INTERNSHIP 4 HRS. (OC)  
Prerequisite: Department approval. This supervised experience is required of students enrolled in the GM-ASEP program. Students’ needs and objectives determine major emphasis of this course.  
Lecture Hours: 0  Laboratory Hours: 20
GIS 108 REMOTE SENSING 3 HRS. (OC)

This course provides an introduction to the techniques of collecting and interpreting information about earth's surface through non-contact methods. The current relationship with geographic information systems (GIS) will be examined.

Lecture Hours: 2 Laboratory Hours: 2

Geography

GEOG 112 CULTURAL GEOGRAPHY (S4 900N) 3 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent. This course is a study of world cultures and their patterns across the earth's surface from a geographic perspective. Aspects and principles of economic geography, urban geography, demography, political geography and cultural ecology are applied to the cultures of the world. Special topics include human origins and distribution, language, religion, agriculture, natural hazards, urbanization, industry and recreation.

Lecture Hours: 3 Laboratory Hours: 0

GEOG 113 WORLD REGIONAL GEOGRAPHY (S4 900N) 3 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent. This course is a study of selected world regions from a geographic point of view. Aspects and principles of economic geography, political geography, cultural geography, historical geography, and physical geography are applied to the regions of the world. The major focus of the course is on the non-Western and Third World.

Lecture Hours: 3 Laboratory Hours: 0

GEOG 116 GEOGRAPHY OF THE DEVELOPING WORLD (S4 901) 3 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent. This course surveys the developing world stressing the economic, social, political, and environmental characteristics of Latin America, Africa, and Asia. The basic relationship between the physical environment and cultural characteristics of a region will be explored as a primary focus of the course.

Lecture Hours: 3 Laboratory Hours: 0

GEOG 118 GEOGRAPHY OF THE DEVELOPED WORLD (S4 903N) 3 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent. This course surveys the developed world stressing the economic, social, political, and environmental characteristics of North America, Europe, and other technologically advanced regions of the world. The basic relationship between the physical environment and cultural characteristics of a region will be explored as a primary focus of the course.

Lecture Hours: 3 Laboratory Hours: 0

GEOG 200 ECONOMIC GEOGRAPHY (S4 903M) 3 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent. This course introduces international aspects of industrial raw materials, agricultural commodities, industrial location, transportation and energy supplies. The scientific method is utilized in problem solving. Students develop skills in working with topographic maps, aerial photographs, formulating and testing hypotheses, evaluating locations from a geographic point of view, and analyzing computer generated maps of land use.

Lecture Hours: 3 Laboratory Hours: 0

German

GER 110 ELEMENTARY GERMAN I 4 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent. This course is an introduction to German grammar and syntax that affords practice in listening, speaking, reading, and writing.

Lecture Hours: 4 Laboratory Hours: 0

GER 111 ELEMENTARY GERMAN II 4 HRS. (TC)

Prerequisite: GER 110 with a grade of “C” or better or equivalent. This course emphasizes conversation, reading, and composition. The course is conducted primarily in German.

Lecture Hours: 4 Laboratory Hours: 0

GER 210 INTERMEDIATE GERMAN I 4 HRS. (TC)

Prerequisite: GER 111 with a grade of “C” or better or equivalent. This course emphasizes conversation, reading, and composition. The course is conducted primarily in German.

Lecture Hours: 4 Laboratory Hours: 0

GER 211 INTERMEDIATE GERMAN II (H1 900) 4 HRS. (TC)

Prerequisite: Approved reading placement score, or equivalent and GER 210. This course is a continuation of GER 210 with emphasis on advanced conversation, reading, and composition. The course is conducted in German.

Lecture Hours: 4 Laboratory Hours: 0
Graphic Communications

**GCOMM 110  INTRODUCTION TO GRAPHIC COMMUNICATIONS**  4 HRS. (TC)
This course introduces the basic principles, materials and equipment used in the major printing processes. Beginning skills in typography, electronic desktop publishing, photography, scanning, image manipulation, creation of printing plates, and press operation are emphasized.
Lecture Hours: 2  Laboratory Hours: 4

**GCOMM 112  VECTOR GRAPHICS WITH ADOBE ILLUSTRATOR**  3 HRS. (TC)
This course is a study of the techniques used to prepare vector artwork for production and page layout of small documents. Students are taught the methods and conventions of drawing, painting, typesetting, and art manipulation with Adobe Illustrator using Macintosh computers. Basic techniques of digital image capture, color separation, and electronic file preparation for single and multiple color jobs are also included in this course.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 130  PAGE LAYOUT WITH ADOBE INDESIGN**  3 HRS. (TC)
This course is an introduction to the tools and techniques utilized in page layout, commonly known as desktop publishing. The more common configurations of hardware and software are discussed, and skills are developed in the use of Adobe InDesign software. The importing of word-processing files, prepared art, and scanned images or digital photographs into the layout are covered. Use file templates, master layouts, and text-formatting styles to dramatically improve production workflow. Students will also be taught to use conditional text and layers to develop customized versions of a document to further layout efficiency. Design considerations in the correct selection of typefaces and use of line elements, and the outputting of files for printed media or electronic publishing are covered.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 140  PRINTING METHODS**  4 HRS. (OC)
Prerequisite: GCOMM 110 with a grade of "C" or better, or department approval.
This course covers offset printing and silk screen press operation.
Lecture Hours: 2  Laboratory Hours: 4

**GCOMM 150  PRODUCTION TECHNIQUES AND PROCESSES**  3 HRS. (OC)
Prerequisite: GCOMM 110 with a grade of "C" or better. This course is designed to provide a study of the materials, supplies, and production concerns found in the printing industry. The basics of estimating job costs, using both conventional and computerized methods, are presented. Production concerns from the copy preparation stage to those encountered in binding and finishing are discussed, and their impact on the scheduling of printing production is covered.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 160  OCCUPATIONAL PHOTOSHOP TECHNIQUES**  1 HR. (OC)
This course contains practical applications of image editing and digital enhancement with Adobe Photoshop for occupational use. Techniques in the manipulation of digital photographs and commercially available images with Photoshop for industry-specific needs will be covered in this course.
Lecture Hours: 0  Laboratory Hours: 2

**GCOMM 225  SCREEN PRINTING**  3 HRS. (OC)
Prerequisite: GCOMM 110, GCOMM 112, GCOMM 250 all with a grade of "C" or better or department approval. This course will provide an introduction to the screen printing trade. Students will explore copy preparation, mesh selection, frames, stencil systems, printing techniques, ink and substrate compatibility, reclamation of screens, and how screen printing affects the finishing processes. A combination of technical laboratory applications and theory will provide the foundation for this course.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 230  ADVANCE PAGE LAYOUT AND INTERACTIVE CROSS MEDIA**  3 HRS. (OC)
Prerequisite: GCOMM 130 with a grade of "C" better. This course is a continuation of GCOMM 130 with emphasis on some of the more advanced features, techniques, and software utilized in electronic publishing. In addition to in-depth publishing topics using Adobe InDesign, this course will introduce students to page layout techniques using Quark XPress software, interactive document creation using Adobe Acrobat Pro, and ePub creation.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 235  DIGITAL PHOTOGRAPHY AND SCANNING FOR PUBLISHING**  3 HRS. (OC)
Prerequisite: Credit or concurrent enrollment in GCOMM 130. This course introduces the student to electronic scanners and scanning techniques commonly used in desktop publishing. Instruction is provided in the operation of desktop scanners and image preparation for page layout. Utilizing commercially prepared images and the basics of digital photography are also covered in this course.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 245  WEB PUBLISHING WITH ADOBE DREAMWEAVER**  3 HRS. (OC)
This course is designed to introduce the student to document construction for publishing on the World Wide Web. Basics of HyperText Markup Language are covered as is instruction in the use of authoring software such as Adobe Dreamweaver and Fireworks.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 247  ADVANCE WEB PUBLISHING WITH ADOBE DREAMWEAVER AND FLASH**
Prerequisite: GCOMM 245 with a grade of "C" or better. This course is a study of the techniques used in creating sophisticated web pages. Students are taught the correct methods of image optimization using Fireworks, and the development of box model CSS template driven web pages using Adobe Dreamweaver. Interactive web page design objects and form validation will be covered using Spry elements. The creation of vector animations with Adobe Flash, and the construction of virtual reality tours using Autodesk Stitcher.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 248  MODELING AND ANIMATION WITH AUTODESK MAYA**  3 HRS. (OC)
Prerequisite: GCOMM 245 with a grade of "C" or better. This course is designed to introduce the student to the creation of two-dimensional (2D) and three-dimensional (3D) animations. The two-dimensional vector animation software Adobe Flash will be used to develop interactive animations. The focus in the 2D animation will be to explore the creation of motion with a timeline interface and programming interactive behavior to control the state of the animations. The topics covered with 2D animation will be built upon in the following 3D animation portion of the class using Autodesk Maya. Students will be taught how to develop 3D models, animate and render them for output as stream video for web delivery, and capture still images for use in print.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 250  BEGINNING ADOBE PHOTOSHOP TECHNIQUES**  3 HRS. (TC)
Prerequisite: Credit or concurrent enrollment in GCOMM 130. This course includes practical applications of image editing utilizing Macintosh computers and Adobe Photoshop. Beginning techniques in the manipulation of original and commercially available images with Photoshop for conventional or electronic publication is emphasized.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 251  ADVANCED ADOBE PHOTOSHOP TECHNIQUES**  3 HRS. (OC)
Prerequisite: GCOMM 250 with a grade of "C" or better. This course is a study of advanced image editing with Adobe Photoshop. Techniques in the manipulation of images, streamlining of production, and the creation of original images with Photoshop for conventional or electronic publication are included.
Lecture Hours: 1  Laboratory Hours: 4

**GCOMM 255  INDEPENDENT STUDY**  1 HR. (OC)
Prerequisite: Department approval. This course provides a student an opportunity to investigate areas of Graphic Communication not included in the course of study according to the individual's academic needs. The student must submit a formal written plan detailing the project, number of credit hours assigned to it and the evaluative criteria that is to be used. This project must be carried out under the direction of a faculty member. The written plan is submitted to the associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit.
Lecture Hours: 0  Laboratory Hours: 3 - 15

**GCOMM 260  GRAPHIC COMMUNICATIONS INTERNSHIP**  1 HR. (OC)
Prerequisite: GCOMM 110, GCOMM 112, GCOMM 130, GCOMM 245, and GCOMM 250, all with a grade of "C" or better. This course will help to prepare students for careers in the graphic communications work force. This exposure to the workplace will help students’ understanding of the different types of careers, work environment, work flows, job duties and how they will be able to fit into the workplace.
Lecture Hours: 1 - 3  Laboratory Hours: 0

Graphic Design

**GRDSN 140  GRAPHIC DESIGN 1: FOUNDATIONS**  3 HRS. (TC)
This introductory studio course provides a foundation in practices, techniques, processes, terminology, theory and aesthetics of graphic design. Studio projects stress concept, graphic form, structure and visual organization methods, and develop effective solutions for visual communication problems. Projects combine aspects of image, text, space and color, in both traditional and new-media approaches.
Lecture Hours: 0  Laboratory Hours: 6

**GRDSN 142  GRAPHIC DESIGN 2: TYPGRAPHY**  3 HRS. (TC)
Prerequisite: GRDSN 140 with a grade of "C" or better or department approval. This course is an introductory course in the Graphic Design sequence. Studio and laboratory projects stress research, basic typographical terminology, and methods for effective graphic design solutions. Analysis of historical trends in typographic design.
creates a context for contemporary trends and practical applications in the field of Graphic Design. Course objectives stress exploration of design and typographic elements in various graphic design software applications, understanding an application of typographic terminology and processes, comprehension of the value of typographic design, and creation of typographic design for effective visual communication.

Lecture Hours: 0  Laboratory Hours: 6

GRDSN 150 GRAPHIC DESIGN 3: METHODS AND PROCESS 3 HRS. (TC)
Prerequisite: GRDSN 140 with a grade of “C” or better and credit or concurrent enrollment in GRDSN 142. This course stresses studio and laboratory project development and design of digital graphic solutions. This course includes advanced graphic design problems, stressing a practical foundation of knowledge of the graphic design process and methodologies. Instruction includes theoretical basis and practical approach to concept and creation of studio and laboratory projects. Advanced graphic design techniques, processes, terminology, software and conceptual skills are emphasized.

Lecture Hours: 0  Laboratory Hours: 6

GRDSN 240 GRAPHIC DESIGN 4: ADVANCED DESIGN PROBLEMS 3 HRS. (TC)
Prerequisite: GRDSN 240 with a grade of “C” or better or department approval. This course is a continuation of GRDSN 240, in creating advanced graphic design problems. Development of projects for portfolio presentation and career preparation for the Graphic Design field is stressed.

Lecture Hours: 0  Laboratory Hours: 6

GRDSN 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides a student an opportunity to investigate areas of Graphic Design not included in the course of study according to the individual’s academic needs. The student must submit a formal written plan detailing the project, number of credit hours assigned to it and the evaluative criteria that is to be used. This project must be carried out under the direction of a faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student.

Lecture Hours: 0  Laboratory Hours: 3 - 15 or equivalent

Green Building Construction

GRBCR 110 BUILDING WALL SYSTEMS 4 HRS. (OC)
Prerequisite: Concurrent enrollment in ARCTK 119. This course introduces students to the construction and repair of the building envelope. Students will learn how to select and operate power tools to construct or repair various wall systems including block, brick, and framed. Students will learn skills in wall-framing, installing, and repairing sheet rock, and finishing interior and exterior walls.

Lecture Hours: 2  Laboratory Hours: 5

GRBCR 120 BUILDING ROOFS 4 HRS. (OC)
Prerequisite: Concurrent enrollment in ARCTK 119 and GRBCR 110 with a grade of “C” or better. This course introduces the student to the roof systems used in residences and light commercial applications. Students will understand basic roof requirements such as sustaining wind and snow loads. Students will be able to recognize components of the common roofing systems. Students will learn to practice environmentally sensitive methods for installing and repairing roof systems.

Lecture Hours: 2  Laboratory Hours: 5

GRBCR 150 BUILDING ENVELOPE EVALUATION 3 HRS. (OC)
In this course, individuals are trained on current methods to evaluate a building’s exterior ability to control air infiltration and heat transfer. Laboratory experiences are designed to provide hands-on experiences that students experience setting up and analyzing building envelopes. This course prepares individuals to pass the Building Performance Institute (BPI) exam.

Lecture Hours: 2  Laboratory Hours: 2

Green Building Environment

GRBE 110 INTRODUCTION TO GREEN BUILDING NEEDS 3 HRS. (OC)
In this course the student will look at how to develop a green building team, who should make up the team, who should be the lead, and how each one affects the total building and its environment.

Lecture Hours: 3  Laboratory Hours: 0

GRBE 120 BUILDING ENERGY ANALYSIS 3 HRS. (OC)
Prerequisite: REACT 211 or concurrent enrollment. This course is designed to cover the introduction of the different types of energy audits and how to conduct an energy audit and water audit of residential and light commercial buildings.

Lecture Hours: 3  Laboratory Hours: 0

GRBE 130 CENTRAL HEATING AND COOLING PLANT 3 HRS. (OC)
Prerequisite: GRBE 120. In this course the student will develop a strong understanding of what a central system is and the advantages over spot heating and cooling. Course content will also cover the old style systems through to the greenest types of heating and cooling systems.

Lecture Hours: 3  Laboratory Hours: 0

GRBE 140 INDOOR AIR QUALITY AND GREEN BUILDINGS 4 HRS. (OC)
This course will deal with the impacts of indoor air quality on green building and energy effects.

Lecture Hours: 3  Laboratory Hours: 3 or equivalent

GRBE 150 GREEN BUILDING ENVIRONMENTAL PROJECTS 3 HRS. (OC)
Prerequisite: GRBE 110, GRBE 120, GRBE 130, GRBE 140, GRBCR 150, ARCTK 119, ARCTK 228, REACT 110, REACT 211, all with a grade of “C” or better. In this course the student will apply all of the knowledge and skills learned in other “green building” courses. The student will be doing community service work and helping others to learn about new ways of improving life and reducing operation costs along the way.

Lecture Hours: 1  Laboratory Hours: 3

Health

HLTH 041 BASIC LIFE SUPPORT (CPR) 0.5 HRS. (VSC)
This course presents the techniques of cardiopulmonary resuscitation (CPR) and foreign body airway obstruction (FBAO) management. Upon successful completion of written and skills evaluations, the student will be issued an American Heart Association Healthcare Provider card.

Lecture Hours: 0.5  Laboratory Hours: 1.5

HLTH 107 BASIC ELECTROCARDIOGRAMS 1 HR. (OC)
Prerequisite: Department approval. This course is designed to prepare the student to perform electrocardiograms. Emphasis is placed on lead placement, artifact, and machine operation. Basic anatomy and physiology of the cardiac system and electrophysiology are presented. Lethal dysrhythmias will be discussed. Practical skills experiences will be provided to correlate with the course content.

Lecture Hours: 5  Laboratory Hours: 1.5 or equivalent

HLTH 108 ELECTROCARDIOGRAM INTERPRETATION 1 HR. (OC)
This course is designed to prepare the student to identify key elements of the electrocardiogram in order to interpret and recognize patterns of dysrhythmias. Basic anatomy and physiology of the cardiac system and cardioelectrophysiology are presented. This course will prepare the student for advanced cardiac life support study.

Lecture Hours: 0.5  Laboratory Hours: 1.5

HLTH 110 FUNDAMENTALS OF STERILE PROCESSING 2 HRS. (OC)
Prerequisite: None. This course introduces students to an understanding of the decontamination, packaging, and handling of surgical medical products; processing and reprocessing of instruments and products; and the issues involved in inventory control and quality assurance of sterile products.

Lecture Hours: 1.5  Laboratory Hours: 1

HLTH 112 NURSING ASSISTANT TRAINING 5 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent and completion of CPR for the Healthcare Provider or concurrent enrollment in HLTH 041. This course is designed to prepare the student to function as a nurse assistant in nursing homes.

Lecture Hours: 3  Laboratory Hours: 6

HLTH 116 NURSE ASSISTANT: ALZHEIMER’S DISEASE 1 HR. (OC)
Prerequisite: Concurrent enrollment in HLTH 112 and Accuplacer score of 44 or greater, or equivalent, or departmental approval. This course is an introduction to the study of Alzheimer’s Disease and related dementias. Topics covered include aging and dementia, communication, care and treatment modalities, behavior issues and management techniques, activities, nutrition, family roles, community resources, and staff support.

Lecture Hours: 1  Laboratory Hours: 0

HLTH 120 FIRST AID 2 HRS. (TC)
This course is designed to provide basic knowledge and skills needed to provide immediate first aid in case of accident or illness. Emphasis is placed on personal safety and accident prevention. Two lecture hours per week or equivalent.

Lecture Hours: 2  Laboratory Hours: 0

The course descriptions are as follows:

**Health Occupations**

- **HEOCC 112** INTRODUCTION TO PHARMACOLOGY
  - Prerequisite: Admission to or graduate of Health Occupations program or department approval. This course provides an introduction to the understanding of pharmacology. Emphasis will be placed on basic drug terminology, drug classifications and systems of measurement.
  - Lecture Hours: 1, Laboratory Hours: 2

- **HEOCC 114** INTRODUCTION TO INTERDISCIPLINARY HEALTH CARE
  - Prerequisite: Enrollment in Health Occupations program or department approval. This is an interdisciplinary course designed to provide health occupation students with the common knowledge and skills necessary to perform effectively in a changing health care environment. Health care management/systems issues, ethical and legal healthcare issues, interpersonal dynamics, team management, employability skills, basic computer skills, and problem-solving/cases are included.
  - Lecture Hours: .5, Laboratory Hours: 1.5

- **HEOCC 200** DISEASE PROCESSES IN MAN
  - Prerequisite: BIOL 140 with a grade of "C" or better or department approval. This course is designed to acquaint the student with disorders affecting tissues, organs and systems of the human body. Major health problems affecting large numbers of patients will be examined in relationship to causes, occurrence, signs and symptoms, diagnostic findings, treatment and prognosis, and the patient's family and society's response to them.
  - Lecture Hours: 3, Laboratory Hours: 0

- **HEOCC 220** LEGAL ISSUES IN HEALTH CARE
  - Prerequisite: Acceptance to Physical Therapist Assistant or Occupational Therapy Assistant or Radiography or Medical Coder curricula or department approval. This course explores the legal foundations of health care delivery. Health law including negligence, hospital responsibilities, patient rights, and federal and state labor laws is discussed.
  - Lecture Hours: 1, Laboratory Hours: 0

- **HEOCC 230** HEALTH CARE ORGANIZATION AND RESOURCES
  - Prerequisite: Acceptance to Occupational Therapy Assistant or Physical Therapist Assistant or Radiography degree completion curricula or department approval. This course is designed to provide a review of the development and organization of the health care delivery system. Emphasis is placed upon the development of an understanding of the health care system and resources: people, money, equipment and facilities. Credentialing mechanisms will be identified and discussed.
  - Lecture Hours: 1, Laboratory Hours: 0

**History**

- **HIST 111** EARLY WORLD CIVILIZATIONS (H2 906)
  - Prerequisite: Approved reading placement score, or equivalent. This course surveys the major ancient and medieval civilizations of the world from prehistoric origins to about 1600. Topics include civilizations of the Near East and Africa, South and East Asia, and the Americas as well as Europe and the Mediterranean.
  - Lecture Hours: 4, Laboratory Hours: 0

- **HIST 112** MODERN WORLD CIVILIZATIONS (H2 907)
  - Prerequisite: Approved reading placement score, or equivalent. This course is a continuation of HIST 111 and concentrates on the Modern era of world history since about 1500. Particular emphasis is placed on political, economic, and social developments which have shaped the cultures of the world including Europe, Russia, Africa, Asia, the Middle East, and the Americas.
  - Lecture Hours: 4, Laboratory Hours: 0

- **HIST 117** EARLY WESTERN CIVILIZATION (S2 902)
  - Prerequisite: Approved reading placement score, or equivalent. This course presents an introduction to the history of Western Civilization in the Ancient, Medieval, and Renaissance periods. Major topics include origins of civilization, the Hebrews, Greek and Roman civilization, origins and development of Christianity, Medieval society and economy, the rise of national monarchies, the Renaissance, the Protestant Reformation, and the origins of modern economic and political concepts.
  - Lecture Hours: 3, Laboratory Hours: 0

**Horticulture**

- **HORT 110** INTRODUCTION TO HORTICULTURAL PLANTS (AG 905)
  - This course is a study of horticultural plant structures, physiology and reproduction. Included are discussions of basic horticultural practices and occupational areas.
  - Lecture Hours: 3, Laboratory Hours: 3

- **HORT 114** TURF MANAGEMENT I
  - This course emphasizes the general types of turfgrasses, their growth habits and requirements and the establishment of turf. Fertilizers, diseases, insects, weeds and turf equipment are included.
  - Lecture Hours: 2, Laboratory Hours: 3

- **HORT 124** LANDSCAPE CONSTRUCTION
  - This course emphasizes techniques and uses of materials as they pertain to construction of various landscape features. Practical experience in the use of surveying instruments, concrete and paving materials. Additional experience in studying and constructing drainage systems, walls, steps, fences, terraces and patios.
  - Lecture Hours: 2, Laboratory Hours: 3

- HOS 112 FACILITIES MANAGEMENT

**Human Services**

- HUMS 110 INTRODUCTION TO HUMAN SERVICES
HUMSV 111 HUMAN SERVICES APPLICATIONS I 3 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or department approval. In this course, students will gain a practical understanding of their role in the helping professions. They will become familiar with the characteristics and types of problem behavior of specific at-risk populations as well as basic skills and techniques necessary to work successfully with those clients. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 114 INTRODUCTION TO DEVELOPMENTAL DISABILITIES 3 HRS. (OC)
This course teaches students about the major types of developmental disabilities, including information about their incidence, causal factors, significant characteristics, treatment, and prevention. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 120 SURVEY OF PSYCHIATRIC REHABILITATION 4 HRS. (OC)
This course is an introduction to the concept and application of psychiatric rehabilitation. The course has four major themes - the understanding of psychiatric disability and current approaches to treatment; the mental health system and surrounding legal issues; psychiatric rehabilitation through vocational skills training; and family and community support systems. Under the direction of an on-site agency supervisor, students will also spend thirty-two hours in observational experiences. Observation and interactive experiences will focus on inpatient milieu and general activities, case management, vocational training, skills training, and consumer activities. Lecture Hours: 3 Laboratory Hours: 2

HUMSV 121 PSYCHIATRIC REHABILITATION SKILLS 3 HRS. (OC)
In this course the student will learn about a rehabilitative approach to serving individuals with serious mental illness. This course has five major themes: basic interviewing and listening skills, skills training and performance, preventing and managing aggression, assessment and treatment planning, and crisis intervention. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 122 PSYCHIATRIC REHABILITATION HEALTH SKILLS 3 HRS. (OC)
This course examines three dimensions of wellness - physical, emotional, and environmental - involved in a rehabilitative approach to serving individuals with serious mental illness. Students will learn the fundamentals of physical wellness, including diet, nutrition, exercise, sanitation, disease prevention and control, and the special considerations necessary for persons with serious mental illness. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 123 VOCATIONAL AND COMMUNITY LIVING SKILLS 4 HRS. (OC)
In this course, students examine vocational rehabilitation and community living skills related to a rehabilitative approach to serving individuals with serious mental illness. The focus of the course is on developing skills for working with community, state, and federal agencies that serve mental health consumers. Under the direction of an on-site agency supervisor, students will also spend a minimum for thirty-two hours in observational experiences, the focus of which is vocational rehabilitation and case management for mental health consumers. Lecture Hours: 3 Laboratory Hours: 2

HUMSV 124 FAMILY SYSTEMS IN THE HUMAN SERVICES 3 HRS. (OC)
Prerequisite: HUMSV 110 or department approval. This course teaches students about the types of families who seek assistance from the human services system, interventions and strategies to assist those families, and appropriate functions and roles of human services paraprofessionals in the helping process. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 125 CULTURAL COMPETENCE IN THE HUMAN SERVICES 3 HRS. (OC)
Prerequisite: HUMSV 110 or department approval. This course teaches students about their own culture/heritages in comparison to others with reference to behaviors, interaction, and values. Through greater understanding of self and others, students will be able to develop helping approaches that are culturally sensitive. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 127 COMMUNITY RESOURCES AND ENTITLEMENT PROGRAMS 1 HR. (OC)
This course teaches students about community resources for at-risk populations and how to help human services consumers access entitlement programs. Lecture Hours: 1 Laboratory Hours: 0

HUMSV 150 HUMAN SERVICE TOPICS 1 HR. (OC)
In this course students will learn about the nature of specific psychosocial issues and approaches with which human services professionals and community volunteers work. Such topics could include domestic violence, depression, suicide, substance abuse, and prevention and intervention strategies. Lecture Hours: 1 - 3 Laboratory Hours: 0

HUMSV 151 CRISIS AND SUICIDE INTERVENTION 3 HRS. (OC)
This course is designed to prepare students to understand the nature of several psychological and social issues such as suicide, stress, mental illnesses, anxiety, substance abuse, and domestic violence. Students will also learn basic prevention and intervention strategies to deal with such issues. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 152 CHILD WELFARE SYSTEM 1 HR. (OC)
This course will provide students with an understanding of the basic child welfare policies, practices, and programs related to children and families in Illinois. They will understand how children enter the system, what happens to children while they are in the system, and how the child will exit the child welfare system. Lecture Hours: 1 Laboratory Hours: 0

HUMSV 154 MENTAL HEALTH FIRST AID 1 HR. (OC)
This course is an empirically-backed prevention tool used to improve the knowledge of mental health problems through learning to assess the situation, select and implement appropriate interventions, and secure appropriate care for individual's experiencing a mental health problem. Lecture Hours: 1 Laboratory Hours: 0

HUMSV 155 SOCIAL CLASS AND THE HELPING PROFESSIONS 3 HRS. (OC)
This course is an examination of how social class is defined in the American culture and the role it plays in an individual's view of self and world. Students will have an understanding of how social class dynamics may impact working with individuals in the helping professions through case studies, experiential learning, and literature review. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 156 YOUTH MENTAL HEALTH FIRST AID 1 HR. (OC)
This course will provide instruction in assisting a young person who may be in the early stages of developing a mental health problem or in a mental health crisis. Lecture Hours: 1 Laboratory Hours: 0

HUMSV 200 HUMAN SERVICES APPLICATIONS II 3 HRS. (OC)
This course introduces students to the skills and strategies essential to effective communication in paraprofessional positions. Students will gain practical experience using effective interaction techniques with at-risk populations and documentation skills needed in human services settings. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 205 GROUP DYNAMICS 3 HRS. (OC)
Prerequisite: HUMSV 110. A practical foundation will be laid for creating and leading groups within the helping professions. Grounded in theory, a strong focus will be on practice and skill development. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 212 UNDERSTANDING DEMENTIA 3 HRS. (OC)
In this course, students will learn about the types and characteristics of dementia, the relationship of dementia to other mental health disorders in older persons, care giving issues and concerns, and the roles of human services paraprofessionals working with older persons who are experiencing dementia and their families. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 213 ISSUES IN ABUSE 3 HRS. (OC)
This course teaches students about abuse and neglect of children, domestic violence, and abuse, neglect, and exploitation of older persons. Topics of discussion will include: the historical context of abuse, demographics of abuse, common myths about abuse, methods of investigating abuse, and cultural differences in abuse. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 215 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT 3 HRS. (TC)
Prerequisite: HUMSV 110. This course explores the dynamics of human behavior across the lifespan. It examines how various aspects of the social environment impact the functioning of individuals and subsequently determines the needs and resources required by the people being served within the field of human services. Lecture Hours: 3 Laboratory Hours: 0

HUMSV 250 HUMAN SERVICE INTERNSHIP 2 HRS. (OC)
Prerequisite: HUMSV 110, HUMSV 111, and HUMSV 200 all with a grade of “C” or better or department approval. This course discusses weekly seminar topics relevant to the laboratory component which occurs in selected community agencies under the supervision of both agency and college personnel. Lecture Hours: 1 Laboratory Hours: 3 or equivalent

HUMSV 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: HUMSV 110 with a grade of “C” or better and department approval. The course provides a student the opportunity to work on a specific project, research, or other specialized study related to individual academic needs. A written plan for the independent study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant information), and the project is carried out under the direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains filed within the department. The student also submits a final written report to the faculty member. Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent
Humanities

HUMAN 123 CLASSICAL HUMANITIES: BEGINNINGS 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is an
interdisciplinary study of literature, philosophy, the visual arts, and music in Western
civilization from the ancient to the early modern periods. It is designed to show the
inter-relations of the arts and to give students a broad cultural background.
Lecture Hours: 3 Laboratory Hours: 0

HUMAN 124 MODERN HUMANITIES: 1650-1900 (HF 903) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is an
interdisciplinary study of literature, philosophy, the visual arts, and music in Western
civilization between the early modern and the contemporary periods: the seventeenth,
eighteenth, and nineteenth centuries. It is designed to show the inter-relations of
the arts and to give students a broad cultural background.
Lecture Hours: 3 Laboratory Hours: 0

HUMAN 125 CONTEMPORARY HUMANITIES (HF 903) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is based on
a thematic-based interdisciplinary study of twentieth and twenty-first century literature,
philosophy, the visual arts, and music. It is designed to show the inter-relations of
the arts and to give students a broad cultural background.
Lecture Hours: 3 Laboratory Hours: 0

HUMAN 128 ART AND MUSIC (F9 900) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This interdisciplinary
course will survey the development of music and the visual arts during the major
episodes of Western Civilization. It is designed to provide students with a broad
cultural background, an appreciation of music and the visual arts, and an under-
standing of how they are related to each other and to the societies from which
they developed.
Lecture Hours: 3 Laboratory Hours: 0

HUMAN 250 EXPERIENCES IN ART AND MUSIC (F9 900) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is an
Interdisciplinary study of aesthetic expression in both the visual and the performing
arts, highlighting their inter-relationships and commonalities. It is designed to pro-
vide students with a broad cultural background through attendance at various music
performances and art galleries. Emphasis will be given to these experiences in art
and music and how they relate to each other and the world in which we live.
Lecture Hours: 1 Laboratory Hours: 4 or equivalent

Interior Design

INDSN 140 BASIC INTERIOR DESIGN 4 HRS. (TC)
This course is an introduction to Interior Design and stresses the application of the
elements and principles of design in space planning using knowledge of the basic
materials used in interiors. Drafting and presentation skills are taught.
Lecture Hours: 4 Laboratory Hours: 0

INDSN 141 HISTORY OF FURNITURE AND FURNISHINGS 4 HRS. (TC)
This lecture based course covers the history of furniture, architectural elements and
room design from the Prehistoric Era through Modernism. Knowledge of residential
and commercial projects of a particular historical style or blend of styles is taught
as well.
Lecture Hours: 4 Laboratory Hours: 0

INDSN 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: IND SN 140 with a grade of “C” or better and IND SN 141 with a grade of
“C” or better. This course provides a student an opportunity to investigate areas of
Interior Design not included in the course of study according to the individual’s
academic needs. The student must submit a formal written plan detailing the
project, number of credit hours assigned to it and the evaluative criteria that is to be
used. This project must be carried out under the direction of a faculty member. The
written plan is submitted to the dean/associate dean for approval and remains on
file within the department, together with a final written report submitted to the faculty
member by the student. This course can be repeated up to three times up to a
maximum of five hours semester credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

International Studies

INTST 130 THE SOCIETY AND CULTURE OF CHINA (S2 914N) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course introduces
students to the society and culture of China from its historical origins through the
present, with interdisciplinary perspectives including geography, population, politics,
economy, international relations, philosophy, religion, and the arts.
Lecture Hours: 3 Laboratory Hours: 0

INTST 132 LATIN AMERICAN HUMANITIES (HF 904N) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course helps
students understand the history, cultures, and societies of Latin America from
pre-Columbian times through the present.
Lecture Hours: 3 Laboratory Hours: 0

INTST 133 CULTURES AND CIVILIZATIONS OF SUB-SAHARAN AFRICA (HF 904N) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course
introduces students to the history, culture, and societies of sub-Saharan Africa
from its beginning through the present.
Lecture Hours: 3 Laboratory Hours: 0

INTST 134 INTRODUCTION TO MIDDLE EASTERN CULTURES (S2 918N) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course
introduces the student to the history, cultures, and societies of the Middle East
from pre-Islamic times through the present.
Lecture Hours: 3 Laboratory Hours: 0

INTST 140 GLOBAL ISSUES (S9 900) 3 HRS. (TC)
Prerequisite: COMPASS reading score of 81 or higher, or equivalent, or department
approval. This course will investigate current global issues from a variety of social
science perspectives, including sociology, anthropology, political science, history
and geography. Through class activities students will develop a more globally
informed perspective on the global issues of our day and gain an understanding
of how to apply various social science disciplines to a topic.
Lecture Hours: 3 Laboratory Hours: 0

Interpreter Preparation

IPP 110 AMERICAN SIGN LANGUAGE I 4 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or ENGL 110 or an
equivalent course with a grade of “C” or better. This is a beginning course in
American Sign Language. It introduces basic expressive and receptive ASL
vocabulary and linguistic principles. Topics covered include, but are not limited to,
classifiers, non-manual markers, ASL grammar rules, fingerspelling and numeric
concepts, and deaf culture. Students learn and implement approximately twelve
hundred ASL vocabulary terms.
Lecture Hours: 2 Laboratory Hours: 4

IPP 111 AMERICAN SIGN LANGUAGE II 4 HRS. (OC)
Prerequisite: IPP 110 with a grade of “C” or better, or department approval. This
course is a continuation of skills developed in IPP 110 (ASL I). IPP 111 (ASL II)
will provide students the opportunity to continue to expand their knowledge of
vocabulary; approximately one thousand new signs will be covered. Students will
continue to learn grammatical features of American Sign Language. Continued
skill building of expressive and receptive Fingerspelling skills are included. Peer
and self-assessment skills are emphasized.
Lecture Hours: 2 Laboratory Hours: 4

IPP 112 AMERICAN SIGN LANGUAGE III 3 HRS. (OC)
Prerequisite: IPP 111, IPP 118, and IPP 121 with a grade of “C” or better, or
department approval. This course is a continuation of skills developed in IPP 111
(ASL II). IPP 112 (ASL III) seeks to enhance student performance skills in expressive
production and reception recognition and comprehension of ASL vocabulary and
source messages. It provides a linguistic bridge into interpreting courses by focus-
ing on easily confused signs and specialized sign vocabulary. Progress in the area
of expressive and receptive Fingerspelling skills is also emphasized.
Lecture Hours: 2 Laboratory Hours: 2

IPP 115 DEAF CULTURE I 3 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, or ENGL 110 with
a grade of “C” or better or department approval. This course is designed for students
who have no previous knowledge of the deaf community. It introduces the students
to the basic essentials of deaf culture. Topics in the course include the history,
language, attitudes, norms, behaviors, values, and traditions of deaf people.
Students will also gain an awareness of the perspectives between the cultural
and medical model of deafness.
Lecture Hours: 3 Laboratory Hours: 0

IPP 118 AMERICAN SIGN LANGUAGE: FINGERSPELLING 2 HRS. (OC)
and numbering I
Prerequisite: IPP 110, 115, and 120 all with a grade of “C” or better, or department
approval. This skills-based course reinforces students’ abilities to use the American
manual alphabet (fingerspelling). Concentration is on receptive and expressive skills,
involved in the production of the American manual alphabet, lexicalized signs, and
numbers. Extensive drills and practice, with an emphasis on real-world situations,
are incorporated.
Lecture Hours: 1 Laboratory Hours: 2
Prerequisite: IPP 110, 115, and 120 all with a grade of "C" or better, or department approval. This course will focus on the interpreter's ethical and professional decision-making according to the RID Code of Professional Conduct, the EIPA Code of Ethics, and the Demand-Control Schema as they apply to working situations within the religious, legal, performing arts, mental health, medical, rehabilitation, social services settings. In-depth discussions will assess various interpreting situations and how to implement problem-solving strategies. This course will also present various occupational settings where interpreters work and focus on agencies that provide services to Deaf and hard of hearing individuals and professional interpreters. Students will continue to observe working interpreters in professional environments. Discussions of professionalism will also be continued in this course.

Lecture Hours: 3 Laboratory Hours: 0

IPP 210 AMERICAN SIGN LANGUAGE IV 3 HRS. (OC)
Prerequisite: IPP 210, 216, 220, and 230 all with a grade of "C" or better, or department approval. This course is a continuation of skills developed in IPP 211 (ASL IV). It will provide students the opportunity to expand their comprehension of medium length stories and narratives. Information on cultural values and attitudes as they relate to the deaf community will be examined. Students will be given the opportunity to express self-generated stories, narratives, and dialogues of medium length in American Sign Language.

Lecture Hours: 2 Laboratory Hours: 2

IPP 211 AMERICAN SIGN LANGUAGE V 3 HRS. (OC)
Prerequisite: IPP 210, 216, 220, and 230 all with a grade of "C" or better, or department approval. This course is a continuation of skills developed in IPP 210 (ASL IV). It will provide students the opportunity to expand their comprehension of medium length stories and narratives. Information on cultural values and attitudes as they relate to the deaf community will be examined. Students will be given the opportunity to express self-generated stories, narratives, and dialogues of medium length in American Sign Language.

Lecture Hours: 2 Laboratory Hours: 2

IPP 212 OCCUPATIONAL INTERPRETING 3 HRS. (OC)
Prerequisite: IPP 210, 216, 220, and 230 all with a grade of "C" or better, or department approval. This course will focus on the roles of the professional interpreter and employment venues including educational, medical, mental health, rehabilitation, social services, business, government, religious, and performing arts settings. Professional certification systems and processes are explored, and personal career goals are constructed. Options to work as an employee versus an independent contractor are analyzed.

Lecture Hours: 3 Laboratory Hours: 0

IPP 220 INTERPRETING I 3 HRS. (OC)
Prerequisite: IPP 112 a grade of "C" or better and or department approval. This course focuses on the acquisition of the interpreting process and introduces the skills necessary to achieve message equivalency when interpreting spoken English messages into American Sign Language or Conceptually Accurate Signed English (CASE). It provides in-class, hands-on experiences of source text analysis, simultaneous sign language interpreting/transliterating and peer and self-analysis.

Lecture Hours: 1 Laboratory Hours: 4

IPP 221 INTERPRETING II 3 HRS. (OC)
Prerequisite: IPP 210, 216, 220, and 230 all with a grade of "C" or better, or department approval. This course is a continuation of IPP 220 and is designed to expand students' skills to achieve message equivalency in simultaneously interpreting spoken English messages into American Sign Language or transliterating into Conceptually Accurate Signed English (CASE). Students continue to focus on source text analysis and peer and self-analysis. The students will increase skills in sign translation of written texts. Emphasis will be placed on expanding sign vocabulary of various employment settings.

Lecture Hours: 1 Laboratory Hours: 4

IPP 230 VOICE INTERPRETING I 3 HRS. (OC)
Prerequisite: IPP 112 with a grade of "C" or better or department approval. This course will assist students with the process of taking a signed message and conveying it into spoken English. It will focus on the receptive interpreting process, including voicing techniques and lip-reading skills, while using the correct register and incorporating vocal expression and appropriate word choices.

Lecture Hours: 1 Laboratory Hours: 4
LIB 111  INTRODUCTION TO RESEARCH  1 HR. (TC)
This course provides instruction in the foundational skills for quality research in any academic or real world venue. As well as instructing students on how to use the Illinois Central College Library, this course will focus on the fundamental skills the information fluent person should know such as how to rephrase a question for best results, how to determine quality results, how to avoid plagiarism and copyright issues, and how to best utilize the open world wide web for research purposes.
Lecture Hours: 1  Laboratory Hours: 0

LIB 114  AUDIOVISUAL EQUIPMENT OPERATION  2 HRS. (OC)
This course stresses practical experience in operating traditional and current AV equipment to deliver effective, comprehensive service support. Emphasis on equipment operation will also include introduction to Internet services, enriched media, and desktop applications.
Lecture Hours: 1  Laboratory Hours: 2

LIB 125  CATALOGING AND CLASSIFICATION  3 HRS. (OC)
This course is designed to introduce the student to current practices in cataloging and classification of library materials, both print and non-print. A practical study is made of the Anglo-American Cataloging Rules, Dewey Decimal Classification, and Sears Subject Headings. Emphasis is placed on cataloging decisions for the online environment and shared cataloging.
Lecture Hours: 2  Laboratory Hours: 2

LIB 127  MARC RECORD AND TECHNICAL PROCESSING  3 HRS. (OC)
Prerequisite: LIB 125 with a grade of "C" or better. This course is designed to enable the student to use bibliographic utilities for copy cataloging, to apply machine readable catalog (MARC) coding to cataloging records, and to be able to process and maintain library materials.
Lecture Hours: 2  Laboratory Hours: 2

LIB 200  INTRODUCTION TO CHILDREN'S/YOUTH SERVICES IN LIBRARIES  3 HRS. (OC)
This course introduces students to the types of youth services offered in public and school libraries for children from birth through 12th grade. The course will examine the skills needed for planning, executing, and analyzing youth services in light of current practices and challenges. Topics include programming, censorship, reader's advisory, reference, story telling, and the role of the Library Technical Assistant.
Lecture Hours: 3  Laboratory Hours: 0

LIB 210  REFERENCE  3 HRS. (OC)
This course teaches the student the criteria for evaluation and the methods of use for basic information sources, both print and electronic. Topics covered include reference interviewing, search strategy, choice of source material, Boolean searching, and World Wide Web browsers. Students gain experience in using these materials to answer reference questions.
Lecture Hours: 2  Laboratory Hours: 2

LIB 216  INTRODUCTION TO COLLECTION DEVELOPMENT  3 HRS. (OC)
This course is designed to introduce the student to library collection development, focusing on the acquisition of materials, both book and non-book. Topics covered include bibliographic search tools, ordering, receiving and accounting procedures, selection policy, policy development, copyright, and automated acquisitions.
Lecture Hours: 3  Laboratory Hours: 0

LIB 222  SPECIAL TOPICS FOR LIBRARY TECHNICAL ASSISTANTS  1 HR. (OC)
This course will cover various issues of concern to Library Technical Assistants. The content of these courses will cover a variety of topics in-depth. This course is repeatable if the topic and content are different. Special topics that will be taught include: (1) introduction to multi-type libraries (health, law, business, and school libraries), (2) library management (catering fundraising, marketing, e-rate, budgeting, scheduling, supervising, hiring and firing staff, and building maintenance), (3) special collections and archives (topics discussed would include managing special collections, working with archival materials, preservation of materials, and book repair), and (4) electronic resource management (the management of electronic resources, selection and de-selection of materials, dealing with vendors, maintaining statistics, and record keeping). This course is repeatable up to three times.
Lecture Hours: 1 - 3  Laboratory Hours: 0

LIB 231  INTRODUCTION TO PATRON SERVICES  3 HRS. (OC)
This course is designed to provide a basic understanding of the operations of library public services departments. Emphasis will be on library organization and policies, circulation, interlibrary loan, security, collection management, information services, and public relations and programs.
Lecture Hours: 3  Laboratory Hours: 0

LIB 250  LIBRARY PRACTICUM  1 HR. (OC)
Prerequisite: Completion of required Library Technology courses or department approval. This course provides supervised work experience in a public, academic, special or school library. Emphasis is on applying knowledge gained in course work to practical on-the-job situations. The student has training in various aspects of librarianship in order to increase knowledge and practical experience.
Lecture Hours: 0  Laboratory Hours: 5 - 15 or equivalent

LIB 275  INTRODUCTION TO LIBRARY PRACTICUM  1 HR. (OC)
This course is designed to introduce and orient the student to the practical aspects of the library environment. Emphasis will be placed on work experience in the library setting. The course will also provide opportunities for the student to observe and participate in the delivery of library services.
Lecture Hours: 1  Laboratory Hours: 0

Lecture Hours: 3  Laboratory Hours: 0

Literature

LIT 110  INTRODUCTION TO LITERATURE (H3 900)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course, which offers the study and discussion of fiction, poetry, and drama, is designed to enhance the student's ability to read literature analytically with keener understanding and heightened appreciation of content and form.
Lecture Hours: 3  Laboratory Hours: 0

LIT 111  THE SHORT STORY AND THE NOVEL (H3 901)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course of extensive reading in prose fiction is designed to enhance the student's ability to read the short story and the novel analytically with keener understanding and heightened appreciation of content and form.
Lecture Hours: 3  Laboratory Hours: 0

LIT 115  MYTHOLOGY (H9 901)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is designed to acquaint the student with the origin and development of classical myths that have greatly influenced modern culture.
Lecture Hours: 3  Laboratory Hours: 0

LIT 117  INTRODUCTION TO POETRY (H3 903)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course introduces the student to poetry in English, the variety of its forms and themes, and methods of interpretation.
Lecture Hours: 3  Laboratory Hours: 0

LIT 120  THE BIBLE AS LITERATURE (H5 901)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course includes extensive reading of major sections of the Bible. It is designed to enable the student to read the Bible as a literary work, understand some of its major stories, themes, and genres, and become more aware of the significance of Biblical allusions in other works of literature and art.
Lecture Hours: 3  Laboratory Hours: 0

LIT 122  LITERATURE OF ETHNIC AMERICA (H3 910D)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This introductory course provides a literary and cultural view of traditions of some major racial and cultural minority groups. The student will develop an understanding of experiences relevant to minority writings. As a significant part of the American cultural and literal heritage, there are some significant eras that reinforce the themes, style, forms, and attitudes presented by minority writers.
Lecture Hours: 3  Laboratory Hours: 0

LIT 124  NON-WESTERN LITERATURE (H3 908N)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course of extensive reading in literature is designed to enhance the student's ability to read and analyze representative masterpieces from a variety of nationalities and epochs. Course introduces students to literature in English or in English translation by writers from non-Western cultures such as Asian, South Asian, African, Caribbean, Middle-Eastern, Pacific Islander, or Latin American. Content includes social, historical, and cultural contexts of literary works; relationship of these writers to literary traditions; terminology and methods of literary analysis and evaluation.
Lecture Hours: 3  Laboratory Hours: 0

LIT 212  BRITISH LITERATURE: BEGINNINGS TO 1800 (H3 912)
Prerequisite: Approved reading placement score, or equivalent. This course is a survey of representative works illustrating the development of British literature from its beginnings to 1800, with an emphasis on understanding major literary movements in relation to their intellectual, social, and political contexts.
Lecture Hours: 3  Laboratory Hours: 0

LIT 213  BRITISH LITERATURE: 1800 TO THE PRESENT (H3 913)
Prerequisite: Approved reading placement score, or equivalent. This course is a survey of representative works illustrating the development of British literature from 1800 to the present, with an emphasis on understanding major literary movements in relation to their intellectual, social, and political contexts.
Lecture Hours: 3  Laboratory Hours: 0

LIT 214  SHAKESPEARE (H3 905)  3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent or ENGL 110 with a grade of "C" or better. This course examines a number of Shakespeare's plays intensively as illustrations of different phases of his work.
Lecture Hours: 3  Laboratory Hours: 0

LIT 215  AMERICAN LITERATURE: BEGINNINGS TO 1865 (H3 914)
Prerequisite: Approved reading placement score, or equivalent. This course examines American literature from its beginnings to 1865.
Lecture Hours: 3  Laboratory Hours: 0
Machine Trades

**MACTR 110 PRINT READING - MECHANICAL** 3 HRS. (OC)
This course is designed to familiarize the student with manufacturing and engineering processes and materials through the study of mechanical blueprint reading. Drawings studied include: orthographic projection, sections, auxiliary views, sub- and assembly-prints. Emphasis is placed on processing requirements to attain part-function and tolerances specified. Problems which will enable students to develop an understanding of commonly accepted industrial design, and machining standards and practices will be assigned.
Lecture Hours: 3 Laboratory Hours: 0

**MACTR 121 MACHINE TOOL OPERATION I** 3 HRS. (OC)
This course emphasizes safety in construction and correct handling of hand tools, layout tools, some precision and limited precision layout tools. The student is introduced to machine nomenclature and basic tool changes and set-up. The student is required to make projects following an operation sheet with detailed information outlining set-up, performance of operations, speeds, feeds and tool changes.
Lecture Hours: 1 Laboratory Hours: 4

**MACTR 122 MACHINE TOOL OPERATION II** 3 HRS. (OC)
Prerequisite: MACTR 121 with a grade of "C" or better or department approval. This course is designed to further experience the use of machine tools. The student is introduced to precision tools and the use of attachments. Selected projects help develop proficiency on machine tools while maintaining close tolerance and achieving specified surface finishes.
Lecture Hours: 1 Laboratory Hours: 4

**MACTR 123 MACHINE TOOL OPERATION III** 2 HRS. (OC)
Prerequisite: MACTR 122 with a "C" or better or department approval. This course will instruct the student in the safe and correct use of specialized operations dealing with making machine parts requiring assembly and use of fixtures. The student will make temporary fixtures and select feeds, speed, tools, and operations for efficient machining.
Lecture Hours: 1 Laboratory Hours: 3

**MACTR 124 SPECIAL MACHINING SKILLS** 2 HRS. (OC)
Prerequisite: MACTR 123 with a grade of "C" or better or departmental approval. This course is designed to give practice in making projects requiring a high degree of skill in machining operations. The student is required to demonstrate accuracy and efficiency in the production of close tolerance tooling and jigs and fixtures.
Lecture Hours: 1 Laboratory Hours: 3

**MACTR 221 MACHINING INTERNSHIP** 1 HR. (OC)
Prerequisite: Completion of MACTR 122 and NCTK 212 with a grade of "C" or better. This internship course is a cooperative project between the College and potential apprentice employers and is designed to provide industrial experience in the fields of precision machining, die making, or mold making. The student will be assigned a wide range of related on-the-job machining experiences with a local metalworking manufacturing firm.
Lecture Hours: 0 Laboratory Hours: 8

Management

**MGMT 113 PRINCIPLES OF MANAGEMENT** 3 HRS. (TC)
This introductory management course is designed to acquaint and orient students to the role of the various levels of management in public- and private-sector organizations. Emphasis is placed on the management functions of planning, organizing, leading, and controlling. Principles of successful management practice are explored.
Lecture Hours: 3 Laboratory Hours: 0

**MGMT 114 PRINCIPLES OF SUPERVISION** 3 HRS. (OC)
If there is one constant in today's business world, it is change. Wholesale changes in technologies, in organizational and competitive structure, in the social, economic, and political environments - all seem to be accelerating more rapidly than before. To operate successfully in this changing environment, organizations need supervisors with the managerial skills and creativity to turn uncertainty into opportunity. This class will equip students with the skills they need to succeed as supervisors in the present and future business world. While learning important supervisory management concepts, they will also learn how to be supervisors - how to apply the principles of supervision in the real world.
Lecture Hours: 3 Laboratory Hours: 0

Marketing

**MKTG 112 PRINCIPLES OF MARKETING** 3 HRS. (TC)
This course studies the business activities involved in planning, pricing, promoting, and distributing want-satisfying goods and services to present and potential customers.
Lecture Hours: 3 Laboratory Hours: 0

**MKTG 115 RETAILING** 3 HRS. (OC)
This course is a study of topics which include: development and present status of the retailing structure, analysis of major store functions, buying, selling, advertising, sales promotion, store operation activities, accounting control, and employment opportunities.
Lecture Hours: 3 Laboratory Hours: 0
MCOMM 220 SCRIPTWRITING 3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent and MCOMM 110 or MCOMM 113 or department approval. This course is an introduction to the principles and practices of writing for television, radio, film, and audio/video Internet content. Students will learn how to write properly-formatted and effective scripts for commercials, drama, comedy, news and documentaries.  
Lecture Hours: 3  Laboratory Hours: 0  

MCOMM 224 HISTORY OF MOTION PICTURES (F 2909) 3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent. A study of the historical development of film as an international mass communication medium and the production innovations that have impacted filmmaking as an art form.  
Lecture Hours: 3  Laboratory Hours: 0  

MCOMM 230 INTERNET AND MOBILE MEDIA PRODUCTION 3 HRS. (TC)  
Prerequisite: MCOMM 110 with a grade of "C" or better or department approval. This course is an introduction to the technical, creative, and communication skills involved in online video, podcasting, blogging, tweeting and use of social media as means of publishing mass media news, entertainment, and promotional content to the Internet and mobile devices. At the end of the course, students will have a website portfolio of their work.  
Lecture Hours: 3  Laboratory Hours: 0  

MCOMM 260 MASS COMMUNICATION INTERNSHIP II 1 HR. (TC)  
Prerequisite: MCOMM 160 with a grade of "C" or better. This course is designed for students wishing to gain on-site educational work experience. The student will work an arranged number of hours per week at a radio or TV station or other appropriate location under the supervision of a mass communication professional.  
Lecture Hours: 0  Laboratory Hours: 5 - 15 or equivalent  

Mass Communication  
MCOMM 110 INTRODUCTION TO MASS MEDIA (MC 911) 3 HRS. (TC)  
This course is an overview of the nature of mass communication and the characteristics, functions and impact of the multiple forms of mass media.  
Lecture Hours: 3  Laboratory Hours: 0  

MCOMM 113 INTRODUCTION TO RADIO, TV, AND EMERGING MEDIA (MC 914) 3 HRS. (TC)  
A survey of the radio and television industries and the integration of electronic media with the Internet and digital media.  
Lecture Hours: 3  Laboratory Hours: 0  

MCOMM 140 SPORTS MEDIA AND SOCIETY 3 HRS. (TC)  
This course is not a forum for exchanging the latest scores or talking about last night’s big game, rather it is a course to develop critical-thinking skills about the sports media and its role in American society.  
Lecture Hours: 3  Laboratory Hours: 0  

MCOMM 160 MASS COMMUNICATION INTERNSHIP I 1 HR. (TC)  
Prerequisite: Department approval. This course is designed to provide the student with an on-site educational work experience. The student will work an arranged number of hours per week at a radio or TV station or other appropriate location under the supervision of a mass communication professional. At least five work hours per week per credit hour received or equivalent (summer) plus weekly meetings with a college supervising professor.  
Lecture Hours: 0  Laboratory Hours: 5 - 15 or equivalent  

MCOMM 214 TV AND MOTION PICTURE PRODUCTION 3 HRS. (TC)  
Prerequisite: MCOMM 110 with a grade of "C" or better or MCOMM 113 with a grade of "C" or better. This course is a "hands-on" introduction to the creative, technical and collaborative process of making television programming, films and corporate video.  
Lecture Hours: 2  Laboratory Hours: 3  

MCOMM 215 MEDIA PERFORMANCE (MC 918) 3 HRS. (TC)  
In this course, students develop and apply proper communication skills and techniques for performing on radio, television, podcasts or other audio/visual media.  
Lecture Hours: 2  Laboratory Hours: 3  

MCOMM 217 AUDIO PRODUCTION 3 HRS. (TC)  
Prerequisite: MCOMM 110, MCOMM 113 or MM 140 or department approval. This course is an introduction to audio recording and production techniques for broadcast, multimedia, Internet and motion picture applications.  
Lecture Hours: 2  Laboratory Hours: 3  

MKTG 200 ADVERTISING 3 HRS. (OC)  
This course will study all forms of paid, nonpersonal communication by which an advertiser presents and promotes ideas, goods, and services. The course will include coverage of the economic and social role of advertising, customer research, selection of advertising appeals, media decisions, the creative process, evaluative research, and retail advertising.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 201 SALES 3 HRS. (OC)  
This course presents basic principles underlying the sales process. The basic philosophy is to promote understanding of the salesperson’s obligation to self, the company, the customer, and society.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 202 CONSUMER MARKETING 3 HRS. (OC)  
Prerequisite: MKTG 112 with a grade of "C" or better. This course provides a comprehensive understanding of consumer buying behavior that guides marketing management decisions. The focus of the course will be directed toward the application of principles, concepts, and activities that influence buying transactions and generate consumer satisfaction.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 207 EVENT PLANNING 3 HRS. (OC)  
This course presents the basic principles underlying event planning. Topics covered include: professional meeting management, including conventions, trade shows, special event planning, meeting planners, meeting sponsors, meeting suppliers, facilities, and meeting service providers.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 260 MARKETING INTERNSHIP 3 HRS. (OC)  
Prerequisite: Admission to the Marketing Program and department approval, and the completion of twelve semester hours of business or business-related program courses. This course involves student trainees who are employed at an approved training station with a program of training scheduled by joint agreement of the student, supervisor, and program coordinator. Special assignments including in-house projects, case studies, and/or supplementary reports are required. This course may be repeated two times.  
Lecture Hours: 1  Laboratory Hours: 15 or equivalent  

Mass Communication  
MCOMM 215 MEDIA PERFORMANCE (MC 918) 3 HRS. (TC)  
In this course, students develop and apply proper communication skills and techniques for performing on radio, television, podcasts or other audio/visual media.  
Lecture Hours: 2  Laboratory Hours: 3  

MCOMM 217 AUDIO PRODUCTION 3 HRS. (TC)  
Prerequisite: MCOMM 110, MCOMM 113 or MM 140 or department approval. This course is an introduction to audio recording and production techniques for broadcast, multimedia, Internet and motion picture applications.  
Lecture Hours: 2  Laboratory Hours: 3  

MKTG 200 ADVERTISING 3 HRS. (OC)  
This course will study all forms of paid, nonpersonal communication by which an advertiser presents and promotes ideas, goods, and services. The course will include coverage of the economic and social role of advertising, customer research, selection of advertising appeals, media decisions, the creative process, evaluative research, and retail advertising.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 201 SALES 3 HRS. (OC)  
This course presents basic principles underlying the sales process. The basic philosophy is to promote understanding of the salesperson’s obligation to self, the company, the customer, and society.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 202 CONSUMER MARKETING 3 HRS. (OC)  
Prerequisite: MKTG 112 with a grade of "C" or better. This course provides a comprehensive understanding of consumer buying behavior that guides marketing management decisions. The focus of the course will be directed toward the application of principles, concepts, and activities that influence buying transactions and generate consumer satisfaction.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 207 EVENT PLANNING 3 HRS. (OC)  
This course presents the basic principles underlying event planning. Topics covered include: professional meeting management, including conventions, trade shows, special event planning, meeting planners, meeting sponsors, meeting suppliers, facilities, and meeting service providers.  
Lecture Hours: 3  Laboratory Hours: 0  

MKTG 260 MARKETING INTERNSHIP 3 HRS. (OC)  
Prerequisite: Admission to the Marketing Program and department approval, and the completion of twelve semester hours of business or business-related program courses. This course involves student trainees who are employed at an approved training station with a program of training scheduled by joint agreement of the student, supervisor, and program coordinator. Special assignments including in-house projects, case studies, and/or supplementary reports are required. This course may be repeated two times.  
Lecture Hours: 1  Laboratory Hours: 15 or equivalent  

Massage Therapy  
TM 100 INTRODUCTION TO MASSAGE THERAPY 1 HR. (OC)  
This course is designed to introduce students to the profession of massage therapy. An introduction to the basic principles and techniques of massage therapy will be presented. Basic Swedish Massage therapy strokes will be demonstrated and practiced as well as draping and use of oils and lotions.  
Lecture Hours: 1  Laboratory Hours: 0.5 or equivalent  

TM 111 FUNDAMENTAL MASSAGE TECHNIQUES 2 HRS. (OC)  
Prerequisite: Admission to the Massage Therapist Program; TM 110 and BIOL 140 with a grade of "C" or better. Concurrent enrollment in CPR for Healthcare Professionals. This course is a presentation of classic Swedish Massage to relax the musculature as well as increase the blood and lymphatic flow throughout the body. In addition to basic traditional massage techniques, good posture, table mechanics, touch and pressure sensitivity, and professional conduct, such as draping, are practiced. The history of massage, benefits, contraindications, and therapist self-care issues will be discussed.  
Lecture Hours: 1  Laboratory Hours: 3 or equivalent  

TM 112 APPLIED ANATOMY AND PHYSIOLOGY FOR THE BODYWORKER 3 HRS. (OC)  
Prerequisite: Admission to Therapeutic Massage Program and TM 110 and BIOL 140 with a grade of "C" or better. This is an extensive course specifically designed for massage therapy students. It includes a thorough examination of the following: muscles (their origins, insertions, and actions), bones, nerves, and functions of the body’s systems. Class time is divided between lecture and hands-on experience to enable the students to integrate the material fully, including building the muscles on a plastic model. Emphasis is placed on studying and analyzing human structure and its effect on body functions.  
Lecture Hours: 2  Laboratory Hours: 3 or equivalent  

TM 113 PROFESSIONAL ISSUES FOR THE BODYWORKER 2.5 HRS. (OC)  
Prerequisite: Admission to Therapeutic Massage Program; BIOL 140 and TM 110 with a grade of "C" or better. In this course the professional practice of massage therapy involves both providing a service to clients and working within a community of health care practitioners. An introduction to the business side of massage therapy includes topics of interest to the small business owner, as well as to the employees and independent worker.  
Lecture Hours: 2.5  Laboratory Hours: 0  

TM 114 PATHOLOGY, DOCUMENTATION, AND TERMINOLOGY FOR THE BODYWORKER 2.5 HRS. (OC)  
Prerequisite: Admission to Therapeutic Massage Program; BIOL 140 and TM 110 with a grade of "C" or better. In this course students will receive an overview of pathological conditions commonly confronted by massage therapists, medical terminology by which to recognize such conditions, and the procedures to document the information.  
Lecture Hours: 2.5  Laboratory Hours: 0
Mathematics

MATH 092  PRE ALGEBRA  3 HRS. (BEC)
Prerequisite: Placement into MATH 092 is according to placement test scores or on a voluntary basis. This course (formerly Introduction to Mathematics) is designed for students who need to review basic arithmetic and prealgebra skills before taking Elementary Algebra (MATH 094 - formerly MAT 104 and also MAT 094). Topics include basic operations and applications of whole numbers, fractions, decimals, signed numbers and an introduction to algebra. As calculators are not permitted in MATH 092 except for enrichment purposes, students must be able to add, subtract, multiply and divide without the aid of a calculator. Students who have completed one year of high school algebra should consider enrolling in Elementary Algebra.
Lecture Hours: 3 Laboratory Hours: 0
MATH 115 COLLEGE ALGEBRA 4 HRS. (TC)
Prerequisite: MATH 098 with a grade of "C" or better or an appropriate score on the math placement test. This course emphasizes both algebraic and graphical approaches to college algebra. Topics include functions, relations, and inverses with emphasis on polynomial, rational, exponential, and logarithmic functions; systems of equations and inequalities; and theory of equations.
Lecture Hours: 4  Laboratory Hours: 0

MATH 120 COLLEGE TRIGONOMETRY 3 HRS. (TC)
Prerequisite: MATH 095 and MATH 098 with a grade of "C" or better or equivalent. This course includes a study of the trigonometric functions and their graphs, radian measure, inverse trigonometric functions, solutions of triangles, trigonometric identities and equations, and roots of complex numbers.
Lecture Hours: 3  Laboratory Hours: 0

MATH 122 DISCRETE MATHEMATICS I (M1 905 CS 915) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 115 with a grade of "C" or better or equivalent or department approval. This course covers directed and undirected graphs including trees and routing; combinatorics and counting principles; logic; functions, relations and sets; Boolean Algebra and switching theory; and finite state machines. Application problems from the field of computer science will be studied such as speed of sorting, database management, and routing in networks.
Lecture Hours: 3  Laboratory Hours: 0

MATH 130 TECHNICAL ALGEBRA AND TRIGONOMETRY 5 HRS. (OC)
Prerequisite: MATH 098 and MATH 098 with a grade of "C" or better, or MATH 106 with a grade of "C" or better. This course is designed for students in their last year of high school algebra, one year of high school geometry or an appropriate score on the math placement test. This course includes the topics: approaches to problem solving, dimensional analysis, the basic use of the calculator and computer, selected topics from college algebra, trigonometry, analytic geometry, and statistics. Included will be systems of equations, basic trigonometric functions, right triangle solutions, two dimensional vectors, common and natural logarithms, and basic conic sections. Scientific calculators and computer software are used.
Lecture Hours: 5  Laboratory Hours: 0

MATH 134 FINITE MATH (M1 906) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 115 with a grade of "C" or better or equivalent. This course covers topics from college algebra with emphasis on systems of linear equations and inequalities, matrix theory, linear programming, probability, statistics, and mathematics of finance. Application problems are chosen from the fields of business and social science.
Lecture Hours: 4  Laboratory Hours: 0

MATH 135 CALCULUS FOR BUSINESS AND SOCIAL SCIENCES (M1 900B) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 115 with a grade of "C" or better. This course covers the basic ideas of calculus including limits; differentiation of polynomial, rational, logarithmic, and exponential functions; partial derivatives and applications; maxima and minima of functions; and techniques of integration including substitution and integration by parts. Application problems are chosen from the fields of business and social science.
Lecture Hours: 4  Laboratory Hours: 0

MATH 137 TECHNICAL CALCULUS 3 HRS. (OC)
Prerequisite: MATH 130 with a grade of "C" or better or equivalent. This course covers topics which include: functions, limits, derivatives, anti-derivatives, integrals, and applications of the definite integral. Emphasis is placed on the physical significance of the derivative and integral to enable the student to relate to the basic underlying mathematical principles.
Lecture Hours: 2  Laboratory Hours: 3

MATH 165 PRECALCULUS 5 HRS. (TC)
Prerequisite: MATH 098 with a grade of C or better, or an appropriate score on the math placement test. NOTE: If a student has not previously completed a high school course in trigonometry, enrollment in the separate courses MATH 115 and MATH 120 is recommended. Students may not earn credit for both MATH 115/120 and MATH 165. This course is intended to provide a solid foundation in the skills of algebra and trigonometry that are required for success in elementary calculus. Algebraic topics will include: properties of functions and graphs that are commonly used in calculus, conic sections, solving equations and higher order systems of equations, and sequences and series. Trigonometry topics will include: numerical aspects, including Laws of Sines and Cosines; trigonometry identities and equation solving; powers and roots of complex numbers; and radian measure and conversion. This course will make use of current technology.
Lecture Hours: 5  Laboratory Hours: 0

MATH 190 MATHEMATICAL REASONING FOR THE ELEMENTARY TEACHER I 3 HRS. (TC)
Prerequisite: MATH 098 with a grade of "C" or better and MATH 098 with a grade of "C" or better or appropriate math placement test scores or department approval. This course is designed to deepen mathematical understanding by providing opportunities to develop problem-solving and reasoning skills. In order to develop depth of understanding, the course concentrates on problems involving place value, whole numbers, decimals, fractions, ratios, and proportions. Note: Successful completion of MATH 115 or appropriate placement score is strongly recommended prior to enrollment in MATH 190 as it is a required prerequisite for the MATH 201 Mathematics for the Elementary Teacher II course.
Lecture Hours: 3  Laboratory Hours: 0

MATH 200 MATHEMATICS FOR ELEMENTARY TEACHERS I 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. MATH 095 with a grade of "C" or better and MATH 098 with a grade of "C" or better or appropriate math placement test scores for both courses or department approval. This course is designed to reinforce and strengthen the prospective elementary teacher's knowledge of the structure of the real number system and the mathematical operations that can be performed within that system. The purpose of this course is to also increase the student's knowledge and understanding of the mathematical content which is taught in elementary schools. Mathematical reasoning and problem solving are consistent themes throughout the course. Note: MATH 115 is strongly recommended as it is a required prerequisite for the MATH 201 Mathematics for the Elementary Teacher II course.
Lecture Hours: 3  Laboratory Hours: 0

MATH 201 MATHEMATICS FOR ELEMENTARY TEACHERS II (M1 903) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 115 with a grade of "C" or better or appropriate math placement test score, and MATH 190 or MATH 200 with a grade of "C" or better or department approval. This course is designed to provide a survey and to teach mathematical concepts needed to teach a modern mathematical program in grades K-9 and prepare teachers and prospective teachers for future changes in mathematics curricula. The course includes a study of logic and problem-solving, graphing and analysis of relations, functions and statistical data, non-metric and informal geometry, estimating and measuring, the metric system, and use of calculating devices.
Lecture Hours: 2  Laboratory Hours: 2

MATH 211 STATISTICAL ANALYSIS (M1 902) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 095 and MATH 115 with a grade of "C" or better or equivalent. This course includes the study of frequency distribution, measures of central tendency, probability, statistical decision making, testing hypotheses, analysis of variance, estimating and predicting.
Lecture Hours: 3  Laboratory Hours: 2

MATH 222 CALCULUS AND ANALYTIC GEOMETRY I (M1 9001 MTH 901) 5 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent; MATH 115 and MATH 120 with grades of "C" or better, or MATH 165 with a grade of "C" or better, or an appropriate score on the math placement test or equivalent. This is the first course of a three-semester sequence in Analytic Geometry and Calculus. The course includes the analytic geometry of lines and circles, limits and continuity of functions of one variable with an introduction to the derivative and the definite integral along with applications and the fundamental theorem of calculus.
Lecture Hours: 5  Laboratory Hours: 0

MATH 223 CALCULUS AND ANALYTIC GEOMETRY II (M1 9002 MTH 902) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 222 with a grade of "C" or better or equivalent. This course is a continuation of MATH 222 and includes the analytic geometry of conic sections, the study of calculus as related to transcendental functions including trigonometric, logarithmic, exponential and hyperbolic functions and their inverses, techniques of integration, indeterminate forms, improper integrals, and infinite series and Taylor's theorem.
Lecture Hours: 4  Laboratory Hours: 0

MATH 224 CALCULUS AND ANALYTIC GEOMETRY III (M1 9003 MTH 903) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and MATH 223 with a grade of "C" or better or equivalent. This course is a continuation of MATH 223 and includes parametric curves, vectors in two and three dimensions, vector valued functions, curves and surfaces in space, curvature, acceleration, quadric surfaces, functions of several variables, partial derivatives and applications, Lagrange multipliers, multiple integrals and integration with polar, cylindrical, and spherical coordinates.
Lecture Hours: 4  Laboratory Hours: 0

MATH 230 LINEAR ALGEBRA 3 HRS. (TC)
Prerequisite: MATH 223 with a grade of "C" or better. This course is a study of finite dimensional vectors, matrices, linear equations, vector spaces and subspaces, linear transformations, determinants and appropriate applications.
Lecture Hours: 3  Laboratory Hours: 0

MATH 250 DIFFERENTIAL EQUATIONS (MTH 912) 3 HRS. (TC)
Prerequisite: MATH 223 with a grade of "C" or better. This course includes first order (e.g., separable, linear, exact) with applications and simple higher order ordinary differential equations; linear independence and the Wronskian; linear differential
equations with constant coefficients along with systems and applications; variation of parameters and undetermined coefficients; solution by means of Laplace transforms, solutions of partial differential equations, solution by power series and numerical methods. Prior knowledge of the basic concepts of physics is recommended.

Lecture Hours: 3 Laboratory Hours: 0

Mechanical Technology

**MECTK 106 BASIC DRAFTING 2 HRS. (OC)**
This introductory course in drafting is for students who either did not have a previous drafting course or wish a review of previous work taken.

Lecture Hours: 1 Laboratory Hours: 3

**MECTK 110 INTRODUCTION TO THE TOOLS OF TECHNOLOGY 3 HRS. (OC)**
This course introduces the student to the industrial fields of design and manufacturing and explores the communication and computing tools used by technologists working in these fields. The student will work as part of a team assigned to carry a project from design to production. The course will integrate computer applications with modern design and manufacturing theory. Computer applications including word processing, spreadsheets, database management, graphics, and problem solvers will be explored in classroom instruction and hands-on computer laboratory experiences. Students will explore the occupational field they have chosen and how it compares with other technical fields. Members of the technology faculty and guests from industry will interact with students and provide career guidance.

Lecture Hours: 2 Laboratory Hours: 4

**MECTK 115 PRINCIPLES OF DIMENSIONAL METROLOGY 2 HRS. (OC)**
This theory and laboratory course is designed to develop dimensional measurement understanding and ability. Topics covered include the traditional concepts of mechanical contact measurement, the principles of standards, comparison measurement, piece-part features, calibration of instruments, and non-traditional techniques of non-contact measurement.

Lecture Hours: 1 Laboratory Hours: 3

**MECTK 121 INTRODUCTION TO MECHANICAL COMPUTER-AIDED DRAFTING USING AUTOCAD 3 HRS. (OC)**
In this course, computer-aided drafting will be explored as students review basic principles of orthographic projection, pictorial views, sectioning and auxiliary views. Two-dimensional problems will be explored using AutoCAD software. Students will gain experience creating and editing graphic entities as they construct mechanical working drawings.

Lecture Hours: 2 Laboratory Hours: 3

**MECTK 123 MECHANICAL DETAILING WITH AUTOCAD 3 HRS. (OC)**
Prerequisite: MECTK 121 with a grade of "C" or better. This course builds on the computer-aided drafting concepts introduced in MECTK 121. The content will emphasize detailed dimensioning, assembly drawings, weldment drawings, tolerances and tolerance symbols. Students will be introduced to creating and editing part libraries, data extraction files and CAD menus as they construct mechanical working drawings.

Lecture Hours: 2 Laboratory Hours: 3

**MECTK 125 3-D MODELING WITH PRO-ENGINEER 4 HRS. (OC)**
Prerequisite: MECTK 121 with a grade of "C" or better or department approval.
This course will provide mechanical design students with an introduction to 3-D parametric solid modeling, assemblies and drawings. Students will develop professional skills in approaching and solving these problems via the CAD workstation.

Lecture Hours: 2 Laboratory Hours: 4

**MECTK 138 MANUFACTURING PROCESSES I 3 HRS. (OC)**
This course is designed to provide an understanding of the basic principles and practices used in traditional manufacturing. Topics covered include: productivity, automation and design principles; metal removal methods; and metal forming methods. Considerable emphasis is placed on creating process planning schedules. The role of the manufacturing engineer is covered, with emphasis on how the student selects the best manufacturing process to most economically perform the required series of manufacturing operations to produce quality parts.

Lecture Hours: 2 Laboratory Hours: 3

**MECTK 149 BASIC POWER TRANSMISSION 2 HRS. (OC)**
Prerequisite: MAT 094 with the grade of "C" or better. This course is the first of a three-course sequence. Basic Power Transmission provides the student with basic knowledge and hands-on experience of mechanical processes used by industry. Students will become proficient in mechanical areas including: precision measuring using micrometers and gage blocks, bolt identification and torque specifications, proper dial indicator use and thread repair procedures. Students will also be instructed in the proper and safe use of tools. The other two courses in this sequence are MECTK 150 and 151.

Lecture Hours: 1 Laboratory Hours: 3

**MECTK 150 MECHANICAL SYSTEMS I 2 HRS. (OC)**
Prerequisite: MECTK 149 with a grade of "C" or better. This course is the second of a three-course sequence. Mechanical Systems I provides the student with basic knowledge and hands-on experience of mechanical systems used by industry. Students will become proficient in mechanical areas including: component and shaft alignment, bearings, v-belt and chain drives, couplings, and spur gears. Students will also be instructed in the proper and safe use of tools. The other two courses in this sequence are MECTK 149 and 151.

Lecture Hours: 1 Laboratory Hours: 3

**MECTK 151 MECHANICAL SYSTEMS II 2 HRS. (OC)**
Prerequisite: MECTK 150 with a grade of "C" or better. This course is the third of a three-course sequence. Mechanical Systems II provides the student with knowledge and hands-on experience of mechanical systems used by industry. Students will become proficient in mechanical areas including precision bearing installation, setting thrust bearing pre-load, packing and seals, crankcases, and way scraping.

Lecture Hours: 1 Laboratory Hours: 4

**MECTK 152 INDUSTRIAL RIGGING 2 HRS. (OC)**
Prerequisite: MAT 094 or appropriate math placement score. This course introduces the student to working within an industrial facility. Content includes topics on: chains and hoists, rigging, layout and fabrication, and machine setup. Structured laboratory experiences provide the maintenance mechanic student with industrial experiences. OSHA regulations will be reviewed and followed.

Lecture Hours: 1 Laboratory Hours: 3

**MECTK 155 PIPING SYSTEMS 1 HR. (OC)**
This course was designed to introduce the student to lay out and fabricate piping systems. Students will learn the theory behind fluid systems including: air, water, oil, and steam. Students will research piping requirements, lay out the piping systems and then fabricate them.

Lecture Hours: 3 Laboratory Hours: 2

**MECTK 201 MECHANISMS 3 HRS. (OC)**
Prerequisite: PHYS 112 with a grade of "C" or better and MATH 130 with a grade of "C" or better. This course is a study of existing mechanisms and their motion characteristics. The position, velocity, and acceleration of linkages, cams, gears, and gear trains are analyzed. Calculations are performed using graphical vector techniques in order to develop an understanding of the concepts. Computer software is then used to design, animate, and analyze complete machines.

Lecture Hours: 2 Laboratory Hours: 3

**MECTK 204 STATICS AND STRENGTH OF MATERIALS 4 HRS. (OC)**
Prerequisite: PHYS 112 with a grade of "C" or better. This course is an introduction to the analysis of 2-D (dimensional) force systems applied to static machine elements. Methods of calculating the stresses produced by the force systems are introduced. Emphasis is placed on the calculation of axial, bending, and torsional stresses and combinations of those stresses. The concept of principal stress is introduced. The laboratory is designed to supplement the classroom presentation and involves measuring forces and stresses with electronic instrumentation.

Lecture Hours: 3 Laboratory Hours: 3

**MECTK 220 ADVANCED CAD PROJECTS WITH PRO-ENGINEER 2 HRS. (OC)**
Prerequisite: MECTK 123 and MECTK 125 both with a grade of "C" or better or department approval. This course provides the student with advanced 3-D CAD problems in Pro-Engineer software. Topics include Variable section sweeps with graphs, trajectories, and formulas. Advanced rounds, Pro-program, and user defined features.

Lecture Hours: 1 Laboratory Hours: 3

**MECTK 221 MACHINE DESIGN I 3 HRS. (OC)**
Prerequisite: Credit or concurrent enrollment in MECTK 204, PHYS 112 with a grade of "C" or better, and MATH 130 with a grade of "C" or better. This course includes various topics associated with the design process. Students will be introduced to design problem definition, research methods, and traditional and computer-aided evaluation methods. Students will learn to utilize engineering standards, manufacturer’s catalogs, design manuals, application engineering software, and CAD (computer-aided design) systems as tools in the design process. The course stresses the design of a complete machine.

Lecture Hours: 2 Laboratory Hours: 3

**MECTK 222 MACHINE DESIGN II 3 HRS. (OC)**
Prerequisite: MECTK 221 with a grade of "C" or better, credit or concurrent enrollment in MECTK 204, credit or concurrent enrollment in PHYS 113, and MATH 130 with a grade of "C" or better. This course is a continuation of MECTK 204 in that it involves more complicated static problems and stress calculations. The concept of principal stress is further developed. Principal stress directions are used to gain an insight into component failure analysis. The topic of fatigue design and theories of failure are introduced. The above concepts of stress analysis are applied to springs, drive shafts, gears, bearings, bolts, and welds. A realistic design project is carried out in the laboratory with emphasis on project management.

Lecture Hours: 2 Laboratory Hours: 3
MEDLB 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

Medical Laboratory Technology

MLT 100 DETECTING MEDICAL LABORATORY SCIENCE 0.5 HRS. (OC)
This course is designed to introduce students to the medical laboratory profession and the role of the medical laboratory technicians and medical laboratory scientists. Basic responsibilities of the medical laboratory professionals and basic laboratory techniques used in a medical laboratory will be demonstrated and practiced.
Lecture Hours: 0.5 Laboratory Hours: 0

MLT 101 INTRO TO MEDICAL LABORATORY SCIENCE 1 HR. (OC)
This course is an introduction to the medical laboratory science profession. It is an overview of the profession of medical technology, purposes and techniques of blood and body fluid analysis in the clinical laboratory, and the use of this scientific data in determination of an individual’s health condition. Lectures and student laboratories are included.
Lecture Hours: 0.5 Laboratory Hours: 1 or equivalent

MLT 102 INTRODUCTION TO GENERAL MEDICAL LABORATORY TECHNIQUES
This course is an introduction to the medical laboratory techniques which addresses basic techniques used in medical laboratories from using pipette, making dilutions, streaking plates for microorganism cultivation to phlebotomy. Various testing methods and testing procedures will be introduced. Lectures and student laboratories are included.
Lecture Hours: 0.5 Laboratory Hours: 1 or equivalent

MLT 110 INTRODUCTION TO THE MEDICAL LABORATORY AND PHLEBOTOMY
Prerequisite: Admission to the Medical Laboratory Technician Program, Phlebotomist Program, or department approval. This course is an introduction to the clinical laboratory; its functions, its personnel structure, and its relationship to the total healthcare system. Venipuncture techniques, micro puncture techniques, phlebotomy equipment, safe practices, and medic legal aspects are also studied.
Lecture Hours: 1 Laboratory Hours: 2 or equivalent

MLT 112 PHLEBOTOMY CLINICAL PRACTICUM 2 HRS. (OC)
Prerequisite: MLT 110 with a grade of “C” or better, or concurrent enrollment; or department approval. This course is a phlebotomy clinical practicum consisting of supervised phlebotomy experiences in a local hospital. Venipunctures, micro punctures, safe techniques, interpersonal communication, ethics and professionalism will be practiced.
Lecture Hours: 0 Laboratory Hours: 6.5

MLT 115 FUNDAMENTALS OF URINALYSIS AND BODY FLUIDS 3 HRS. (OC)
Prerequisite: Admission to Medical Laboratory Technician program or department approval. This course is an introduction to the study of urine and body fluids. Course studies urine formation including function and diseases of the kidney. Main focus is on detection of physical, chemical and microscopic properties of urine in normal and abnormal states. Content also includes discussion of miscellaneous fluid analysis, cerebrospinal fluid analysis, and fecal occult blood analysis. Additional practice on basic medical laboratory techniques will be emphasized.
Lecture Hours: 2 Laboratory Hours: 2 or equivalent

MLT 116 FUNDAMENTALS OF IMMUNOLOGY AND SEROLOGY
Prerequisite: Admission to the Medical Laboratory Technician program or department approval. This course is a study of the basic immunological principles to provide a general orientation to immunology; it will focus on antigen and antibody structures and how they relate to immune system disorders. Immunologic principles of laboratory diagnosis of human infectious diseases are emphasized. Lectures and student laboratories are included.
Lecture Hours: 1.5 Laboratory Hours: 1 or equivalent

MLT 210 FUNDAMENTALS OF HEMATOLOGY AND HEMOSTASIS 3 HRS. (OC)
Prerequisite: MLT 115 and MLT 116 with a grade of “C” or better, or department approval. This course is a study of basic laboratory techniques in hematology and hemostasis. The course focuses on theories and principles of normal blood cell production. Identification of blood cells and their morphology along with the laboratory
techniques used in cell counts and differentials are included in lectures and student laboratories. This course also discusses the four major systems of hemostasis and common disease states associated with these systems.

Lecture Hours: 1.5 Laboratory Hours: 3 or equivalent

MLT 214 FUNDAMENTALS OF CLINICAL CHEMISTRY 2.5 HRS. (OC)
Prerequisite: MLT 115 and MLT 116 with a grade of "C" or better, or department approval. This course is an introduction to basic principles and practices of clinical chemistry. It will include automation, specimen handling, quality control, chemical mathematics, electrolytes, proteins, carbohydrates, enzymes, and trace elements. Lectures and student laboratories are included.

Lecture Hours: 2 Laboratory Hours: 1

MLT 216 FUNDAMENTALS OF IMMUNOHEMATOLOGY 4 HRS. (OC)
Prerequisite: MLT 116 with a grade of "C" or better, or department approval. This course is a study of the basic principles and laboratory techniques of immuno- hematology. It will focus on antigen and antibody in relation to transfusion and donor services. Lectures and student laboratories are included.

Lecture Hours: 2 Laboratory Hours: 4

MLT 218 FUNDAMENTALS OF CLINICAL MICROBIOLOGY 3 HRS. (OC)
Prerequisite: MLT 115 and MLT 116 with a grade of "C" or better, or department approval. This course is an introduction to clinical microbiology which includes collection and handling of biological specimens and bacteria identification techniques. Commonly encountered bacteria will be covered. Lecture and student laboratories are included.

Lecture Hours: 1.5 Laboratory Hours: 3 or equivalent

MLT 220 ADVANCED CLINICAL HEMATOLOGY 2 HRS. (OC)
Prerequisite: MLT 210 with a grade of "C" or better. This course focuses on disorders of blood cells including anemias, leukemias, and other white blood cell neoplasms. Lectures and student laboratories are included.

Lecture Hours: 1.5 Laboratory Hours: 1 or equivalent

MLT 222 APPLIED CLINICAL EXPERIENCE I 4 HRS. (OC)
Prerequisite: Concurrent enrollment and completion of MLT 115, MLT 116, MLT 210, MLT 214, MLT 216 and MLT 218 with a grade of "C" or better on each course or department approval. This course is a clinical experience in the disciplines of phlebotomy, urinalysis, and basic testing procedures in immunohematology/blood banking, hematology, microbiology, chemistry, and immunology/serology.

Lecture Hours: 0 Laboratory Hours: 10

MLT 224 ADVANCED CLINICAL CHEMISTRY 2 HRS. (OC)
Prerequisite: MLT 214 with a grade of "C" or better. This course is a continuation of MLT 214 with emphasis on pathophysiology and testing related to liver function, endocrine function, lipid metabolism, toxicology testing, therapeutic drug monitoring, tumor markers, cardiac markers, and blood gases. Lectures and student laboratories are included.

Lecture Hours: 1.5 Laboratory Hours: 1 or equivalent

MLT 228 ADVANCED CLINICAL MICROBIOLOGY 2.5 HRS. (OC)
Prerequisite: MLT 218 with a grade of "C" or better, or department approval. This course concentrates on the basics of acid fast organisms, parasites, and fungi, including their pathophysiology, epidemiology and associated diseases. Common diseases caused by microorganisms by anatomical sites will be discussed. Lecture and student laboratories are included.

Lecture Hours: 2 Laboratory Hours: 1 or equivalent

MLT 230 PROFESSIONAL SEMINAR 2 HRS. (OC)
Prerequisite: MLT 218 and MLT 216 with a grade of "C" or better. This course is a review of all of the major disciplines of the clinical laboratory. Professional and ethical issues concerning the clinical laboratory technician are discussed. Lectures and student laboratories are included.

Lecture Hours: 1 Laboratory Hours: 3 or equivalent

MLT 232 APPLIED CLINICAL EXPERIENCE II 5 HRS. (OC)
Prerequisite: Concurrent enrollment and completion of MLT 220, MLT 222, MLT 224, and MLT 228 with a grade of "C" or better. This course is a continuation of clinical experience to enhance technical skills along with clinical applications in the disciplines of phlebotomy, urinalysis, immunohematology/blood banking, hematology, microbiology, chemistry, and immunology/serology.

Lecture Hours: 0 Laboratory Hours: 12 or equivalent

Medical Office
MEDO 110 MEDICAL ASSISTANT ADMINISTRATIVE SKILLS 4 HRS. (OC)
Prerequisite: Admission to the Medical Office Administrative Assistant and/or Medical Assistant Program and concurrently enrolled in MEDO 112. This course studies the medical office from a business-administrative standpoint including clerical functions, bookkeeping procedures, processing insurance claims, professional communications, legal and ethical concepts, patient instruction and operational functions.

Lecture Hours: 4 Laboratory Hours: 0

MEDO 111 MEDICAL ASSISTANT CLINICAL PROCEDURES 4 HRS. (OC)
Prerequisite: Completion of BIOL 140, MEDO 110, ENGL 125, TYPE 120 or TYPE 121, all with a grade of "C" or better. This course is an introduction to the clinical procedures commonly performed in health care settings which include medical asepsis and infection control, medical history and patient assessment, vital signs, assisting with the physical examination, surgical instruments and sterilization, assisting with minor office surgery, preparing and administering medications and maintaining their records, and other common diagnostic and therapeutic procedures. Lectures and applied experiences are included.

Lecture Hours: 2 Laboratory Hours: 6

MEDO 112 MEDICAL OFFICE COMPUTER SKILLS 2 HRS. (OC)
Prerequisite: Admission to the Medical Assistant Program, Medical Office Administrative Assistant Program and/or department approval and concurrently enrolled in MEDO 110. This course emphasizes basic computer software operations and procedural and diagnostic coding basics as applied to the medical office setting.

Lecture Hours: 1 Laboratory Hours: 2

MEDO 114 CLINICAL LABORATORY SKILLS FOR MEDICAL ASSISTANTS 4 HRS. (OC)
Prerequisite: Admission to the Medical Assistant Program, MLT 110, MEDO 111, HLTH 120, HLTH 121, HLTH 071, HECC 200. This course is designed to provide the student with the opportunity to perform basic medical laboratory tests that are performed in medical offices, to practice good techniques in laboratory procedures to apply to all tests, and to properly clean and maintain lab equipment.

Lecture Hours: 2 Laboratory Hours: 4

MEDO 115 INTRODUCTION TO ICD-10-CM AND ICD-10-PCS CODING 3 HRS. (OC)
Prerequisite: HLTH 121 with a grade of "C" or better or department approval. This course is intended to introduce the student to the concepts of coding medical conditions and procedures. Through guided instruction and practical experience students will become familiar with an entry-level proficiency in the techniques of coding using the ICD-10-CM (International Classification of Diseases, 10th revision, Clinical Modification) and ICD-10-PCS (International Classification of Diseases, 10th revision, Procedure Coding System).

Lecture Hours: 3 Laboratory Hours: 0

MEDO 116 INTRODUCTION TO ICD-9-CM CODING 3 HRS. (OC)
Prerequisite: HLTH 121 with a grade of "C" or better or department approval. This course is intended to introduce the student to the concepts of coding medical conditions and procedures. Through guided instruction and practical experience students will become familiar with an entry-level proficiency in the techniques of coding using the ICD-9-CM (International Classification of Diseases, 9th revision, Clinical Modification).

Lecture Hours: 3 Laboratory Hours: 0

MEDO 117 INTRODUCTION TO CURRENT PROCEDURAL TERMINOLOGY (CPT) CODING 2 HRS. (OC)
Prerequisite: HLTH 121 with a grade of "C" or better or equivalent, and/or department approval. This course is designed to teach the basic purpose, structure and conventions of the CPT system.

Lecture Hours: 2 Laboratory Hours: 0

MEDO 118 CODING INTERNSHIP 2 HRS. (OC)
Prerequisite: MEDO 115, MEDO 117, and MEDO 120, all with a grade of "C" or better. This supervised internship course is arranged for students in a variety of health care settings where they will have the opportunity to apply and gain a working knowledge of the International Classification of Diseases and Current Procedural Terminology coding systems to determine appropriate reimbursement for services rendered by health care providers.

Lecture Hours: 0 Laboratory Hours: 7.5

MEDO 119 INTRODUCTION TO PHARMACOLOGY FOR MEDICAL ASSISTANTS 2 HRS. (OC)
Prerequisite: Admission to the Medical Assistant Program and concurrently enrolled in MEDO 125. This course provides an introduction of pharmacology for the medical assistant. Emphasis will be placed on basic drug terminology, drug classifications, and a drug's affect on the different body systems.

Lecture Hours: 1 Laboratory Hours: 2

MEDO 120 INTERMEDIATE ICD-10-CM AND ICD-10-PCS CODING 3 HRS. (OC)
Prerequisite: MEDO 115 with a grade of "C" or better and/or department approval. This course builds on the basic knowledge of coding presented in the introductory course. Explanation of coding procedures for complex body systems as well as the technicalities of complete and accurate coding and DRG assignments in the in-patient setting will be covered.

Lecture Hours: 2 Laboratory Hours: 2
MM 140 MULTIMEDIA PRODUCTION I 3 HRS. (TC)
This course provides introductory skills survey of multimedia communications, production components, elements, aesthetics, and tools. It introduces the fundamentals of text-processing, digital graphics, digital audio and video, web-based design, and interactive media presentation formats are introduced. Basic skills and strategies in a variety of multimedia software, systems, peripherals, document and file formats, and Internet navigation and production are emphasized.
Lecture Hours: 0 Laboratory Hours: 6

MM 142 DIGITAL PHOTOGRAPHY 3 HRS. (TC)
Prerequisite: MM 140 and GRDNS 140 both with a grade of “C” or better. This introductory course explores applied hybrid and digital photography in digital darkroom studio projects. Project assignments are created with direct camera work and methods of image capture, manipulation, enhancement, synthesis and derivation. Students acquire facility with digital cameras, computers, and image-processing software and peripherals. Projects and critiques stress image-making as documentary and narrative visual communication for graphic design and multimedia applications. Studio, laboratory and location exercises and assignments are required. Assigned readings and research address technical, aesthetic, rhetorical, and technological and ethical implications of the contemporary darkroom and images.
Lecture Hours: 0 Laboratory Hours: 6

MM 150 MULTIMEDIA THEORY 3 HRS. (TC)
Prerequisite: MM 140 and GRDNS 140 both with a grade of “C” or better. This theory-based course extracts, interprets and examines fundamental aspects of contemporary art, design, communication, rhetorical, and technological theories. Students explore theories to inform, explain, understand and create new interactive multimedia contexts and environments.
Lecture Hours: 0 Laboratory Hours: 6

MM 230 DIGITAL VIDEO PRODUCTION 3 HRS. (TC)
Prerequisite: MM 140 and MM 150 both with a grade of “C” or better. This studio course provides advanced video production techniques for use in multimedia, Internet, and new media projects. This is a fundamental course in nonlinear production. The course combines technical information, video production, technical skills, and editing with a theoretical and practical approach. Reproduction planning, storyboarding, and effects production are explored.
Lecture Hours: 0 Laboratory Hours: 6

MM 231 VIDEO SPECIAL EFFECTS 3 HRS. (OC)
Prerequisite: MM 140 and MM 150 both with a grade of “C” or better. This studio course provides advanced video production effects for multimedia, Internet, and new media projects. The course emphasizes principles and properties of special effects for text, keying,traveling mats, and other effects. Advanced software techniques are explored.
Lecture Hours: 0 Laboratory Hours: 6

MM 241 MULTIMEDIA AUTHORING 5 HRS. (TC)
Prerequisite: MM 140 and GRDNS 140 both with a grade of “C” or better. This course includes authoring of multimedia presentations, using industry-standard software. Design management, interactivity, branching, navigation, user interface, and digital components are stressed. Digital acquisition and processing of text, graphics, animation, video and sound are also covered. Problem-solving, prototypes, sequential design, and digital media integration are stressed.
Lecture Hours: 0 Laboratory Hours: 10

MM 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides the student the opportunity to investigate areas of multimedia not included in the course of study according to the individual’s academic needs. The student must submit a formal written plan detailing the project, number of credit hours assigned to it, and the evaluative criteria that is to be used. This project must be carried out under the direction of a faculty member. Repeatable to a max of five semester hours of credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

Music
MUS 110 CLASS PIANO I 2 HRS. (TC)
These courses are for future music majors who have little or no previous piano instruction. The purpose of these courses is to develop a basic ability at the keyboard required of the musician and enhance aural understanding of music. Laboratory hours will be practiced outside of the classroom.
Lecture Hours: 2 Laboratory Hours: 0

MUS 111 CLASS PIANO II 2 HRS. (TC)
Prerequisite: MUS 110 with a grade of “C” or better. This course is for future music majors who have little or no previous piano instruction. The purpose of this course is to develop a basic ability at the keyboard required of the musician and enhance aural understanding of music. Laboratory hours will be practiced outside of the classroom.
Lecture Hours: 2 Laboratory Hours: 0

MUS 114 CLASS PIANO FOR NON-MUSIC MAJORS 2 HRS. (TC)
This course is for non-music students who have little or no previous piano instruction. By the end of the semester, the student is able to play simple keyboard music for personal enjoyment.
Lecture Hours: 2 Laboratory Hours: 0

MUS 117 ENRICHMENT FOR PIANO 0.5 HRS. (TC)
Prerequisite: MUS 114 or department approval. This course provides individual piano study for the developing music student and music students working on a secondary instrument. This course may be repeated three times for credit.
Lecture Hours: 0.5 Laboratory Hours: 0

MUS 128 ENRICHMENT FOR VOICE 0.5 HRS. (TC)
This course provides individual vocal instruction for the developing music student and music students working on a secondary instrument. This course may be repeated three times for credit.
Lecture Hours: 0.5 Laboratory Hours: 0

MUS 130 CHAMBER SINGERS 1 HR. (TC)
Prerequisite: Department approval. Students interested in studying vocal music should enroll in this ensemble which is open to a limited number of auditioned singers. This course may be repeated three times for credit.
Lecture Hours: 0 Laboratory Hours: 3

MUS 131 CONCERT BAND 1 HR. (TC)
All students who play wind or percussion instruments may enroll. Music students whose performance instrument is brass, woodwind or percussion should enroll. This course may be repeated three times for credit.
Lecture Hours: 0 Laboratory Hours: 3 or equivalent

MUS 132 JAZZ BAND 1 HR. (TC)
All students who play guitar, piano, wind and percussion instruments may enroll. Some students may be required to audition. This course may be repeated three times for credit.
Lecture Hours: 0 Laboratory Hours: 3

MUS 134 CONCERT CHOIR 1 HR. (TC)
All students who want to sing in a choral organization may enroll. This course may be repeated three times for credit.
Lecture Hours: 0 Laboratory Hours: 3

MUS 136 MUSIC FUNDAMENTALS 3 HRS. (TC)
This course is designed to provide an introduction to music fundamentals: music notation, scales, rhythm, harmony, melody, ear training, basic sight-singing, familiarity with the keyboard, and an optional composition. Recommended for non-music majors who wish to learn music basics and future music majors with insufficient background for music theory.
Lecture Hours: 3 Laboratory Hours: 0
MUS 137 VOCAL JAZZ ENSEMBLE 1 HR. (TC)
Prerequisite: Department approval. This course concentrates on the study of various styles and techniques of the vocal jazz genre. In addition to vocal jazz literature and performance, ensemble intonation, sound reinforcement and improvisation will be presented. Voice majors, voice minors, and students from the total student body are encouraged to audition for this ensemble. This course may be repeated three times for credit. Three lab hours per week and additional rehearsals and performances as scheduled.
Lecture Hours: 0 Laboratory Hours: 3

MUS 146 BEGINNING CLASS GUITAR I 2 HRS. (TC)
This is a basic course in beginning guitar. Students will study the fundamentals of tuning, proper instrument grip, proper finger positions, various strumming and picking styles, and chord structures. Instruction will include the essential elements of music theory, such as notation, keys, scales, intervals, and triads, as these apply to the playing of the guitar. Students must supply their own guitar.
Lecture Hours: 2 Laboratory Hours: 0

MUS 147 BEGINNING CLASS GUITAR II 2 HRS. (TC)
Prerequisite: MUS 146 with a grade of "C" or better. This course is a second semester/continuation of a basic course in beginning guitar. Students will study the fundamentals of tuning, proper instrument grip, proper finger positions, various strumming and picking styles, and chord structures, progressing toward an intermediate level. Instruction will include review and expansion upon essential elements of music theory, such as notation, keys, scales, intervals, and triads, as these elements apply to the playing of the guitar.
Lecture Hours: 2 Laboratory Hours: 0

MUS 148 INTRODUCTION TO AMERICAN MUSIC (F1 904) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is a study of the musical heritages as they combined in the United States to create jazz, what many critics consider America’s greatest contribution to art music. From the earliest performances to its present day pre-eminence in the musical world, this course covers formative influences such as religious music and spirituals; solo piano styles such as ragtime, boogie, and stride; blues history, work songs, and field hollers. It culminates in a detailed exploration of the various style periods in jazz, placing each movement in its historical and sociological context, including jazz as practiced today.
Lecture Hours: 3 Laboratory Hours: 0

MUS 149 INTRODUCTION TO MUSIC LITERATURE (F1 901) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is an introduction to the standard concert repertoire through intensive guided listening. Representative works by major composers are chosen to illustrate the principal styles, forms, and techniques of vocal and instrumental music. Although there is no music prerequisite for this course, there is an assumption of fundamental knowledge and understanding of the elements of music.
Lecture Hours: 3 Laboratory Hours: 0

MUS 150 MUSIC APPRECIATION (F1 900) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This is a general course introducing representative music of various periods from our musical heritage. Skills of intelligent listening are taught.
Lecture Hours: 3 Laboratory Hours: 0

MUS 154 ENRICHMENT FOR BRASS 0.5 HRS. (TC)
This course provides individual brass instruction for the developing music student and music students working on a secondary instrument. This course may be repeated three times for credit.
Lecture Hours: .5 Laboratory Hours: 0

MUS 158 ENRICHMENT FOR WOODWIND 0.5 HRS. (TC)
This course provides individual woodwind instruction for the developing music student and music students working on a secondary instrument. This course may be repeated three times for credit.
Lecture Hours: .5 Laboratory Hours: 0

MUS 160 ENRICHMENT FOR PERCUSSION 0.5 HRS. (TC)
This course provides individual percussion instruction for the developing music student and music students working on a secondary instrument. This course may be repeated three times for credit.
Lecture Hours: .5 Laboratory Hours: 0

MUS 162 ENRICHMENT FOR GUITAR 0.5 HRS. (TC)
This course provides individual guitar instruction for the developing music student and music students working on a secondary instrument. This course may be repeated 3 times for credit.
Lecture Hours: .5 Laboratory Hours: 0

MUS 163 APPLIED GUITAR II 1 HR. (TC)
Prerequisite: MUS 162 with a grade of "C" or better and concurrent registration in an ensemble. In this course, on-going study for the guitar major on an individualized basis is provided. The music major is expected to register for applied music each semester.
Lecture Hours: 1 Laboratory Hours: 0

MUS 164 GUITAR ENSEMBLE 1 HR. (TC)
Prerequisite: Department approval. This course involves working with others to prepare music for public performance using guitar. The student applies techniques and musical concepts learned from Applied Guitar, Enrichment for Guitar and/or Class Guitar. This course can be repeated up to a maximum of three times.
Lecture Hours: 0 Laboratory Hours: 3

MUS 170 THEORY I 3 HRS. (TC)
Prerequisite: MUS 136 with a grade of "C" or better, or a score of 35 on the Theory Placement exam, and concurrent enrollment in MUS 180. This is the first course in a series of four courses in music theory. The course includes basic fundamentals, diatonic functions, triads and seventh chords, principles of voice leading, harmonic progressions, inversions and concludes with cadences, phrases and sequences.
Lecture Hours: 3 Laboratory Hours: 0

MUS 171 THEORY II 3 HRS. (TC)
Prerequisite: MUS 170 and MUS 180 with a grade of "C" or better and concurrent enrollment in MUS 181. This is the second course in a series of four courses in music theory. This course begins the study of non-chord tones, diatonic seventh chords, voice leading practices, and concludes with secondary functions.
Lecture Hours: 3 Laboratory Hours: 0

MUS 180 MUSICIANSHIP I 1 HR. (TC)
Prerequisite: MUS 136 with a grade of "C" or better, or a score of 35 on the Theory Placement exam, and concurrent enrollment in MUS 170. This is the first course in a series of four courses devoted to the aural skills of musicianship. The course includes division of the beat in simple and compound meters; identification of scales, intervals, triads, and seventh chords; and melodies moving by step and using skips within the tonic triad in major and minor tonalities. Aural understanding is developed through dictation and sight singing.
Lecture Hours: 0 Laboratory Hours: 2

MUS 181 MUSICIANSHIP II 1 HR. (TC)
Prerequisite: MUS 180 and MUS 170 both with a grade of "C" or better. This is the second course in a series of four courses devoted to the aural skills of musicianship. The course includes intervals from the dominant triad and dominant seventh chord in major and minor keys in simple and compound meters; other diatonic intervals of the seventh and tritone; subdivision of the beat in simple and compound meters; and structured improvisation. Aural understanding is developed through dictation, sight singing, and improvisation.
Lecture Hours: 0 Laboratory Hours: 2

MUS 210 CLASS PIANO III 2 HRS. (TC)
Prerequisite: MUS 111 and concurrent enrollment in one of the following ensembles: MUS 130, 131, 132, 134, 137. This course is for future music majors who have little or no previous piano instruction. The purpose of this course is to develop a basic quality at the keyboard required by the musician and enhance aural understanding of music. Practice outside of the classroom required.
Lecture Hours: 2 Laboratory Hours: 0

MUS 211 CLASS PIANO IV 2 HRS. (TC)
Prerequisite: MUS 210 and concurrent enrollment in one of the following ensembles: MUS 130, 131, 132, 134, 137. This course is for future music majors who have little or no previous piano instruction. The purpose of this course is to develop a basic quality at the keyboard required by the musician and enhance aural musicianship. Practice outside of the classroom required.
Lecture Hours: 2 Laboratory Hours: 0

MUS 214 CLASS PIANO FOR NON-MUSIC MAJORS 2 HRS. (TC)
Prerequisite: MUS 114 with a grade of "C" or better. This course is for non-music majors who have little or no previous piano instruction. By the end of the second semester the student is able to play most keyboard music for personal enjoyment.
Lecture Hours: 2 Laboratory Hours: 0

MUS 217 APPLIED PIANO 1 HR. (TC)
Prerequisite: Concurrent enrollment in one of the following ensembles: MUS 130, 131, 132, 134, 137; and department approval. This course provides continuing individual study for the piano student planning to major in music. The student is expected to register for applied piano each semester. This course may be repeated three times for credit.
Lecture Hours: 1 Laboratory Hours: 0

MUS 228 APPLIED VOICE 1 HR. (TC)
Prerequisite: Concurrent enrollment in one of the following ensembles: MUS 130, 131, 132, 134, 137; or department approval. This course provides continuing individual study for the voice student planning to major in music. The student is expected to register for Applied Voice each semester. This course may be repeated three times for credit.
Lecture Hours: 1 Laboratory Hours: 0
### Numerical Control Technology

**NCTK 110** **INTRODUCTION TO NUMERICAL CONTROL SYSTEMS** 1 HR. (OC)

This course introduces the student to the evolution of machine tool technology; the development of hard automation and flexible automation; and the topics of automated control, servo systems, and computer numerical control terminology. The student is acquainted with computers in manufacturing and how they interface with CNC systems to perform useful work; the role of computer numerical control in automated work cells, flexible manufacturing systems and factory applications of CNC.

Lecture Hours: 1 Laboratory Hours: 0

**NCTK 210** **FUNDAMENTALS OF CNC PROGRAMMING** 2 HRS. (OC)

Prerequisite: NCTK 212 with a “C” or better and MAT 106 with a grade of “C” or better or departmental approval. This course includes the theoretical and practical aspects of writing manual numerical control programs. Included is coding formats, preparatory functions, miscellaneous functions, and point-to-point and continuous path programming. Emphasis is on developing programs for three axis machine tools.

Lecture Hours: 1 Laboratory Hours: 0

**NCTK 212** **CNC MACHINE OPERATION I** 2 HRS. (OC)

Prerequisite: MACTR 121 with a grade of “C” or better; concurrent enrollment in NCTK 110 or department approval. This course prepares the student for practical programming assignments and is designed to give actual hands-on experience in the setting up and operation of CNC machining and turning centers.

Lecture Hours: 1 Laboratory Hours: 3

**NCTK 214** **CNC MACHINE OPERATION II** 2 HRS. (OC)

Prerequisite: NCTK 212 with a grade of “C” or better or departmental approval. This course prepares the student for practical programming assignments, and is designed to give advanced hands-on experience in the setting up and operation of CNC machining and turning centers.

Lecture Hours: 1 Laboratory Hours: 3

**NCTK 255** **INDEPENDENT STUDY** 1 HR. (OC)

Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit.

Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

### Occupational Therapy Assistant

**OTA 110** **FOUNDATIONS FOR THE OCCUPATIONAL THERAPY ASSISTANT** 4 HRS. (OC)

Prerequisite: Acceptance to the Occupational Therapy Assistant Program. This course provides an introduction to the health care discipline of occupational therapy, including its history, philosophy, theory, ethics, safety of self and others, evidenced-based research and practice, cultural diversity, and specifically role delineation within the occupational therapy process and the Practice Framework. A broad overview of the relationship of physical and psychosocial health and disease will be presented, along with a focus on occupational performance, documentation and the Practice Framework for the occupational therapy assistant.

Lecture Hours: 3 Laboratory Hours: 2

**OTA 111** **OCCUPATIONAL THERAPY PROCESS FOR INDIVIDUALS AND GROUPS** 4 HRS. (OC)

Prerequisite: Acceptance to the Occupational Therapy Assistant Program. This course addresses the fundamental concepts of occupational therapy for individual and group interventions, group development and group dynamics to support occupational performance, participation, and well-being across the lifespan with a primary focus on the aging process. Level I fieldwork experience is completed.

Lecture Hours: 3 Laboratory Hours: 2

**OTA 112** **MENTAL HEALTH AND FUNCTION ACROSS THE LIFESPAN** 4 HRS. (OC)

Prerequisite: BIOL 140, OTA 110, OTA 111, and OTA 118, all with a grade of “C” or better or department approval. This course provides a basic understanding of mental health conditions and behaviors across the lifespan. The principles of the occupational therapy process, assessment and interventions are discussed. Level I Fieldwork with a psychosocial emphasis is completed.

Lecture Hours: 3 Laboratory Hours: 2
### OTA 114  TASK ANALYSIS, ASSISTIVE TECHNOLOGY AND THERAPEUTIC MEDIA FOR THE OCCUPATIONAL THERAPY ASSISTANT

Prerequisite: BIOL 140, OTA 110, OTA 111 and OTA 118, all with a “C” or better or department approval. In this course, occupational therapy process including assessment and intervention implementation will be examined through task analysis, gradation of activities, and adaptation through the use of assistive technology and therapeutic media to promote occupational performance across the lifespan. Lecture Hours: 2 Laboratory Hours: 6

### OTA 118  APPLICATIONS OF ANATOMY AND KINESIOLOGY IN THE OCCUPATIONAL THERAPY PROCESS

Prerequisite: Acceptance to the Occupational Therapy Assistant Program. In this course, body structures and functions of the neuromusculoskeletal system will be examined. Assessment of joint range of motion, coordination, and muscle strength will be emphasized in relation to performance in areas of occupation across the life span. Analysis of activities of daily living (ADL) and instrumental activities of daily living (IADL) tasks and their upper extremity activity demands including joint range of motion, muscle strength, gross motor coordination, fine motor coordination, prehension and grasp patterns are discussed. Upper and lower extremity joint range of motion, goniometry, manual muscle testing, and functional mobility competencies are directly assessed. Therapeutic exercise and its relationship to performance skills and occupations will be emphasized. Lecture Hours: 3 Laboratory Hours: 3

### OTA 210  OCCUPATIONAL THERAPY PROCESS AND INTERVENTIONS IN PEDIATRICS

Prerequisite: OTA 112 and OTA 114 both with a grade of C or better or department approval. This course applies the occupational therapy process in traditional and emerging pediatric practice settings. The focus of this course are assessments and interventions addressing physical, cognitive, behavioral, perceptual, sensory, neuromuscular and orthopedic impairments and conditions found in the pediatric population.

Lecture Hours: 3 Laboratory Hours: 3

### OTA 211  OCCUPATIONAL THERAPY PROCESS AND INTERVENTIONS FOR PHYSICAL DYSFUNCTION ACROSS THE LIFE SPAN

Prerequisite: OTA 210 and OTA 212 both with a grade of “C” or better or department approval. This course applies the occupational therapy process to individuals with physical dysfunction across the life span. The focus of this course are assessments and interventions addressing physical, cognitive, perceptual, sensory, neuromuscular and orthopedic impairments and conditions in traditional and emerging practice settings across the life span.

Lecture Hours: 3 Laboratory Hours: 3

### OTA 212  OCCUPATIONAL THERAPY ASSISTANT FIELDWORK PRACTICE-I-PEDIATRICS

Prerequisite: OTA 112 and OTA 114 both with a grade of “C” or better or department approval. This course provides an offsite, clinical fieldwork experience with an emphasis on pediatrics. Concentrated focus on the developmental, physical, psychological and social factors that influence engagement in occupation with the pediatric population. Students are provided an in-depth learning opportunity to experience delivering occupational therapy services to individuals and groups, focusing on application of purposeful and meaningful occupation.

Lecture Hours: 1 Laboratory Hours: 20

### OTA 213  OCCUPATIONAL THERAPY ASSISTANT PRACTICE II-ACROSS THE LIFE SPAN

Prerequisite: OTA 210 and OTA 212 both with a grade of “C” or better or department approval. This course provides an offsite, clinical fieldwork experience with an emphasis on cognitive, physical, psychological and social factors that influence engagement in occupation across the lifespan. Students are provided an in-depth learning opportunity in delivering occupational therapy services to individuals and groups, focusing on application of purposeful and meaningful occupation.

Lecture Hours: 1 Laboratory Hours: 20

### OTA 220  MANAGEMENT AND ADMINISTRATION FOR THE OTA

Prerequisite: OTA 210 and OTA 212 both with a grade of “C” or better or department approval. This course introduces program development, marketing, management and advocacy for occupational therapy service delivery. Concentrated focus on leadership, professional behaviors, and interprofessional team collaboration. This course includes a service learning project with key process partners from within the community.

Lecture Hours: 3 Laboratory Hours: 0

### OTA 255  INDEPENDENT STUDY

Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent study project is developed with a faculty member (including a detailed description of the study project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters). The project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department. A final written report is submitted to the faculty member by the student.

Lecture Hours: 2 Laboratory Hours: 2

### Office Occupations

- **OFOCC 111**  TELEPHONE SKILLS FOR THE OFFICE  
  This course will cover training in the professional use of the telephone.
  Lecture Hours: 1 Laboratory Hours: 0

- **OFOCC 114**  FUNDAMENTALS OF TRANSCRIPTION  
  Prerequisite: Credit or concurrent enrollment in TYPE 121 or equivalent. This course covers basic fundamentals of transcription. Classroom activities emphasize basic secretarial grammar, word study, spelling, and punctuation required for the transcription of notes and rough drafts in a business office. The students use computers with word processing software programs to accomplish their daily tasks and tests.
  Lecture Hours: 3 Laboratory Hours: 0

- **OFOCC 117**  USING VOICE RECOGNITION SOFTWARE  
  This course will provide instruction and practice using voice recognition software to complete office tasks using a computer. This course is repeatable up to three times.
  Lecture Hours: 1 Laboratory Hours: 2
OFCC 141 SPECIAL TOPICS 0.5 HRS. (OC)
The content of this special topics course will vary to allow an examination of various topics such as software updates, new software, new productivity tools, and emerging trends and issues in the office environment. Each section offered will present a unique topic of value to students in the office professions. This course may be repeated three times when the topic and content are different. Lecture Hours: 0.5 - 3.0 Laboratory Hours: 0

OFCC 200 MACHINE TRANSCRIPTION AND SPECIALIZED 2 HRS. (OC)
TERMINOLOGY
Prerequisite: Credit in OFCC 114 and TYFE 121 with a grade of “C” or better. This course prepares individuals to support business information operations by using current technology to enter, process, and retrieve data including instruction in word processing software and transcription equipment. Students will create marketable transcription business, medical, and legal documents. Lecture Hours: 1 Laboratory Hours: 2 or equivalent

OFCC 205 FUNDAMENTALS OF RECORDS CONTROL 3 HRS. (OC)
This course examines the principles of storage, retention, transfer and disposition of records; and numerous filing systems, equipment and techniques of record management. Lecture Hours: 3 Laboratory Hours: 0

OFCC 210 ADMINISTRATIVE OFFICE PROCEDURES 3 HRS. (OC)
Prerequisite: TYPE 121 with a grade of “C” or better and OFACS 132 with a grade of “C” or better. This course provides students with opportunities to integrate technology, knowledge, and skills for successful office employment. Students will benefit from this class by learning basic procedures which office professionals are expected to know and by improving their interpersonal skills. Lecture Hours: 3 Laboratory Hours: 0

OFCC 250 OFFICE OCCUPATIONS INTERNSHIP 3 HRS. (OC)
Prerequisite: Admission to an Office Occupations Internship Program and a 2.0 cumulative grade point average. The student-intern is placed in an area office to receive on-the-job training under the direction of a training station supervisor and/ or employer. Student-interns also meet in class or individually with the office occupations coordinator for one hour per week to work on problems or special assignments related to the internship training. Lecture Hours: 1 Laboratory Hours: 15 or equivalent

OFCC 255 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the associate dean for approval and remains on file within the department; together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit. Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

Paralegal

PRLGL 110 INTRODUCTION TO PARALEGAL 3 HRS. (OC)
Prerequisite: ENGL 110 with a “C” or better, or equivalent. This course examines the legal assistant in the legal system and overviews the skills required of this type of work. Reference is made to legal terminology and Illinois procedural and substantive law. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 112 LEGAL RESEARCH I 3 HRS. (OC)
Prerequisite: PRLGL 110 with a grade of “C” or better or department approval. This course orientates the student as to the use and contents of the law library, i.e., legal publications, treaties and other legal writings encountered in the practice of law. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 113 LEGAL RESEARCH II 3 HRS. (OC)
Prerequisite: PRLGL 112 with a grade of “C” or better. This course examines the purposes, forms, organization, design and language of legal writing and engages the student in the analysis and resolution of the issues presented by the law and the facts. The writing of appellate briefs, research and argumentative memoranda, as well as advisory letters is emphasized. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 114 FAMILY LAW 3 HRS. (OC)
Prerequisite: PRLGL 110 and PRLGL 112 with a grade of “C” or better or department approval. This course studies the marital relationship including: formation, annulment, separation and dissolution (divorce). Consequential considerations are covered such as child custody and support, maintenance (alimony), property settlement and some of the tax consequences. Other matters included in the course are adoption, paternity and the rights of family members. These topics are viewed in the light of Illinois law. The student participates in the completion and drafting of various forms and other documents. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 115 WILLS, TRUSTS AND ESTATE ADMINISTRATION 3 HRS. (OC)
Prerequisite: PRLGL 110 and PRLGL 112 with a grade of “C” or better or department approval. This course informs the student of concepts in and the mechanics of will and trust preparation and estate administration and provides exercises appropriate to the duties of a legal assistant. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 116 CIVIL LITIGATION 3 HRS. (OC)
Prerequisite: PRLGL 110 and PRLGL 112 with a grade of “C” or better and department approval. This course is a study of major steps in preparation for filing of and defensive pleadings for civil lawsuits; discovery; trial preparations, trial and post-trial matters; and ancillary matters. Appropriate reference is made to Illinois law. Exercises are provided. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 117 ADMINISTRATIVE LAW 3 HRS. (OC)
Prerequisite: PRLGL 110 and PRLGL 112 with a grade of “C” or better or department approval. This course provides the student with an overview of administrative law, including agency rule-making and adjudication with specific emphasis on the processing of workers compensation cases under the Illinois Workers Compensation Act and federal social security practice. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 118 LAW OFFICE MANAGEMENT 3 HRS. (OC)
Prerequisite: PRLGL 110 and PRLGL 112 with a grade of “C” or better or department approval. This course provides the student with exposure to practice-oriented contemporary topics of law office management. In addition to studying the organization, politics, employment law and the procedures of a law office, students will be introduced to and given an opportunity to utilize law oriented computer software applications in classroom exercises. Students will be exposed to exercises designed to provide exposure to the skills utilized by a paralegal in file management, time keeping and billing, docket management and developments in computer based legal research and document movement. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 120 MEDICAL TERMINOLOGY FOR PARALEGALS 3 HRS. (OC)
Prerequisite: Department approval. This course presents paralegal students and paralegals with the opportunity to acquire competency with medical terminology and gain experience with practical legal applications for medical terminology. Paralegal students can take this course as an elective; paralegals can take this course as part of their continuing legal education. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 121 PARALEGAL ETHICS AND PROFESSIONAL RESPONSIBILITIES 3 HRS. (OC)
Prerequisite: Department approval. This course is an in-depth review of the canons of professional responsibility, including case study projects. The emphasis is on the duty of paralegals and lawyers to act so as to serve a client’s interests best, to do so in an ethical manner, and to advance the interests of justice. Paralegal students can take this course as an elective; paralegals can take this course as part of their continuing legal education. Lecture Hours: 3 Laboratory Hours: 0

PRLGL 141 CURRENT LAW TOPICS 1 HR. (OC)
Prerequisite: PRLGL 110 with a grade of “C” or better or department approval. This course provides the student with exposure to practice-oriented contemporary topics of law. In addition to studying the recent changes to the law, students will be exposed to exercises designed to provide exposure to the skills utilized by a paralegal in each area of the law covered within the semester. Repeatable up to a maximum of three semester hours of credit. Lecture Hours: 1 - 3 Laboratory Hours: 0

PRLGL 159 PARALEGAL PRE-INTERNSHIP 1 HR. (OC)
Prerequisite: Twelve credit hours of PRLGL courses. This course is designed to enable students to understand and prepare for the internship experience. Students will explore internship and legal career opportunities, develop job application skills, review expectations of professionalism, office procedures, and ethical responsibilities, and select potential internship placements in each student’s areas of interest. Students are required to complete this course prior to enrolling in PRLGL 260 Paralegal Internship. Lecture Hours: 1 Laboratory Hours: 0

PRLGL 215 BUSINESS ORGANIZATION AND PRACTICE 3 HRS. (OC)
Prerequisite: PRLGL 110 and PRLGL 112 with a grade of “C” or better or department approval. This course is intended to provide a guide to knowledge and practical exercises in the paralegal’s function in the day-to-day legal representation of business clients. The course focuses on simulated activities expected of a paralegal in a law
office environment and discussion of the substantive law and procedural tasks involved in the formation and maintenance of various business entities and related business transactions. The course is presented by way of class discussion and related simulations and class assignments focusing on corporate formation, financial structure, meeting shareholders' rights and liabilities, changes in corporate status, as well as on such related topics as trademark registration, file maintenance, and drafting business transaction documents. The first portion of the course focuses on organizational matters with a focus on the creation and organization of a state-specific resource binder in which the student will adapt checklists to meet state requirements, as well as compile relevant state statutes, frequently used telephone listings, filing fee information, and state-specific forms. The second portion of the course will focus on client matters.

Lecture Hours: 3 Laboratory Hours: 0

PRRLG 260 PARALEGAL INTERNSHIP
Prerequisite: Admission to a paralegal program; completion of a minimum of 12 credit hours in the program or department approval; and completion of PRRLG 159 with a "C" or better. The student must have completed all coursework and have access to an approved training station with a program of training scheduled by joint agreement of the student, supervisor, and program coordinator. Special assignments including case studies and/or supplementary reports are required.
Lecture Hours: 1 Laboratory Hours: 15 or equivalent

Philosophy

PHIL 110 INTRODUCTION TO PHILOSOPHY (H4 900)
Prerequisite: Approved reading placement score, or equivalent. This course is a study of recurring philosophical principles and problems. Students will examine philosophical issues surrounding knowledge, the nature of truth, identity, free will, morality, and religion.
Lecture Hours: 3 Laboratory Hours: 0

PHIL 111 LOGIC (H4 906)
Prerequisite: Approved reading placement score, or equivalent. This course will acquaint the student with the terminology and the various forms of inductive and deductive reasoning. It will focus on methods of distinguishing good reasoning from bad and on the rules by which we judge arguments, as well as the practical application of these rules.
Lecture Hours: 3 Laboratory Hours: 0

PHIL 112 COMPARATIVE RELIGIONS (H5 904N)
Prerequisite: Approved reading placement score, or equivalent. An introductory survey of selected teachings, practices and institutions of major Eastern and Western religions. This course may include the role of history, appreciation for forms of expression, and criticism of their origins, rituals, and forms of religious knowledge and destiny.
Lecture Hours: 3 Laboratory Hours: 0

PHIL 113 MEDICAL ETHICS
Prerequisite: Approved reading placement score, or equivalent. This course investigates the multitude of ethical issues which have been raised because of advanced technology in medicine and health care. It attempts to clarify questions on such subjects as abortion, genetic engineering, euthanasia, human experimentation, transplantation, and patient consent. It will also present principles one may apply in making decisions in these areas.
Lecture Hours: 3 Laboratory Hours: 0

PHIL 114 BUSINESS ETHICS
Prerequisite: Approved reading placement score, or equivalent. This course investigates the basic ethical frameworks from which moral decisions are derived. It applies those fundamentals to such practical problems as advertising, the profit motive, labeling, public safety, natural resource preservation and other significant concerns which arise in normal business activities.
Lecture Hours: 3 Laboratory Hours: 0

PHIL 115 ETHICS (H4 904)
Prerequisite: Approved reading placement score, or equivalent. This course is an exploration of Ethics. This is an area of philosophy in which there is an attempt to achieve a systematic understanding of the good along with a clear notion of how we ought to live and why. Readings and discussions will feature several alternative moral theories.
Lecture Hours: 3 Laboratory Hours: 0

PHIL 116 PHILOSOPHY OF RELIGION (H4 905)
Prerequisite: Approved reading placement score, or equivalent. This course involves rational reflection about the experiences, thinking, attitudes, values, and questions that arise in relationship to religious reality. Some of the issues to be considered will include the following: definitions of God’s nature, philosophical arguments for God’s existence, the problem of evil, and the question of divine providence. The course also deals with the relationship between religion and morality, consciousness, and society.
Lecture Hours: 3 Laboratory Hours: 0

Physical Education

PHYED 110 BASKETBALL
This course includes an introduction to the history and the rules of the game with an analysis of fundamentals. Emphasis is placed on individual skills and team play.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 112 SPORTS ACTIVITIES AND FITNESS
Participation is in various activities designed to promote physical fitness. Activities include volleyball, badminton, and other conditioning activities and games.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 114 VOLLEYBALL
This course stresses individual volleyball skills in passing, setting up, serving, blocking and spiking. Basic concepts of offensive and defensive team play are introduced.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 116 INTRODUCTION TO RECREATION
This course is designed to orient students to the field of recreation and recreational activities. It is intended to provide each student opportunities to formulate a philosophy and some basic concepts regarding recreation and recreational services as a profession.
Lecture Hours: 2 Laboratory Hours: 0

PHYED 118 SOFTBALL
This course stresses individual skills in batting, bunting, base running, sliding, fielding, throwing, pitching, infield skills and outfield skills. The individual is introduced to basic concepts of offensive and defensive team play.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 119 ADVANCED SOFTBALL
Prerequisite: PHYED 118 with a grade of “C” or better. This course is a review of basic skills in batting, throwing, fielding, infield skills and outfield skills. The student is introduced to the more intricate aspects of team offense and defense.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 120 BOWLING
This course gives instruction in footwork and the fundamental movements in delivery. Rules, terminology, scoring and etiquette are also covered.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 122 ADVANCED BASKETBALL
Prerequisite: PHYED 110 with a grade of “C” or better. This course includes basic fundamental skills, but emphasizes defensive play, rebounding and teamwork.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 123 ADVANCED BOWLING
Prerequisite: PHYED 120 with a grade of “C” or better. This course will prepare the novice bowler for tournament level bowling. Skills that will be developed include reading the lanes, wrist releases, ball hooking for optimum striking consistency, as well as choosing appropriate bowling equipment.
Lecture Hours: 1 Laboratory Hours: 2 or equivalent

PHYED 124 ADVANCED VOLLEYBALL
Prerequisite: PHYED 114 with a grade of “C” or better. This course is a review of skills in passing, setting, serving, blocking and spiking. Concepts of offense and defense in game situations are introduced.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 125 BEGINNING FENCING
This introductory course emphasizes basic footwork, blade work, and competitive activities. Beginning fencing includes an introduction to the strategy and rules of fencing. Fundamental skills are reinforced through tactical games and conditioning exercises.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 126 BASEBALL
This course stresses individual skills in hitting, base running, fielding, pitching, catching, and position skills. Team offensive and defensive concepts are included.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 127 ADVANCED BASEBALL
Prerequisite: PHYED 126 with a grade of “C” or better. This course is a review of basic skills in hitting, throwing, fielding, pitching, catching, and infield and outfield skills. Greater emphasis is placed on offensive and defensive strategies from a team standpoint. Continuation of the development of flexibility, strength and cardiovascular improvement is stressed.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent
PHYED 128  DISTANCE RUNNING  1 HR. (TC)
This course will teach the basics of distance running including running efficiency, improving cardiovascular endurance, muscle balance, and strength training. The student will be introduced to competitive track or road racing and racing strategies. This course may be repeated once for credit.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 129  ADVANCED DISTANCE RUNNING  1 HR. (TC)
Prerequisite: PHYED 128 with a grade of "C" or better. This course stresses different types of training for the distance runner. Philosophies will include steady state running, fartlek, interval training, and hill training. Advanced racing techniques, such as surging, will be introduced. This course may be repeated once for credit.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 130  GOLF  1 HR. (TC)
This course stresses the techniques of driving, fairway shots, pitching and putting. The student is introduced to general rules and match and stroke play.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 131  ADVANCED GOLF  1 HR. (TC)
Prerequisite: PHYED 130 with a grade of "C" or better or department approval. In this course the student will receive instruction on the basic techniques of driving, fairway shots, pitching and putting. The class will receive instruction on shot selection that would be utilized in actual competition.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 135  ARCHERY  1 HR. (TC)
Instruction is given in equipment selection, safety, scoring, and shooting techniques. Students also participate in tournaments in target archery and novelty events.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 136  FOUNDATIONS OF HUMAN MOVEMENT  3 HRS. (TC)
This is an introduction course for physical education majors looking to transfer to a four-year institution in an exercise science curriculum. This course will review the history of physical education, sport and exercise science, as well as introduce the basic concepts of movement and the professions available in this area.
Lecture Hours: 3  Laboratory Hours: 0

PHYED 138  LACROSSE: HISTORY AND BASIC SKILLS  1 HR. (TC)
This introductory course begins with a survey of the history of the sport from its North American Indian roots to the current indoor and outdoor (men's and women's) versions. Basic skills include throwing, catching, cradling, scooping, passing, shooting, and goal tending. Skills will be learned, developed and reinforced through drills, skill contests, and actual game play using modified rules.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 140  PHYSICAL CONDITIONING  1 HR. (TC)
This course involves utilization of calisthetics, weight training and aerobic activities to promote physical fitness.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 141  FIGURE FITNESS FOR WOMEN  1 HR. (TC)
This course includes concepts and application of exercise and nutrition toward total fitness.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 142  PERSONAL DEVELOPMENT AND WEIGHT CONTROL  1 HR. (TC)
This course is a planned program of fitness, exercise, nutrition, diet, relaxation, posture and sports activity for the personal development of each individual.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 143  SELF-DEFENSE  1 HR. (TC)
This course introduces self-defense in the practical form, as used in possible street confrontations.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 145  ADVANCED PHYSICAL CONDITIONING  1 HR. (TC)
Prerequisite: PHYED 140 with a grade of "C" or better. This course involves the utilization of calisthetics, weight training and aerobic activities to promote physical fitness.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 146  GYMNASTICS  1 HR. (TC)
Instruction in fundamental skills on selected apparatus such as the trampoline, mats, balance beam, and on uneven parallel bars is included in gymnastics.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 147  TAI CHI  1 HR. (TC)
The student is introduced to the basics of Chen style Tai Chi.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 149  WEIGHT TRAINING  1 HR. (TC)
This course emphasizes concepts and application of Nautilus, or a similar type of equipment, and/or free weights to promote strength and physical fitness.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 150  BEGINNING SWIMMING  1 HR. (TC)
This course is open to non-swimmers and low beginners. Instruction is given in the fundamental skills of floating, treading water, bobbing, elementary crawlstrokes and the elementary backstroke.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 152  INTERMEDIATE SWIMMING  1 HR. (TC)
Prerequisite: PHYED 150 with a grade of "C" or better or department approval. This course provides instruction on the front and back crawl, elementary backstroke, sidestroke and breaststroke for improved efficiency. Diving and rescue skills are also included.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 153  LIFEGUARD TRAINING  1 HR. (TC)
Prerequisite: PHYED 152 with a grade of "C" or better or department approval. This course covers the American Red Cross principles and techniques of lifesaving. Instruction is given in safety, accident prevention, defense mechanisms and ability to assist and rescue others. The Lifeguarding Today Certificate may be earned.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 156  SCUBA DIVING  1 HR. (TC)
Prerequisite: Some swimming ability needed. This course provides instruction on the care and use of scuba equipment, the underwater environment, decompression tables, and local and ocean diving. Scuba diving skills are taught in an Olympic pool, preparing you for your PADI Open Water certification. Some swimming skills required.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 157  ADVANCED SCUBA DIVING  1 HR. (TC)
Prerequisite: PHYED 156 with a grade of "C" or better. This course consists of pool and classroom instruction in equipment maintenance, underwater navigation, diving maladies, ocean diving, and other specialty dives. Advanced scuba diving includes five open-water dives and advanced certification.
Lecture Hours: 5  Laboratory Hours: 2 or equivalent

PHYED 160  TENNIS  1 HR. (TC)
This course provides instruction including the rules, strategy and scoring of the game. Students are introduced to the fundamentals of the basic shots and singles and doubles competition.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 161  ADVANCED TENNIS  1 HR. (TC)
Prerequisite: PHYED 160 with a grade of "C" or better or department approval. This course provides instruction including the rules, singles and doubles strategy and advanced scoring such as the tie-breaker. Students are introduced to advanced strokes and taught to play singles and doubles in an advanced and aggressive manner.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 162  ADVANCED WEIGHT TRAINING  1 HR. (TC)
Prerequisite: PHYED 149 with a grade of "C" or better. This course includes advanced concepts and application of Nautilus, or a similar type of equipment, and/or free weights to promote strength and physical fitness, plus aerobic exercises.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 166  WELLNESS/GOLF  1 HR. (TC)
The student will be instructed in basic techniques to develop personal wellness and fitness. Wellness portion of the course will be in the first three meetings.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 167  WELLNESS/ TENNIS  1 HR. (TC)
Students will be instructed in basic techniques to develop personal wellness and fitness, in addition to fundamentals in singles and doubles tennis.
Lecture Hours: 0  Laboratory Hours: 2

PHYED 168  AEROBICS  1 HR. (TC)
This course will emphasize the utilization of various aerobic techniques to promote physical fitness. The student will receive instruction in the basic concepts and techniques of mixed impact aerobics, step, kickboxing and muscle toning activities in order to develop personal wellness and fitness.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 169  ADVANCED AEROBICS  1 HR. (TC)
Prerequisite: PHYED 168 with a grade of "C" or better. This course will utilize various aerobic techniques to promote physical fitness. The student will receive advanced instruction in concepts and techniques of mixed impact aerobics, step, kickboxing, aerobic circuit, and muscle toning activities in order to develop an advanced level of wellness and fitness.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 171  SOCIAL DANCE  1 HR. (TC)
This course gives instruction in the distinguishing of the various dance tempos. Performance of waltz, foxtrot, polka and current novelty dances, as well as the techniques of leading and following will be included.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent

PHYED 172  CONTEMPORARY DANCE  1 HR. (TC)
This course gives students an exposure to modern dance. Dances are performed in a variety of dance studios and include elements of contemporary, jazz, and hip-hop.
Lecture Hours: 0  Laboratory Hours: 2 or equivalent
PHYED 172 FOLK DANCE 1 HR. (TC)
Instruction is given in the folk dances of various countries and cultures. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 174 SQUARE DANCE 1 HR. (TC)
This course gives instruction in square dance as an activity in the social setting as danced today throughout the United States. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 175 PRINCIPLES OF TRAINING 3 HRS. (TC)
This course will cover the proper fundamentals and techniques of different styles of fitness training. Techniques of free weight training, circuit training, cross training, and well being (yoga, Pilates, tai chi) will be emphasized. Use and care of cardiovascular equipment will also be covered. Lecture Hours: 2 Laboratory Hours: 2 or equivalent

PHYED 176 EXERCISE TESTING, PRESCRIPTION, AND DESIGN 3 HRS. (TC)
Prerequisite: PHYED 175 with a grade of “C” or better. This course will instruct students on evaluating clients in the fitness profession. Students will learn the basics of exercise testing and how to evaluate individuals and groups. The students will then use their evaluations to safely and effectively design workout programs for the clients. Students will understand the wide diversity of the clients' physical abilities. Lecture Hours: 3 Laboratory Hours: 1 or equivalent

PHYED 180 AEROBIC SUPER CIRCUIT FITNESS 1 HR. (TC)
This course will introduce the student to an exercise program built around a multi-station aerobic super circuit utilizing weights with multiple repetitions. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 181 AEROBIC SUPER CIRCUIT FITNESS 1 HR. (TC)
Prerequisite: PHYED 180 with a grade of “C” or better. This course is a continuation of PHYED 180 and is designed to further the student’s understanding of the aerobic concept of fitness. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 182 AEROBIC SUPER CIRCUIT FITNESS 1 HR. (TC)
Prerequisite: PHYED 180 and PHYED 181 both with a grade of “C” or better. This course is a continuation of PHYED 181 and is designed to further the student’s understanding of the aerobic concept of fitness and to better develop aerobic performance. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 183 AEROBIC SUPER CIRCUIT FITNESS 1 HR. (TC)
Prerequisite: PHYED 180, 181 and 182, all with a grade of “C” or better. This course is a continuation of PHYED 182 and is designed to further the student’s understanding of aerobic fitness, to raise aerobic performance levels and to attain the benefits of regular exercise. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 190 SOCCER 1 HR. (TC)
This course is designed to provide students with an active understanding of the game of soccer. Students will learn the skills necessary to be able to play all of the positions on the field, as well as the technical terms associated with the game. Lecture Hours: 0 Laboratory Hours: 2.5 or equivalent

PHYED 191 ADVANCED SOCCER 1 HR. (TC)
Prerequisite: PHYED 190 with a grade of “C” or better. This course is designed to further the students' knowledge of the game of soccer. High-level skills will be taught to the advanced student. Lecture Hours: 0 Laboratory Hours: 2.5 or equivalent

PHYED 200 OFFICIATING OF WOMEN S SPORT 1 HR. (TC)
Instruction is provided in officiating techniques for women’s sports as designated by the NAGWS in basketball and volleyball. Lecture Hours: 1 Laboratory Hours: 0

PHYED 203 OFFICIATING OF MEN’S SPORTS 1 HR. (TC)
This course provides instruction in officiating techniques for men’s sports as designated by the IHSA in football, soccer, basketball, baseball and wrestling. Lecture Hours: 0 Laboratory Hours: 2 or equivalent

PHYED 205 FITNESS AND WELLNESS 2 HRS. (TC)
This course covers basic fitness and wellness information, aiding the student in making lifestyle choices that can lead to increased health and wellness. Lecture Hours: 2 Laboratory Hours: 0

PHYED 210 SPORT PSYCHOLOGY 3 HRS. (TC)
Prerequisite: PSY 110 with a grade of “C” or better or department approval. This course will provide an overview into the nature of psychology as it applies to sport and leisure activities. Topics that will be discussed include motivation, group dynamics, competition and cooperation, and performance enhancement. Lecture Hours: 3 Laboratory Hours: 0

PHYED 236 SCIENTIFIC BASIS OF HUMAN MOVEMENT 3 HRS. (TC)
Prerequisite: PHYED 136 or department consent. This is a lecture and laboratory course designed for the student interested in obtaining a basic understanding of the physiological, psychological and sociological effects of exercise. Lecture Hours: 2 Laboratory Hours: 1

PHYED 276 PERSONAL TRAINING FIELD EXPERIENCE 3 HRS. (TC)
Prerequisite: PHYED 176. This course is designed to prepare the student for work as a personal trainer. The student will work the floor of the fitness center as a personal trainer, designing workouts, performing exercise testing, and leading group fitness classes. The student will be required to perform six hours per week on the fitness floor/group exercise area. Lecture Hours: 0 Laboratory Hours: 6 or equivalent

PHYED 277 PHYSICAL EDUCATION TOPICS 1 HR. (TC)
In this course, students will learn about specifics topics that pertain to physical education, personal training, and sport management. Such topics could include special population education and training, traditional and new methods of training, management of facilities, and marketing techniques. This course is repeatable up to a maximum of three total credit hours. Lecture Hours: 1 - 3 Laboratory Hours: 0

Physical Science

PHYS 090 INTRODUCTION TO SCIENTIFIC LITERACY 3 HRS. (BEC)
This course will facilitate student development of science literacy through the implementation of student/faculty-generated science investigations, utilizing instruction across disciplines in collaboration with faculty members in all departments. This course is intended specifically for students to prepare for transfer level science courses. Lecture Hours: 2 Laboratory Hours: 2

PHYS 110 ENERGY AND ENVIRONMENT (P9 900L) 4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course provides students not majoring in science with an opportunity to study world energy and environmental problems while learning basic concepts of physical science. It surveys topics of availability of energy resources, storage and consumption of energy, alternate sources of energy, and measurement and management of energy as they relate to our planet's life-support capabilities. Recommended for students who desire to build a background of information useful in keeping abreast of future developments in areas such as construction, transportation, industry, business, agriculture, economics and marketing. Lecture Hours: 3 Laboratory Hours: 2

PHYS 114 INTRODUCTION TO ASTRONOMY (P1 906L) 4 HRS. (TC)
Prerequisite: COMPASS Reading score of 81 or higher, or equivalent, or department approval. This course explores the origin and nature of the universe, intergalactic space, and the motion within the celestial sphere. Three lecture and two laboratory hours per week including instruction at the Planetarium and Observatory. Lecture Hours: 3 Laboratory Hours: 2

Physical Therapist Assistant

PHTA 100 PHYSICAL THERAPY ORIENTATION 0.5 HRS. (OC)
This course is designed to introduce students to the profession of physical therapy and the role of the physical therapist assistant. Basic physical therapy interventions, such as superficial heat and cold modalities, massage, gait training, and therapeutic exercises will be demonstrated and practiced. This course is repeatable one time. Lecture Hours: 0.5 Laboratory Hours: 0

PHTA 112 INTRODUCTION TO PHYSICAL THERAPY 1 HR. (OC)
Prerequisite: PHTA 114 and BIOL 140 with a grade of “C” or better and department approval. This course provides an introduction to the physical therapy profession, the American Physical Therapy Association, the role of the physical therapist assistant, development of communication skills needed in the clinical setting, review of professional literature, and an introduction to legal and ethical issues in physical therapy. Lecture Hours: 1 Laboratory Hours: 0

PHTA 114 FUNDAMENTALS FOR THE PHYSICAL THERAPIST 2 HRS. (OC)
ASSISTANT I
Prerequisite: Acceptance to Physical Therapist Assistant Program. This course provides a beginning study of basic physical therapy skills. The emphasis is on aspesis and sterile technique, vital signs, body mechanics, basic positioning and bed mobility skills, wheelchairs, including basic management and mobility, transfer techniques and introduction to the patient chart and SOAP note format. Lecture Hours: 1 Laboratory Hours: 3
PHTA 115  FUNDAMENTALS FOR THE PHYSICAL THERAPIST  4 HRS. (OC)
ASSISTANT II
Prerequisite: PHTA 114 and BIOL 140 with a “C” or better, or department approval.
This course provides a continuation of the study of basic physical therapy skills. Emphasis
is on the use of assistive devices/introduction to normal gait, techniques of
draping and positioning for treatment, principles and practices related to use of
selected modalities of therapeutic heat and cold, hydrotherapy, ultrasound, thera-
peutic massage techniques, documentation/SOAP note writing and orientation to
clinical practice. Lecture Hours: 2 Laboratory Hours: 6

PHTA 116  FUNCTIONAL ANATOMY  4 HRS. (OC)
Prerequisite: PHTA 114 and BIOL 140 with a grade of “C” or better, or department
approval. This course includes analysis of human motion and muscle actions with
detailed study of the musculoskeletal and nervous systems. It provides the founda-
tion for understanding and application of physical therapy approaches to treatment.
Lecture Hours: 2 Laboratory Hours: 6

PHTA 118  FUNDAMENTALS FOR THE PHYSICAL THERAPIST  5 HRS. (OC)
ASSISTANT III
Prerequisite: PHTA 112, PHTA 115, PHTA 116 and HLTH 121 all with a grade of
“C” or better or department approval. This course is a continuation of the skills and
knowledge acquired in PHTA 115, focusing on orthopedic and arthritic conditions
and their therapeutic management. Therapeutic exercise including stretching and
strengthening, postural training, mechanical traction, goniometry, manual muscle
testing and the understanding of common special tests performed by the physical
therapist.
Lecture Hours: 3 Laboratory Hours: 6

PHTA 130  CLINICAL I  1 HR. (OC)
Prerequisite: PHTA 216 with a grade of “C” or better or department approval. This
course includes an orientation to the clinical facility and supervised clinical practice
in a physical therapy department. Students will participate and observe a variety of
patient care interventions used in a physical therapy setting.
Lecture Hours: 2 Laboratory Hours: 6

PHTA 216  FUNDAMENTALS FOR THE PHYSICAL THERAPIST  3 HRS. (OC)
ASSISTANT IV
Prerequisite: PHTA 112, PHTA 115, PHTA 116, and HLTH 121 all with a grade of
“C” or better or department approval. This course provides an orientation to the
principles of therapeutic electrical currents and their effects on the human body.
Electrotherapeutic techniques used in physical therapy are introduced.
Lecture Hours: 1 Laboratory Hours: 4

PHTA 218  FUNDAMENTALS FOR THE PHYSICAL THERAPIST  5 HRS. (OC)
ASSISTANT V
Prerequisite: PHTA 116 and PHTA 216 with a grade of “C” or better and PHTA 130
with a “S” grade or department approval. This course focuses on common neurolog-
cal conditions treated in physical therapy for adult and pediatric populations.
Lecture Hours: 3 Laboratory Hours: 6

PHTA 220  FUNDAMENTALS FOR THE PHYSICAL THERAPIST  4 HRS. (OC)
ASSISTANT VI
Prerequisite: PHTA 216 with a grade of “C” or better and PHTA 230 with a “S” grade
or department approval. This course is a continuation of PHTA 216 with a focus on
therapeutic interventions for adult and pediatric populations.
Lecture Hours: 2 Laboratory Hours: 6

PHTA 222  CLINICAL SEMINAR  2 HRS. (OC)
Prerequisite: PHTA 218 with a grade of “C” or better and PHTA 230 with a “S” grade
or department approval. This course incorporates an overview of the organization
and administration of a physical therapy practice including legal and ethical issues,
professional literature and evidence based practice, healthcare management and
administration, reimbursement, quality improvement, and the role of physical
therapy personnel. This course also covers professional issues including preparation
for employment, continuing education and lifelong learning, and preparation for the
licensure examination.
Lecture Hours: 2 Laboratory Hours: 0

PHTA 230  CLINICAL II  2 HRS. (OC)
Prerequisite: PHTA 118 with a grade of “C” or better and PHTA 130 with a grade of
“S” or department approval. This course is a progression of PHTA 130 in which
the student develops the ability to initiate treatment interventions and increase clinical
problem solving and understanding of rationale and outcomes. The student will
meet more complex patients with continued direct personal supervision by qualified
clinical instructors.
Lecture Hours: 0 Laboratory Hours: 16 or equivalent

PHTA 232  CLINICAL III  4 HRS. (OC)
Prerequisite: PHTA 220 and PHTA 222 with a “C” or better and PHTA 230 with a “S”
grade or department approval. This course is a progression of PHTA 230 in which
the student develops proficiency with all aspects of a full time physical
therapist assistant’s patient care workload, under general supervision of qualified
clinical instructors.
Lecture Hours: 0 Laboratory Hours: 20

PHTA 255  INDEPENDENT STUDY  1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work
on a technical project, research or other specialized study related to individual
academic needs. A written plan for the independent-study project is developed
with a faculty member (including a detailed description of the project, the number of
credit hours assigned to it, the evaluative criteria to be used, and other relevant
matters) and the project is carried out under the periodic direction of the faculty
member. The written plan is submitted to the associate dean for approval and
remains on file within the department, together with a final written report submitted
to the faculty member by the student. Repeatable up to a maximum of five semester
hours of credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

PHYS 104  PRE-TECHNICAL PHYSICS  4 HRS. (OC)
Prerequisite: A grade of “C” or better in MAT 106 or equivalent. This is a course in
elementary physics. It is intended to provide the student with an introduction to
scientific units of measure, dimensional analysis, and basic applications of physical
principles to the student’s technical interests. The topics selected and discussed will
be directed toward the student’s field of study.
Lecture Hours: 3 Laboratory Hours: 3

PHYS 110  FOUNDATIONS OF PHYSICS (P1 901L)  4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is an
introductory treatment of the study of motion, atomic structure, heat, sound, elec-
tricity and light. An attempt is made to relate directly the physical concepts to the
major fields of study represented in the class. Designed for students in some of the
applied science programs, as a general education course for students in the non-
science transfer programs, and as a foundations course for students strengthening
their science background before enrolling in one of the regular physics sequences.
Lecture Hours: 3 Laboratory Hours: 2

PHYS 112  TECHNICAL PHYSICS I  4 HRS. (TC)
Prerequisite: A grade of “C” or better in MATH 130. This course covers the basic
concepts of mechanics (forces, velocity, acceleration, energy, power); heat and ther-
modynamics; simple machines; fluid mechanics; and mechanical properties of
materials. Mathematics used in computations include algebra, trigonometry, and some
basic programming.
Lecture Hours: 3 Laboratory Hours: 3

PHYS 113  TECHNICAL PHYSICS II  4 HRS. (TC)
Prerequisite: PHYS 112 with a grade of “C” or better. This course covers the advanced
concepts of mechanics (impulse, momentum, projectile motion, rotational motion,
circular motion, simple harmonic motion); light and optics; electricity; magnetism;
quantum mechanics; and modern physics (atomic and nuclear physics).
Lecture Hours: 3 Laboratory Hours: 3

PHYS 120  GENERAL PHYSICS (P1 900L)  5 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and high school or
college credit in trigonometry or concurrent enrollment in MATH 120. This course is
a study of mechanics and thermodynamics designed for students in the liberal arts.
Lecture Hours: 4 Laboratory Hours: 3

PHYS 121  GENERAL PHYSICS  5 HRS. (TC)
Prerequisite: PHYS 120 with a grade of “C” or better. This course is a continuation
of PHYS 120. The course includes: the study of electricity, magnetism, wave motion,
light and modern physics.
Lecture Hours: 4 Laboratory Hours: 3

PHYS 211  ENGINEERING PHYSICS: MECHANICS  4 HRS. (TC)
Prerequisite: PHYS 110 with a grade of “C” or better, or high school physics, MATH
222 with a grade of “C” or better, and credit or concurrent enrollment in MATH 223.
This course is a study of mechanics for students majoring in engineering, mathe-
matics, physics, or chemistry. Topics will include Newton’s laws; linear and rotational
kinematics, dynamics, and momentum; systems of particles; work and energy,
harmonic motion and waves.
Lecture Hours: 3 Laboratory Hours: 3

PHYS 212  ENGINEERING PHYSICS: ELECTRICITY AND
MAGNETISM (PHY 912)  4 HRS. (TC)
Prerequisite: A grade of “C” or better in PHYS 211; a grade of “C” or better or
concurrent enrollment in MATH 224. This course is a continuation of PHYS 211 and
is a study of electricity, magnetism, and geometric optics for students majoring in
engineering, mathematics, physics, or chemistry. Topics will include Coulomb’s
Law; electric fields and potential; resistance, capacitance, and inductance; DC and
AC circuits; magnetic forces and fields; Laws of Gauss, Ampere, and Faraday;
Maxwell’s equations and electromagnetic waves; geometric optics and polarization.
Lecture Hours: 3 Laboratory Hours: 3

</thead>
<tbody>
<tr>
<td>PRNRS 110</td>
<td>PRACTICAL NURSING I</td>
<td>9 HRS.</td>
<td>prerequisite: Acceptance to the Practical Nursing curriculum and concurrently enrolled in BIOL 140, and PRNRS 150 or completion with a grade of &quot;C&quot; or better. This course is the study of nursing concepts to meet patient's basic needs. The emphasis is on human adaptation and the acquisition of skills and knowledge fundamental to the care of all patients. Clinical experiences assist the student to begin assessing the patients, utilizing nursing diagnoses, understanding fundamental pharmacology theory, identifying measurable patient outcomes, developing nursing interventions with focus on Maslow's Hierarchy of Needs. Lecture Hours: 5 Laboratory Hours: 12</td>
</tr>
<tr>
<td>PRNRS 111</td>
<td>PRACTICAL NURSING II</td>
<td>12 HRS.</td>
<td>prerequisite: PRNRS 110 and PRNRS 150 with a grade of &quot;C&quot; or better. This course builds upon the concepts introduced in Practical Nursing I and utilizes the nursing process in dealing with more complex health care problems. Supervised clinical experience with adults in hospitals and other community agencies is included. Lecture Hours: 7 Laboratory Hours: 15</td>
</tr>
<tr>
<td>PRNRS 112</td>
<td>PRACTICAL NURSING III</td>
<td>5 HRS.</td>
<td>prerequisite: PRNRS 111 with a grade of &quot;C&quot; or better. This course places emphasis on care of the expectant family and pediatric patients. Supervised clinical experience in hospital obstetrics and pediatrics departments is included. Lecture Hours: 3 Laboratory Hours: 6</td>
</tr>
<tr>
<td>PRNRS 160</td>
<td>MEDICAL CORPSMAN TO PRACTICAL NURSE TRANSITION</td>
<td>6 HRS.</td>
<td>prerequisite: Successful completion of the METC Basic Medical Technician Corpsman Program within the last five years. If more than five years, at least one year of experience using corpsman skills within the last five years, or department approval. This course is designed for Veterans who have completed the Medical Education and Training Campus (METC) Basic Medical Technician Corpsman Program and seek to earn a practical nurse certificate. The program addresses differences in competencies between the METC Basic Medical Technician Corpsman Program and those of a practical nursing program as delineated in the Illinois Nurse Practice Act. Program components include didactic, clinical and skills validation learning experiences. Upon successful program completion, students will be awarded a practical nurse certificate and may apply to the Illinois Board of Nursing for licensure as a Licensed Practical Nurse by examination NCLEX-PN (National Council Licensing Exam- Practical Nurse). This course is typically offered as an eight week course.</td>
</tr>
<tr>
<td>PRNRS 161</td>
<td>MEDICAL CORPSMAN TO PRACTICAL NURSE</td>
<td>6 HRS.</td>
<td>prerequisite: Approval rating, or equivalent. This course is designed for individuals to prepare for a career as a commercial driver and leads to a Tractor/Trailer Driver Certificate. Students will develop proficiency in operating a vehicle and will study trucking regulations, reporting requirements, map reading and trip planning. Upon successful completion of course work, students will take the Secretary of State Class A Skills Test. Daytime classes begin monthly, and evening classes begin every two months. Usually taught with forty hours of classroom lecture and 120 hours of yard work and behind-the-wheel practice. Lecture Hours: 3 Laboratory Hours: 7</td>
</tr>
<tr>
<td>PSY 110</td>
<td>INTRODUCTION TO PSYCHOLOGY</td>
<td>3 HRS.</td>
<td>prerequisite: Approved reading placement score, or equivalent. Psychology is the scientific study of behavior and mental processes. This course will introduce the student to fundamentals of physiological psychology, sensation and perception, learning, emotions and motivation, and psychological disorders and their treatment. The role of research and the scientific method are emphasized throughout the course. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>PSY 111</td>
<td>PSYCHOLOGY OF GENDER DIFFERENCES</td>
<td>3 HRS.</td>
<td>prerequisite: PSY 110 with a grade of &quot;C&quot; or better. This course is a comparison of the major theoretical approaches to explaining personality, including its development and relation to adaptive and maladaptive human behavior. The discussion of empirical research and treatment methods will be included. Lecture Hours: 3 Laboratory Hours: 0</td>
</tr>
<tr>
<td>PSY 115</td>
<td>HUMAN POTENTIAL</td>
<td>1 HRS.</td>
<td>This course is designed to help students experience a greater degree of control in their own life, the motivation to change that perceived to need change, and discover what is truly important. Through positive group interaction each participant will increase awareness of self, gain insight into goals, values and motivations, and increase feelings of self-worth. This course is usually taught in eight two-hour sessions. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>
<tr>
<td>PSY 117</td>
<td>CONFLICT RESOLUTION - LIFESTYLE PLANNING</td>
<td>1 HRS.</td>
<td>prerequisite: PSY 116 with a grade of &quot;C&quot; or better. This course emphasizes an advanced phase of the Human Potential experience, the identification and resolution of personal conflicts, and the clarification and affirmation of meaningful lifestyles. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>

### Radiography

**PSY 118** Human Sexuality  3 HRS. (TC)  
Prerequisite: PSY 110 with a grade of “C” or better or department approval. This course focuses on biological, psychological, and sociological correlates of human sexual behavior. Topics include: anatomy and physiology of the reproductive systems, sexually transmitted diseases, birth control, as well as cross-cultural and historical views, sexual variations, deviations, dysfunctions and gender identity. Some topics are somewhat sensitive and controversial.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 127** Crisis Management  3 HRS. (OC)  
This course emphasizes the identification and resolution of personal and professional conflicts. Cultural issues are considered. Three lecture hours per week for six weeks.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 200** Educational Psychology  3 HRS. (TC)  
Prerequisite: PSY 110 with a grade of “C” or better or department approval. This course emphasizes the application of psychological principles and knowledge to the learning process in an educational setting. The course’s objectives are aligned with the Illinois Professional Teaching Standards.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 202** Child and Adolescent Development (S6 903)  3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent, and PSY 110. This course is a review of research in developmental psychology regarding the physical, perceptual, cognitive, and social development of children and adolescent.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 210** Human Social Behavior (S8 900)  3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent, and PSY 110 or SOC 110 with a grade of “C” or better. This course will emphasize empirically derived principles of human social behavior. A number of topics will be considered including: attitudes and attitude change; interpersonal attraction; social influence, conformity and obedience; person perception (impression formation); aggression and altruism; group processes and leadership; and prejudice and discrimination. The thrust of the course will be to deal with two questions: (1) What has psychological research shown us about human social behavior (in each of the topical areas mentioned above); and (2) What are the implications of this research for understanding, changing, or resisting the change of ourselves, others and society.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 215** The Dynamics of Organizational Behavior  3 HRS. (TC)  
Prerequisite: PSY 110 with a grade of “C” or better. This course addresses the theory, research and practical applications of behavior in organizations. Specific topics pertain to understanding self and others at work, creating effective work groups, leadership and management, and effective organizations. Students have the option to apply for a leadership certificate upon completion of additional designated assignments.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 220** Adulthood and Aging (S6 905)  3 HRS. (TC)  
Prerequisite: Approved reading placement score, or equivalent, or PSY 110 or SOC 110, or CHILD 120. This course is an examination of the psychological, social and biological influences that affect the human life course from young adulthood to old age. The topics covered may include memory and intellectual functioning, personality and social relationships, physical and emotional health, and life transitions.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 225** Abnormal Psychology  3 HRS. (TC)  
Prerequisite: PSY 110 with a grade of “C” or better. This course emphasizes the identification and treatment of psychological disorders. Practical applications of the information will be stressed.  
Lecture Hours: 3 Laboratory Hours: 0

**PSY 250** Introduction to Research Methods in the Behavioral Sciences  3 HRS. (TC)  
Prerequisite: MATH 111 and six hours social science; or department approval. This course is an introduction to research design used in fields of psychology, sociology and education. In addition, topical coverage includes the use of descriptive and inferential statistics. Junior and senior level courses in four-year schools normally require this subject as a prerequisite for advanced study in the social sciences.  
Lecture Hours: 3 Laboratory Hours: 0

**Radiography**

**RADTK 100** Exposure to Radiography  0.5 HRS. (OC)  
This course is designed to introduce students to the medical imaging profession and the role of the radiologic technologist. Basic responsibilities of the radiologic technologist, such as patient interaction and procedures, basic radiation protection measures, and general image evaluation skills will be demonstrated and practiced.  
Lecture Hours: .5 Laboratory Hours: 0

**RADTK 110** Fundamentals of Radiography I  6 HRS. (OC)  
Prerequisite: Acceptance to Radiography Program. Content is designed to introduce students to radiography and the role of the radiographer as a member of the health care team. Students become familiar with procedures to be followed when working with ionizing radiation and concepts of patient care. Anatomy and terminology of body systems related to the performance of imaging procedures of the chest, abdomen, GI tract, upper extremity, and lower extremity are also presented, with emphasis on positioning and image analysis.  
Lecture Hours: 6 Laboratory Hours: 0

**RADTK 112** Fundamentals of Radiography, Directed Practice Orientation  1 HR. (OC)  
Prerequisite: Concurrent enrollment in RADTK 110. This course provides participation in supervised clinical experience in a hospital medical imaging department.  
Lecture Hours: 0 Laboratory Hours: 8

**RADTK 120** Fundamentals of Radiography II  6 HRS. (OC)  
Prerequisite: RADTK 110 with a grade of “C” or better and RADTK 112 with a grade of “S”. This course covers the anatomy and terminology of the bony thorax, shoulder girdle, pelvic girdle, and vertebral column, with emphasis on radiographic positioning and image analysis. Atomic structure, nature and characteristics of radiation, x-ray production, photon interactions with matter and factors affecting emission spectra are also presented. Content also establishes a knowledge base in radiographic, fluoroscopic, and mobile equipment requirements and design, and associated quality management criteria.  
Lecture Hours: 6 Laboratory Hours: 0

**RADTK 121** Fundamentals of Radiography, Directed Practice I  3 HRS. (OC)  
Prerequisite: Concurrent enrollment in RADTK 120. This course provides participation in supervised clinical experience in a hospital medical imaging department.  
Lecture Hours: 0 Laboratory Hours: 24

**RADTK 150** Basic Principles of Computed Tomography  1 HR. (OC)  
Prerequisite: Concurrent enrollment in RADTK 200. This course provides entry-level radiography students with principles related to computed tomography (CT) imaging.  
Lecture Hours: 1 Laboratory Hours: 0

**RADTK 200** Radiography I  3 HRS. (OC)  
Prerequisite: RADTK 120 with a grade of “C” or better and RADTK 121 with a grade of “S”. This course is designed to provide an understanding of the principles and operation of digital imaging systems found in diagnostic radiology. Factors that impact image acquisition, display, archiving and retrieval are discussed. Guidelines for selecting exposure factors, evaluating images, and principles of digital quality assurance and maintenance are presented. This course also provides a fundamental background in ethics and introduction to legal principles and professional standards.  
Lecture Hours: 3 Laboratory Hours: 0

**RADTK 201** Fundamentals of Radiography, Directed Practice II  2 HRS. (OC)  
Prerequisite: Concurrent enrollment in RADTK 200. This course provides participation in supervised clinical experience in a hospital medical imaging department.  
Lecture Hours: 0 Laboratory Hours: 14

**RADTK 210** Radiography II  6 HRS. (OC)  
Prerequisite: RADTK 200 with a grade of “C” or better and RADTK 211 with a grade of “S”. This course covers anatomy and terminology related to the performance of radiography of the cranium with emphasis on positioning and image analysis. The principles of radiation protection including the responsibilities of the radiographer for patients, personnel, and the public are presented. Radiation effects on molecules, cells, tissues, and the body as a whole are discussed.  
Lecture Hours: 6 Laboratory Hours: 0

**RADTK 211** Radiography, Directed Practice III  3 HRS. (OC)  
Prerequisite: Concurrent enrollment in RADTK 210. This course provides participation in supervised clinical experience in a hospital medical imaging department.  
Lecture Hours: 0 Laboratory Hours: 24

**RADTK 220** Radiography III  3 HRS. (OC)  
Prerequisite: RADTK 210 and RADTK 260 with a grade of “C” or better and RADTK 211 with a grade of “S”. This course is designed to provide a knowledge base necessary to perform imaging procedures of the circulatory, lymphatic, biliary, urinary, central nervous, and reproductive systems, and other special studies with emphasis on related pharmacology, equipment, and image analysis. Additional imaging modalities will also be presented and explored.  
Lecture Hours: 3 Laboratory Hours: 0

**RADTK 221** Radiography, Directed Practice IV  3 HRS. (OC)  
Prerequisite: Concurrent enrollment in RADTK 220. This course provides participation in supervised clinical experience in a hospital medical imaging department.  
Lecture Hours: 0 Laboratory Hours: 24
RADTK 230  RADIOMETRY IV  2 HRS. (OC)
Prerequisite: RADTK 220 with a grade of "C" or better and RADTK 221 with a grade of "S". This course enhances students' knowledge and understanding of current trends and issues related to the radiologic sciences. It also serves as a comprehensive review for the national certification examination.
Lecture Hours: 2 Laboratory Hours: 0

RADTK 231  RADIOMETRY, DIRECTED PRACTICE V  2 HRS. (OC)
Prerequisite: Concurrent enrollment in RADTK 230. This course provides participation in supervised clinical experience in a hospital medical imaging department.
Lecture Hours: 0 Laboratory Hours: 14

RADTK 255  INDEPENDENT STUDY  1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research or other specialized study related to individual academic needs. A written plan for the independent-study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit. Three to fifteen laboratory hours per week or equivalent.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

RADTK 260  SECTIONAL ANATOMY FOR DIAGNOSTIC IMAGING  3 HRS. (OC)
Prerequisite: RADTK 200 with a grade of "C" or better and RADTK 201 with a grade of "S" or department approval. This course is a study of human anatomy in sectional planes visualized in computed tomography (CT), magnetic resonance imaging (MRI), and ultrasound. Emphasis is on anatomy of the head, neck, spine, thorax, abdomen, pelvis, and musculoskeletal system with comparison of planar anatomy to sectional anatomy.
Lecture Hours: 3 Laboratory Hours: 0

RADTK 270  PATHOLOGY AND PHARMACOLOGY FOR THE IMAGING PROFESSIONAL  3 HRS. (OC)
Prerequisite: RADTK 210 and 260 with a grade of "C" or better and RADTK 211 with a grade of "S" or department approval. This course is designed to provide an understanding of common pathologic conditions and disease processes. Each disease or traumatic process is studied based on its description, etiology, symptoms, and diagnosis with its appearance on images in radiography, Computed Tomography (CT), Magnetic Resonance Imaging (MRI), Nuclear Medicine and Sonography as applicable. Basic concepts of pharmacology as well as techniques of venipuncture and administration of diagnostic contrast agents are also included.
Lecture Hours: 3 Laboratory Hours: 0

RADTK 280  COMPUTED TOMOGRAPHY PRINCIPLES, INSTRUMENTATION AND IMAGING PROCEDURES  3 HRS. (OC)
Prerequisite: RADTK 210 and 260 with a grade of "C" or better and RADTK 211 with a grade of "S" or department approval. This course is designed to provide an understanding of the Computed Tomography (CT) system including: operation and components, data acquisition and display, image quality, artifact production and reduction, quality control standards and radiation safety and dosimetry. CT chest, abdomen, pelvis, spine, extremities, and CT/Nuclear Medicine imaging procedures will also be presented.
Lecture Hours: 3 Laboratory Hours: 0

RADTK 285  COMPUTED TOMOGRAPHY PRACTICUM  3 HRS. (OC)
Prerequisite: Graduate of an accredited imaging program and hold current ARRT certification in Radiography, Radiation Therapy, or Nuclear Medicine (registration with NMTCB is also accepted) and maintain a current license in medical radiation technology from the Illinois Emergency Management Agency (IEMA), Department of Nuclear Safety; Department approval.
This course emphasizes the practical aspects of Computed Tomography (CT) through clinical practice including patient positioning, care and handling, as well as scanning protocols for the head, neck, spine, chest, abdomen, pelvis and musculoskeletal system. Supervised performance in an approved hospital and/or imaging center also emphasizes the practical aspects of the equipment and the clinical applications of CT.
Lecture Hours: 0 Laboratory Hours: 24 or equivalent

RADTK 286  ADVANCED DIAGNOSTIC IMAGING PRACTICUM  4 HRS. (OC)
Prerequisite: Graduate of an accredited imaging program and hold current ARRT certification in Radiography, Department approval. This course emphasizes the practical aspects of specific imaging modalities through supervised performance in an approved hospital and/or imaging center. The imaging modalities available are: Magnetic Resonance Imaging, Mammography, Cardiac Interventional Radiography, and Vascular Interventional Radiography. In addition, this course is designed to meet the clinical competency requirements of the American Registry of Radiologic Technologists (ARRT).
Lecture Hours: 0 Laboratory Hours: 24 or equivalent

RADTK 290  COMPUTED TOMOGRAPHY REVIEW  2 HRS. (OC)
Prerequisite: Graduate of an accredited imaging program and hold a current ARRT certification in Radiography, Radiation Therapy, or Nuclear Medicine (registration with NMTCB is also accepted); Department approval. This course is designed to provide entry level and experienced Computed Tomography (CT) students with a review of elementary and advanced principles and practices related to CT imaging. Advanced elements include, but are not limited to: patient care and safety, contrast administration, radiation dosimetry, imaging procedures and physics and instrumentation. This course will also assist the student to prepare for the American Registry of Radiologic Technologists (ARRT) Computed Tomography Certification Examination.
Lecture Hours: 2 Laboratory Hours: 0

Refrigeration and Air Conditioning

REACT 110  INTRODUCTION TO REFRIGERATION  4 HRS. (OC)
Prerequisite: Approved reading placement score, or equivalent, and MAT 094 or higher, or an equivalent course with a grade of "C" or better, or department approval. This course studies the fundamentals of the refrigeration system. Emphasis is on operation of the compressor, condenser, evaporator, metering device, brazing refrigerant lines, system installation techniques, and refrigerant evacuation, recovery, and charging techniques. The course is also designed to prepare students to take the Environmental Protection Agency Exams (EPA-608).
Lecture Hours: 3 Laboratory Hours: 3

REACT 112  RESIDENTIAL AIR CONDITIONING  4 HRS. (OC)
Prerequisite: REACT 110 and REACT 118 with a grade of "C" or better or concurrent enrollment or departmental approval. This course is a continuation of REACT 110 and covers more depth of the refrigeration system in residential air conditioning systems. It also covers basic cycle controls, refrigerant characteristics, piping, installation procedures, and accessories, troubleshooting and repairing residential air conditioning systems.
Lecture Hours: 3 Laboratory Hours: 3

REACT 118  ELECTRICITY AS IT APPLIES TO HVAC/R  4 HRS. (OC)
Prerequisite: REACT 110 with a grade of "C" or better or concurrent enrollment. This course studies the principles of electricity as it applies to air conditioning and refrigeration. Emphasis is on wiring diagram symbols, proper use of electric multi-meters, alternating current fundamentals, direct current fundamentals, and single-phase motor theory.
Lecture Hours: 3 Laboratory Hours: 3

REACT 119  SHEET METAL FOR HVAC/R  2 HRS. (OC)
Prerequisite: REACT 110 with a grade of "C" or better or concurrent enrollment. In this course, the student will learn the principles of sheet metal as it applies to air conditioning and refrigeration.
Lecture Hours: 1 Laboratory Hours: 3

REACT 120  RESIDENTIAL FURNACES  4 HRS. (OC)
Prerequisite: REACT 110 and REACT 118 with a grade of "C" or better. This course develops the skills needed for the basic installation of furnaces and to understand basic wiring diagrams and sequences of operation. This course also includes hands-on experience in installing, troubleshooting, and repairing of residential forced air furnaces.
Lecture Hours: 3 Laboratory Hours: 3

REACT 121  HEAT PUMPS AND GEOTHERMAL  4 HRS. (OC)
Prerequisite: REACT 112 and REACT 120 with a grade of "C" or better. This course develops the skills needed for hands-on experience in servicing and repairing heat pumps, geothermal systems, and electric air handlers.
Lecture Hours: 3 Laboratory Hours: 3

REACT 122  RESIDENTIAL HYDRONIC SYSTEMS  3 HRS. (OC)
Prerequisite: REACT 121 with a grade of "C" or better or department approval.
This course develops the skills needed to understand wiring diagrams, piping diagrams, sequence of operation, and hands-on experience in repairing of residential hydronic systems.
Lecture Hours: 2 Laboratory Hours: 3

REACT 130  LIGHT COMMERCIAL REFRIGERATION  4 HRS. (OC)
Prerequisite: REACT 112 with a grade of "C" or better. This course includes the study of equipment that is used in medium and low temperature applications. Special attention is given to sizing systems, metering devices, controls, electrical schematics and troubleshooting.
Lecture Hours: 3 Laboratory Hours: 3

REACT 131  COMMERCIAL REFRIGERATION AND ICE MACHINES  4 HRS. (OC)
Prerequisite: REACT 130 with a grade of "C" or better. This course covers electrical installation diagrams and electrical wiring diagrams. Emphases are placed on the use and reading of schematics of ice machines, reach-in coolers, walk-in coolers, reach-in freezers, walk-in freezers, and supermarket refrigeration systems.
Lecture Hours: 3 Laboratory Hours: 3

Respiratory Care

RESP 110 INTRODUCTION TO RESPIRATORY CARE 1 HR. (OC)
Prerequisite: Admission to the Respiratory Therapist Program or department approval. This course is an introduction to the respiratory care profession and the organization of the service in the acute hospital setting. Legal and ethical principles will be discussed. Workplace skills and professionalism will be emphasized.
Lecture Hours: 0.5 Laboratory Hours: 1.5 or equivalent

RESP 115 RESPIRATORY CARE PRACTICUM I 3 HRS. (OC)
Prerequisite: Admission to the Respiratory Therapist Program. This course is a supervised clinical experience of the service in the acute hospital setting. Students will observe and perform respiratory care techniques in a supervised clinical setting. Sixteen laboratory or supervised practice hours per week.
Lecture Hours: 0 Laboratory Hours: 3

RESP 121 FUNDAMENTALS OF RESPIRATORY CARE I 4 HRS. (OC)
Prerequisite: Admission to the Respiratory Therapist Program. A beginning study of the essential elements of respiratory care, including patient interface.
Lecture Hours: 2 Laboratory Hours: 0

RESP 122 CARDIOPULMONARY ANATOMY AND PHYSIOLOGY 2 HRS. (OC)
Prerequisite: Admission to the Respiratory Therapist Program or department approval. This course gives instruction in the structure and function of the normal cardiopulmonary, vascular and renal anatomy. Mechanics of ventilation, respiration, gas transport, and neurologic control of ventilation will be stressed.
Lecture Hours: 2 Laboratory Hours: 0

RESP 123 PHARMACOLOGY FOR RESPIRATORY CARE 2 HRS. (OC)
Prerequisite: RESP 110, RESP 112, RESP 115, and RESP 122 with a grade of "C" or better. This course is a continuation of RESP 112. Included in this course are pulmonary function testing, blood gas analysis and interpretation, airway management, and basic mechanical ventilation concepts.
Lecture Hours: 4 Laboratory Hours: 3

RESP 125 RESPIRATORY CARE PRACTICUM II 3 HRS. (OC)
Prerequisite: RESP 110, RESP 112, RESP 115, and RESP 122 all with a grade of "C" or better. This course is a continuation of RESP 115 including supervised experience in the administration of respiratory care.
Lecture Hours: 0 Laboratory Hours: 16

RESP 127 CARDIOPULMONARY DISEASES 3 HRS. (OC)
Prerequisite: RESP 110, RESP 112, RESP 115, and RESP 122 all with a grade of "C" or better or department approval. This course is an introduction to the study of disease with emphasis on cardiopulmonary disorders: their etiology, pathophysiology, diagnosis, and treatment.
Lecture Hours: 2 Laboratory Hours: 2

RESP 201 INTRODUCTION TO MECHANICAL VENTILATION 1 HR. (OC)
Prerequisite: RESP 121 and RESP 125 with a grade of "C" or better. This course is designed to introduce the respiratory therapist student to intermediate concepts of mechanical ventilation. Emphasis will be on theory and application, measurement of airway resistance, lung/thorax compliance, and guidelines for correct ventilator/patient interface.
Lecture Hours: .5 Laboratory Hours: 1.5

RESP 210 FUNDAMENTALS OF RESPIRATORY CARE III 5 HRS. (OC)
Prerequisite: RESP 121, RESP 123, and RESP 127 and BIOL 140 or BIOL 205, all with a grade of "C" or better. This course is a continuation of RESP 121 including pulmonary rehabilitation, invasive monitoring, non-invasive monitoring, special respiratory procedures, and advanced mechanical ventilation concepts.
Lecture Hours: 4 Laboratory Hours: 3 

RESP 220 RESPIRATORY CARE PRACTICUM III 3 HRS. (OC)
Prerequisite: RESP 121, RESP 123, and RESP 127 all with a grade of "C" or better. This course is a continuation of RESP 125 including clinical experience in the administration of respiratory care in local respiratory care departments. Emphasis is on adult critical care procedures. Supervision will be provided by qualified respiratory personnel.
Lecture Hours: 0 Laboratory Hours: 16

RESP 230 CARDIOPULMONARY DISEASES 3 HRS. (OC)
Prerequisite: RESP 210 and RESP 220 both with a grade of "C" or better. This course is a continuation of RESP 220 including clinical experience in the administration of respiratory care in local respiratory care departments. Emphasis is on adult, pediatric, and neonatal critical care procedures. Supervision will be provided by qualified respiratory personnel.
Lecture Hours: 0 Laboratory Hours: 16

RESP 240 RESPIRATORY THERAPY CAPSTONE 1 HR. (OC)
Prerequisite: RESP 210 and RESP 220 both with a grade of "C" or better or department approval. This course explores the matrices of the National Board for Respiratory Care advanced practice examinations. The review and analysis of the essential components of the respiratory care competencies are presented in a lecture/computer simulation format.
Lecture Hours: 5 Laboratory Hours: 1.5

RESP 250 INDEPENDENT STUDY 1 HR. (OC)
Prerequisite: Department approval. This course provides the student the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit. Three to fifteen laboratory hours per week or equivalent.
Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent

Social Science

SSC 111 AMERICANS AND THEIR CULTURE (S9 900) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is an analytical approach toward understanding the dynamics and the relationships of the individual, society, and culture, with emphasis on America today and in the future. It introduces the student to the basic concepts of the social sciences.
Lecture Hours: 3 Laboratory Hours: 0

SSC 115 LEADERSHIP AND COMMUNITY SERVICE 2 HRS. (TC)
This course concentrates on the social, political and economic dimensions of community issues such as under-education, poverty and ethnic diversity. Students will also examine the impact of various personal and community responses to these issues while performing community service.
Lecture Hours: 1 Laboratory Hours: 3 or equivalent

Social Work

SOCWK 220 INTRODUCTION TO SOCIAL WORK 3 HRS. (TC)
Prerequisite: SOC 110 with a grade of "C" or better or PSY 110 with a grade of "C" or better. This course is an introduction to generalist social work within the context of social welfare service and policies, including their historical origins, conceptual framework, and contemporary foci. It also examines social work values and code of ethics, practice methods, and research and policy issues, emphasizing the unique experiences of diverse and at-risk populations.
Lecture Hours: 3 Laboratory Hours: 0

Sociology

SOC 110 AN INTRODUCTION TO SOCIOLOGY (S7 900) 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course utilizes the approaches of functionalism, conflict theory, and interactionism to analyze the structures and processes of group life from a scientific perspective. Major areas of inquiry include: theory and methodology, culture, social organizations, socialization, groups, institutions, formal organizations, collective behavior, and social change.
Lecture Hours: 3 Laboratory Hours: 0
Spanish

SPAN 105        CONVERSATIONAL SPANISH AND CULTURE             3 HRS. (OC)
This course will train participants to communicate effectively with Spanish-speaking personnel in horticultural and agricultural situations, and to learn to appreciate their culture and heritage. Skills will include informal conversation, identifying equipment, giving and taking directions, and discussion of work related issues.
Lecture Hours: 3 Laboratory Hours: 0

SPAN 110        ELEMENTARY SPANISH I                         4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This course is designed to develop through the natural approach the four language skills in Spanish: listening, speaking, reading, and writing.
Lecture Hours: 4 Laboratory Hours: 0

SPAN 111        ELEMENTARY SPANISH II                        4 HRS. (TC)
Prerequisite: SPAN 110 with a grade of "C" or better or equivalent. This course is a continuation of SPAN 110 with emphasis on listening, speaking, reading, and writing. The course is conducted primarily in Spanish.
Lecture Hours: 4 Laboratory Hours: 0

SPAN 210        INTERMEDIATE SPANISH I                       4 HRS. (TC)
Prerequisite: SPAN 111 with a grade of "C" or better or equivalent. This course emphasizes conversation, selected readings, and composition. The course is conducted primarily in Spanish.
Lecture Hours: 4 Laboratory Hours: 0

SPAN 211        INTERMEDIATE SPANISH II (H1 900)             4 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent, and SPAN 210 with a grade of "C" or better or equivalent. This course is a continuation of SPAN 210 with emphasis on advanced conversation, reading, and composition. The course is conducted in Spanish.
Lecture Hours: 4 Laboratory Hours: 0

Spanish General Education Development

SPGED 090      SPANISH GED REVIEW I                         1 HR. (ASE)
Prerequisite: Reading level 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College or department approval. This course is designed to prepare the student for the Spanish GED Test in the areas of literature, writing, social studies, science, and mathematics.
Lecture Hours: 1 Laboratory Hours: 0

SPGED 091      SPANISH GED REVIEW II                        2 HRS. (ASE)
Prerequisite: Reading level 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College or department approval. This course is designed to prepare the student for the Spanish GED Test in the areas of literature, writing, social studies, science, and mathematics. This course is repeatable three times.
Lecture Hours: 2 Laboratory Hours: 0

SPGED 092      SPANISH GED REVIEW III                       3 HRS. (ASE)
Prerequisite: Reading level 9-12.9 on a standardized reading test accepted by the Illinois Community College Board or the College or department approval. This course is designed to prepare the student for the Spanish GED Test in the areas of literature, writing, social studies, science, and mathematics. This course is repeatable three times.
Lecture Hours: 3 Laboratory Hours: 0

Supply Chain Management

SCM 111        CONTEMPORARY LOGISTICS                         3 HRS. (OC)
This course focuses on the complex and dynamic subject of logistics and its role within supply chain management, including a detailed examination of many elements of the logistics systems. The course also examines methods of analyzing, implementing, and controlling logistics as used by a firm and those firms with which it is linked.
Lecture Hours: 3 Laboratory Hours: 0

SCM 219        THE SOCIOLOGY OF RACE AND ETHNICITY IN          3 HRS. (TC)
AMERICA (S7 903D)
Prerequisite: Approved reading placement score, or equivalent, and SOC 110 or PSY 110 either with a grade of "C" or better. This course employs the social psychological perspective to examine the behavior of the individual in society. Major emphasis is given to psychological and sociological theory and to the scientific methods employed by the social psychologist as scientist. Focal points include: the self-concept, perception, communication, attraction, and socialization.
Lecture Hours: 3 Laboratory Hours: 0

SCM 220        BASICS OF SUPPLY CHAIN MANAGEMENT                2 HRS. (OC)
This course focuses on material and capacity and scheduling and planning. It includes repeatable three times.
Lecture Hours: 2 Laboratory Hours: 0

SCM 221        DEATH AND DYING                                 3 HRS. (TC)
This course considers death and the dying process and grief. Students have the opportunity to read and discuss issues relevant to the major topics.
Lecture Hours: 3 Laboratory Hours: 0

Lecture Hours: 3 Laboratory Hours: 0

SCM 231        QUALITY MANAGEMENT                             2 HRS. (OC)
Prerequisite: SCM 220 with a grade of "C" or better or department approval. This course focuses on quality management, control and improvement. It explains the importance of the management structure as well as the statistical and analytical tools needed to implement a successful quality management system. Discussion will include execution of quality initiatives and continuous improvement plans using tools such as Six Sigma methodologies.
Lecture Hours: 2 Laboratory Hours: 0

SCM 232        OPERATIONS MANAGEMENT                           3 HRS. (OC)
Prerequisite: SCM 220 with a grade of "C" or better or department approval. This course focuses on material and capacity and scheduling and planning. It includes a detailed explanation of material requirements planning and introduces material-dominated scheduling. It explains capacity requirements planning in detail and introduces processor-dominated scheduling.
Lecture Hours: 3 Laboratory Hours: 0

SCM 233        PROJECT MANAGEMENT                             3 HRS. (OC)
Prerequisite: SCM 220 with a grade of "C" or better or department approval. This course focuses on the principles of project management. It explains the importance of project management skills that will assist in ones role as a project sponsor, project leader or project team member. Management's knowledge and understanding of project management has grown to the level where it is utilized in most companies in one form or another. Demand is high for those who have project management skills. This course addresses those skills as well as assists with preparation for Project Management Professional certification by highlighting key topics from the Project Management Body of Knowledge.
Lecture Hours: 3 Laboratory Hours: 0

ILLINOIS CENTRAL COLLEGE
Course Descriptions

College Catalog 2017-2018
Course Descriptions

**SCM 234 STRATEGIC PLANNING** 2 HRS. (OC)
Prerequisite: SCM 220, 231, 232, and 233 all with a grade of “C” or better or department approval. This course explores the relationship of existing and emerging processes and technologies to manufacturing strategy and supply chain-related functions. The course addresses three main topics: aligning resources with the strategic plan, configuring and integrating operating processes to support the strategic plan, and implementing change.
Lecture Hours: 2 Laboratory Hours: 0

**SCM 245 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (ERP) SYSTEMS** 3 HRS. (OC)
This course introduces integrated business processes with Enterprise Resource Planning systems. The course is intended to explain how fundamental business processes including Accounting, Procurement, Fulfillment, Production, Inventory, and Warehouse Management, and Material Planning interact with an ERP system such as SAP.
Lecture Hours: 3 Laboratory Hours: 0

**Surgical Technology**

**SURTK 100 ORIENTATION TO SURGICAL TECHNOLOGY** 0.5 HRS. (OC)
This course is designed to introduce students to the profession of surgical technology. Concepts include the basic principles and techniques of surgical technology, hand-washing, scrubbing, gowning, gloving, as well as preparing a sterile field.
Lecture Hours: .5 Laboratory Hours: 0

**SURTK 120 INTRODUCTION TO SURGICAL TECHNOLOGY** 4 HRS. (OC)
Prerequisite: Acceptance to the surgical technology curriculum and concurrently enrolled in BIOL 205 or completion with a grade of “C” or better and CPR certification. This course is a study of operating room fundamentals including aseptic technique, patient care, preparation, and maintenance and care of equipment and supplies. Didactic and practical experiences are designed to prepare the student to function as a surgical technologist.
Lecture Hours: 3 Laboratory Hours: 2

**SURTK 121 FUNDAMENTALS OF SURGICAL TECHNOLOGY I** 7 HRS. (OC)
Prerequisite: Completion of SURTK 120 with a grade of “C” or better and completion of BIOL 205 with a grade of “C” or better and completion of BIOL 206 with a “C” or better or concurrent enrollment in BIOL 206 and current CPR certification. This course is a continuation of introduction to surgical technology with emphasis on acquiring skills of scrubbing and assisting the circulator during surgical procedures in the operating room and delivery room. Specific areas of study include: surgical landmarks, surgical anatomy, incisions and terminology related to laparotomy, hernias, breast, veins, and rectal, obstetrical and gynecological surgical procedures.
Lecture Hours: 5 Laboratory Hours: 14

**SURTK 122 FUNDAMENTALS OF SURGICAL TECHNOLOGY II** 6 HRS. (OC)
Prerequisite: Completion of SURTK 121 with a grade of “C” or better and completion of BIOL 205 and 206 with a grade of “C” or better and completion of BIOL 220 with a grade of “C” or better or concurrent enrollment in BIOL 220 and current CPR certification. This course is a continuation of fundamentals of surgical technology with emphasis on acquiring skills of scrubbing and assisting the circulator during surgical procedures in the operating room and delivery room. Specific areas of study include: gentiourinary, orthopedics, and endocrine system.
Lecture Hours: 4.5 Laboratory Hours: 12 or equivalent

**SURTK 130 PHARMACOLOGY FOR THE SURGICAL TECHNOLOGIST** 1 HR. (OC)
Prerequisite: Acceptance into the Surgical Technology Program. This course is a study of pharmacology and anesthesia. It will deal with all aspects of pharmacology: drug sources, forms, nomenclature, route of administration, classifications, pharmacokinetics, pharmacodynamics, drug handling techniques, identification, supplies needed, transfer of medications to the sterile field, commonly used medications, general anesthesia, nerve conduction blocks, history, and team member roles during anesthesia.
Lecture Hours: 1 Laboratory Hours: 0

**SURTK 210 FUNDAMENTALS OF SURGICAL TECHNOLOGY III** 8 HRS. (OC)
Prerequisite: Completion of SURTK 122 and BIOL 205 and BIOL 206 and BIOL 220 with a grade of “C” or better and current certification in CPR. This course is a continuation of Fundamentals of Surgical Technology II with emphasis on acquiring skills of scrubbing and assisting the circulator during surgical procedures in the operating room and delivery room. Specific areas of study include: neurosurgery, thoracic, cardiovascular, burns, plastics, oral, ophthalmic, and otolaryngology.
Lecture Hours: 5 Laboratory Hours: 24 or equivalent

**SURTK 211 ADVANCED FUNDAMENTALS OF SURGICAL TECHNOLOGY** 7 HRS. (OC)
Prerequisite: Completion of SURTK 210 with a grade of “C” or better and current certification in CPR. This course outlines advanced techniques in surgical technology and is a continuation of the fundamentals of surgical technology series. This course will focus on suturing and knot tying techniques, professionalism and interpersonal skills, continuing education, and resume writing.
Lecture Hours: 3 Laboratory Hours: 32

**SURTK 250 SURGICAL TECHNOLOGY BRIDGE** 4 HRS. (OC)
Prerequisite: Department approval. This course outlines advanced techniques in surgical technology and is a continuation of the fundamentals of surgical technology series. This course is a bridge between the previous surgical technology certificate and the Associate in Applied Science Surgical Technology degree. This course will focus on suturing and knot tying techniques, professionalism and interpersonal skills. This course also includes the study of human diseases and mechanisms that govern them. It will address etiology, clinical presentation and the appropriate surgical intervention that is related to that specific disease process.
Lecture Hours: 4 Laboratory Hours: 0

**SURTK 255 INDEPENDENT STUDY** 1 HR. (OC)
Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. Repeatable up to a maximum of five semester hours of credit.
Lecture Hours: 0 Laboratory Hours: 3 - 15

**Theatre**

**THTRE 110 THEATRE APPRECIATION (F1 907)** 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This is a general education humanities course, and is not a performance based class. This course will enhance the appreciation of the theatre as an art form. Emphasis will be placed upon the dynamic way in which theatre can reflect, enhance, and enlighten the human condition, and includes historical, social, esthetic, and technical aspects of theatrical expression.
Lecture Hours: 3 Laboratory Hours: 0

**THTRE 111 MODERN DRAMA (F1 907)** 3 HRS. (TC)
Prerequisite: Approved reading placement score, or equivalent. This is a general education humanities course, and is not a performance based class. This course introduces the many fascinating forms of drama and should make students aware of the extraordinary vitality and diversity of the modern global theatre through reading and study of various theatrical works.
Lecture Hours: 3 Laboratory Hours: 0

**THTRE 113 INTRODUCTION TO TECHNICAL THEATRE (TA 911)** 3 HRS. (TC)
This course introduces safety procedures and basic techniques of scenery and property construction, tool use, scene painting, basic lighting techniques, and backstage organization. Through the use of laboratory hours, students will have hands-on experience in conjunction with departmental productions.
Lecture Hours: 3 Laboratory Hours: 1

**THTRE 114 FUNDAMENTALS OF THEATRICAL DESIGN** 3 HRS. (TC)
Prerequisite: THTRE 113 with a grade of “C” or better or department approval. This course will provide a hands-on introduction to design elements, the design process, and the ability to communicate the progression of a theatrical design from concept to realization. Some areas covered are: script analysis, creating a vision statement, basic drafting, renderings, and model making.
Lecture Hours: 3 Laboratory Hours: 1

**THTRE 115 STAGE MAKE-UP** 2 HRS. (TC)
This course is hands-on introduction to the basic knowledge, techniques, and application of make-up as it applies to theatre and film. Course content will incorporate color analysis and design and application techniques for creating corrective, straight, old age, fantasy, trauma, and special effects make-up for the stage.
Lecture Hours: 1 Laboratory Hours: 2

**THTRE 118 THEATRE PRACTICUM** 1 HR. (TC)
This course offers the student practical experience in on-stage and off-stage theatrical production techniques. The student arranges a minimum thirty-two hours of hands-on experience workshop at times of student's convenience.
Lecture Hours: 0 Laboratory Hours: 32

**THTRE 119 THEATRE PRACTICUM** 1 HR. (TC)
This course offers the student practical experience in on-stage and off-stage theatrical production techniques. The student arranges a minimum thirty-two hours of hands-on experience workshop at times of student's convenience.
Lecture Hours: 0 Laboratory Hours: 32

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>THTRE 122</td>
<td>ACTING I (TA 814)</td>
<td>3</td>
<td>This is a performance based fundamentals of acting course. The course covers the actors' use of concentration and observation, the importance of acting choices, basics of character development and script analysis. Course topics are introduced through acting exercises, improvisations, and short scene study. A variety of acting techniques such as Stanislavski, Meisner, and Cohen will be used as a basis to help the actor acquire the tools needed to create believable characters.</td>
</tr>
<tr>
<td>THTRE 123</td>
<td>DIRECTING I</td>
<td>3</td>
<td>This is an introductory course to acquaint the student with the study and practice of the fundamentals of directing through director terminology, brief historical development and importance of the director. The student will acquire practical knowledge and use of the director's tools, beginning script analysis, use of stage space and work with actors in a laboratory setting.</td>
</tr>
<tr>
<td>THTRE 210</td>
<td>INTRODUCTION TO COSTUMING</td>
<td>3</td>
<td>This introductory course focuses on planning and executing costumes for theatrical production including experience in conjunction with departmental presentations. The student learns the use of costume plots, measurements for fittings, procedures for construction, and standard works for research in historical costume periods and folk costume.</td>
</tr>
<tr>
<td>THTRE 211</td>
<td>THEATRE INTERNSHIP</td>
<td>3</td>
<td>Prerequisite: Department approval. This course is designed to give the student/ intern experience in their chosen field of interest under the direct supervision of a professional (Producer, Director, Designer, Stage Manager) while engaged in on-the-job training. The student/intern will also do individual research and study on approved area of interest.</td>
</tr>
<tr>
<td>THTRE 217</td>
<td>CREATIVE DRAMATICS AND CHILDREN'S THEATRE</td>
<td>3</td>
<td>This course links Creative Dramatics and Children's Theatre. The focus of the first portion is leading children to develop their imaginations through the use of dramatic activities as a learning tool — in any classroom or as an end in itself. The second division, Children's Theatre, involves the analysis of playscripts and the techniques of directing, acting, and designing for the child audience.</td>
</tr>
<tr>
<td>THTRE 218</td>
<td>THEATRE PRACTICUM</td>
<td>1</td>
<td>This course offers the student practical experience in on-stage and off-stage theatrical production techniques. The student arranges a minimum thirty-two hours of hands-on experience workshop at times of student's convenience. THTRE 219 and THTRE 219 may be taken a maximum of three times each.</td>
</tr>
<tr>
<td>THTRE 219</td>
<td>THEATRE PRACTICUM</td>
<td>1</td>
<td>This course offers the student practical experience in on-stage and off-stage theatrical production techniques. The student arranges a minimum thirty-two hours of hands-on experience workshop at times of student's convenience. THTRE 219 and THTRE 219 may be taken a maximum of three times each.</td>
</tr>
<tr>
<td>THTRE 220</td>
<td>SUMMER THEATRE WORKSHOP</td>
<td>3</td>
<td>Prerequisite: Department approval. This course is for all residents of Illinois Central College District 514 who wish to participate in a summer theatre workshop. They are encouraged to enroll in this exciting venture. High school juniors and seniors may also enroll in this course. Students will work with several theatre instructors in the preparation, rehearsing, staging, and actual presentation of a major production in Illinois Central College Performing Arts Center.</td>
</tr>
<tr>
<td>THTRE 221</td>
<td>STAGE MOVEMENT</td>
<td>3</td>
<td>This performance course is taught in a three-section format. The first section is warm-up; the second is the study of mime techniques; the third is improvisation/ performance. Classwork begins with solo work and progresses through duet, trio, and ensemble exercises. Completion of this course will provide a basic knowledge of theatrical and dramatic stage movement.</td>
</tr>
<tr>
<td>THTRE 222</td>
<td>ACTING II</td>
<td>3</td>
<td>Prerequisite: THTRE 122 with a grade of &quot;C&quot; or better or department approval. This is a performance course and is a continuation of Acting I. In this course the student-actor will concentrate on the extended development of character and the further application of learned techniques. The student will move from exercises and improvisation to the use of the script and formal application of acting techniques through scene work.</td>
</tr>
<tr>
<td>THTRE 223</td>
<td>DIRECTING II</td>
<td>3</td>
<td>Prerequisite: THTRE 123 with a grade of &quot;C&quot; or better or department approval. This course is a continuation of Directing I. In this course the student-director will further development the director's tools, director/actor communication, and the understanding and use of acting tools and techniques necessary to the rehearsal and performance process. The student will display knowledge and ability to use techniques through class exercises, text analysis, and extended scene work.</td>

<tr>
<td>WELD 113</td>
<td>WELDING THEORY - GMAW</td>
<td>1</td>
<td>Prerequisite: Concurrent enrollment in WELD 131 or department approval. This course emphasizes techniques and theory of welding using the Gas Metal Arc (GMAW) process for welding, as practiced in WELD 131 and WELD 141. Special techniques such as flux cored and granular flux shielded arc welding are also covered. Lecture Hours: 1 Laboratory Hours: 0</td>
</tr>
<tr>
<td>WELD 119</td>
<td>WELDING PROCESSES</td>
<td>3</td>
<td>This course emphasizes welding procedures, techniques, and equipment currently used in industry. Consideration is given to the elements of arc welding and the application of arc welding processes to meet commercial quality standards. Lecture Hours: 2 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 120</td>
<td>WELDING</td>
<td>2</td>
<td>This course is designed to acquaint the student with common welding techniques and equipment used currently in trades and industry. Consideration is given to welding with arc and oxyacetylene in the various positions, hard surfacing, brazing, cutting, electrode selection, and metal identification. The student is expected to develop basic skills in manual welding. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 121</td>
<td>STICK WELDING I</td>
<td>1</td>
<td>Prerequisite: Credit or concurrent enrollment in WELD 112 or department approval. This course is the first in a series of stick welding courses. The student will develop proficiency in the safe operation of manual shielded arc welding processes in the flat position, and will learn how to position to meet commercial quality standards. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 122</td>
<td>STICK WELDING II</td>
<td>1</td>
<td>Prerequisite: Credit or concurrent enrollment in WELD 121 or department approval. This course is a continuation of WELD 121. The student will develop proficiency in the safe operation of the manual shielded arc welding process in horizontal position to meet commercial quality standards. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 131</td>
<td>GAS METAL ARC WELDING (MIG) I</td>
<td>1</td>
<td>Prerequisite: Concurrent enrollment in WELD 113 or department approval. This course is designed to broaden the knowledge and skill of the experienced production welder by developing proficiency in the safe operation of the semi-automatic arc welding processes. Extensive practice in continuous wire gas shielded arc welding, arc cutting and surfacing to meet commercial quality standards for welding of structural grade steels will be included in the course. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 133</td>
<td>WELDING FOR MAINTENANCE MECHANICS</td>
<td>3</td>
<td>This course introduces the maintenance mechanic student to commonly used welding processes. The student will learn the theory and application of these processes. The student will become proficient in flat position welding using the SMAW and GMAW processes. Students will also be introduced to pipe welding. Students will also learn periodic and preventative maintenance measures on the equipment. Lecture Hours: 1 Laboratory Hours: 5</td>
</tr>
<tr>
<td>WELD 135</td>
<td>GAS METAL ARC WELDING (MIG) II</td>
<td>1</td>
<td>Prerequisite: WELD 131 with a grade of “C” or better or department approval. This course is designed to broaden the knowledge and skill of the experienced production welder by developing proficiency in the safe operation of the semi-automatic arc welding processes. A review of wire gas shielded arc welding, flux cored gas shielded and unshielded welding, and arc cutting and surfacing to meet commercial quality standards for welding of structural grade steels will be included in the course. Lecture Hours: 1 Laboratory Hours: 3 or equivalent</td>
</tr>
<tr>
<td>WELD 141</td>
<td>GAS TUNGSTEN ARC WELDING</td>
<td>1</td>
<td>Prerequisite: WELD 121 with a grade of “C” or better or department approval. This course is designed to broaden knowledge and skill by developing proficiency in the safe operation of the tungsten inert gas (TIG) welding process, and for joining of common and alloy steels and aluminum to meet commercial quality standards. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 150</td>
<td>WELD CERTIFICATION PREPARATION AND TESTING I</td>
<td>1</td>
<td>Prerequisite: Department approval. This course introduces students to specific weld certification requirements and the practice necessary to complete the weld test. This course is repeatable up to a maximum of three times for credit. Lecture Hours: 1 Laboratory Hours: 3 or equivalent</td>
</tr>
<tr>
<td>WELD 161</td>
<td>MAINTENANCE WELDING</td>
<td>2</td>
<td>Prerequisite: WELD 112, WELD 113, WELD 121 and WELD 131 with grades of “C” or better or department approval. This course is designed to instruct the student in the theory and practice of maintenance welding. Subjects discussed include equipment selection, filler metal selection, metallurgy, and preventative maintenance techniques to increase mean time between failures, and failure analysis. Laboratory practice will include instruction in stick, oxyacetylene, metal inert gas welding, tungsten inert gas welding, and low temperature joining. Lecture Hours: 1 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 163</td>
<td>FABRICATION WITH THE GMAW PROCESS</td>
<td>2</td>
<td>Prerequisite: WELD 111, WELD 113, and WELD 135, all with a grade of “C” or better. This course requires the student to precisely measure and prepare parts, assemble parts accurately, work hold parts, tack parts into place, inspect the assembly, and then weld project. This capstone course will require the student to use blueprint reading, measuring, joint preparation, troubleshooting, and MIG welding skills. Lecture Hours: 0 Laboratory Hours: 4</td>
</tr>
<tr>
<td>WELD 192</td>
<td>WELDING EQUIPMENT MAINTENANCE AND OPERATION</td>
<td>3</td>
<td>Prerequisite: WELD 112, 113, 121, and 131 with a grade of “C” or better or department approval. This course is a study of the theory, construction, operation, and repair of a wide variety of commercially available welding equipment. Troubleshooting and preventative maintenance will be stressed. Lecture Hours: 2 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 210</td>
<td>WELDING PROCESSES</td>
<td>3</td>
<td>Prerequisite: WELD 122 with a grade of “C” or better. As a continuation of WELD 122, instruction is centered using the SMAW process to weld in the vertical position. The student will gain proficiency using a number of filler materials in a number of joints. The successful student will demonstrate commercial quality welds upon course completion. Lecture Hours: 0 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 224</td>
<td>STICK WELDING IV</td>
<td>1</td>
<td>Prerequisite: WELD 122 with a “C” or better or department approval. In this course, the student will develop proficiency in the safe operation of the manual shielded metal arc welding process in overhead position to meet commercial quality standards. Lecture Hours: 3</td>
</tr>
<tr>
<td>WELD 230</td>
<td>WELD TESTING</td>
<td>3</td>
<td>Prerequisite: WELD 111, WELD 121, and WELD 131 with a grade of “C” or better, or department approval. This course is a survey of welding inspection methods and technology, welding metallurgy, and welding codes. Included in the course are visual, destructive, and non-destructive inspection and testing techniques commonly used in industry to assure quality in welded products. The course includes an overview of the inspector’s responsibilities, ethical concerns, and relationships with welding personnel. Laboratory assignments require the use of welding processes to construct test samples, inspection and testing of welded samples, research, and report writing. Lecture Hours: 2 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 240</td>
<td>WELDING TECHNOLOGY</td>
<td>3</td>
<td>Prerequisite: WELD 131, WELD 141, and WELD 230 all with a grade of “C” or better, or department approval. This course provides the student with an opportunity to utilize the skill and knowledge gained through the Welding Technology program to solve industrial welding problems, assess weld quality, and improve manufacturing systems employing welding. It is a combination of lecture, team projects, and laboratory assignments simulating the job requirements of a welding technician. Lecture Hours: 2 Laboratory Hours: 3</td>
</tr>
<tr>
<td>WELD 255</td>
<td>INDEPENDENT STUDY</td>
<td>1</td>
<td>Prerequisite: Department approval. This course provides the opportunity to work on a technical project, research, or other specialized study related to individual academic needs. A written plan for the independent study project is developed with a faculty member (including a detailed description of the project, the number of credit hours assigned to it, the evaluative criteria to be used, and other relevant matters), and the project is carried out under the periodic direction of the faculty member. The written plan is submitted to the dean/associate dean for approval and remains on file within the department, together with a final written report submitted to the faculty member by the student. This course can be repeated up to three times up to a maximum of five hours semester credit. Lecture Hours: 0 Laboratory Hours: 3 - 15 or equivalent</td>
</tr>
<tr>
<td>WELD 263</td>
<td>WELD FABRICATION WITH THE GMAW PROCESS</td>
<td>2</td>
<td>Prerequisite: WELD 163, WELD 223, and WELD 141 with a “C” or better or department approval. In this course, by following blueprints, the student will learn fabrication techniques for using stick and TIG processes to produce weldments to specifications. The student will become proficient in laying out the project, cutting and preparing parts, work holding, and tack welding to make the assembly, inspecting the assembly, and making the final welds. Lecture Hours: 4</td>
</tr>

ILLINOIS CENTRAL COLLEGE

Course Descriptions

COLLEGE CATALOG 2017-2018
Word Processing

WP 122  KEYBOARD/WORD PROCESSING III  4 HRS. (OC)
Prerequisite: TYPE 121 with a grade of "C" or better. This course is a continuation
of the word processing commands and formatting learned in TYPE 121. The course
utilizes word processing commands such as merging, styles, columns, and tables
with math calculations as they are used to prepare business documents. This
course is repeatable up to three times.
Lecture Hours: 3  Laboratory Hours: 2

WP 152  PROOFREADING  1 HR. (OC)
Prerequisite: OFOCC 114 with a grade of "C" or better. This course is designed
to teach and develop office-style proofreading techniques and skills.
Lecture Hours: 1  Laboratory Hours: 0

WP 161  DATA ENTRY  1 HR. (OC)
Prerequisite: Ability to type 40 net words per minute. This course develops numeric
keypad proficiency from a variety of sources and formats with a specified percent
of accuracy.
Lecture Hours: 0  Laboratory Hours: 2

WP 186  WORD PROCESSING FOR DESKTOP PUBLISHING  3 HRS. (OC)
Prerequisite: WP 122 with a grade of "C" or better. This course will address specific
desktop publishing features in currently used word processing software for a variety
of business applications.
Lecture Hours: 2  Laboratory Hours: 2

Work Skills

WRKSK 092  JOB PREPAREDNESS I  2 HRS. (ABE)
Prerequisite: Reading level of 4.0-8.9 on a standardized reading test accepted by
the Illinois Community College Board or the College. This course assists students
in developing and/or updating job readiness skills.
Lecture Hours: 2  Laboratory Hours: 0

WRKSK 093  JOB PREPAREDNESS II  2 HRS. (ABE)
Prerequisite: Reading level of 9.0-12.9 on a standardized reading test accepted by
the Illinois Community College Board or the College. This course assists students
in developing and/or updating job readiness skills.
Lecture Hours: 2  Laboratory Hours: 0

Non Credit Classes

CRAFT C13  DRAWING AND PAINTING I  0 HRS. (NC)
Eight two and one-half hour sessions.
Lecture Hours: 1  Laboratory Hours: 0

CRAFT C15  CERAMICS  0 HRS. (NC)
Eight two-hour sessions.
Lecture Hours: 1  Laboratory Hours: 0

CRAFT C16  OIL Painting  0 HRS. (NC)
Eight two-hour sessions.
Lecture Hours: 1  Laboratory Hours: 0

CRAFT C41  CERAMICS PRACTICUM  0 HRS. (NC)
Prerequisite: ART 204 and 205. Eight two and one-half hour sessions.
Lecture Hours: 0  Laboratory Hours: 1

CRAFT C42  SCULPTURE PRACTICUM  0 HRS. (NC)
Prerequisite: ART 112 and 206. Eight two and one-half hour sessions.
Lecture Hours: 0  Laboratory Hours: 1

CRAFT C43  PAINTING PRACTICUM  0 HRS. (NC)
Prerequisite: ART 200 and 201. Three laboratory hours per week for eight weeks.
Lecture Hours: 0  Laboratory Hours: 1.5

CRAFT C44  DRAWING PRACTICUM  0 HRS. (NC)
Prerequisite: ART 206 and 207. Eight two and one-half hour sessions or equivalent.
Lecture Hours: 0  Laboratory Hours: 1.5 or equivalent

REC C05  SPORTS ACTIVITIES AND FITNESS  0 HRS. (NC)
Participation in various activities designed to promote physical fitness. Activities
include volleyball, badminton, and other conditioning activities and games.
Lecture Hours: 1  Laboratory Hours: 0

REC C06  TENNIS  0 HRS. (NC)
This course includes instruction of the rules, strategy, and scoring and etiquette of
the game. Students are introduced to the fundamentals of the basic strokes and
singles and doubles competition. Eight two-hour sessions or equivalent.
Lecture Hours: 1  Laboratory Hours: 0

REC C17  MODERN DANCE PRACTICUM  0 HRS. (NC)
Prerequisite: DANCE 140 and 141 both with a grade of "C" or better. This course is
designed to allow advanced dance students who have completed DANCE 140 and
141 the opportunity to continue advanced training. Students may enroll in Modern
Dance Practicum, REC C17, any number of times.
Lecture Hours: 1  Laboratory Hours: 2 or equivalent

REC C26  AEROBIC EXERCISE  0 HRS. (NC)
This physical fitness class is designed to improve the cardiovascular system as well
as body muscle flexibility. Eight two-hour sessions or equivalent.
Lecture Hours: 0  Laboratory Hours: 1

REC C27  ADVANCED AEROBIC FITNESS  0 HRS. (NC)
Prerequisite: REC C26. This course is designed for students seeking a more
advanced fitness program. Students begin at their own pace, then increase along
with the help of the instructor to improve cardiovascular (heart and lungs) muscular
strength, flexibility, coordination, body composition and balance. Eight two-hour
sessions.
Lecture Hours: 1  Laboratory Hours: 0

REC C36  BALLET PRACTICUM  0 HRS. (NC)
Prerequisite: DANCE 120 with a grade of "C" or better. This course is specifically structured
to meet the needs of those ballet students who have (1) completed both DANCE
110 and 120, and (2) desire to continue with ballet lessons, but are unable to either enroll in a day section of DANCE 210 or successfully audit for the Tazwood
Dance Company. Sixteen two-hour sessions or equivalent.
Lecture Hours: 2  Laboratory Hours: 0

REC C37  PRAIRIE WIND ENSEMBLE  0 HRS. (NC)
Prerequisite: Two semesters of MUS 131 and two semesters of MUS 231. This course is available to all students who have successfully completed four semesters in the Concert Band (MUS 131 and 231). Sixteen three-hour sessions and performances as may be scheduled.
Lecture Hours: 3  Laboratory Hours: 0

REC C50  RACQUETBALL  0 HRS. (NC)
This course provides progressive development of skill in arm strokes, footwork,
serve, volley, kill shots, rules and general strategy, and types of competition.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C51  SOFTBALL  0 HRS. (NC)
This course stresses individual skills in batting, bunting, base running, sliding,
fielding, throwing, pitching, infield skills, and outfield skills. The individual is
introduced to basic concepts of offensive and defensive team play.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C52  BOWLING  0 HRS. (NC)
This course gives instruction in footwork and the fundamental movement in delivery.
Rules, terminology, scoring and etiquette are also covered.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C53  GOLF  0 HRS. (NC)
This course stresses the techniques of driving, fairway shots, pitching and putting.
The student is introduced to general rules and match and stroke play.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C54  ADVANCED GOLF  0 HRS. (NC)
This course provides the student with the basic techniques of driving, fairway shots, pitching and putting. The class receives instruction on shot selection that would be utilized in actual competition.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C55  BEGINNING SWIMMING  0 HRS. (NC)
This course gives instruction to beginners and low intermediates who need
additional practice in shallow water. The five basic strokes and beginning diving are taught.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C56  INTERMEDIATE SWIMMING  0 HRS. (NC)
This course gives instruction in the front and back crawl, elementary back-stroke, side-stroke, and breast-stroke for improved efficiency. Diving and rescue skills are also included.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C57  FIGURE FITNESS FOR WOMEN  0 HRS. (NC)
This course provides concepts and application of exercise and nutrition toward
total fitness.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

REC C58  PHYSICAL CONDITIONING  0 HRS. (NC)
This course involves using calisthenics and weight training to promote physical fitness.
Lecture Hours: 0  Laboratory Hours: 1 or equivalent

ILLINOIS CENTRAL COLLEGE  
Course Descriptions  
COLLEGE CATALOG 2017-2018
REC C59  WEIGHT TRAINING  0 HRS. (NC)
In this course, the student will learn concepts and application of selectorized resistance equipment and/or free weights to promote strength and physical fitness plus aerobic exercise.
Lecture Hours: 0 Laboratory Hours: 1 or equivalent

REC C62  PHILHARMONIC CHORALE  0 HRS. (NC)
This ensemble is open to persons with previous choral experience. Membership is based on audition.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

REC C64  HEART OF ILLINOIS CHORUS  0 HRS. (NC)
This ensemble is for students with previous choral experience and interest in female barbershop style singing. Membership is through audition.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

REC C65  CONCERT CHOIR  0 HRS. (NC)
Prerequisite: Two semesters of MUS 134 and two semesters of MUS 234. This course is for all students who are interested in singing and who have successfully completed four semesters in the Concert Choir (MUS 134 and 234). Sixteen three-hour sessions and performances as may be scheduled.
Lecture Hours: 0 Laboratory Hours: 3

REC C66  CHAMBER SINGERS  0 HRS. (NC)
Prerequisite: Department approval and two semesters each of MUS 130 and 230. This course allows voice majors to enroll in this ensemble which is open to a limited number of auditioned singers. Three laboratory hours per week for eight weeks.
Lecture Hours: 0 Laboratory Hours: 1.5

REC C67  AEROBIC CIRCUIT FITNESS  0 HRS. (NC)
Prerequisite: PHYED 183. This course is a continuation of PHYED 183 and is designed to further the student's understanding of total physical fitness.
Lecture Hours: 0 Laboratory Hours: 2

REC C70  AEROBICS  0 HRS. (NC)
This course will emphasize the utilization of various aerobic techniques to promote physical fitness. The student will receive instruction in the basic concepts and techniques of mixed impact aerobics, step, kickboxing and muscle toning activities in order to develop personal wellness and fitness.
Lecture Hours: 0 Laboratory Hours: 2

REC C77  JAZZ DANCE PRACTICUM  0 HRS. (NC)
Prerequisite: DANCE 131 with a grade of "C" or better. This course is designed to allow advanced dance students who have completed DANCE 130 and 131 the opportunity to continue advanced training. Students may enroll in Jazz Dance Practicum, REC C77, any number of times.
Lecture Hours: 1 Laboratory Hours: 2

REC C79  TAP DANCE PRACTICUM  0 HRS. (NC)
Prerequisite: DANCE 151 with a grade of "C" or better. This course is designed to allow advanced dance students who have completed DANCE 150 and 151 the opportunity to continue advanced training. Students may enroll in Tap Dance Practicum, REC C79, any number of times.
Lecture Hours: 1 Laboratory Hours: 2 or equivalent

REC C80  AEROBIC SUPER CIRCUIT FITNESS  0 HRS. (NC)
Prerequisite: PHYED 183. This course is an annual non-credit course that allows full-time faculty, staff, retirees and their spouses who have successfully completed PHYED 180-183 to continue to expand their health and fitness knowledge and behavior.
Lecture Hours: 0 Laboratory Hours: 2

REC C81  AEROBIC SUPER CIRCUIT FITNESS  0 HRS. (NC)
Prerequisite: PHYED 183. This course is an annual non-credit course that allows students over 65 years of age who have successfully completed PHYED 180-183 to continue to expand their health and fitness knowledge and behavior.
Lecture Hours: 0 Laboratory Hours: 2

REC C82  AEROBIC SUPER CIRCUIT FITNESS  0 HRS. (NC)
Prerequisite: PHYED 183. This course is an annual non-credit course that allows students between 16 and 64 years of age who have successfully completed PHYED 180-183 to continue to expand their health and fitness knowledge and behavior.
Lecture Hours: 0 Laboratory Hours: 2

REC C83  AEROBIC SUPER CIRCUIT FITNESS  0 HRS. (NC)
Prerequisite: PHYED 183. This is an annual non-credit course that allows adjunct faculty and part-time staff who have successfully completed PHYED 180-183 to continue to expand their health and fitness knowledge and behavior.
Lecture Hours: 0 Laboratory Hours: 2

REC C84  CENTRAL ILLINOIS JAZZ TRAIN  0 HRS. (NC)
This course is available to persons with previous jazz experience. Membership is by audition only.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

REC C85  HEALTH AND WELLNESS FOR SENIORS  0 HRS. (NC)
This non-credit course is designed for adults over age 60 who wish to expand their knowledge of health and wellness for seniors. Aspects of physical, psychological and social wellness are covered. Other topics include historical and cultural perspectives of wellness, as well as application of lifestyle choices which can lead to increased health and wellness.
Lecture Hours: 5 Laboratory Hours: 0

REC C86  ICC HARD BOP JAZZ BAND  0 HRS. (NC)
Prerequisite: Two semesters of MUS 132 and two semesters of MUS 232. This course is available to all students who have successfully completed four semesters in the Jazz Band (MUS 132 and 232). Sixteen three-hour sessions and performances as may be scheduled.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

REC C87  PRAIRIE WIND ENSEMBLE  0 HRS. (NC)
This course is available to all individuals that play wind or percussion instruments that have successfully auditioned for the ensemble.
Lecture Hours: 0 Laboratory Hours: 2 or equivalent

REC C94  TAZWOOD DANCE COMPANY  0 HRS. (NC)
This course is designed to allow advanced dance students the opportunity to continue advanced training. Membership is awarded through audition.
Lecture Hours: 0 Laboratory Hours: 2
Program Mission, Goals, and Student Learning Outcomes
911 TELECOMMUNICATOR CERTIFICATE

Department:

The mission of the 911 Telecommunicator Certificate is to prepare the students for employment in the various fields of 911 telecommunication within police, fire or EMS departments by educating them in the knowledge, skills and behaviors for an entry-level 911 telecommunicator.

GOAL 1
Graduates will demonstrate ethical and service-oriented behaviors in the 911 Telecommunication field in which they choose to work.

1. Students will demonstrate professional interaction with all parties in the internship setting, such as with police, fire, and EMS.
2. Students will demonstrate the ethics of professional responsibility within the 911 telecommunication profession.

GOAL 2
Graduates will demonstrate skills of the 911 Telecommunication in which they plan to work, along with the issues and problems that arise within that system.

1. Students will develop the skills necessary to work within the 911 telecommunication field, such as call taking, accurate address information, proper communications, computer systems, etc.
2. Students will perform routine tasks involving technology to access information about the court system; the laws; cases; and court rules, as well as communicate about the same.

GOAL 3
Graduates will demonstrate knowledge in the area of criminal 911 Telecommunication, specifically new trends and law that apply to their chosen profession.

1. Students will demonstrate knowledge of the 911 Telecommunication and its role in contributing to our understanding of the evolving world of crime and the changing trends of telecommunication.
2. Students will demonstrate knowledge of 911 Telecommunication issues that deal with new case law and the evolving changes in crime and the applicable law.

ACCOUNTING AAS DEGREE

Department: Business, Hospitality, and Information Systems

The mission of the Associate in Applied Science Accounting program is to provide a background in accounting to qualify the student as a paraprofessional accountant, junior accountant, or entry-level accountant, or to prepare the student to engage in a general business career, either as an owner or manager, by educating them in accounting methods and principles, and exposing students to computers and programming necessary in an automated accounting environment.

GOAL 1
Graduates of the program will demonstrate understanding of the creation and use of accounting information as well as the basic principles of business law, management, and economics.

1. Students will demonstrate an understanding of the accounting equation.
2. Students will be able to interpret financial statements.
3. Students will demonstrate an understanding of fundamental cost accounting concepts.
4. Students will be able to describe the laws and regulations needed to manage business operations and accounting transactions.

GOAL 2
Graduates of the program will demonstrate the appropriate skills for an entry-level paraprofessional accountant.

1. Students will be able to analyze economic activity, record business transactions, and construct financial statements.
2. Students will be able to manipulate accounting information for use in managerial decision-making.
3. Students will demonstrate proficiency in the use of accounting software and electronic spreadsheets.
4. Students will be able to perform basic payroll calculations in accordance with federal laws.
5. Students will be able to prepare individual federal income tax returns.

GOAL 3
Graduates of the program will demonstrate awareness of the need for ethical decision-making in the creation and dissemination of financial information.

1. Students will demonstrate awareness of the need for ethical behavior when developing estimates and making accounting judgments.
2. Students will demonstrate an understanding of the fraud triangle and the need for internal controls over financial reporting.
ACCOUNTING CLERK CERTIFICATE

Department: Business, Hospitality, and Information Systems

The mission of the Accounting Clerk Certificate program is to prepare students with little or no office experience for employment in accounting or an accounting related field as an accounting clerk, accounts receivable clerk, accounts payable clerk, payroll clerk, or similar positions in other areas of accounting within the manufacturing, service, financial, not-for-profit, or governmental sectors of the economy by educating them in basic accounting, keyboarding, and data entry.

GOAL 1

Graduates of the program will demonstrate basic understanding of the creation and use of accounting information as well as the principles of business.

1. Students will demonstrate an understanding of the accounting equation.
2. Students will be able to interpret basic financial statements.
3. Students will demonstrate a basic understanding of the laws and regulations needed to manage business operations and accounting transactions.

GOAL 2

Graduates of the program will demonstrate the appropriate skills for an accounting clerk.

1. Students will be able to analyze economic activity, record business transactions, and construct basic financial statements.
2. Students will demonstrate proficiency in the use of accounting software and electronic spreadsheets.
3. Students will be able to prepare payroll in conformity with federal and state laws and regulations.
4. Students will demonstrate proficiency in keyboarding and data entry.

GOAL 4

Graduates of the program will demonstrate awareness of the need for ethical decision-making in the creation and dissemination of financial information.

1. Students will demonstrate basic awareness of the need for ethical behavior in developing estimates and making accounting judgments.
2. Students will demonstrate an understanding of the fraud triangle and the need for internal controls over financial reporting.

ACCOUNTING TECHNICIAN CERTIFICATE

Department: Business, Hospitality, and Information Systems

The mission of the Accounting Technician Certificate program is to prepare office-experienced students for employment in accounting or an accounting related field as a bookkeeper, payroll clerk, or similar positions in other areas of accounting within the manufacturing, service, financial, not-for-profit, or governmental sectors of the economy by educating them in basic accounting methods and principles, and exposing students to computers and programming necessary in an automated accounting environment.

GOAL 1

Graduates of the program will demonstrate basic understanding of the creation and use of accounting information as well as the principles of business.

1. Students will demonstrate an understanding of the accounting equation.
2. Students will be able to interpret basic financial statements.
3. Students will demonstrate a basic understanding of fundamental cost accounting concepts.
4. Students will demonstrate a basic understanding of the laws and regulations needed to manage business operations and accounting transactions.

GOAL 2

Graduates of the program will demonstrate the appropriate skills for a bookkeeper or accounting clerk.

1. Students will be able to analyze economic activity, record business transactions, and construct basic financial statements.
2. Students will be able to manipulate basic accounting information for use in managerial decision-making.
3. Students will demonstrate proficiency in the use of accounting software and electronic spreadsheets.
4. Students will be able to prepare payroll in conformity with federal and state laws and regulations.
5. Students will be able to prepare individual federal income tax returns.

GOAL 3

Graduates of the program will demonstrate awareness of the need for ethical decision-making in the creation and dissemination of financial information.

1. Students will demonstrate basic awareness of the need for ethical behavior in developing estimates and making accounting judgments.
2. Students will demonstrate an understanding of the fraud triangle and the need for internal controls over financial reporting.
AGRICULTURAL BUSINESS MANAGEMENT AAS DEGREE

Department: Agricultural and Industrial Technologies

The mission of the Agricultural Business Management program is to prepare students for employment in the agricultural industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the agricultural industry.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge required of an employee in a wide variety of agricultural occupations.

1. Students will demonstrate technical knowledge principles of genetics, nutrition, physiology, reproduction, growth and lactation of farm animals.
2. Students will demonstrate technical knowledge of biological concepts of soil and plant growth.

GOAL 2
Graduates will demonstrate proficiency in application of best management practices in production agriculture.

1. Students will demonstrate proficiency in preparing budgets, accounting records and financial records for an agricultural business.
2. Students will demonstrate application of marketing and the role of agriculture in the United States economy.

GOAL 3
Graduates will demonstrate professional qualities and professional ethics.

1. Students will demonstrate collegiality with customers, employers and fellow employees.
2. Students will demonstrate honesty, initiative and a positive attitude at work.

AGRICULTURAL BUSINESS MANAGEMENT—AGRICULTURAL SALES & SERVICE AAS DEGREE

Department: Agricultural and Industrial Technologies

The mission of the Agricultural Business Management-Agricultural Sales and Service program is to prepare students for employment in the agricultural sales industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the agricultural sales industry.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge and proficiency required of an entry-level employee in occupations within the agricultural sales and service industry.

1. Students will demonstrate technical knowledge of products within the agricultural sales and service industry.
2. Students will demonstrate knowledge of importance of customer service within the agricultural sales and service industry.

GOAL 2
Graduates will demonstrate specific knowledge and proficiency in agricultural sales and service practices.

1. Students will demonstrate a problem solving approach to selling agricultural goods or services.
2. Students develop effective customer profiles to demonstrate skill in selling agricultural goods or services.

GOAL 3
Graduates will demonstrate professional qualities and professional ethics.

1. Students will understand and adjust sales presentation based on personality traits and communication skills.
2. Students will demonstrate collegiality with customers, employers and fellow employees.
AGRICULTURAL BUSINESS MANAGEMENT-AGRONOMY AAS DEGREE
Department: Agricultural and Industrial Technologies
The mission of the Agricultural Business Management-Agronomy program is to prepare students for employment in the crop systems industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of agronomy.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge required of an entry-level employee in the agronomy industry.

1. Students will demonstrate technical knowledge of methods and procedures to properly manage and conserve soil.
2. Students will demonstrate technical knowledge of plant growth.

GOAL 2
Graduates will demonstrate proficiency in application of best management practices in agronomy.

1. Students will demonstrate proficiency in planning a sustainable soil fertility program.
2. Students will demonstrate proficiency in use of variable rate technology to insure profitable production of crops.

GOAL 3
Graduates will demonstrate professional qualities and professional ethics.

1. Students will demonstrate collegiality with customers, employers and fellow employees.
2. Students will demonstrate honesty, initiative and a positive attitude at work.

AGRICULTURAL BUSINESS MANAGEMENT-ANIMAL SCIENCES AAS DEGREE
Department: Agricultural and Industrial Technologies
The mission of the Agricultural Business Management-Animal Sciences program is to prepare students for employment in the field by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the animal science industry.

GOAL 1
Graduates of the Agricultural Business Management-Animal Sciences program will demonstrate an understanding of the technical knowledge and proficiency required of an entry-level employee in animal science industry.

1. Students will demonstrate technical knowledge of principles of genetics, nutrition, physiology, reproduction, growth, lactation and marketing of farm animals.
2. Students will demonstrate a technical knowledge of the interaction of crop production (inputs), environment, behavior, health and sanitation (manure handling) on production of farm animals.

GOAL 2
Graduates of the Agricultural Business Management-Animal Sciences program will demonstrate proficiency in application of best management practices in animal production.

1. Students will demonstrate their proficiency in successfully artificially inseminating swine.
2. Students will demonstrate their proficiency in the application and use of breeding Expected Progeny Differences in selection of a herd bull.

GOAL 3
Graduates of the Agricultural Business Management-Animal Sciences program will demonstrate professional qualities and professional ethics.

1. Students will demonstrate collegiality with customers, employers and fellow employees.
2. Students will demonstrate honesty, initiative and a positive attitude at work.
AGRICULTURAL BUSINESS MANAGEMENT—PRECISION AGRICULTURE CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Precision Agriculture certificate program is to prepare students for employment in the field of precision agriculture.

GOAL 1
Certificate earners will demonstrate technical knowledge required of an employee within agricultural industries that require specialization in the use of global positioning systems and geographical informational systems.

1. Students will demonstrate technical knowledge of global positioning systems and geographical informational systems.
2. Students will demonstrate technical knowledge of soil.

GOAL 2
Certificate earners will demonstrate proficiency in use of computer technology used in global positioning systems and geographical informational systems for management purposes.

1. Students will demonstrate comprehension of converting, formatting, analyzing and interpreting data to construct useful maps.
2. Students will demonstrate the ability to use computer technology to make more informed management decisions on input use.

GOAL 3
Certificate earners will understand how advanced technologies affect the environment and sustainability practices.

1. Students will demonstrate the ability to develop a sustainable soil fertility program.
2. Students will demonstrate understanding of laws and regulations that govern pesticide and fertilizer application.

AGRICULTURAL PRODUCTION CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Agricultural Production program is to prepare students for employment in agricultural production by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the agricultural production industry.

GOAL 1
Certificate earners will demonstrate an understanding of the technical knowledge of an employee in agricultural production.

1. Students will demonstrate technical knowledge of genetics, nutrition, physiology, reproduction and lactation of farm animals.
2. Students will demonstrate technical knowledge of biological concepts of soil and plant growth.

GOAL 2
Certificate earners will demonstrate proficiency in best management practices in agricultural production.

1. Students will demonstrate proficiency of industry accepted management practices in the production of farm animals.
2. Students will demonstrate proficiency in planning a sustainable soil fertility program.

GOAL 3
Certificate earners will have a general understanding and appreciation for the attitudes and behaviors of an entry-level position in agricultural production.

1. Students will demonstrate collegiality with fellow students during group projects.
2. Students will express appreciation to hosts following laboratory visits to businesses or farms.
ARCHITECTURAL CONSTRUCTION TECHNOLOGY AAS DEGREE
Department: Arts and Communication
The Associate of Applied Science degree in Architectural Construction's mission is to prepare students for entry-level positions in construction firms by providing architectural drafting skills and an understanding of the fundamentals of architecture and construction.

GOAL 1
Graduates of the program will be able to manage, document and coordinate a basic building construction project.
1. Utilize modern technology and techniques to implement construction contracts documents
2. Estimate material quantities and life cycle costs
3. Analyze and prepare technical reports and presentations

GOAL 2
Graduates of the program will be able to utilize construction technologies to communicate and work in the field.
1. Develop and interpret basic construction working drawings
2. Utilize modern surveying technology for construction layout

GOAL 3
Graduates of the program will be able to supervise, inspect and evaluate the erection of wood, steel, masonry and concrete systems in relation to residential, commercial and industrial structures.
1. Evaluate forces and stresses in elementary structural systems
2. Identify and use a wide range of information resources, electronic data bases and internet services to solve or explain construction related issues
3. Evaluate materials and methods for construction projects

ARCHITECTURAL DRAFTING CERTIFICATE
Department: Arts and Communication
The Architectural Drafting Certificate's mission is to prepare the student to enter employment as a trainee in the area of civil engineering, architecture, or construction with basic skills and knowledge of the profession.

GOAL 1
Graduates of the certificate will be able to create and utilize construction drawings.
1. Identify basic elements of construction prints.
2. Interpret and prepare a basic set of construction drawings, both manually and computer generated.
3. Attain a basic understanding to propose construction drawings using industry standards in computer systems.

GOAL 2
Graduates of the certificate will be able to solve construction and engineering problems.
1. Apply industry standards & use testing methods appropriate to evaluate engineering properties of soils and concrete.
2. Use applicable mathematics to solve construction and engineering problems.
3. Use land surveying instruments for basic construction use.

GOAL 3
Graduates of the certificate will be able to communicate to members of the construction team.
1. Attain the ability to communicate verbally to members of construction team.
2. Attain the ability to communicate in writing to members of construction team.
AUTOMOTIVE TECHNOLOGY AAS  
Department: Agricultural and Industrial Technologies  
The mission of the Automotive Technology Associate’s degree program is to prepare students for employment as an entry-level technician to be employed by automobile dealers, independent repair shops, mass merchandisers, auto manufacturers, part and component distributors, and other service oriented businesses. In this NATEF certified program, students are trained to perform a full range of automotive technical functions including diagnosis of mechanical and electrical problems, repair, and maintenance.

GOAL 1.  
Graduates of the program will demonstrate the necessary skills of an entry-level automotive technician.

1. Students will demonstrate in the automotive lab the skills required to work within the automotive electrical systems.
2. Students will demonstrate in the automotive lab the skills required to work within the automotive transmissions and transaxles systems.
3. Students will demonstrate in the automotive lab the skills required to work within the automotive manual drive train and axles systems.
4. Students will demonstrate in the automotive lab the skills required to work within the automotive suspension and steering systems.
5. Students will demonstrate in the automotive lab the skills required to work within the automotive brake systems.
6. Students will demonstrate in the automotive lab the skills required to work within the automotive heating and air conditioning systems.
7. Students will demonstrate in the automotive lab the skills required to work within the automotive engine repair.
8. Students will demonstrate in the automotive lab the skills required to work within the automotive engine performance.

GOAL 2  
Graduates will demonstrate professional behaviors in the workplace.

1. Students will attend regularly throughout internship.
2. Students will follow ethical practices while doing repair orders.

GOAL 3  
Graduates will demonstrate knowledge of the physics principles used in automotive technology.

1. Students will demonstrate knowledge of Ohm’s law.
2. Students will demonstrate knowledge of Pascal’s law.

BANKING AND FINANCE CERTIFICATE  
Department: Business, Hospitality, and Information Systems  
The mission of the Banking and Finance Certificate program is to prepare or further educate individuals preparing for employment or employed in banking or financial services, by educating them in the knowledge, skills, and behaviors required to seek or continue employment in banking, financial services, and other financial management-related positions.

GOAL 1  
Graduates obtaining a banking & finance certificate will be able to demonstrate competency in math skills required for the financial services industry.

GOAL 2  
Graduates obtaining a banking & finance certificate will be able to demonstrate competency and understanding of banking and financial systems.

GOAL 3  
Graduates obtaining a banking & finance certificate will be able to demonstrate ability to function in the financial services industry.
CATERPILLAR DEALER SERVICE TECHNOLOGY

Department: Agricultural and Industrial Technologies

The mission of the Caterpillar Dealer Service Technology Associate’s Degree program is to prepare students for employment as a Service Technician at a sponsoring partner Caterpillar dealership. During this full time two-year program, the student will develop the necessary knowledge, skills, and behaviors to be a productive member of the dealership’s service team.

GOAL 1
Students in the Caterpillar Dealer Service Technology program will demonstrate knowledge of Caterpillar Inc. and the operation of a Caterpillar dealership.

1. Students will develop an understanding and appreciation for Caterpillar Inc. from a historical perspective.
2. Students will be introduced to various business procedures found in a typical Caterpillar dealership.
3. Students will become proficient in the use of the electronic media used in Caterpillar dealers.

GOAL 2
Students will demonstrate knowledge of the construction, operation, and repair of the systems utilized in the Caterpillar earthmoving equipment product line. This knowledge to include, but not limited to engines, power trains, and hydraulics.

1. Students will develop an understanding of the basic construction of engines, power trains, and hydraulic system.
2. Students will develop an understanding and knowledge of the correct system operation of the engines, power trains, and hydraulic systems.
3. Students will develop an understanding and knowledge of the diagnostic processes required to successfully repair engine, power train, and hydraulic systems.

GOAL 3
Students will demonstrate the ability to successfully assimilate into the Caterpillar dealer network exhibiting skills of cooperation and teamwork.

1. Students will successfully complete the required internships at the sponsoring dealer.
2. Students will follow all applicable dealer standards as they relate to the completion of the internship.

CISCO CERTIFIED NETWORK ASSOCIATE (CCNA) CERTIFICATE

Department: Business, Hospitality, and Information Systems

Mission: The Cisco Certified Network Associate (CCNA) Certificate is designed to provide students with hands-on networking experience in associate-level technologies that focuses on core routing and switching. Instruction includes, but is not limited to networking standards, LAN protocols, WAN protocols, cabling standards, IP addressing, and various routing protocols. The certificate is career-focused and certification aligned aimed at helping students prepare for entry-level networking opportunities.

GOAL 1
Graduates of the program will demonstrate the ability to design and install networks.

1. Students will be able to design and install basic networks.
2. Students will be able to design and install advanced networks.

GOAL 2
Graduates of the program will configure associate to enterprise--level settings and features on Cisco routers and switches.

1. Students will be able to configure associate-level routed and switched networks.
2. Students will be able to configure enterprise-level routed and switched networks.

GOAL 3
Graduates of the program will demonstrate the ability to maintain and troubleshoot router and switch configurations using associate to enterprise-level methodologies.

1. Students will be able to monitor and maintain networks.
2. Students will be able to troubleshoot the network using proper methodologies and techniques.

GOAL 4
Graduates of the program will demonstrate ethical behaviors in self-management, teamwork and building relationships on entry into the workforce.

1. Students will work in teams to complete labs and practical simulations.
2. Students will work as individuals on self-paced simulations.
CISCO CERTIFIED NETWORK PROFESSIONAL (CCNP) CERTIFICATE
Department: Business, Hospitality, and Information Systems

Mission: The Cisco Certified Network Professional (CCNP) Certificate is designed to provide students with hands-on networking experience in enterprise-level networking that develops an advanced understanding of routing and switching technologies. Instruction includes, but is not limited to advanced knowledge of routing protocols, LAN protocols, WAN protocols, and further hands-on experience with enterprise-level network devices and their configurations. The certificate is career-focused and certification aligned aimed at helping students prepare for professional-level networking opportunities.

GOAL 1
Graduates of the program will demonstrate the ability to design and install networks.

1. Students will be able to design and install basic networks.
2. Students will be able to design and install advanced networks.

GOAL 2
Graduates of the program will demonstrate configurations using advanced-level settings and features on enterprise-level routers and switches.

1. Students will be able to configure associate-level routed and switched networks.
2. Students will be able to configure enterprise-level routed and switched networks.

GOAL 3
Graduates of the program will demonstrate the ability to troubleshoot advanced-level router and switch configurations.

1. Students will be able to monitor and maintain networks.
2. Students will be able to troubleshoot the network using proper methodologies and techniques.

GOAL 4
Graduates of the program will demonstrate the ability to maintain network stability and efficiency using advanced-level features.

1. Students will work in teams to complete labs and practical simulations.
2. Students will work as individuals on self-paced simulations.

CISCO NETWORKING SPECIALIST AAS DEGREE
Department: Business, Hospitality, and Information Systems

The mission of the Cisco Networking Specialist degree is to prepare students for employment in the networking field through education and training on real-world networking equipment by specializing in areas of cabling, network design, core routing and switching technologies, and security concepts, as well as telephony and wireless technologies. The program is aligned to several highly-sought after Cisco certifications including the CCNA and CCNP.

GOAL 1
Graduates of the program will be able to design and install basic to advance-level networks.

1. Students will be able to design and install basic networks.
2. Students will be able to design and install advanced networks.

GOAL 2
Graduates of the program will configure associate to enterprise-level settings and features on Cisco routers and switches.

1. Students will be able to configure associate-level routed and switched networks.
2. Students will be able to configure enterprise-level routed and switched networks.

GOAL 3
Graduates of the program will demonstrate the ability to maintain and troubleshoot router and switch configurations using associate to enterprise-level methodologies.

1. Students will be able to monitor and maintain networks.
2. Students will be able to troubleshoot the network using proper methodologies and techniques.

GOAL 4
Graduates of the program will demonstrate ethical behaviors in self-management, teamwork and building relationships on entry into the workforce.

1. Students will work in teams to complete labs and practical simulations.
2. Students will work as individuals on self-paced simulations.
CLERK TYPIST CERTIFICATE  
Department: Business, Hospitality, and Information Systems

The mission of the Clerk Typist Certificate is to prepare students for employment in entry-level office positions such as receptionist and file clerk by helping them develop the necessary knowledge, speed, and accuracy.

GOAL 1
Graduates of the program will demonstrate appropriate keyboarding skills for an entry-level office position.
1. Students will demonstrate accurate touch-typing skill and speed.
2. Students will demonstrate accurate 10 key skill and speed.

GOAL 2
Graduates of the program will demonstrate or describe appropriate office skills needed for an entry-level office position.
1. Students will be able to construct basic mailable documents using current word processing software.
2. Students will be able to maintain and retrieve accurate office records.
3. Students will be able to accurately manage office communications.

GOAL 3
Graduates of the program will demonstrate or describe appropriate office attitudes and behaviors needed for an entry-level office position.
1. Students will be able to demonstrate or describe appropriate office attitudes in the modern office setting.
2. Students will be able to demonstrate or describe appropriate office behaviors in the modern office setting.

CNC MACHINE OPERATOR CERTIFICATE  
Department: Agricultural and Industrial Technologies

The mission of the CNC Machine Operator Certificate program is to prepare students with the skills and knowledge required for entry-level employment as a CNC machine operator in a manufacturing facility. Individuals will learn part design, machine setup and operation, and production.

GOAL 1
Graduates of the program will demonstrate the skills to properly access the correct program, identify and troubleshoot work holding devices, tooling, and piece parts, load piece parts and run the automated cycle, and inspect finished parts for accuracy at a level consistent with local employer expectations.
1. Use rulers, gauges, and precision measuring tools to properly identify sizes and locations of part features.
2. Analyze industrial prints including dimensions, tolerances, allowances, geometric tolerances, and notes.

GOAL 2
Graduates of the program will have a general understanding and appreciation for the procedures within manufacturing for safety, quality, logistics, and other things and be prepared to positively contribute to the production team.
1. Follow all prescribed safety rules including the wearing of personal protection devices, properly using lifting tools to move equipment & supplies, following lockout/tagout procedures, and site specific requirements.
2. Communicate in a formal and informal manner to a level that is expected of supervisors or mid-level managers.

GOAL 3
Graduate will be able to interpret mechanical blueprints, use precision measuring tools, communicate how the CNC processes produces the required features within specified tolerances, and verify that features are indeed within tolerance.
1. Troubleshoot machining problems including tooling, finish, dimensional errors, and work holding.
2. Setup and machine sub-assembly, assembly, and fixture parts within tolerance using common machine tool systems.
3. Program machine tools using manual and computer assisted methods.
4. Safely operate CNC machine tools.
COMMERCIAL REFRIGERATION TECHNICIAN CERTIFICATE
Department: Agricultural and Industrial Technologies

The mission of the Commercial Refrigeration Certificate program is to provide students with the knowledge and skills pertaining to the maintenance and repairing of ice machines as well as both medium and low temperature walk-ins, reach-ins, and supermarket refrigeration. After completing the program coursework consisting of both lecture and lab experiences, the graduates will be prepared to seek employment as entry-level technicians as refrigeration mechanics or general facilities repair persons.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge to perform as an entry-level light commercial refrigeration technician.
1. Students will demonstrate technical knowledge of light commercial refrigeration theory.
2. Students will identify and describe the function of system components used in low-temperature and medium-temperature refrigeration systems.
3. Students will identify and describe the function of system components used in ice machines, walk-in, reach-in, and market refrigeration systems.
4. Students will identify and describe the function of test instruments and tools required to diagnose ice machines and light commercial refrigeration systems.

GOAL 2
Graduates will demonstrate the skills appropriate for an entry-level light commercial refrigeration technician.
1. Students will demonstrate and describe troubleshooting techniques of ice machines and light commercial refrigeration equipment according to manufacturer's instructions.
2. Students will demonstrate and describe the procedures in replacing faulty components in ice machines and light commercial refrigeration systems.
3. Students will demonstrate and describe the skills to troubleshoot ice machine and light commercial refrigeration components by using the appropriate test instruments.
4. Students will demonstrate and describe installation techniques of ice machines and light commercial refrigeration equipment according to manufacturer's instructions.

GOAL 3
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry-level light commercial refrigeration technician.
1. Students will demonstrate and describe proper refrigerant handling techniques in accordance to Section 608 of the Federal Clean Air Act.
2. Students will demonstrate and describe ladder and fall prevention safety procedures in accordance to OSHA 29 CFR 1910.
3. Students will demonstrate and describe lockout/tagout safety procedures for control of hazardous energy sources in accordance to OSHA 29 CFR 1910.
4. Students will demonstrate and describe safety procedures for handling pressurized cylinders in accordance to OSHA 29 CFR 1910.
5. Students will demonstrate and describe how to maintain strict compliance with all federal, state, county, and municipal government laws, regulations, and ordinances pertaining to the HVAC/R industry and business operation.

COMPUTED TOMOGRAPHY CERTIFICATE
Department: Health Careers

The mission of the Computed Tomography Certificate Program is to prepare knowledgeable and skilled entry-level CT technologists to meet the needs of the medical community.

GOAL 1
Students will be clinically competent.
1. Students will identify anatomic structures in all imaging planes.
2. Students will apply routine scanning protocols.
3. Students will successfully perform CT exams in the clinical setting.

GOAL 2
Students will develop critical thinking skills.
1. Students will demonstrate sound decision making.
2. Students will appropriately evaluate CT images.

GOAL 3
Students will model professionalism.
1. Students will demonstrate professional qualities.
2. Students will understand professional ethics.
COMPUTER PROGRAMMING AND DATABASE DEVELOPMENT AAS DEGREE

Department: Business, Hospitality, and Information Systems

The mission of the Associate in Applied Science Computer Programming and Database Development degree is to prepare students for computer programming positions through instruction of in-depth programming skills in two different programming languages, so that the variety of computer platforms and languages available allow students diversification to meet their personal and career interests.

GOAL 1
Graduates of the program will demonstrate specific skills and proficiency in the technical knowledge of computer programming.

1. The student will design, implement and test a medium-sized software application, utilizing industry conventions for the computer industry.
2. The student will demonstrate an understanding of Object-Oriented programming and the idea of object instantiation from a class, methods, attributes, inheritance, and encapsulation.
3. The student will demonstrate an understanding and knowledge of abstract-data types.

GOAL 2
Graduates of the program will comprehend the terminology and industry conventions required to produce user-friendly and programmer-friendly software.

1. The student will create code in their programs that makes a concerted effort to insure that the program is user-friendly.
2. The student will create code in their programs that make a concerted effort to insure that the program meets all project requirements while still maintaining conventions to insuring reusability and programmer friendliness.
3. The student will create text files and small programs, and use them to manipulate data in a UNIX/Linux operating system.

GOAL 3
Graduates of the program will have an application of knowledge in the proper construction and querying of databases and providing information from the stored data.

1. The student will be able to create and manage database files.
2. The student will demonstrate an understanding of SQL commands to create, maintain, and query a relational database.
3. The student will design and implement a relational database meeting industry conventions for input of data, storage of properly formatted data, and successful information retrieval.

COMPUTER AIDED MECHANICAL DRAFTING CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Computer-Aided Mechanical Drafting certificate program is to provide students with the knowledge and skills required for entry-level employment in computer-aided design and drafting systems. Individuals will learn manufacturing processes, welding processes, and dimensional metrology.

GOAL 1
Graduates of the program will demonstrate the understanding of engineering drawings in order to pursue employment as a computer aided mechanical design professional.

1. Students will be able to create 3d solid models in Creo, formerly called Pro-E, using extrude, revolve, sweep and blend commands.
2. Students will be able to edit existing models and change size and location of features.

GOAL 2
Graduates of the program will demonstrate specific procedures within the area of computer-aided mechanical drafting such as detailing, illustrating that they are well prepared to positively contribute to the design team.

1. Students will assign dimensions to drawings according to ANSI standards.
2. Students will assign welding symbols to drawings.

GOAL 3
Students will demonstrate professional behavior.

1. Students will use formal professional language during presentations displaying their work.
2. Students will be able to work independently.
CULINARY ARTS MANAGEMENT  
ASSOCIATE IN APPLIED SCIENCE DEGREE

Department: Business, Hospitality, and Information Systems

The Mission of the Culinary Arts Management Associate in Applied Science Degree program is to prepare students for employment in the restaurant industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the restaurant industry.

GOAL 1
Graduates of the program will demonstrate appropriate culinary math knowledge in order to perform calculations necessary in the industry.
1. Students will be able to demonstrate proficiency in recipe adjustment.
2. Students will be able to demonstrate proficiency in recipe costing.

GOAL 2
Graduates of the program will demonstrate application of knowledge of culinary arts, baking and pastry, and front of the house principles.
1. Students will design and execute an appetizer and entree using culinary arts principles.
2. Students will complete a torte, plated dessert, and petit fours using baking and pastry principles.
3. Students will demonstrate knowledge of Front of the House Operation and serving techniques.

GOAL 3
Graduates of the program will model professional behaviors appropriate for an entry-level culinarian.
1. Students will demonstrate cooperative learning and engagement when working with their peers in group projects.
2. Students will demonstrate professional demeanor by following the Culinary Arts Policies and Procedures in regards to uniforms and grooming guidelines.

CULINARY ARTS MANAGEMENT  
CERTIFICATE

Department: Business, Hospitality, and Information Systems

The Mission of the Culinary Arts Certificate program is to prepare students for entry-level employment such as prep cooks and cooks in the restaurant industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the restaurant industry.

GOAL 1
Graduates will have basic culinary math knowledge in order to perform calculations necessary in the industry.
1. Students will be able to demonstrate proficiency in recipe adjustment.
2. Students will be able to demonstrate proficiency in recipe costing.

GOAL 2
Graduates of the program will demonstrate application of skills of basic culinary and bakeshop principles.
1. Students will apply basic culinary skills and techniques.
2. Students will apply basic baking skills and techniques.

GOAL 3
Graduates will model professional behaviors appropriate for an entry-level culinarian.
1. Students will demonstrate cooperative learning and engagement when working with their peers in group projects.
2. Students will demonstrate professional demeanor by following the Culinary Arts Policies and Procedures in regards to uniforms and grooming guidelines.
CUSTOMER SERVICE PROFESSIONAL CERTIFICATE

Department: Business, Hospitality, and Information Systems

The mission of the Customer Service Professional Certificate is to prepare students for employment as an entry-level customer service professional by providing them with the necessary technological skills, human relations skills, and management skills.

GOAL 1
Graduates of the program will demonstrate technological skills needed for an entry-level customer service position.

1. Students will be able to construct basic mailable documents using current word processing software.
2. Students will be able to construct and interpret accurate workbooks using current spreadsheet software.

GOAL 2
Graduates of the program will demonstrate or describe appropriate human relations attitudes/behaviors and skills needed for an entry-level customer service position.

1. Students will be able to demonstrate or describe appropriate customer service procedures.
2. Students will be able to demonstrate or describe appropriate customer service attitudes.
3. Students will be able to demonstrate or describe appropriate customer service behaviors.

GOAL 3
Graduates of the program will demonstrate or describe appropriate management skills needed for an entry-level customer service position.

1. Students will be able to describe the economic and legal environment in which businesses operate.
2. Students will be able to maintain and retrieve accurate customer records.

DECONSTRUCTION

Department: Agricultural and Industrial Technologies

The mission of the Deconstruction Certificate is to prepare students for employment in the deconstruction and building material salvage, reuse and recycling industries. The sequence of courses combined with a capstone lab project which serves to educate them in knowledge, skills, and behaviors to entry-level positions in construction, deconstruction, or material salvage crews.

GOAL 1
Graduates of the program will demonstrate on-the job skills.

1. Students will identify appropriate tools to be used for the deconstruction task.
2. Students will demonstrate knowledge of worker safety on a deconstruction project.
3. Students will demonstrate knowledge of safety on site during a deconstruction project.

GOAL 2
Graduates will be able to coordinate a deconstruction project.

1. Students will write a site assessment plan that demonstrates considerations for safety, codes and permits, scheduling sequence, and logistics.
2. Students will write an environmental health report that defines hazardous material and remediation.

GOAL 3
Graduates will evaluate the value of the deconstruction advantage.

1. Select and support the market for recovered materials.
2. Appraise the reuse value.
3. Differentiate the economic, social and environmental value.
DENTAL HYGIENE AAS DEGREE
Department: Health Careers
The mission of the Illinois Central College Dental Hygiene Program is to graduate and facilitate the development of professional, ethical, and competent dental hygienists who exhibit the following characteristics: an awareness of the present and future roles and responsibilities within the dental hygiene profession and the community he/she serves; the knowledge and clinical skills necessary to provide the current standard of care within the dental hygiene profession for clients he/she treats; a commitment to lifelong learning and professional development.

GOAL 1
Graduates will exhibit clinical competency as an entry-level dental hygienist.
1. Utilize reflective judgment in developing a comprehensive patient dental hygiene care plan. (PC.6)
2. Collaborate with the patient and other health professionals as indicated to formulate a comprehensive dental hygiene care plan that is patient-centered and based on the best scientific evidence and professional judgment. (PC.7)

GOAL 2
Graduates will exhibit a foundation for professional growth, scientific advancement, and life-long learning.
1. Integrate accepted scientific theories and research into educational, preventive, and therapeutic oral health services. (C.5)
2. Investigate career opportunities within health care, industry, education, research, and other roles as they evolve for the dental hygienist. (PGD.1)

GOAL 3
Graduates will exhibit appropriate critical thinking skills for an entry-level dental hygienist.
1. Facilitate consultations and referrals with all relevant health care providers for optimal patient care. (C.9)
2. Manage medical emergencies by using professional judgment, providing life support, and utilizing required CPR and any specialized training or knowledge. (C.10)
3. Systematically collect, analyze, and record diagnostic data on the general, oral, and psychosocial health status of a variety of patients using methods consistent with medicolegal principles. (PC.1)
4. Make referrals to professional colleagues and other health care professionals as indicated in the patient care plan. (PC.8)

GOAL 4
Graduates will model professional behaviors appropriate for an entry-level dental hygienist.
1. Respect the goals, values, beliefs, and preferences of all patients. (HP.1)
2. Advocate for effective oral health care for underserved populations. (CM.2)

DIESEL POWERED EQUIPMENT TECHNOLOGY
Department: Agricultural and Industrial Technologies
The mission of the Diesel Powered Equipment Technology Program is to provide the training necessary to maintain, service, and diagnose system failures as applied to agricultural equipment, construction equipment, and heavy truck. The program actively encourages students to expand their horizons to permit upward mobility through General Education courses and other related learning experiences such as those associated with the student club organization. The program also places a strong emphasis on developing and expanding the student's work ethic so that the student is fully prepared as an entry-level service technician.

GOAL 1
Graduates of the Diesel Powered Equipment Technology Program will demonstrate an understanding of the technical knowledge and proficiency required of an entry-level diesel powered equipment service professional.
1. Students will demonstrate technical knowledge and proficiency as judged by their internship employers.
2. Students will be gainfully employed by a diesel powered equipment employer at graduation.

GOAL 2
Graduates of the program will demonstrate specific knowledge and proficiency in the technical areas of diesel engines, electrical systems, electronic systems, tractor guidance and telematics, diesel fuel systems, power trains, air conditioning, hydraulics, heavy truck suspension, chassis and brakes, and agricultural machinery.
1. Students will demonstrate technical competency thru their performance during the annual DPET Diagnostic Skills Assessment.
2. Students will demonstrate technical competency thru their performance in each laboratory practicums held at the conclusion of each designated DPET course.

GOAL 3
Graduates of the program will develop leadership, cooperative, professional, and work ethic skills necessary for greater success and upward mobility throughout the graduate's career.
1. Students will demonstrate "soft" skills throughout their internship experiences.
2. Students participate in DPET student club activities.
3. Students uphold the standards outlined in the DPET "Guide to Student Success".
DIGITAL IMAGING CERTIFICATE

Department: Arts and Communication

The mission of the Digital Imaging Certificate program is to prepare students for employment or upgrade existing job skills in the graphic communications industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of photography, lighting, and image manipulation.

GOAL 1
Graduates of the program will demonstrate knowledge of digital image capture.

1. Demonstrate an understanding of composition in digital photography.
2. Demonstrate effects of adjusting common features of digital cameras including exposure controls, resolution settings, and focal length controls.

GOAL 2
Graduates of the program will have basic skills with image manipulation.

1. Demonstrate the proper use selection tools, layers and channels.
2. Demonstrate the proper Adobe Photoshop compositing techniques including layer masks, clipping groups, blending modes, and clipping paths.

GOAL 3
Graduates will demonstrate professional behavior.

1. Students will use professional language during class presentations.
2. Students will work independently.

DIGITAL PUBLISHING CERTIFICATE

Department: Arts and Communication

The mission of the Digital Publishing Certificate program is to prepare students for employment in the graphic communications industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills for page layout, web page development, packaging, screen-printing, and digital publishing workflows.

GOAL 1
Graduates of the program will demonstrate knowledge of digital image capture.

1. Demonstrate an understanding of composition in digital photography.
2. Demonstrate effects of adjusting common features of digital cameras including exposure controls, resolution settings, and focal length controls.

GOAL 2
Graduates of the program will produce digital format publication for distribution as ebook and web delivery.

1. Demonstrate proper CSS coding for formatting web site content.
2. List the types of interactivity possible using PDF file format.

GOAL 3
Graduates will demonstrate professional behavior.

1. Students will use professional language during class presentations.
2. Students will be able to work independently with safe behavior.
EARLY CHILDHOOD EDUCATION
AAS DEGREE
Department: Social Sciences and Public Services

The mission of the Early Childhood Education Associate in Applied Science Degree program is to prepare students for employment in the early childhood education field by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of early childhood.

GOAL 1
Graduates of the program will demonstrate knowledge to perform as entry-level early childhood educators.

1. Students will demonstrate knowledge of the developmental domains of Child Development.
3. Students will exhibit knowledge of diverse populations.

GOAL 2
Graduates of the program will demonstrate teaching and learning skills appropriate for entry-level early childhood educators.

1. Students will demonstrate mastery of developmentally appropriate practices (DAP).
2. Students will demonstrate observation and assessment skills.
3. Students will demonstrate curriculum and lesson planning skills.

GOAL 3
Students will demonstrate ethical and professional behaviors during observations and field experiences.

1. Students will demonstrate professional interactions with all parties in the field experience settings.
2. Students will model adherence to the NAEYC (National Association for the Education of Young Children) Code of Ethics.

EARLY CHILDHOOD EDUCATION - BASIC CERTIFICATE
Department: Social Sciences and Public Services

The mission of the Early Childhood Education Basic Certificate program is to prepare students for employment in the early childhood education field by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of early childhood education and preparing them for the Gateways ECE Level 2 Credential, which can lead to Level 3 and Level 4 Credentials.

GOAL 1
Graduates of the program will demonstrate knowledge to perform as entry-level early childhood educators meeting the requirements of the Gateways ECE Level 2 Credential.

1. Students will demonstrate knowledge of the developmental domains of Child Development.
3. Students will exhibit knowledge of diverse populations.

GOAL 2
Graduates of the program will demonstrate teaching skills appropriate for entry-level early childhood educators meeting the requirements of the Gateways ECE Level 2 Credential.

1. Students will demonstrate proficiency of developmentally appropriate practices (DAP).
2. Students will demonstrate observation and assessment skills.
3. Students will demonstrate curriculum and lesson planning skills.

GOAL 3
Students will demonstrate ethical and professional behaviors during observations and field experiences.

1. Students will demonstrate professional interactions with all parties in the field experience settings.
2. Students will model adherence to the NAEYC (National Association for the Education of Young Children) Code of Ethics.
EARLY CHILDHOOD EDUCATION - ADVANCED CERTIFICATE

Department: Social Sciences and Public Services

The mission of the Early Childhood Education Advanced Certificate program is to prepare students for employment in the early childhood education field by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of early childhood education and preparing them for the Gateways ECE Level 3 Credential, which can lead to the Level 4 Credential.

GOAL 1
Graduates of the program will demonstrate knowledge to perform as entry-level early childhood educators meeting the requirements of the Gateways ECE Level 3 Credential.

1. Students will demonstrate general and math-specific knowledge of the developmental domains of Child Development.
3. Students will exhibit knowledge of diverse populations.

GOAL 2
Graduates of the program will demonstrate teaching skills appropriate for entry-level early childhood educators meeting the requirements of the Gateways ECE Level 3 Credential.

1. Students will demonstrate proficiency of developmentally appropriate practices (DAP) in all areas and mastery in math practices.
2. Students will demonstrate observation and assessment skills.
3. Students will demonstrate general and math-specific curriculum and lesson planning skills.

GOAL 3
Students will demonstrate ethical and professional behaviors during observations and field experiences.

1. Students will demonstrate professional interactions with all parties in the field experience settings.
2. Students will model adherence to the NAEYC (National Association for the Education of Young Children) Code of Ethics.

ELECTRONICS SERVICING CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Electronics Servicing Certificate program is to prepare students for technical positions in the expanding field of Electronics Servicing and/or for the pursuit of advanced degrees in Electronics Technology by educating them in the fundamental concepts, knowledge, and skills required of an Electronics Servicing technician.

GOAL 1.
Graduates of the Electronics Servicing Certificate program will demonstrate an understanding of technical knowledge required of an entry-level Electronics Servicing Technician.

1. Explain how Ohm’s Law relates to components in series circuits.
2. Identify components in electronics circuits.

GOAL 2.
Graduates of the program will demonstrate skills proficiency in the areas of D.C. & A.C. circuits, solid state electronics, troubleshooting, digital electronics, and programmable controls.

1. Demonstrate the proper use of test equipment.
2. Demonstrate correct circuit wiring methods.

GOAL 3.
Graduates of the program will have a general understanding and appreciation for safety within manufacturing setting.

1. Explain the necessity for safe work practices in performance of job-specific tasks.
2. Explain the attributes for working effectively in group settings.
ELECTRONICS TECHNOLOGY AAS DEGREE
Department: Agricultural and Industrial Technologies
The mission of the Electronics Technology Associate in Applied Science degree program is to prepare the graduate for employment as an Electronics Technician by educating them in the knowledge, skills, and behaviors an Electronics Technician should possess.

GOAL 1
Graduates of the Electronics Technology program will exhibit an understanding of technical knowledge required of an Electronics Technology Maintenance technician.
1. Explain the operation of components in a circuit.
2. Complete circuit calculations including voltage, current, resistance and power.

GOAL 2
Graduates of the program will demonstrate the proficiencies required of an entry-level Electronics Technology Maintenance technician.
1. Construct electronics circuits from a schematic.
2. Demonstrate the ability to properly use test equipment in performance of duties for an Electronics Technician.

GOAL 3
Graduates of the Electronics Technology program will model the attitudes and behaviors necessary to perform as an Electronics Technology Maintenance technician.
1. Demonstrate safe work practices in performance of job-specific tasks.
2. Demonstrate the ability to work effectively in group projects.

EMERGENCY MEDICAL TECHNICIAN CERTIFICATE
Department: Health Careers
The mission of the Emergency Medical Technician certificate program is to prepare graduates for licensure/certification and employment as an EMT by providing theoretical knowledge, practicing technical skills, simulation, and field practicums, and enhancing professional behaviors.

GOAL 1
Students will demonstrate the knowledge necessary to gain employment.
1. Students will exhibit an understanding of the fundamental concepts of emergency medical care.
2. Students will successfully complete a final cumulative knowledge-based examination.

GOAL 2
Students will demonstrate communication skills.
1. Students will demonstrate written communication skills.
2. Students will demonstrate oral communication skills.

GOAL 3
Students will acquire and develop the psychomotor skills required of an entry-level EMT.
1. Students will successfully complete all aspects of the psychomotor cumulative evaluation prior to challenging the certification/licensure examination.
2. Students will develop and demonstrate proficiency in performing procedures for trauma, medical, non-routine, and age-specific patients.
FINANCE AAS DEGREE
Department: Business, Hospitality, and Information Systems

The mission of the Associate in Applied Science Finance program is to prepare students for employment in financial institutions, government, and other positions in the financial services industry, by educating them in the knowledge and skills of personal or private finance, or to allow those already in the industry to upgrade their skills for possible promotion or change in job responsibilities. The program is not designed for college transfer, although some individual courses and/or the program may transfer with approval from four-year institutions.

GOAL 1
Graduates will demonstrate competency in basic accounting.

GOAL 2
Graduates will demonstrate competency in financial information and data.

GOAL 3
Graduates will demonstrate understanding of the financial services industry.

GOAL 4
Graduates will demonstrate effective communication with customers.

GOAL 5
Graduates will demonstrate functionality in investment services.

GENERAL MOTOR AUTOMOTIVE SERVICE EDUCATIONAL PROGRAM (GM ASEP) AAS DEGREE
Department: Agricultural and Industrial Technologies

The mission of the General Motors Automotive Service Education Program (GM ASEP) Associate in Applied Science degree program is to prepare students for employment in the automotive repair industry by educating them in the fundamental concepts, knowledge, hands-on techniques, and forward thinking skills to serve as the next generation of automotive technicians.

GOAL 1
Graduates of the program will meet NATEF requirements for SAE areas A1-A8.

1. Students will demonstrate in the automotive lab the skills required to work in NATEF areas A1 Electrical Systems.
2. Students will demonstrate in the automotive lab the skills required to work in NATEF areas A5 Brakes Systems.
3. Students will demonstrate in the automotive lab the skills required to work in NATEF areas A7 Automotive Heating and Air Conditioning.

GOAL 2
Graduates of the ASEP program will demonstrate knowledge of General Motors’ product lines as well as the operations of GM Dealerships.

1. Students will demonstrate an understanding of the similarities of the General Motors platforms.
2. Students will understand the operations of the Sales, Parts and Service within the dealership.

GOAL 3
Graduates will appreciate processes for safety, environmental protection, efficiency, accurate reporting, and other processes identified by their employer.

1. Students will demonstrate an understanding of safety requirements during labs and internships.
2. Students will appropriately handle hazardous waste materials.
3. Students will appropriately write a repair order.
GRAPHIC COMMUNICATIONS AAS
Department: Arts and Communication

The mission of the Graphic Communications Associate in Applied Science degree program is to prepare students for employment in the graphic communications industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills for page layout, web page development, packaging, screen-printing, and digital publishing workflows.

GOAL 1
Graduates of the program will demonstrate knowledge of digital image capture.
1. Demonstrate an understanding of composition in digital photography.
2. Demonstrate effects of adjusting common features of digital cameras including exposure controls, resolution settings, and focal length controls.

GOAL 2
Graduates of the program will produce digital format publication for distribution as ebook and web delivery.
1. Demonstrate proper CSS coding for formatting web site content.
2. List the types of interactivity possible using PDF file format.

GOAL 3
Graduates will demonstrate professional behavior.
1. Students will use professional language during class presentations.
2. Students will be able to work independently with safe behavior.

GREEN BUILDING ENVIRONMENT AAS DEGREE
Department: Agricultural & Industrial Technologies

The mission of the Green Building Environment Associate in Applied Science degree program is to provide the student with the knowledge to work in the energy areas, the built environment, building management, and other jobs yet to be defined. The student will learn about the evolving and developing sustainability and green areas and how to become better stewards of the environment. After completing this program, graduates will be able to work as entry-level weatherization technicians, energy auditors, and indoor air quality technicians in residential and commercial buildings.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge to perform as an entry-level residential energy auditor.
1. Students will demonstrate an understanding of the specific knowledge and proficiency with test instruments and the tools required of a residential energy auditor.
2. Students will demonstrate technical knowledge by identifying and describing the components of the homes envelope and mechanical equipment.

GOAL 2
Graduates will demonstrate skills appropriate of an entry-level residential energy auditor.
1. Students will demonstrate and describe the skills to test residential and light commercial buildings by using the appropriate test instruments.
2. Students will describe and demonstrate the three types of energy audits for residential and light commercial buildings.

GOAL 3
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry residential energy auditor.
1. Students will demonstrate and describe proper techniques of documentation of test results in accordance to the 2012 Illinois Energy Conservation Code.
2. Students will demonstrate and describe the minimum ventilation rates of residential and light commercial buildings in accordance to ACCA and the 2012 Illinois Energy Conservation Code.
HORTICULTURE - LANDSCAPE MANAGEMENT
AAS DEGREE

Department: Agricultural and Industrial Technologies

The mission of the Horticulture-Landscape Management Associate in Applied Science degree program is to prepare students for employment in the landscape management industry (landscape contracting, nursery management, garden center management, etc.) by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the landscape industry.

GOAL 1

Graduates of the program will demonstrate application of the technical knowledge required for a landscape management position.

1. Demonstrate a fundamental understanding of basic horticultural principles and practices.
2. Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management.
3. Demonstrate a fundamental understanding of turfgrass identification, selection, use and maintenance of turfgrasses best suited for use and weed identification.
4. Demonstrate a fundamental understanding of plant identification, selection, use and maintenance of plant materials best suited for use.
5. Demonstrate a fundamental understanding of basic landscape design principles and practices.
6. Demonstrate a fundamental understanding of sustainable landscape construction and maintenance principles and practice.
7. Demonstrate a fundamental understanding of the business and marketing practices unique to the horticulture industry.

GOAL 2

Graduates of the program will demonstrate proficiency in the skills necessary to obtain a landscape management position.

1. Identify common landscape plant and turfgrass species and know their growth habits and maintenance requirements including pest management.
2. Apply critical and creative thinking skills to design and install landscapes and understand small business management.
3. Propose on-going integrated pest management practices and solutions for green spaces.
4. Demonstrate a proficiency in operation of industry equipment.

GOAL 3

Graduates of the program will demonstrate professional qualities and professional ethics.

1. Gain practical experience and practice professionalism in the industry through onsite training.
2. Demonstrate proficiency at safely operating landscape construction and maintenance power equipment to complete various landscape operations.

HORTICULTURE - LANDSCAPING CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Horticulture-Landscaping certificate program is to prepare students for employment or the pursuit of a Horticulture Landscape Management Associate in Applied Science degree in the landscaping industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the landscape industry.

GOAL 1

Certificate earners of the program will demonstrate an understanding of the technical knowledge required of an entry-level employee in the landscape industry.

1. Demonstrate a fundamental understanding of basic horticultural principles and practices.
2. Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management.
3. Demonstrate a fundamental understanding of turfgrass identification, selection, use and maintenance of turfgrasses best suited for use and weed identification.
4. Demonstrate a fundamental understanding of plant identification, selection, use and maintenance of plant materials best suited for use.
5. Demonstrate a fundamental understanding of sustainable landscape construction and maintenance principles and practice.

GOAL 2

Certificate earners of the program will demonstrate specific skills related to soil fertility, turfgrass management, landscape plant identification and landscape maintenance.

1. Identify common landscape plant and turfgrass species and know their growth habits and maintenance requirements including pest management.
2. Apply critical and creative thinking skills to design and install landscapes
3. Propose on-going integrated pest management practices and solutions for green spaces.
4. Demonstrate a proficiency at safely operating landscape equipment and maintenance of power equipment.
HORTICULTURE TURFGRASS MANAGEMENT
AAS DEGREE
Department: Agricultural and Industrial Technologies
The mission of the Horticulture-Turfgrass Management Associate in Applied Science degree program is to prepare students for employment in the turfgrass management industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the turfgrass industry.

GOAL 1
Graduates of the program will demonstrate an understanding of the technical knowledge and proficiency required of a turfgrass management position.

1. Demonstrate a fundamental understanding of basic horticultural principles and practices.
2. Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management.
3. Demonstrate a fundamental understanding of turfgrass identification, selection, use and maintenance of turfgrasses best suited for use and weed identification.
4. Demonstrate a fundamental understanding of plant identification, selection, use and maintenance of plant materials best suited for use.
5. Demonstrate a fundamental understanding of basic landscape design principles and practices.
6. Demonstrate a fundamental understanding of sustainable landscape construction and maintenance principles and practice.
7. Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.
8. Demonstrate a fundamental understanding of the business and marketing practices unique to the turfgrass industry.

GOAL 2
Graduates of the program will demonstrate specific turfgrass management skills required to obtain a turfgrass management position.

1. Propose on-going integrated pest management practices and solutions for green spaces.
2. Demonstrate a proficiency in maintenance of power equipment.
3. Identify common landscape plant and turfgrass species and know their growth habits and maintenance requirements including pest management.
4. Apply critical and creative thinking skills to design and install landscapes (including turfgrass) and understand small business management.

GOAL 3
Graduates of the program will demonstrate professional qualities and professional ethics.

1. Demonstrate proficiency at safely operating landscape construction and maintenance power equipment to complete various landscape operations
2. Gain practical experience and practice professionalism in the industry through onsite training.

HORTICULTURE - TURFGRASS OPERATIONS CERTIFICATE
Department: Agricultural and Industrial Technologies
The mission of the Horticulture -Turfgrass Operations certificate program is to prepare students for employment or the pursuit of a Horticulture Turfgrass Management Associate in Applied Science degree in the turfgrass industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the turfgrass industry.

GOAL 1
Certificate earners of the program will demonstrate an understanding of the technical knowledge and proficiency required of an entry-level employee in the turfgrass operation industry.

1. Demonstrate a fundamental understanding of basic horticultural principles and practices.
2. Demonstrate a fundamental understanding of soils, soil development, soil building and preparation, and sustainable soil management along with turf identification and management.
3. Demonstrate a fundamental understanding of turfgrass identification, selection, use and maintenance of plant material best suited for conventional and sustainable landscapes.
4. Demonstrate a fundamental understanding of hydraulics and irrigation design, installation, and water management principles and practices.

GOAL 2
Certificate earners of the program will demonstrate turfgrass management skills required to obtain an entry-level position within the turfgrass industry.

1. Demonstrate proficiency in operating and servicing equipment used in the turfgrass industry.
2. Identify common landscape plant and turfgrass species and know their growth habits and maintenance requirements including pest management.
HUMAN SERVICE - GENERALIST
AAS DEGREE

Department: Social Sciences and Public Services

The mission of the Human Service - Generalist Program is to provide students with the necessary skills to obtain an entry level position in the human service field by educating them in the cross-disciplinary areas that provide support and service to individuals, families and communities in need.

GOAL 1
Graduates will demonstrate a knowledge of the cross-disciplinary areas of the human services field.

1. Students will demonstrate understanding of how to effectively deal with the behavior of individuals and groups.
2. Students will be able to determine and define at-risk populations.
3. Students will understand historical events in social welfare.
4. Students will demonstrate knowledge of contemporary social problems in the United States.
5. Students will demonstrate knowledge of interpersonal communication, group process and family dynamics.
6. Students will be able to identify legal issues and laws affecting the human services field.

GOAL 2
Graduates will demonstrate the skills necessary to be a productive member of the human service organization.

1. Students will practice and demonstrate appropriate prevention and intervention strategies and approaches.
2. Students will use client assessment data to complete a comprehensive treatment plan.
3. Students will demonstrate learned skills through applying them in a community agency setting.

GOAL 3
Graduates will model behaviors appropriate to an entry-level human service professional.

1. Students will be able to apply a professional code of ethics and demonstrate professional behaviors in the human services field.
2. Students will be able to demonstrate cross-cultural sensitivity and a multicultural perspective.

HVAC RESIDENTIAL INSTALLER CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Heating Ventilation and Air Conditioning (HVAC) Residential Installer certificate program is to provide students with the knowledge and skills to understand and follow the manufacturer's specifications when installing basic residential heating and air conditioning equipment as well as the skills to complete the installation. Students will learn the theory of residential heating and cooling through extensive laboratory experience as well as lectures. After completing this program, the graduates will be able to work as entry-level residential furnace and air conditioner installers.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge to perform as an entry-level residential HVAC installer.

1. Students will identify and describe the function of system components in residential natural gas furnace, propane gas furnace, and air-conditioning forced air systems.
2. Students will demonstrate technical knowledge of sizing piping, wiring, fuses, and breakers in residential heating and cooling systems.

GOAL 2
Graduates will demonstrate the skills appropriate for an entry-level residential HVAC installer.

1. Students will demonstrate and describe installation techniques of residential natural gas heating and cooling equipment according to manufacturer's instructions.
2. Students will demonstrate and describe the procedures of measuring, cutting, and joining of copper tubing, black iron pipe, PVC pipe, and CVPC pipe.
3. Students will demonstrate and describe the procedures of measuring, cutting, and joining of sheet metal.

GOAL 3
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry-level residential HVAC installer.

1. Students will demonstrate and describe proper refrigerant handling techniques in accordance to Section 608 of the Federal Clean Air Act.
2. Students will demonstrate and describe ladder and fall prevention safety procedures in accordance to OSHA 29 CFR 1910.
3. Students will demonstrate and describe lockout/tagout safety procedures for control of hazardous energy sources in accordance to OSHA 29 CFR 1910.
4. Students will demonstrate and describe safety procedures for handling pressurized cylinders in accordance to OSHA 29 CFR 1910.
5. Students will demonstrate and describe how to maintain strict compliance with all federal, state, county, and municipal government laws, regulations, and ordinances pertaining to the HVAC industry and business operation.
HVAC TECHNICIAN CERTIFICATE

Department: Agricultural and Industrial Technologies

The mission of the Heating Ventilation and Air Conditioning (HVAC) Technician certificate program is to provide students with the knowledge and skills pertaining to the maintenance and repairing of air conditioning systems as well as the following heating systems: natural gas, propane, electric, air source heat pumps, geothermal, and hydronic heating systems. After completing the program coursework consisting of both lecture and extensive laboratory experiences, the graduates will be able to work as entry-level HVAC technicians or general facilities repair persons.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge to perform as an entry-level HVAC technician.

1. Students will demonstrate technical knowledge of electric heat theory, air-source heat pump theory, ground-source heat pump theory, hydronic heating theory, and combustion theory of heating fuels.
2. Students will demonstrate technical knowledge by identifying and describing the function of system components used in electric heating, hydronic heating, air-source heat pump (heating/cooling), and ground-source heat pump (heating/cooling) systems.
3. Students will identify and describe the function of test instruments and tools required to diagnose residential heating and cooling systems.

GOAL 2
Graduates will demonstrate the skills appropriate for an entry-level HVAC technician.

1. Students will demonstrate and describe troubleshooting techniques of residential heating and cooling equipment according to manufacturers instructions.
2. Students will demonstrate and describe the procedures in replacing faulty components in residential heating and cooling equipment.
3. Students will demonstrate and describe the skills to troubleshoot residential and light commercial HVAC components by using the appropriate test instruments.

GOAL 3
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry-level HVAC technician.

1. Students will demonstrate and describe proper refrigerant handling techniques in accordance to Section 608 of the Federal Clean Air Act.
2. Students will demonstrate and describe ladder and fall prevention safety procedures in accordance to OSHA 29 CFR 1910.
3. Students will demonstrate and describe lockout/tagout safety procedures for control of hazardous energy sources in accordance to OSHA 29 CFR 1910.
4. Students will demonstrate and describe safety procedures for handling pressurized cylinders in accordance to OSHA 29 CFR 1910.
5. Students will demonstrate and describe how to maintain strict compliance with all federal, state, county, and municipal government laws, regulations, and ordinances pertaining to the HVAC industry and business operation.

HVAC/R TECHNOLOGY AAS DEGREE

Department: Agricultural and Industrial Technologies

The mission of the Heating, Air Conditioning, and Refrigeration Technology Associate in Applied Science degree program is to provide students with the knowledge and skills pertaining to the maintenance, repairing, and designing of residential heating, cooling, and commercial refrigeration systems. After completing this program consisting of extensive laboratory as well as lecture-based coursework, graduates will be prepared to work as entry-level technicians in the following job classifications: heating, air conditioning, and refrigeration mechanics, sheet metal installers, residential heating and air conditioning installers, startup technicians, residential heating and air-conditioning designer, and general facilities repair persons.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge to perform as an entry-level HVAC/R startup technician.

1. Students will demonstrate technical knowledge of test, adjust, balance (TAB) theory.
2. Students will demonstrate an understanding of the specific knowledge and proficiency with test instruments and the tools required of a HVAC/R startup technician.
3. Students will demonstrate technical knowledge by identifying and describing auxiliary components and equipment.

GOAL 2
Graduates will demonstrate skills appropriate of an entry-level HVAC/R startup technician.

1. Students will describe and demonstrate the skills of TAB techniques of residential heating and cooling systems according to manufactures instructions.
2. Students will demonstrate and describe the skills to test residential and light commercial HVAC/R systems by using the appropriate TAB test instruments.
3. Students will describe and demonstrate the skills in the layout and building of sheet metal take-offs and rectangle-to-round transitions.

GOAL 3
Graduates will demonstrate an understanding of the technical knowledge to perform as an entry-level residential heating and air-conditioning designer.

1. Students will demonstrate technical knowledge and proficiency in determining how to maintain human comfort for residential and light commercial buildings according to ACCA Manual Jae and ACCA Manual S.
2. Students will demonstrate technical knowledge and proficiency in determining ventilation requirements of residential and light commercial buildings to maintain a safe and healthy indoor environment according to ACCA Manual Jae and Manual S.
3. Students will demonstrate technical knowledge and proficiency in determining the correct amount of conditioned air needed per room of residential and light commercial buildings according to ACCA Manual Jae, S, D and ACCA Manual T.

GOAL 4
Graduates will demonstrate skills appropriate of an entry-level residential heating and air-conditioning designer.

1. Students will demonstrate and describe the procedures in determining the correct size of a gas furnace, heat pump and air-conditioner from using manufacture's specification sheets in accordance to ACCA Manual Jae and Manual S.
2. Students will demonstrate and describe the procedures in determining ventilation requirements of residential and light commercial buildings according to ACCA Manual Jae.
3. Students will demonstrate and describe the procedures in determining the correct size of the duct distribution system of residential and light commercial buildings according to ACCA Manual D and ACCA Manual T.

GOAL 5
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry-level start up technician.

1. Students will demonstrate and describe proper techniques of TAB documentation in accordance to ACCA Manual B.
2. Students will demonstrate and describe the creation of a preventive maintenance schedule for residential and light commercial heating and cooling systems.
4. Students will demonstrate and describe how to maintain strict compliance with all federal, state, county, and municipal government laws, regulations, and ordinances pertaining to the HVAC industry and business operation.

GOAL 6
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry-level residential heating and air-conditioning designer.

1. Students will demonstrate and describe the minimum ventilation rates of residential and light commercial buildings in accordance to ACCA and the 2012 Illinois Energy Conservation Code.
2. Students will demonstrate and describe the minimum insulation values and envelope air leakage rates of residential and light commercial buildings in accordance to ACCA and the 2012 Illinois Energy Conservation Code.
3. Students will demonstrate and describe how to maintain strict compliance with all federal, state, county, and municipal government laws, regulations, and ordinances pertaining to the HVAC industry and business operation.

IMEDIA CERTIFICATE
Department: Arts and Communication
The mission of the iMedia certificate program is to prepare students for employment or upgrade existing job skills needed in the modern digital publishing format industry by educating them in the fundamental concepts, knowledge, hands-on techniques, and skills needed to create and manage ebooks, variable data processing, interactive PDFs (Portable Document Formats), CSS (Cascading Style Sheets), controlled web sites, and designing augmented reality experiences.

GOAL 1
Graduates of the program will demonstrate basic knowledge of publication software.

1. Properly identify tools in the publishing software.
2. Demonstrate knowledge of publication content formatting using style sheets.

GOAL 2
Graduates of the program will produce digital format publication for distribution as ebook and web delivery.

1. Demonstrate proper CSS coding for formatting web site content.
2. List the types of interactivity possible using PDF file format.

GOAL 3
Graduates will demonstrate professional behavior.

1. Students will use professional language during class presentations.
2. Students will work independently.
INDUSTRIAL ELECTRICAL TECHNOLOGY
AAS DEGREE
Department: Agricultural and Industrial Technologies

The mission of the Industrial Electrical Technology Associate in Applied Science degree program is to use lecture and hands-on laboratory experiences to prepare the graduate for employment as an Industrial Electrical Maintenance Technician by educating them in the knowledge, skills, and behaviors associated with the field.

GOAL 1
Graduates of the Industrial Electrical program will exhibit an understanding of technical knowledge required of an Industrial Electrical Maintenance technician.

1. Explain safe work practices in an industrial work environment.
2. Identify key aspects of Motor Control operation.

GOAL 2
Graduates of the program will demonstrate the proficiencies required of an Industrial Electrical Maintenance technician.

1. Demonstrate the ability to create ladder logic diagrams given system specifications.
2. Demonstrate the ability to create PLC programs and properly interface them to input and output (I/O) devices.

GOAL 3
Graduates of the Electronics Technology program will model the attitudes and behaviors necessary for an Industrial Electrical Maintenance technician.

1. Demonstrate safe work practices in performance of job-specific tasks.
2. Demonstrate the ability to work effectively in group projects.

INTERPRETER PREPARATION
Department: English Humanities and Language Studies

The mission of the Interpreter Preparation Program is to produce entry-level professional interpreters by educating students about D/deafness, the profession of interpreting, and expressive and receptive interpreting skills and techniques.

GOAL 1
Graduates will demonstrate knowledge to perform as entry-level interpreters.

1. Students will demonstrate knowledge of ASL grammatical structures
2. Students demonstrate knowledge of the interpreting profession
3. Students will exhibit knowledge of D/deaf culture norms
4. Students will demonstrate knowledge of the Code of Professional Conduct of the Registry of Interpreters for the Deaf (RID) and the EIPA Guidelines for Professional Conduct

GOAL 2
Graduates will demonstrate skills appropriate for an entry-level interpreter.

1. Students will demonstrate mastery of ASL vocabulary
2. Students will demonstrate expressive and receptive interpreting skills
3. Students will demonstrate expressive and receptive finger spelling skills

GOAL 3
Graduates will demonstrate ethical and professional behaviors appropriate to an interpreter.

1. Students will demonstrate professional interactions with all parties in the internship setting
2. Students will model adherence to the Code of Professional Conduct of the Registry of Interpreters for the Deaf (RID)
3. Students will model adherence to the EIPA Guidelines for Professional Conduct for Educational Interpreters
4. Students will display culturally appropriate behaviors during interactions within D/deaf individuals in internship settings
LAW ENFORCEMENT AAS DEGREE
Department: Social Sciences and Public Services

The mission of the Associate in Applied Science Law Enforcement degree is to prepare students for employment in the law enforcement field by educating them in general education as well as specialized courses in criminal justice.

GOAL 1
Graduates will demonstrate ethical and service-oriented behaviors in the Criminal Justice profession in which they choose to work.
1. Students will demonstrate professional interaction with all parties in the industry, such as with police, judges, and defendants
2. Students will demonstrate the ethics of professional responsibility within the criminal justice profession

GOAL 2
Graduates will demonstrate skills of the Criminal Justice System in which they plan to work, along with the issues and problems that arise within that system.
1. Students will demonstrate investigative skills necessary to work within any field of the Criminal Justice system.
2. Students will demonstrate communication skills necessary to work within any field of the Criminal Justice system.
3. Students will demonstrate the ability to supervise personnel who work within the Criminal Justice system.
4. Students will use technology to access information about the court system; the laws, cases, and court rules.

GOAL 3
Graduates will demonstrate knowledge in the areas of criminal justice system.
1. Students will demonstrate knowledge of the cultural differences within the criminal justice systems worldwide
2. Students will demonstrate knowledge of practices in the field of juvenile delinquency.
3. Students will demonstrate knowledge of practices in the field of corrections.
4. Students will demonstrate knowledge of practices in the field of policing.

LAW ENFORCEMENT CERTIFICATE
Department: Social Sciences and Public Services

The mission of the Law Enforcement Certificate is to prepare students for employment in the law enforcement field by educating them in specialized courses in criminal justice.

GOAL 1
Graduates will demonstrate ethical and service-oriented behaviors in the Criminal Justice profession in which they choose to work.
1. Students will demonstrate professional interaction with all parties in the industry, such as with police, judges, and defendants
2. Students will demonstrate the ethics of professional responsibility within the criminal justice profession

GOAL 2
Graduates will demonstrate skills of the Criminal Justice System in which they plan to work, along with the issues and problems that arise within that system.
1. Students will demonstrate investigative skills necessary to work within any field of the Criminal Justice system.
2. Students will demonstrate communication skills necessary to work within any field of the Criminal Justice system.
3. Students will demonstrate the ability to supervise personnel who work within the Criminal Justice system.
4. Students will use technology to access information about the court system; the laws, cases, and court rules.

GOAL 3
Graduates will demonstrate knowledge in the areas of the criminal justice system.
1. Students will demonstrate knowledge of the cultural differences within the criminal justice systems worldwide
2. Students will demonstrate knowledge of practices in the field of juvenile delinquency.
3. Students will demonstrate knowledge of practices in the field of corrections.
4. Students will demonstrate knowledge of practices in the field of policing.
LIBRARY TECHNICAL ASSISTANT
AAS PROGRAM

Department: Library

The mission of the Library Technical Assistant Program is to prepare students for employment in various types of libraries and to provide a foundational education in library services and information studies. LTA graduates possess basic skills in: collection development, cataloging, media technology, technology troubleshooting, reference, and patron services to serve in libraries and information centers.

GOAL 1
Graduates will demonstrate foundational knowledge appropriate to perform as an entry-level Library Technical Assistant.
1. Students will demonstrate knowledge of library service and customer care principles.
2. Students will demonstrate knowledge of acquisitions and collection development.
3. Students will exhibit knowledge of information literacy.
4. Students will demonstrate knowledge of the American Library Association’s Professional Code of Ethics.

GOAL 2
Graduates will demonstrate skills appropriate for an entry Library Technical Assistant.
1. Students will model proficient reference service skills and be able to troubleshoot problems related to circulation and resource sharing.
2. Students will be able to set-up, operate and perform basic troubleshooting on audio-visual and computer hardware and software.
3. Students will demonstrate basic cataloging, classification and collection development skills.
4. Students will be able to serve people in accordance with customer care principles.

GOAL 3
Graduates will demonstrate ethical and professional behaviors.
1. Students will demonstrate professional interactions in the workplace.
2. Students will use information ethically.
3. Students will adhere to the ALA professional Code of ethics.

LIBRARY TECHNICAL ASSISTANT
CERTIFICATE

Department: Library

The mission of the Library Technical Assistant Program is to prepare students for employment in various types of libraries and to provide a foundational education in library services and information studies. LTA graduates possess basic skills in: collection development, cataloging, media technology, technology troubleshooting, reference, and patron services to serve in libraries and information centers. This certificate may be of interest to anyone currently working as a paraprofessional in a library or anyone seeking professional development opportunities.

GOAL 1
Graduates will demonstrate foundational knowledge appropriate to perform as an entry-level Library Technical Assistant.
1. Students will demonstrate knowledge of library service and customer care principles.
2. Students will demonstrate knowledge of acquisitions and collection development.
3. Students will exhibit knowledge of information literacy.
4. Students will demonstrate knowledge of the American Library Association’s Professional Code of Ethics.

GOAL 2
Graduates will demonstrate skills appropriate for an entry Library Technical Assistant.
1. Students will model proficient reference service skills and be able to troubleshoot problems related to circulation and resource sharing.
2. Students will be able to set-up, operate, and perform basic troubleshooting on audio-visual and computer hardware and software.
3. Students will demonstrate basic cataloging, classification, and collection development skills.
4. Students will be able to serve people in accordance with customer care principles.

GOAL 3
Graduates will demonstrate ethical and professional behaviors.
1. Students will demonstrate professional interactions in the workplace.
2. Students will use information ethically.
3. Students will demonstrate adherence to the ALA professional Code of ethics.
LICENSED PRACTICAL NURSING CERTIFICATE
Department: Health Careers

The mission of the Licensed Practical Nurse certificate is to effectively provide educational resources within theory, laboratory, and clinical experiences to prepare graduates for a successful professional nursing career as a Licensed Practical Nurse.

GOAL 1
Graduates of the nursing program will demonstrate competency in skill performance as a registered nurse.
1. Students will demonstrate nursing skills based on application of scientific and theoretical knowledge in the health skills lab setting prior to performing skills in clinical setting.
2. Students will demonstrate nursing skill competency while caring for patients in the clinical setting.

GOAL 2
Graduates of the program will communicate effectively to develop appropriate interpersonal relationships within the healthcare environment.
1. Students will verbally communicate effectively with patient, family and healthcare team.
2. Students will communicate application of theoretical knowledge of patient care via verbal, electronic and written means.

GOAL 3
Graduates of the program will apply nursing knowledge and critical thinking to promote wellness and patient adaptation in health and/or illness.
1. Students will utilize critical thinking skills to analyze patient situations and respond appropriately within the clinical setting.
2. Students will utilize the nursing process to individualize holistic care within the clinical setting.
3. Students will apply principles of legal/ethical nursing practice within the clinical setting.
4. Students will teach concepts of wellness, health, and illness while acknowledging the diversity of patients, families, and/or significant others.

GOAL 4
Graduates of the program will adhere to the standards of nursing practice, as outlined in the Illinois Nurse Practice Act.
1. Students will provide care in a safe manner.
2. Students will adhere to confidentiality guidelines while providing patient care.
3. Students will apply principles of legal/ethical nursing practice within the clinical setting.

LICENSED PRACTICAL NURSE TO REGISTERED NURSE COMPLETION PROGRAM AAS DEGREE
Department: Health Careers

The mission of the Associate in Applied Science Licensed Practical Nurse to Registered Nurse completion program is to effectively provide educational resources within theory, laboratory, and clinical experiences to prepare graduates for a successful professional nursing career as a Registered Nurse.

GOAL 1
Graduates of the nursing program will demonstrate competency in skill performance as a registered nurse.
1. Students will demonstrate nursing skills based on application of scientific and theoretical knowledge in the health skills lab setting prior to performing skills in clinical setting.
2. Students will demonstrate nursing skill competency while caring for patients in the clinical setting.

GOAL 2
Graduates of the program will communicate effectively to develop appropriate interpersonal relationships within the healthcare environment.
1. Students will verbally communicate effectively with patient, family and healthcare team.
2. Students will communicate application of theoretical knowledge of patient care via verbal, electronic and written means.

GOAL 3
Graduates of the program will apply nursing knowledge and critical thinking to promote wellness and patient adaptation in health and/or illness.
1. Students will utilize critical thinking skills to analyze patient situations and respond appropriately within the clinical setting.
2. Students will utilize the nursing process to individualize holistic care within the clinical setting.
3. Students will apply principles of legal/ethical nursing practice within the clinical setting.
4. Students will teach concepts of wellness, health, and illness while acknowledging the diversity of patients, families, and/or significant others.

GOAL 4
Graduates of the program will adhere to the standards of nursing practice, as outlined in the Illinois Nurse Practice Act.
1. Students will provide care in a safe manner.
2. Students will adhere to confidentiality guidelines while providing patient care.
3. Students will apply principles of legal/ethical nursing practice within the clinical setting.
MACHINE TOOL TECHNOLOGY AAS DEGREE

Department: Agricultural & Industrial Technologies

The mission of the Machine Tool Technology Associate in Applied Science degree program is to prepare students with the skills in the operation of machine tools for entry-level positions as industry professionals including precision machinists, mold makers, die makers, and tool makers.

GOAL 1

Students display general behavior and attitudes expected of an entry-level production team member by a manufacturing, construction, agricultural or fabrication oriented business.

1. Demonstrate positive attitudes and acceptable behaviors for such things as reporting to work regularly and on time, working in a team, honesty, quality-minded, and accepting alternative points of view.

2. Follow all prescribed safety rules including the wearing of personal protection devices, properly using lifting tools to move equipment & supplies, following lockout/tagout procedures, and site specific requirements.

GOAL 2

Graduates of the program will have a general understanding and appreciation for the procedures within manufacturing such as safety, quality, logistics, and accurate reporting, and be prepared to positively contribute to the production team.

1. Use rulers, gauges, and precision measuring tools to properly identify sizes and locations of part features and sizes of welds.

2. Interpret industrial drawings.

GOAL 3

Graduate will demonstrate the aptitude, attitude, reasoning, and communication skills to lead production teams, design machine tool layouts on the shop floor, develop procedures to check part quality, and continue their education towards a bachelor of applied science degree.

1. Communicate in a formal manner both written and oral, that which expected of supervisors or mid-level managers.

2. Prepare reports detailing conclusions and recommendations for manufacturing process optimization and analysis of manufacturing problems.

GOAL 4

Graduates of the program will demonstrate the understanding of engineering drawings, materials science, manufacturing processes, quality assurance, and other areas that prepares graduates to pursue a bachelor's degree or enter into employment as a production professional.

1. Troubleshoot machining problems including tooling, finish, dimensional errors, and work holding.

2. Program machine tools using manual and computer assisted methods.

4. Safely operate CNC machine tools.

MACHINIST CERTIFICATE

Department: Agricultural & Industrial Technologies

The mission of the Machinist certificate program is to provide students with entry-level skills needed to gain employment as machine operators of traditional manual machines and computer assisted numerically-controlled machines. This program will also allow practicing machinists to upgrade their competencies.

GOAL 1

Graduates of the program will demonstrate the skills to properly access the correct program, identify and troubleshoot work holding devices, tooling, and piece parts, load piece parts and run the automated cycle, and inspect finished parts for accuracy at a level consistent with local employer expectations.

1. Use rulers, gauges, and precision measuring tools to properly identify sizes and locations of part features.

2. Analyze industrial prints including dimensions, tolerances, allowances, geometric tolerances, and notes.

GOAL 2

Graduates of the program will have a general understanding and appreciation for the procedures within manufacturing for safety, quality, logistics, and other things and be prepared to positively contribute to the production team.

1. Follow all prescribed safety rules including the wearing of personal protection devices, properly using lifting tools to move equipment & supplies, following lockout/tagout procedures, and site specific requirements.

2. Communicate in a formal and informal manner to a level that is expected of supervisors or mid-level managers.

GOAL 3

Graduate will be able to interpret mechanical blueprints, use precision measuring tools, communicate how the CNC processes produces the required features within specified tolerances, and verify that features are indeed within tolerance.

1. Troubleshoot machining problems including tooling, finish, dimensional errors, and work holding.

2. Setup and machine sub-assembly, assembly, and fixture parts within tolerance using common machine tool systems.

3. Program machine tools using manual and computer assisted methods.

4. Safely operate CNC machine tools.
MANAGEMENT AAS DEGREE
Department: Business, Hospitality, and Information Systems

The mission of the Management Associate in Applied Science degree program is to prepare students for employment in managerial positions through education in management, fundamental business concepts, and classes specific to particular industry option.

GOAL 1
Graduates will be able to demonstrate knowledge of excellent customer service and professionalism with stakeholders.
1. The student will be able to employ strategies used by management to enhance business relationships.
2. The student will be able to relate customer service principles to work scenarios.
3. The student will be able to respond appropriately to the emotions of others.

GOAL 2
Graduates will be able to demonstrate effective communication skills.
1. The student will be able to obtain information which impacts business decisions.
2. The student will be able to convey ideas and information which impact business decisions and report on organizational activities.

GOAL 3
Graduates will be able to demonstrate best business practices in management.
1. The student will be able to explain how the four functions of management, planning, organizing, directing, and controlling are used to achieve organizational goals.
2. The student will be able to lead employees in contributing to successful business operations.
3. Use structured problem-solving methods when developing proposals and solutions.

GOAL 4
Graduates will have knowledge of the legal and ethical implications in their decisions.
1. The student will be able to apply ethical reasoning to a variety of workplace situations in order to make ethical decisions.
2. The student will be able to identify personal and long-term workplace consequences of unethical or illegal behaviors.
3. The student will be able to explain how specific organizational policies and procedures influence a specific work situation.
4. The student will be able to describe management's responsibility to know and abide by laws and regulations that affect business operations and transactions.

GOAL 5
Graduates will be able to manage the use of financial resources to protect a business's fiscal well-being.
1. The student will be able to interpret a business's financial statements.
2. The student will be able to manage financial resources to maintain business solvency.

MANAGEMENT - SUPPLY CHAIN
MANAGEMENT AAS DEGREE
Department: Business, Hospitality, and Information Systems

The mission of the Supply Chain Management program is to prepare students for employment in Supply Chain Management through education in management, fundamental business concepts, and supply chain management.

GOAL 1
The graduate will have developed competencies in management, fundamental business concepts and supply chain management.
1. The student demonstrates knowledge of basic business concepts and functional areas.
2. The student understands the role of manufacturing in our economy and the basic types of manufacturing processes and supply chains.
3. The student is familiar with methods of inventory management and the necessity of good inventory management.

GOAL 2
The graduate is aware of ethical behavior as it pertains to employment.
1. The student will be aware of ethical issues in the supply chain management and chooses to respond ethically.
2. The student demonstrates the ability to support quality initiatives in the workplace.

GOAL 3
The graduate will have practical knowledge, techniques, and theory needed to work effectively, to solve current problems, and to develop new strategies and direction.
1. The student demonstrates knowledge of change management.
2. The student demonstrates knowledge of best practices in supply chain management.
3. The student will develop good oral and written communication skills.

GOAL 4
Graduates of the program will demonstrate the appropriate skills for an entry-level supervisor.
1. The student will be able to analyze workplace problems and formulate solutions.
2. The student will demonstrate an understanding of the four functions of management.
3. The student can interpret financial reports and statements relating to production and has developed skills in purchasing management.
4. Students demonstrate the development of management and people skills.
MANAGEMENT OF SUPPLY CHAIN CERTIFICATE

Department: Business, Hospitality, and Information Systems

The mission of the Management of Supply Chain Certificate program is to prepare students for employment in Supply Chain Management through education in management, fundamental business concepts, and supply chain management.

GOAL 1
The graduate will demonstrate specific knowledge and proficiency in the supply chain field.

1. The student understands the role of manufacturing in our economy and the basic types of manufacturing processes and supply chains.
2. The student is familiar with methods of inventory management and the necessity of good inventory management.
3. The student demonstrates management skills.

GOAL 2
Graduates will have developed the competencies to succeed in supply chain management employment.

1. The student can execute and evaluate work plans.
2. The student can execute and evaluate cost control and risk management.
3. Students demonstrate skills in project management.

GOAL 3
The graduate will be aware of ethical behavior as it pertains to employment.

1. The student will be aware of ethical issues in the supply chain management and chooses to respond ethically.
2. The student demonstrates the ability to support quality initiatives in the workplace.

MANUFACTURING ENGINEERING TECHNOLOGY AAS DEGREE

Department: Agricultural & Industrial Technologies

The mission of the Manufacturing Engineering Technology Associate in Applied Science degree program is to prepare students with the skills and knowledge for entry-level positions in manufacturing firms. Students will learn about manufacturing processes as well as manufacturing equipment, parts, and quality problems.

GOAL 1
Students display general behavior and attitudes expected of an entry-level production team member by a manufacturing, construction, agricultural or fabrication oriented business.

1. Demonstrate positive attitudes and acceptable behaviors for such things as reporting to work regularly and on time, working in a team, honesty, quality-minded, and accepting alternative points of view.
2. Follow all prescribed safety rules including the wearing of personal protection devices, properly using lifting tools to move equipment & supplies, following lockout/tagout procedures, and site specific requirements.

GOAL 2
Graduates of the program will have a general understanding and appreciation for the procedures within manufacturing such as safety, quality, logistics, and accurate reporting, and be prepared to positively contribute to the production team.

1. Use rulers, gauges, and precision measuring tools to properly identify sizes and locations of part features and sizes of welds.
2. Interpret industrial drawings.

GOAL 3
Graduate will demonstrate the aptitude, attitude, reasoning, and communication skills to lead production teams, design machine tool layouts on the shop floor, develop procedures to check part quality, and continue their education towards a bachelor of applied science degree.

1. Communicate in a formal manner both written and oral, that which expected of supervisors or mid-level managers.
2. Prepare reports detailing conclusions and recommendations for manufacturing process optimization and analysis of manufacturing problems.

GOAL 4
Graduates of the program will demonstrate the understanding of engineering drawings, materials science, manufacturing processes, quality assurance, and other areas that prepares graduates to pursue a bachelor’s degree or enter into employment as a production professional.

1. Compare manufacturing methods to assure optimization, quality assurance, and appropriate use of technology.
2. Troubleshoot machining problems including tooling, finish, dimensional errors, and work holding.
3. Design statistical tests to analyze the quality and quality trends of manufacturing data.
MARKETING/SALES AND RETAIL MANAGEMENT, AAS DEGREE

Department: Business, Hospitality, and Information Systems

The mission of the Associate in Applied Science Marketing/Sales and Retail Management degree program is to prepare students for employment in supervisory positions in marketing through education in marketing, sales, advertising, customer service, consumer marketing, as well as broad-based business classes including international business, legal environment of business, human relations, management, accounting/bookkeeping and a marketing internship.

GOAL 1
Graduates will demonstrate a foundation of knowledge for successful employment in entry-level marketing positions.
1. Students will demonstrate knowledge of the marketing mix of product, price, promotion, and place, and how they relate to successful marketing.
2. Students attain understanding of customer behavior and what influences customers to purchase.
3. Students will know effect of technology and social media as they relate to the rapidly-changing trends of contemporary marketing.

GOAL 2
Graduates will have developed the competencies to succeed in his/her chosen facet of marketing, sales and/or retail management.
1. Students will demonstrate effective verbal and written communication in a business type of setting.
2. Students will understand the concept of brand.
3. Students will be able to segment a market and develop one or more target markets.

GOAL 3
Graduates will have developed professional and ethical behaviors for marketing.
1. The student will be aware of ethical issues in the marketing field and demonstrate the ability to choose ethical responses.
2. The student will be able to relate customer service principles to work scenarios.
3. Students will be able to use modern professional sales techniques to build relationships with customers.

GOAL 4
Graduates of the program will demonstrate the appropriate skills for an entry-level supervisor.
1. The student will be able to analyze workplace problems and formulate solutions.
2. The student will demonstrate an understanding of the four functions of management.

MASSAGE THERAPIST CERTIFICATE

Department: Health Careers

The mission of the Massage Therapist Program is to provide the curriculum and clinical experiences to empower students with the knowledge, skills and affective elements necessary to successfully practice massage therapy in the workplace.

GOAL 1
Graduates of the program will demonstrate application of knowledge of massage therapy principles.
1. Students will demonstrate effective propping of client in the clinic massage therapy setting.
2. Students will demonstrate appropriate draping of client in the clinic massage therapy setting.
3. Students will address endangerment sites appropriately in the clinic massage therapy setting.
4. Students will analyze and notate client posture in the clinic massage therapy setting.

GOAL 2
Graduates of the program will demonstrate competency of technical skills performed by a massage therapist.
1. Students will demonstrate effective verbal communication in the clinic massage therapy setting.
2. Students will demonstrate an orchestrated flow in the clinic massage therapy setting.
3. Students will demonstrate effective strokes in the clinic massage therapy setting.
4. Students will demonstrate proper use of lubricants in the clinic massage therapy setting.
5. Students will demonstrate proper body mechanics in the clinic massage therapy setting.

GOAL 3
Graduates of this program will display suitable affective elements in the massage therapy environment: appearance, confidence, nurturing, boundaries, and attitude.
1. Students will demonstrate a professional appearance in the clinic massage therapy setting.
2. Students will demonstrate confidence in the clinic massage therapy setting.
3. Students will be nurturing toward clients in the clinic massage therapy setting.
4. Students will display proper emotional and physical boundaries with clients in the clinic massage setting.
5. Students will display a professional attitude in the clinic massage setting.
MECHANICAL ENGINEERING TECHNOLOGY
Department: Agricultural and Industrial Technologies

The mission of the Mechanical Engineering Technology Associate in Applied Science program is to prepare students to continue on for a bachelor’s degree in manufacturing engineering or industrial technology or to enter the workforce in the manufacturing community by educating them in various aspects of the profession.

GOAL 1
Graduates of the program will demonstrate the understanding of engineering drawings in order to pursue a bachelor’s degree or enter into employment as a mechanical design professional.

1. Students will be able to create 3d solid models in Creo, formerly called Pro-E, using extrude, revolve, sweep and blend commands.
2. Students will be able to edit existing models and change size and location of features.

GOAL 2
Graduates of the program will demonstrate specific procedures within the area of mechanical design such as detailing, illustrating that they are well prepared to positively contribute to the design team.

1. Students will assign dimensions to drawings according to ANSI standards.
2. Students will assign welding symbols to drawings.

GOAL 3
Students will demonstrate professional behavior.

1. Students will use formal professional language during presentations displaying their work.
2. Students will be able to work independently.

MECHATRONICS CERTIFICATE
Department: Agricultural and Industrial Technologies

The Mechatronics Certificate program of study prepares graduates for technical positions in the expanding field of electrical/mechanical systems installation and service.

GOAL 1
Graduates of the Mechatronics Technology program will demonstrate an understanding of technical knowledge required of an entry-level Mechatronics technician.

1. Recognize pneumatic/hydraulic and VFD/electric-motor control diagrams.
2. Recognize PLC programs and their relationship to input and output devices.

GOAL 2
Graduates of the program will demonstrate entry-level skills proficiency typically expected of an entry-level Mechatronics Technician.

1. Demonstrate an understanding of electrical and electronic circuits related to Mechatronics.
2. Demonstrate an understanding of the use of test equipment related to entry-level employment as a Mechatronics Technician.

GOAL 3
Graduates of the program will have a general understanding and appreciation for the attitudes and behaviors of an entry-level Mechatronics technician.

1. Explain the necessity for safe work practices in performance of job-specific tasks.
2. Work effectively in group settings.
MECHATRONICS TECHNOLOGY AAS DEGREE
Department: Agricultural and Industrial Technologies
The mission of the Mechatronics Technology Associate in Applied Science degree program is to provide experience to prepare the graduate for employment in industry/business as an electromechanical maintenance technician by educating them in the knowledge, skills, and behaviors as a mechatronics technician.

GOAL 1
Graduates of the Mechatronics Technology program will demonstrate the proficiencies required of an entry-level Mechatronics technician.
1. Demonstrate the ability to properly use test equipment in performance of duties for a Mechatronics Technician.
2. Demonstrate the ability to analyze, construct and test electrical and electronic circuits from schematic diagrams.

GOAL 2
Graduates of the program will demonstrate specific knowledge and proficiency in the mechanical areas of fluid power and programmable controls.
1. Demonstrate the ability to analyze VFD/electric-motor control diagrams and construct them with appropriate hardware.
2. Demonstrate the ability to create PLC programs and properly interface them to input and output devices.

GOAL 3
Graduates of the program will have a general understanding and appreciation for professional standards in the workplace.
1. Demonstrate safe work practices in performance of job-specific tasks.
2. Exhibit good class preparation.

MEDICAL ASSISTANT CERTIFICATE
Department: Health Careers
The mission of the Medical Assistant Program is to prepare students to be competent, entry-level medical assistants by educating them in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

GOAL 1
Graduates will exhibit clinical competency as an entry-level medical assistant.
1. Students will demonstrate knowledge of basic math computations using applied mathematics.
2. Students will apply appropriate principles of human anatomy and physiology by performing patient skills competencies.
3. Students will demonstrate knowledge of proper infection control techniques to ensure compliance with CDC regulations in health care settings.

GOAL 2
Graduates will demonstrate concepts of effective communication as an entry-level medical assistant.
1. Students will demonstrate professional telephone techniques.
2. Students will demonstrate ability to respond appropriately to nonverbal communication.
3. Students will demonstrate ability to report relevant information to the physician.
4. Students will demonstrate ability to instruct a patient according to a patient’s special dietary needs.

GOAL 3
Graduates will exhibit administrative skills necessary for an entry-level medical assistant.
1. Students will demonstrate competence in obtaining accurate patient billing information.
2. Students will demonstrate competence in Basic Practice Finances & 3rd Party Reimbursement.
3. Students will demonstrate competency in how to use the most current CPT & ICD coding systems.

GOAL 4
Graduates will model professional behavior appropriate for an entry-level medical assistant.
1. Students will describe the state’s legal scope of practice for a medical assistant.
2. Students will demonstrate professional telephone techniques.

GOAL 5
Graduates will exhibit appropriate critical thinking skills necessary for an entry-level medical assistant.
1. Students will effectively evaluate the work environment to identify unsafe working conditions.
2. Students will participate in a mock exposure event with documentation of steps taken.
MEDICAL CODER CERTIFICATE
Department: Health Careers
The mission of the Medical Coding Certificate Program is to provide students with fundamental concepts, knowledge, and skills in medical coding, in preparation for entry-level careers in medical offices, hospitals, clinics, nursing homes, insurance companies and governmental agencies.

GOAL 1
Program graduate will demonstrate entry-level coding skills needed for medical coders.
1. Students will demonstrate understanding of the basic coding concepts by assigning appropriate CPT codes based on published coding guidelines.
2. Students will demonstrate understanding of the basic coding concepts by assigning appropriate ICD-10 codes based on published coding guidelines.

GOAL 2
Program graduates will evaluate Health Record content and documentation.
1. Students will interpret health record documentation using knowledge of anatomy, physiology, clinical disease process, pharmacology and medical terminology to identify codable diagnoses and/or procedures.
2. Students will determine when additional clinical documentation is needed to assign the diagnosis and/or procedure codes.

GOAL 3
Program graduates will follow the AHIMA code of ethics.
1. Students will assign and report codes based on supporting documentation and not own interpretation.
2. Students will protect confidentiality of the health record.

GOAL 4
Program graduates will demonstrate proficiency in coding software.
1. Students will demonstrate the correct coding path in the encoder to arrive at the correct code assignment.
2. Students will consult reference materials in encoder to facilitate code assignments.

MEDICAL CORPSMAN TO LICENSED PRACTICAL NURSE CERTIFICATE
Department: Health Careers
The mission of the Medical Corpsman to Licensed Practical Nurse certificate is to provide the knowledge, skills, and abilities necessary to practice safely as a Licensed Practical Nurse.

GOAL 1
Graduates of the nursing program will demonstrate competency in skill performance as a licensed practical nurse.
1. Students will demonstrate safety in the administration of medications to include knowledge of the methods of administration to individuals across the lifespan, mode of action of commonly used classifications of drugs, anticipated side effects, possible adverse effects, and evaluation of patient response to medications used for common health problems.
2. Students will demonstrate safe performance of skills commonly delegated to the licensed practical nurse including collecting data and reporting patient responses relative to designated skills.

GOAL 2
Graduates of the program will communicate effectively to develop appropriate interpersonal relationships within the healthcare environment, in order to identify needs and coordinate patient care.
1. Students will collaborate with the registered nurse and other members of the health care team to organize and incorporate assessment data to plan/revise patient care and actions based on the established nursing diagnoses, nursing protocols, and assessment and evaluation data.
2. Students will participate in health teaching and counseling to promote, attain, and maintain the optimum health level of patients, as delegated.
3. Students will safely manage information technology related to communicating and providing patient care.
4. Students will collaborate with the patient/family and health care team in creating and maintaining a safe environment for the delivery of health care.
5. Students will effectively communicate with patients, families and members of the interdisciplinary health care team incorporating interpersonal and therapeutic communication skills.

GOAL 3
Graduates of the program will apply nursing knowledge and critical thinking to promote wellness and patient adaptation in health and/or illness.
1. Students will describe common issues and the role of the licensed practical nurse surrounding end of life care including symptom management, advanced directives, advocacy, artificial nutrition and hydration, communication, cultural implications, care of family/significant others, and grief and mourning to promote a respectful, peaceful death.
2. Students will promote function and health through managing care of patients/residents in a long term care setting based on an understanding of the normal aging changes and common elder concerns as loss, accidents, chronic illness, and caregiver stress.
3. Students will differentiate the approach of the licensed practical nurse to promoting and supporting the emotional, mental and social well-being of patients.
4. Students will provide rationale for judgements used in the provision of safe, quality care and for decisions that promote the health of patients within a family context.
5. Students will question the basis for nursing actions, considering research, evidence, tradition, and patient preferences.
GOAL 4
Graduates of the program will adhere to the standards of nursing practice, as outlined in the Illinois Nurse Practice Act.

1. Students will differentiate the scope of practice of the licensed practical nurse, as delineated in the Illinois Nurse Practice Act, from that of the corpsman and other members of the interdisciplinary health care team.

2. Students will demonstrate the role of the practical licensed nurse as a health care team member in utilizing the nursing process to address the health care needs of individuals/families across the life span and in a variety of settings.

3. Students will incorporate compassion; empathy; cultural awareness and sensitivity; and knowledge of growth and development, spirituality, socioeconomic status, and patient preferences in providing nursing care.

4. Students will demonstrate professional behaviors of accountability and professionalism according to the legal and ethical standards for a competent licensed practical nurse.

5. Students will promote the human dignity, integrity, self-determination, and personal growth of patients, oneself, and members of the health care team.

MEDICAL LABORATORY TECHNICIAN AAS DEGREE

Department: Health Careers

The mission of the Medical Laboratory Technician program is to prepare its students with entry-level skills for practice in a clinical laboratory by providing the resources, curriculum, and clinical experiences to its students.

GOAL 1
Cognitive
Graduates will demonstrate specific knowledge and proficiency to practice at the entry-level in a medical laboratory setting.

1. Outcome 1: Students will demonstrate competency on each of the major disciplines in the medical laboratory technology.

2. Outcome 2: Students will effectively transition information and experiences learned in the program to performance on the National Board Certification Exam and employment situations.

GOAL 2
Psychomotor
The students will be able to apply learned theories to demonstrate necessary skills to perform as a medical laboratory technician as defined in the Standard of Accredited Educational Programs of the Medical Laboratory Technician.

1. Outcome 1: Students will apply the learned discipline-specific theory to achieve a satisfactory assessment for each discipline during their clinical practicum in the medical laboratory settings.

2. Outcome 2: Graduates will meet employers’ expectations.

GOAL 3
Affective
Students will communicate effectively in written, verbal, and non-verbal communication.

1. Outcome 1: Students will demonstrate professional conduct, communication, and interpersonal relations with laboratory personnel, patients, other health care professionals, and the public.

2. Outcome 2: Students will write a report on a clinical case study and present to class.
MEDICAL OFFICE ADMINISTRATIVE ASSISTANT CERTIFICATE
Department: Health Careers
The mission of the Medical Office Administrative Assistant Program is to prepare students to be competent, entry-level medical office administrative assistants by educating them in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

GOAL 1
Graduates will demonstrate concepts of effective communication as an entry-level medical office administrative assistant.
1. Students will demonstrate professional telephone techniques.
2. Students will demonstrate recognition of importance of responding to nonverbal communication.
3. Students will demonstrate ability to report relevant information to the physician.

GOAL 2
Graduates will exhibit administrative skills necessary for an entry-level medical office administrative assistant.
1. Students will demonstrate competence in obtaining accurate patient billing information.
2. Students will demonstrate competence in Basic Practice Finances & Third-Party Reimbursement.
3. Students will demonstrate competency in how to use the most current CPT & ICD-10 coding systems.

GOAL 3
Graduates will model professional behavior appropriate for an entry-level medical office administrative assistant.
1. Students will describe the state’s legal scope of practice for a medical assistant.
2. Students will apply HIPAA rules in regard to release of information and patient confidentiality.

GOAL 4
Graduates will exhibit appropriate critical thinking skills necessary for an entry-level medical office administrative assistant.
1. Students will effectively evaluate the work environment to identify unsafe working conditions.
2. Students will participate in a mock exposure event with documentation of steps taken.
3. Students will apply appropriate principles of human anatomy and physiology.

NETWORK ADMINISTRATOR AAS DEGREE
Department: Business, Hospitality, and Information Systems
The mission of the Network Administrator AAS degree is to prepare students for employment as network administrators by teaching them to install, configure, maintain, and troubleshoot network operating systems and CISCO routers and switches.

GOAL 1
Graduates will demonstrate the appropriate technical skills for an entry-level network technician.
1. Students will be able to install desktop and server operating systems.
2. Students will be able to configure server operating systems for network connectivity.

GOAL 2
Graduates of the program will demonstrate technical knowledge to perform as an entry-level technician.
1. Students will understand how to calculate ip addressing.
2. Students will understand how to calculate subnets.
NETWORKING CERTIFICATE
Department: Business, Hospitality, and Information Systems

The mission of the Networking Certificate is to prepare students for employment as network technicians by teaching them to install, configure, maintain, and troubleshoot Windows operating systems and CISCO routers and switches.

GOAL 1
Graduates will exhibit the appropriate technical skills for an entry-level network technician.
1. Students will be able to install desktop and server operating systems.
2. Students will be able to configure server operating systems for network connectivity.

GOAL 2
Graduates of the program will demonstrate technical knowledge to perform as an entry-level network technician.
1. Students will understand how to calculate IP addressing.
2. Students will understand how to calculate subnets.

NURSING ASSISTANT CERTIFICATE
Department: Health Careers

The mission of the Nursing Assistant Program is to provide the resources, curriculum, and clinical experiences to enable graduates to attain entry-level employment as nursing assistants in long-term care facilities, hospitals, and other health care settings.

GOAL 1
Graduates will demonstrate correct performance of basic nursing skills, personal care skills, and basic restorative skills.
1. Students will demonstrate proficiency in the 21 basic skills required per IDPH.
2. Students will demonstrate proficiency in taking vitals prior to clinical.

GOAL 2
Graduates will demonstrate professional behaviors.
1. Students will maintain a professional appearance in the clinical setting.
2. Students will be on time for class.
3. Students will maintain a positive attitude while improving skills in the clinical setting.

GOAL 3
Graduates will demonstrate knowledge of Nursing Assistant scope of practice.
1. Students will pass the State Exam.
2. Students will pass the Nursing Assistant Training course.
OCCUPATIONAL THERAPY ASSISTANT AAS DEGREE

Department: Health Careers

The mission of the Associate in Applied Science Occupational Therapy Assistant Degree Program at Illinois Central College is to effectively provide educational resources within theory, laboratory, and fieldwork experiences to prepare graduates for a successful career in occupational therapy service delivery and to begin generalist practice as an entry-level occupational therapy assistant.

GOAL 1

Graduates of the program will demonstrate an understanding and application of knowledge from the Occupational Therapy Practice Framework: Domain and Process, theory, models of practice and guidelines for practice utilized in the occupational therapy process.

1. The student will demonstrate an understanding of the importance of occupational therapy history, theory and philosophical base of the profession and its relevance to current practice.
2. The student will demonstrate knowledge and an understanding of the Occupational Therapy Practice Framework: Domain and Process.
3. The student will articulate the role of the occupational therapist and the occupational therapy assistant throughout the occupational therapy process.
4. The student will demonstrate skill in task analysis in areas of occupation, performance skills, performance patterns, activity demands, context and environments, and client factors to implement client-centered interventions.

GOAL 2

Graduates of the program will exhibit proficiency in the delivery of interventions to facilitate participation and enhance occupational performance across the lifespan.

1. The student will demonstrate knowledge in the development of evidence-based approaches in the selection of occupation-based strategies appropriate to individual and group intervention planning, implementation and review of outcomes addressing the geriatric and psychosocial needs of identified populations.
2. The student will demonstrate an understanding of the use of technology to support performance, participation, health and well-being to include: keyboarding, use of the internet, electronic documentation systems, distance communication, virtual environments, assistive technology and telehealth technology.
3. The student will demonstrate knowledge and understanding of bones, boney landmarks, joint structures, muscle groups and their functions in occupation-based assessment and intervention.
4. The student will demonstrate an understanding of the use of assistive technology, compensatory strategies and sensory integration principles to enhance occupational performance in traditional and emerging pediatric practice settings.

GOAL 3

Graduates of the program will perform entry-level skills to practice as a generalist in a variety of traditional and emerging occupational therapy practice settings.

1. The student will articulate and demonstrate appropriate judgment in regard to safety of self and others and by adhering to safety regulations throughout the occupational therapy process.
2. The student will demonstrate skill competency in goniometry, range of motion, coordination, muscle strength, and functional mobility assessment procedures, interventions and documentation requirements.
3. The student will select and provide direct occupational therapy assessments and interventions to enhance safety and promote occupational performance in ADLs, IADLs, education, play, rest, leisure and social participation with individuals and pediatric populations.
4. The student will demonstrate an understanding of the use of remediation strategies, assistive technology, compensatory strategies, and environmental adaptations to enhance occupational performance in home, work, school and community settings.

GOAL 4

Graduates of the program will effectively interact through written, oral and non-verbal communication with the client, family, significant others and the public in a professionally acceptable manner.

1. The student will demonstrate effective written and oral communication in context of appropriate settings in which occupational therapy service delivery addresses intervention planning, implementation, review of outcomes and documentation.
2. The student will utilize sound professional judgement in regard to safety of self and others by demonstrating proper care and maintenance of lab equipment and supplies and by adhering to safety regulations throughout the occupational therapy process as appropriate to setting and scope of practice.
3. The student will demonstrate skill in performing, teaching, and adapting selected occupations and activities as reflected in current occupational therapy practice.
4. The student will demonstrate skill competency in goniometry, range of motion, coordination, muscle strength, and functional mobility assessment procedures, interventions and documentation requirements.
3. The student will demonstrate effective written, oral, and nonverbal communication skills throughout the occupational therapy process with individuals across the life span as an interprofessional team member and advocate to ensure accountability of service provision.

GOAL 5

Graduates of the program will model positive behaviors to promote effective interprofessional team collaboration.

1. The student will identify the principles and historical perspective of development and the dynamics of normal and abnormal human behavior across the lifespan.
2. The student will demonstrate effective written, oral, and nonverbal communication skills throughout the occupational therapy process and as an interprofessional team member and advocate to ensure accountability of service provision to pediatric populations.
3. The student will demonstrate the ability to plan service delivery, educate and promote the profession of occupational therapy to various interprofessional team members and the community.
4. The student will demonstrate professionalism throughout the occupational therapy process.
OFFICE AND INFORMATION PROCESSING MANAGEMENT CERTIFICATE

Department: Business, Hospitality, and Information Systems

The mission of the Office and Information Processing Certificate is to prepare employees to advance into office supervisory positions by providing necessary office and technological skills, human relations skills, and management skills.

GOAL 1
Graduates of the program will demonstrate technological skills needed in office supervisory positions.
1. Students will be able to construct basic mailable documents using current word processing software.
2. Students will be able to construct and interpret accurate workbooks using current spreadsheet software.
3. Students will be able to construct and utilize basic data bases using current database software.

GOAL 2
Graduates of the program will demonstrate or describe human relations attitudes and behaviors needed in office supervisory positions.
1. Students will be able to demonstrate or describe appropriate human relations attitudes.
2. Students will be able to demonstrate or describe appropriate human relations behaviors.

GOAL 3
Graduates of the program will demonstrate or describe management skills needed in office supervisory positions.
1. Students will be able to construct and interpret basic financial documents.
2. Students will be able to demonstrate or describe basic principles of managing resources.
3. Students will be able to describe the economic and legal environment in which businesses operate.
PAGE LAYOUT CERTIFICATE
Department: Arts and Communication

The mission of the Page Layout certificate program is to prepare students for employment or upgrade existing job skills in the publishing industry by educating them in the fundamental concepts, knowledge, hands-on techniques, and skills ranging from traditional page layout for print as well as new electronic book formatting for eReaders/epubs devices.

GOAL 1
Graduates of the program will demonstrate knowledge of vector graphic creation.
1. Construct a graphic using the pen tool.
2. Identify the tools and shortcut keys.

GOAL 2
Graduates of the program will demonstrate basic knowledge of layout software.
1. Properly identify tools in the publishing software.
2. Demonstrate know of publication content formatting using style sheets.

GOAL 3
Graduates will demonstrate professional behavior.
1. Students will use professional language during class presentations.
2. Students will work independently.

PARALEGAL AAS DEGREE
Department: Social Sciences and Public Services

The mission of the Associate in Applied Science Paralegal degree is to produce competent, well-rounded students for employment to be able to work under the supervision of an attorney in the many areas of the practice of law; specifically, by educating them in the areas of performing such tasks as legal research, client interviews, investigations, preparation of legal documents, and other legal work as delegated by an attorney. Paralegals are employed by private law firms, corporations, governmental agencies, insurance companies, title companies, and financial institutions.

GOAL 1
Graduates will demonstrate ethical and service-oriented behaviors in the legal profession working under direct attorney supervisor, resulting in exceptional and effective assistance to attorneys, judges, and other legal organizations.
1. Students will demonstrate professional interaction with all parties in the internship setting.
2. Students will demonstrate the canons of professional responsibility within the paralegal profession.

GOAL 2
Graduates will demonstrate skills of legal professionals’ research, writing, and documentation skills, resulting in exceptional and effective assistance to attorneys, judges, and other legal organizations.
1. Students will perform legal research in the library and online while stressing the fundamentals of legal analysis and writing, citation checking, and verification of authority.
2. Students will research, analyze, and apply both federal and state codes, both civil and Criminal, to a variety of fact patterns and will further be able to apply and analyze rules of evidence as they apply to those fact patterns.

GOAL 3
Graduates will demonstrate knowledge in the areas of civil, family, probate, administrative, and business law, resulting in exceptional and effective assistance to attorneys, judges, and other legal organizations.
1. Students will document, manage case files, and conducting case specific research related to family law and civil law.
2. Students will document, managing case files, and conducting case specific research related to administrative law and business law.
3. Students will document, managing case files, and conducting case specific research related to probate law.

GOAL 4
Graduates will demonstrate knowledge of the legal environment and understanding of the roles of the professions.
1. Students will describe and define the roles of the paralegal in the legal profession through mastering legal terminology, reviewing basic legal research and developing professional ethics.
2. Students will perform routine tasks involved in managing a law office, including managing case files, software, billing, and ethical considerations.
PARALEGAL CERTIFICATE
Department: Social Sciences and Public Services
The mission of the Paralegal post-degree Certificate (these students have completed an underlying degree, and will add a Paralegal Certificate to that degree) is to produce competent, well-rounded students for employment to be able to work under the supervision of an attorney in the many areas of the practice of law; specifically by educating them in the areas of performing such tasks as legal research, client interviews, investigations, preparation of legal documents, and other legal work as delegated by an attorney. Paralegals are employed by private law firms, corporations, governmental agencies, insurance companies, title companies, and financial institutions.

GOAL 1
Graduates will demonstrate ethical and service-oriented behaviors in the legal profession working under direct attorney supervisor, resulting in exceptional and effective assistance to attorneys, judges, and other legal organizations.
1. Students will demonstrate professional interaction with all parties in the internship setting.
2. Students will demonstrate the canons of professional responsibility within the paralegal profession.

GOAL 2
Graduates will demonstrate skills of legal professionals’ research, writing, and documentation skills, resulting in exceptional and effective assistance to attorneys, judges, and other legal organizations.
1. Students will perform legal research in the library and online while stressing the fundamentals of legal analysis and writing, citation checking, and verification of authority.
2. Students will research, analyze, and apply both federal and state codes, both civil and Criminal, to a variety of fact patterns and will further be able to apply and analyze rules of evidence as they apply to those fact patterns.

GOAL 3
Graduates will demonstrate knowledge in the areas of civil, family, probate, administrative, and business law, resulting in exceptional and effective assistance to attorneys, judges, and other legal organizations.
1. Students will document, manage case files, and conducting case specific research related to family law and civil law.
2. Students will document, managing case files, and conducting case specific research related to administrative law and business law.
3. Students will document, managing case files, and conducting case specific research related to probate law.

GOAL 4
Graduates will demonstrate knowledge of the legal environment and understanding of the roles of the professions.
1. Students will describe and define the roles of the paralegal in the legal profession through mastering legal terminology, reviewing basic legal research and developing professional ethics.
2. Students will perform routine tasks involved in managing a law office, including managing case files, software, billing, and ethical considerations.

PARAMEDIC AAS DEGREE
Department: Health Careers
The mission of the Illinois Central College Emergency Medical Services Program is to prepare competent entry-level Emergency Medical Technician-Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains, with or without exit points at the Emergency Medical Technician-Intermediate, and/or Emergency Medical Technician-Basic, and/or First Responder levels.

GOAL 1
Students will acquire the knowledge to necessary to gain employment.
1. Students will exhibit an understanding of the fundamental concepts of emergency medical care.
2. Students will successfully complete a final cumulative knowledge-based examination.
3. Students will successfully complete the certification/licensure examination.

GOAL 2
Students will demonstrate healthcare team leadership skills.
1. Students will be awarded “team leader” designation in excess of the minimum requirements during the field clinical experience of the program.
2. Students will serve as a “team leader” and direct patient care during their field clinical experience.
3. Students will demonstrate and direct management of patient care prior to challenging the certification/licensure examination.

GOAL 3
Students will acquire and develop the psychomotor skills required of an entry-level Paramedic.
1. Students will successfully complete the psychomotor cumulative evaluation prior to challenging the certification/licensure examination.
2. Students will achieve and demonstrate competency in all psychomotor patient skills.
PHLEBOTOMIST CERTIFICATE
Department: Health Careers
The mission of the Phlebotomist Program is to prepare its students to properly and safely perform micropunctures and venipunctures in a professional manner by providing the resources, curriculum, and clinical experiences to its students.

GOAL 1
Cognitive
Graduates will demonstrate specific knowledge and proficiency to practice in a blood collection center.
1. Outcome 1: Students will demonstrate competency in phlebotomy prior to beginning their clinical practicum.
2. Outcome 2: Students will demonstrate knowledge of current venipuncture and micropuncture practice, and safety in a medical laboratory, and proficiency to practice at a phlebotomist

GOAL 2
Psychomotor
The students will be able to apply learned theories to demonstrate necessary skills to perform venipuncture and micropuncture during their clinical practicum.
1. Outcome 1: Students will apply the learned discipline-specific theory to achieve a satisfactory assessment during their clinical practicum.
2. Outcome 2: Students will successfully perform the minimum required collections at the end of the clinical practicum.

GOAL 3
Affective
Students will communicate effectively in written, verbal, and non-verbal communication.
1. Outcome 1: Students will demonstrate professional conduct, communication, and interpersonal relations with laboratory personnel, patients, other health care professionals, and the public.

PHYSICAL THERAPIST ASSISTANT AAS DEGREE
Department: Health Careers
The mission of the Physical Therapist Assistant (PTA) Program is to provide the knowledge and skills and develop attitudes which prepare graduates to function as an entry-level PTA who will work under the direction and supervision of the physical therapist.

GOAL 1
Students will demonstrate competency in skill performance as an entry-level PTA.
1. Students will demonstrate competency with classroom theory and practical skills to progress to clinical courses.
2. Sophomore students will demonstrate retention of freshman-year theory and skills application.
3. Students will pass the skills-check list in PTA courses with a lab component.
4. Students will score entry-level performance with the final clinical course, Clinical 3 (PHTA 232).

GOAL 2
Students will adhere to ethical standards as outlined in the APTA’s Code of Conduct for the PTA.
1. Students will demonstrate ethical and professional behaviors in the clinical setting.
2. Students will demonstrate knowledge of the Code of Ethics for the PTA.
3. Students will apply Code of Ethics to clinical case studies.

GOAL 3
Students will be aware of cultural and individual difference in providing patient care.
1. Students will understand the concepts related to culture in the patient-care setting.
2. Student will provide quality patient care regardless of individual and/or cultural differences.

GOAL 4
Students will apply the knowledge and critical thinking skills to provide physical therapy treatments in a safe manner.
1. Students will be safe when providing physical therapy interventions in the clinical setting.
2. Students will provide a rationale when a treatment should be withheld or modified based on patient response.
3. Students will demonstrate safety with therapy interventions in the lab setting prior to progressing to clinical courses.

GOAL 5
Students will develop a plan for lifelong learning for professional growth after program completion.
1. The student will develop a 1-, 3-, and 5-year plan for professional development.
2. Students will appreciate the value of continuing education courses and application to clinical practice.
PRINTING CERTIFICATE
Department: Arts and Communication
The mission of the Printing Certificate program is to prepare students for employment or upgrade existing job skills in the Graphic Communications industry by educating them in the fundamental concepts, knowledge, hands-on techniques and skills of lithography, screen, flexography and digital printing.

GOAL 1
Graduates will demonstrate professional behavior.
1. Students will use professional language during class presentations.
2. Students will be able to work independently with safe behavior.

GOAL 2
Graduates of the program will demonstrate knowledge lithography.
1. Demonstrate press adjustment for color registration on a two color print job.
2. Explain use of RIP software for plate output.

GOAL 3
Graduates of the program will demonstrate knowledge of flexography.
1. Explain the process of creating a flexography plate.
2. Demonstrate the process of properly plate mounting onto the printing cylinder.

PRODUCTION WELDER CERTIFICATE
Department: Agricultural & Industrial Technologies
The mission of the Production Welder certificate program is to prepare students with the knowledge and skills pertaining to gas metal arc welding processes for employment as an entry-level welder in a manufacturing facility.

GOAL 1
Graduates will accurately produce the correct size weld(s) in the specified locations and meet the engineering requirements using the Gas Metal Arc Welding, GMAW (MIG) process.
1. Student will produce required MIG welds as specified and the welds will pass inspection.
2. Student will produce simple fabrication that follows dimensions.

GOAL 2
Graduates will demonstrate safe practices within the manufacturing setting.
1. Students will practice safe habits in the welding lab.
2. Students will demonstrate that they understand all OSHA safety rules.

GOAL 3
Graduates will communicate the processes for setting up the machine and apparatus to weld as well as the proper welding motion and characteristics of good weld.
1. Students will communicate their mastery of basic production welding setup and operation.
2. Students will describe welding discontinuities.
MISSION, GOALS, AND OUTCOMES

RADIOGRAPHER AAS DEGREE
Department: Health Careers
The mission of the Radiographer Program is to prepare competent entry-level radiographers to function within the healthcare community.

GOAL 1
Students will be clinically competent.
1. Students will apply radiographic positioning skills.
2. Students will demonstrate principles of radiation protection.
3. Students will select appropriate technical factors.

GOAL 2
Students will demonstrate communication skills.
1. Students will use effective oral communications skills.
2. Students will practice written communication skills.

GOAL 3
Students will develop critical thinking skills.
1. Students will demonstrate sound decision making.
2. Students will adapt positioning for non-routine procedures.

GOAL 4
Students will model professionalism.
1. Students will demonstrate professional qualities.
2. Students will understand professional ethics.

REGISTERED NURSE AAS DEGREE
Department: Health Careers
The mission of the Associate in Applied Science Registered Nurse degree is to effectually provide educational resources within theory, laboratory, and clinical experiences to prepare graduates for a successful professional nursing career as a Registered Nurse.

GOAL 1
Graduates of the nursing program will demonstrate competency in skill performance as a registered nurse.
1. Students will demonstrate nursing skills based on application of scientific and theoretical knowledge in the health skills lab setting prior to performing skills in clinical setting.
2. Students will demonstrate nursing skill competency while caring for patients in the clinical setting.
3. Students will spend at least 3 hours in the lab practicing new skills or any with which they are having difficulties.

GOAL 2
Graduates of the program will communicate effectively to develop appropriate interpersonal relationships within the healthcare environment.
1. Students will verbally communicate effectively with patient, family and healthcare team.
2. Students will communicate application of theoretical knowledge of patient care via verbal, electronic and written means.

GOAL 3
Graduates of the program will apply nursing knowledge and critical thinking to promote wellness and patient adaptation in health and/or illness.
1. Students will utilize critical thinking as well as prioritization in the care of diverse patient populations.

GOAL 4
Graduates of the program will adhere to the standards of nursing practice, as outlined in the Illinois Nurse Practice Act.
1. Students will provide care in a safe manner.
2. Students will adhere to confidentiality guidelines while providing patient care.
3. Students will apply principles of legal/ethical nursing practice within the clinical setting.
RESPIRATORY THERAPIST AAS DEGREE
Department: Health Careers
The mission of the Respiratory Therapist Program is to prepare graduates to enter the professional practice of respiratory care by providing the resources, curriculum, and clinical experiences to assume primary clinical responsibilities for respiratory care modalities.

GOAL 1
Students will comprehend, apply and evaluate clinical information relevant to the roles of advanced-level respiratory therapists,
1. Students will pass at least twenty-two clinical simulation exams.
2. Students will score at the "Certified" level on the Therapist Multiple Choice Mock Exam.
3. Students will pass the NBRC national exams

GOAL 2
Students will demonstrate technical proficiency in all skills necessary to fulfill their roles as advanced-level respiratory therapists,
1. Graduate employer surveys will rate graduate technical proficiencies as 3 or >3 on a Likert scale of 1 to 5 on all queries related to skills.
2. Freshman students will pass an assessment of student learning of artificial airways and adjuncts.
3. Sophomore students will pass the ACLS written and Mega code.

GOAL 3
Students will display professional behavior consistent with employer expectations as advanced-level respiratory therapists.
1. Graduate employer surveys will rate graduate attitudes and behaviors as 3 or >3 on a Likert scale of 1 to 5 on all queries related to attitudes and behaviors.
2. Freshman and sophomore students will not be absent or late for assigned clinical rotations.

RESTAURANT MANAGEMENT AAS DEGREE
Department: Business, Hospitality, and Information Systems
The Mission of the Restaurant Management Associate in Applied Science Degree program is to prepare students for employment in the restaurant industry by educating them in the fundamental concepts, knowledge, and hands-on techniques and skills of the restaurant industry.

GOAL 1
Graduates will demonstrate appropriate culinary math knowledge in order to perform calculations necessary in the industry.
1. Students will be able to demonstrate proficiency in recipe adjustment.
2. Students will be able to demonstrate proficiency in recipe costing.

GOAL 2
Graduates will apply the application and knowledge of management principles.
1. Students will apply management knowledge to Front of the House Operation and serving techniques.
2. Students will complete a menu and marketing plan.

GOAL 3
Graduates of the program will model professional behaviors appropriate for an entry-level culinarian.
1. Students will demonstrate cooperative learning and engagement when working with their peers in group projects.
2. Students will demonstrate professional demeanor by following the Culinary Arts Policies and Procedures in regards to uniform and grooming guidelines.
SECURE SOFTWARE DEVELOPMENT
Department: Business, Hospitality, and Information Systems

The mission of the Secure Software AAS program is to prepare students for employment in secure software development by educating them in the fundamental concepts of computer programming, software assurance and database development.

GOAL 1
Graduates of the program will demonstrate specific skills and proficiency in the technical knowledge of secure computer programming principles, methods, and measurements.

1. The student will design, implement and formally test a medium-sized software application, utilizing super-classes, subclasses, abstract classes, and interfaces.
2. The student will design and implement data structures including arrays, linked lists, stacks, queues, trees, sets, hashing, maps and graphs.
3. The student will demonstrate an understanding of time and space efficiency analysis of searching and sorting algorithms.
4. The student will demonstrate a knowledge of designing, constructing and assessing appropriate solutions using a variety of basic recursive techniques.

GOAL 2
Graduates of the program will comprehend the security risks and threats to software.

1. The student will understand the tenets of ethical and professional behavior promoted by professional societies and The student will demonstrate an understanding of testing and static analysis of software to provide security assurance accept the professional responsibilities and liabilities associated with security.
2. The student will understand software architecture, architectural patterns and client-server computing.

GOAL 3
Graduates of the program will have an application of knowledge in the proper construction and querying of databases and providing information from the stored data.

1. The student will be able to design, create and manage database.
2. The student will demonstrate an understanding of SQL commands to create, maintain, and query a relational database.
3. The students will manage and organize the relational database and user/data privileges.

SMALL BUSINESS MANAGEMENT
CERTIFICATE
Department: Business, Hospitality, and Information Systems

The mission of the Small Business Management certificate is to provide students with a background in business organization and operations, as well as management training, necessary for advancement to supervisory positions in small businesses.

GOAL 1
Graduates will understand the role of marketing, management, and accounting practices and theory in the operation of a small business.

1. The student will demonstrate an understanding of the four functions of management.
2. The student will develop an understanding of marketing as it operates in a small business.
3. The student will be able to understand basic accounting principles used in business operations.

GOAL 2
Graduates will be able to demonstrate best business practices in management.

1. The student will be able to analyze workplace problems and formulate potential solutions using the scientific method.
2. The student will create a business plan which incorporates the different facets involved in the start-up operations of a small business.

GOAL 3
Graduates will demonstrate knowledge of human resource management.

1. The student will cultivate a positive attitude which influences stakeholders of the business.
2. The student will increase knowledge of theories and practices related to personnel management.
SOLAR THERMAL HEATING SYSTEMS
Department: Agricultural & Industrial Technologies
The mission of the Solar Thermal Heating Systems certificate program is to provide the students with knowledge and skills pertaining to solar thermal heating systems. After completing this program, the graduate will be able to work as an entry-level repair/maintenance worker, solar domestic water/space heating technician, solar thermal systems designer, or a solar thermal salesperson.

GOAL 1
Graduates will demonstrate an understanding of the technical knowledge of solar thermal heating principles.
1. Students will identify and describe the functions of system components in a solar domestic hot water system/solar thermal space heating system.
2. Students will demonstrate technical knowledge of sizing piping, pumps, heat storage, heat exchangers, expansion tanks, and solar collectors.

GOAL 2
Graduates will demonstrate the skills appropriate for an entry-level solar thermal technician/designer.
1. Students will demonstrate and describe installation techniques of residential solar domestic hot water/solar thermal space heating systems.
2. Students will demonstrate and describe the procedures for measuring, cutting, joining, and supporting copper piping.
3. Students will demonstrate and describe the procedures of mounting solar collectors on a roof.

GOAL 3
Graduates will demonstrate ethical/legal work practices and work safety standards appropriate for an entry-level solar thermal technician/designer.
1. Students will demonstrate and describe ladder and fall prevention safety procedures in accordance to OSHA 29 CFR 1910.
2. Students will demonstrate and describe lockout/tagout safety procedures for control of hazardous energy sources in accordance to OSHA 29 CFR 1910.
3. Students will demonstrate and describe how to maintain strict compliance with all federal, state, county, and municipal laws, regulations, and ordinances pertaining to the solar thermal industry and business operations.

SURGICAL TECHNOLOGY AAS DEGREE
Department: Health Careers
The mission of the Associate in Applied Science Surgical Technology program is to prepare competent, entry-level surgical technologist able to function within the healthcare community.

GOAL 1
Acquire and develop the knowledge necessary to gain employment.
1. Student will develop professional attitudes and responsibilities.
2. Students will understand and apply knowledge gained from the basic sciences.
3. Students will successfully demonstrate a safe level of practice and knowledge related to: a) patient safety, b) surgical technique, c) surgical and obstetrical procedures, and d) ethical/legal responsibilities.

GOAL 2
Acquire and develop the skills necessary to practice safely within the surgical environment.
1. Students will demonstrate sound decision making.
2. Students will appropriately Set up cases in surgical rotations.

GOAL 3
Acquire and develop the behaviors necessary to become a productive member of the health care team.
1. Students will demonstrate professional qualities.
2. Students will understand professional responsibilities to the patient.
SURGICAL TECHNOLOGY CERTIFICATE
Department: Health Careers

GOAL 1
Acquire and develop the knowledge necessary to gain employment.
1. Student will develop professional attitudes and responsibilities.
2. Students will understand and apply knowledge gained from the basic sciences.
3. Students will successfully demonstrate a safe level of practice and knowledge related to: a) patient safety, b) surgical technique, c) surgical and obstetrical procedures, and d) ethical/legal responsibilities.

GOAL 2
Acquire and develop the skills necessary to practice safely within the surgical environment.
1. Students will demonstrate sound decision making.
2. Students will appropriately Set up cases in surgical rotations.

GOAL 3
Acquire and develop the behaviors necessary to become a productive member of the health care team.
1. Students will demonstrate professional qualities.
2. Students will understand professional responsibilities to the patient.

WEB DEVELOPER CERTIFICATE
Department: Business, Hospitality, and Information Systems

The mission of the Web Developer Certificate program is to instruct students in the practice of programming and scripting of websites for business and industry by providing hands-on experience in interfacing web applications with legacy applications.

GOAL 1
Graduates of the program will demonstrate the knowledge and proficiency to create dynamic, responsive websites and applications utilizing modern best practices, tools and techniques on both the client and server sides.
2. Demonstrate the ability to create (and deploy) audience-appropriate content, interactions and multimedia to achieve the objectives of the website.
3. Describe the basic functionality, protocols, and tools of the internet.

GOAL 2
Graduates of the program will employ security best practices to protect websites against malicious intrusions and exploitation.
1. Demonstrate an understanding of common attack vectors.
2. Utilize secure programming techniques when creating (and maintaining) websites.
WEB DEVELOPER APPRENTICE CERTIFICATE
Department: Business, Hospitality, and Information Systems
The mission of the Web Designer Certificate program is to instruct students in the current technologies of Web creation by providing hands-on experience in developing a portfolio of Web page projects.

GOAL 1
Graduates of the program will demonstrate the knowledge and proficiency to create simple, static responsive websites with meaningful content and multimedia.
2. Demonstrate the ability to create (and deploy) audience-appropriate content and multimedia to achieve the objectives of the website.
3. Describe the basic functionality, protocols, and tools of the internet.

WEB SYSTEMS AAS DEGREE
Department: Business, Hospitality, and Information Systems
The mission of the Web Systems program of study is to prepare students for employment as a web professional by educating them in the skills and knowledge needed to maintain corporate intranet, extranet, and internet web sites.

GOAL 1
Graduates of the program will demonstrate the knowledge and proficiency to create dynamic, responsive websites and applications utilizing modern best practices, tools and techniques on both the client and server sides.
1. Create dynamic websites, including ecommerce sites, using modern best practices.
2. Demonstrate the ability to create (and deploy) audience-appropriate content interactions and multimedia to achieve the objectives of the website.
3. Describe the basic functionality, protocols, and tools of the internet.
4. Demonstrate the ability to properly configure a web hosting environment.

GOAL 2
Graduates of the program will employ security best practices to protect websites against malicious intrusions and exploitation.
1. Demonstrate an understanding of common attack vectors.
2. Utilize secure programming techniques when creating (and maintaining) websites.

GOAL 3
Graduates of the program will have an understanding of the techniques to properly utilize social media in a business environment.
1. Create social media policy for business.
2. Utilize social media to effectively communicate between the business and their customers.
WELDING OPERATOR CERTIFICATE
Department: Agricultural & Industrial Technologies

The Welding Operator certificate program prepares students with entry-level skills in the major commercial welding processes, SMAW and GMAW. With welding skills in both processes, completers of the Welding Operator certificate might seek entry-level welder positions in the construction as well as the manufacturing industry.

GOAL 1
Graduates will accurately produce the correct size weld(s) in the specified locations and meet the engineering requirements using the Gas Metal Arc Welding, GMAW (MIG) and the Shielded Metal Arc Welding, SMAW (stick) processes.
1. Student will produce required MIG welds as specified and the welds will pass inspection.
2. Student will produce simple MIG fabrication that follows dimensions.
3. Student will produce required STICK welds as specified and the welds will pass inspection.
4. Student will produce simple Stick fabrication that follows dimensions.

GOAL 2
Graduates will demonstrate safe practices within the manufacturing setting.
1. Student will practice safe habits in the welding lab.
2. Student will demonstrate that they understand all OSHA safety rules.

GOAL 3
Graduates will communicate the processes for setting up the machine and apparatus to weld as well as the proper welding motion and characteristics of good weld.
1. Graduates will communicate their mastery of basic production welding setup and operation using GMAW processes.
2. Graduates will communicate their mastery of basic welding setup and operation using SMAW processes.

WELDING SPECIALIST CERTIFICATE
Department: Agricultural & Industrial Technologies

The mission of the Welding Specialist certificate program of study is to develop entry-level welders for industry with skill in major commercial welding processes capable of part layout, inspection, and process troubleshooting.

GOAL 1
Graduates will accurately produce the correct size weld(s) in the specified locations and meet the engineering requirements using the Gas Metal Arc Welding, GMAW (MIG), the Shielded Metal Arc Welding, SMAW (stick), Gas Tungsten Arc Welding, GTAW (TIG) processes.
1. Student will produce required MIG welds as specified and the welds will pass inspection.
2. Student will produce required SMAW welds as specified and the welds will pass inspection.
3. Student will produce required GTAW (TIG) welds as specified and the welds will pass inspection.
4. Student will produce complex fabrications that follows dimensions and specifications using the GMAW, GTAW, and SMAW processes.

GOAL 2
Graduates will demonstrate safe practices within the manufacturing setting.
1. Student will practice safe habits in the welding lab.
2. Student will demonstrate that they understand all OSHA safety rules.

GOAL 3
Given a blueprint and engineering specifications, graduate will be able to fabricate a weldment that meets the design requirements by appropriately using a combination of layout, machining, welding, and precision measuring skills.
1. Students will produce fabrication, within specified tolerances.
2. Student will safely and appropriately operate machine shop tools to machine components as required.

GOAL 4
The welding specialist will be able to troubleshoot the process and determine if the problem lies with technique, power supply settings or operation, or shielding gas and make or suggest remediation or repairs to correct the process.
1. Student will properly troubleshoot the operation of power supplies and recommend adjustments or repairs.
2. Student will properly troubleshoot the operation of welding apparatus and recommend adjustments or repairs.
Mission, Goals, and Outcomes

WELDING TECHNOLOGY AAS DEGREE
Department: Agricultural & Industrial Technologies

The mission of the Welding Technology Associate’s Degree program is to prepare graduates for employment as a Weld Technician in a manufacturing or construction business. During this full-time two year program the graduate will develop the technical skills to be a competent welder as well as the education to be a contributor to the production team.

GOAL 1
Students display general behavior and attitudes expected of an entry-level production team member by a manufacturing, construction, agricultural or fabrication oriented business.

Upon completion of the degree, the student will be able to:
1. Demonstrate positive attitudes and acceptable behaviors for such things as reporting to work regularly and on time, working in a team, honesty, quality-minded, and no tolerance for waste.
2. Follow all prescribed safety rules including the wearing of personal protection devices, properly using lifting tools to move equipment & supplies, following lockout/tagout procedures, and site specific requirements.
3. Use rulers, gauges, and precision measuring tools to properly identify sizes and locations of part features and sizes of welds.
4. In both written and oral communication, the student will communicate in a formal manner that is expected of supervisors or mid-level managers.

GOAL 2
Graduates will competently perform a full range of specified welding tasks using the MIG, stick, and TIG processes including designing and repairing weldments.

1. Perform welds on various joints in the flat, horizontal, and vertical positions using the SMAW with multiple electrodes.
2. Perform welds on various joints in the flat, horizontal, and vertical positions using the GMAW process with multiple electrodes.
3. Perform welds on various joints in the flat, horizontal, and vertical positions using the GTAW process with multiple electrodes.
4. Troubleshoot system programming, electrical, mechanical, and shielding gas systems and make repairs.
5. Fabricate and/or troubleshoot “good” weldments based on blueprints and technical literature as well as communicate the specifications in terms of tolerances and allowances.

GOAL 3
Graduates will demonstrate safe practices within the manufacturing setting.
1. Practice safe habits in the welding lab.
2. Demonstrate that they understand all OSHA safety rules.

GOAL 4
Given a blueprint and engineering specifications, graduate will be able to design and fabricate a weldment that meets the design requirements by appropriately using a combination of layout, machining, welding, and precision measuring skills.
1. Produce fabrication, within specified tolerances.
2. Safely operate machine shop tools to machine components as required.
3. Produce a weldment design along with workholding requirements and inspection guidelines and devices.

GOAL 5
The welding specialist will be able to troubleshoot the process and determine if the problem lies with technique, power supply settings or operation, or shielding gas and make or suggest remediation or repairs to correct the process.
1. Troubleshoot the operation of power supplies and recommend adjustments or repairs.
2. Troubleshoot the operation of welding apparatus and recommend adjustments or repairs.
3. Compare and select welding processes to optimize the fabrication of assemblies, sub-assemblies, and discrete parts.
4. Analyze automation systems for correct operation and programming of parts from industrial prints.
Student Services

Student Life and Organizations ........................................ 360

Access Services .................................................................. 360
Additional Student Services ............................................. 360

For more information about ICC student life and student services refer to the

ICC Student Handbook.
Student Life and Organizations.
Students have many opportunities for interaction and campus involvement outside of the classroom through a broad range of social, recreational, cultural, and intellectual programs and events. Students are encouraged to stop by Student Leadership and Engagement to explore all that is available. For more information about getting involved on campus and a full listing of student organizations visit the ICC website at icc.edu/studentlife.

Academic Support Services
Academic support is available through the Library, Learning Labs, Math Labs, Studio, or supplemental instruction to ensure academic success. A complete listing of academic support can be found on the ICC website at icc.edu/academics/academic-support/. For information about specific services including contact information, locations, and availability visit the specific support service page. Library = icc.edu/library
Learning Labs = icc.edu/learninglabs
The Studio = thestudio.icc.edu/
Supplemental Instruction = icc.edu/si

Access Services
East Peoria Campus Room L222
(309) 694-5749 (VOICE)
(309) 694-5721 (TTY)
(309) 694-5721 (VRS)

In accordance with the revised Americans with Disabilities Act of 1990, as amended, and Section 504 of the Rehabilitation Act of 1973, the Office for Access Services assists students with disabilities in obtaining reasonable accommodations to access their classes and the campus. ICC offers support services to students with varying disabilities including health, physical, psychological, sensory, learning, and temporary disabilities. Accommodative services and adaptive equipment are available based on individual student needs. Students with disabilities seeking academic accommodations must provide written documentation of their disability from appropriate professionals with recommendations for the types of accommodations needed. The office provides advisement and consultation to students. Further information regarding specific documentation requirements and procedures may be found on the ICC website at icc.edu/access.

Additional Student Services
Additional Information related to various areas of Student Services can be found in more detail in the ICC Student Handbook. The following are various services or areas of the College that may be beneficial to students. Please see the Student Handbook for more information on all of the following services and more:
• Bookstore
• Campus Dining
• Career Services
• Children's Center
• Counseling Services
• Dental Hygiene Clinic
• Housing
• Fitness Center
• Therapeutic Massage Clinic
• Libraries
• Student Employment
• TRiO Student Support Services.
Student Policies and Procedures

The Student Optional Disclosure of Private Mental Health Act .................................................. 362
Policy Statement on Sexual Assault .......................................................... 362
Policy Statement on Domestic or Dating Violence and Stalking ........................................... 362
Sexual Assault Response Team ................................................................. 362
The Student Optional Disclosure of Private Mental Health Act

In accordance with the Illinois law, The Student Optional Disclosure of Private Mental Health Act (IGP 59.1), Illinois Central College will provide students with the option to authorize in writing that a designated person, defined as a parent, guardian, or adult over the age of 18, be contacted by a psychologist, counselor, or other qualified examiner employed by Illinois Central College during a mental health emergency. This is an optional form that students can complete but are not required to complete. Students that are interested in completing the Student Optional Disclosure of Private Mental Health form or updating this form can access it on the Student Services website at http://icc.edu/students/files/ICC-Disclosure-of-Private-Mental-Health-Information.pdf.

Policy Statement on Sexual Assault
(approved by the Board of Trustees November, 2014)

Illinois Central College will not tolerate sexual assault against students, staff, faculty, or visitors. Internal complaints of sexual assaults filed against students will be investigated pursuant to procedures established by the College and appropriate disciplinary action taken as determined by the college judicial system.

In an on-going effort to prevent sexual assaults, and in addition to providing various security measures, the College is committed to making available, through a variety of channels, relevant educational information and programs. It is College policy to comply with all applicable federal and state statutes for reporting and publishing sexual assault statistics.

Policy Statement on Domestic or Dating Violence and Stalking
(approved by the Board of Trustees November, 2014)

Illinois Central College will not tolerate domestic or dating violence and stalking against students, staff, faculty, or visitors. Internal complaints of domestic or dating violence and stalking filed against students will be investigated pursuant to procedures established by the College and appropriate disciplinary action taken as determined by the college judicial system.

In an on-going effort to prevent domestic or dating violence and stalking, and in addition to providing various security measures, the College is committed to making available, through a variety of channels, relevant educational information and programs. It is College policy to comply with all applicable federal and state statutes for reporting and publishing domestic or dating violence and stalking statistics.

These policies are intended to comply with relevant parts of the Crime Awareness and Campus Security Act of 1990, as amended, 20 USC 1092(f), and the implementing federal regulations, 34 CFR 668.47(a)(12). It is also intended to comply with the federal Violence Against Women Reauthorization Act of 2013 as amended. These policy statements and supporting procedures may be amended by the College as necessary to conform to future changes in state and federal law. The full procedures and other relevant information can be found at icc.edu/student-services.

Sexual Assault Response Team (SART)

The Illinois Central College Sexual Assault Response Team (SART) is a team of professional faculty, staff, and community representatives from the Center for Prevention of Abuse that are trained and prepared to assist students who are survivors of an on-campus sexual assault. This team will provide survivors with information and resources in order to assist the student in making informed decisions regarding the sexual assault incident. SART members will also be instrumental in ensuring that Illinois Central College is in compliance with Title IX and the Illinois Law – Preventing Sexual Violence in Higher Education Act. More information on the Sexual Assault Response Team (SART) can be found at icc.edu/SART.

Campus Police ........................................................... 364
Smoke Free/Tobacco Free Campus
Illinois Central College complies with state law that requires college campuses to be smoke free/tobacco free. Smoke free/tobacco free means the use of tobacco or related products (herbal substitutes and e-cigarettes, for example) will not be allowed anywhere on campus, including parking lots. For more information, visit icc.edu/smoke-free-tobacco-free.

Weapons and Firearms Policy
Illinois Central College continues to be committed to providing a safe and secure environment for its employees, students and guests. In accordance with the Board of Trustees’ authority and the 2013 Illinois Firearm Concealed Carry Act, ICC’s Weapons on Campus and Firearm Concealed Carry Policy was adopted on January 16, 2014, to assert the College’s weapons- and firearms-free status at all campus locations and on any sites where ICC programs, activities, and classes are held. This policy applies to all employees, students, persons conducting business, and campus visitors. It prohibits the possession of a weapon or firearm on property owned, leased, or controlled by ICC (including parking areas, sidewalks, and common areas), even if that person has a valid federal or state license to possess a weapon or firearm. “Weapons and firearms” includes, but is not limited to, loaded or unloaded handguns, any device which shoots a bullet, pellet, flare, or any other projectile, knives or any explosive device.

Exceptions to the policy: 1) Students carrying a weapon or firearm used in connection with a weapons safety course approved and authorized by ICC; 2) Law enforcement officers (including off-duty and retired officers) carrying a weapon as a condition of their employment and who have maintained proper training and licensing for possession of a weapon; and 3) Concealed carry licensees transporting a firearm into an unrestricted parking area within a vehicle if the firearm and its ammunition remain locked in a case out of plain view within the parked vehicle.

Violations of this policy may result in possible arrest or prosecution. For complete details of ICC’s Weapons on Campus and Firearm Concealed Carry Policy, including definitions of prohibited devices and exceptions, visit icc.edu/around-campus/campus-police/policies.

Emergency Procedures
IN CASE OF EMERGENCY
1. Immediately notify Campus Police by calling (309) 694-5111 (5111 from on-campus location).
2. Identify yourself and give the extension number from which you are calling.
4. In the case of an accident where a person is injured, after notifying Campus Police, remain with the victim and make the person as comfortable as possible.

In the case of fire there will be an alert tone followed by verbal instruction and flashing strobe lights indicating a fire emergency requiring you to immediately evacuate the building until given further instructions.

If a tornado is sighted near the campus, there will be an alert tone followed by verbal instructions or a continuous steady blast of the Civil Defense Siren. Seek shelter in the nearest location until given an all clear.

Campus Police have the responsibility to notify proper personnel. Upon arriving at the scene, Campus Police will take charge. For further information regarding emergencies, evacuation procedures, and violent active shooter situations, see the Student Handbook or visit the Campus Police Emergency Response Guide online at http://icc.edu/emergency-guide/.

Emergency Alert
ICC’s MyAlert provides free emergency and other notifications through emails, text messages, and voice messaging. You always will receive these at your official ICC email. Please make sure you regularly check your ICC student email. If you listed a landline or cell phone in your eServices account, the system automatically calls those numbers for emergency notification. If you have texting capabilities, you will also receive a text message. If you don’t want to receive text messages, you need to turn off that function in your MyAlert account. For more information about changing your preferences and to find out more about the MyAlert system visit the Student Technology website at icc.edu/students/student-technology/student-technology-enrolled-students/.

Campus Police
East Peoria Campus Academic Building 103A
(309) 694-5223

ICC Peoria Arbor Hall A02L
(309) 690-6899

ICC Pekin Main Office
(309) 635-8804

The primary function of the Campus Police Department is to protect life and property in all situations and preserve peace within the established limits of the College community. Sworn Campus Police Officers are armed and have the same responsibility and authority as county and municipal police officers, including the power to make arrests and issue citations.

The Campus Police Department is available 24 hours a day, 7 days a week to provide its services, for a list of services visit the Campus Police website at icc.edu/campuspolice.

Explanation of Terms

Academic Advisor – faculty member or counselor assigned to help students select courses and plan their educational programs.

Associate Degree – awarded to a student who has completed at least 60 semester hours in a particular field of study as outlined in the college catalog.

Auditing – enrolling for and attending class(es) regularly without having to take tests. No grade or credit hours are earned.

Baccalaureate Degree – awarded after completion of required semester hours, usually four years of full-time academic study. Usually referred to as bachelor's degree.

Certificate – awarded to students who complete requirements for a specific program of more than one course as listed in the College Catalog, but less than 50 semester hours.

Certificate of Participation – awarded for completion of single course programs such as “Stress Management” offered by our Professional Development Institute.

Class Schedule – available online, listing fall, spring, and summer semesters’ courses offered, time of day, day of week, location, cost, refund dates, withdrawal dates, and instructor.

Community education – noncredit classes and workshops that are designed to provide training in areas of interest for the general public. Includes Adult Community Programs, College for Kids, and ACT/SAT review.

Compass – a computer-adaptive college placement test published by ACT, Inc. and used by ICC’s Testing Center for determining course placement.

Credit by Examination – course credit granted upon successful completion of a standardized test such as CLEP (College Level Examination Program) or PEP (Proficiency Exam Program).

Credit Hour – a unit of credit awarded for completion of a course. Typically it is expected that a course will meet for 45 hours of combined classroom/laboratory and study time for each semester hour.

Curriculum – a group of courses making up an area of specialization.

Dean/Associate Dean – person responsible for the administration of an academic department or academic support department.

Department – an administrative unit of an academics division, giving instruction in a particular subject or group of subjects, such as Social Sciences Department.

District 514 – Illinois Central College District official designation for ICC.

Diversity pledge – statement of ICC’s commitment to diversity in all its dimensions.

Dropping a Course – If you’re signed up for a course or are actually taking the course, and no longer want to take the course, you cannot just stop coming to class. You must fill out the correct Add/Drop Form in Enrollment Services or drop in eServices online. Be sure to check Class Schedule for details and deadlines.

Elective – course student may take not specifically required in a major, but counts as general credit toward a degree.

Full-time Student – student enrolled for 12 or more semester hours.

Grade Points – the number of points assigned to the specific letter grade received in a class.

Grade Point Average – total number of grade points earned divided by the total number of semester hours attempted.

HYBRID classes – courses delivered through a combination of face-to-face instruction and the internet. Time required in the classroom is reduced but not eliminated.

IAI (Illinois Articulation Initiative) – a statewide transfer program consisting of a package of core general education courses that will transfer from one school to another and will count towards a degree at the new school. Successful completion of these core courses, composed of five categories can mean a smoother transition to any associate or bachelor's degree program at participating schools.

Lab – portion of course work conducted in a laboratory setting. Usually hands-on work such as physics experiments or computer use.

Lecture – classroom instruction, not a lab.

Minimester – a typical 16-week credit class accelerated to be completed in approximately 11 days by attending class approximately 6 hours each day.

Noncredit Classes – courses do not require exams and do not earn college credit.

Off-campus Classes – courses taught at locations other than our East Peoria or Peoria Campuses, such as classes held at area high schools or agencies.

On-campus Classes – classes taught at any of our ICC campuses.

Online classes – classes delivered entirely online through the internet.

Open-Door Policy – any person 18 years of age or older may enroll as a part-time student for credit classes (if class does not require a pre-requisite) at Illinois Central College even if they do not have a high school diploma or GED certificate But, to enroll for classes with the goal of earning an Associate Degree, specific entrance requirements must be met.

Prerequisite – course that must be completed before another course can be taken, such as MATH 134 must be completed prior to MATH 135.

Semester – usually 16 weeks at Illinois Central College; one-half of the academic year. Note: Summer sessions are usually 8 weeks long.

Transcript – copy of a student’s academic record. Can be obtained from Enrollment Services, East Peoria Campus, Room L211.

Tuition – cost of one semester hour multiplied by the number of semester hours in which enrolled. ($143 x 3 semester hours = $429 tuition for the average course)

WEB classes (www) – refer to online classes.
